3. Contacting the wire services regarding the cabling of the Safety Award report to South America.

4. Conferring with the Safety Council for the preparation and distribution of a special story on the award.

5. The notification of the general press with respect to the award to Pan American-Grace Airways.

6. Arrangement for the taking of photographs showing Mr. Roig receiving the award and the distribution of these photographs by air-mail to the general press and to Pan American-Grace press office in Lima.

d. Conferred with wire services to prevent publication in the United States of erroneous report re-

ceived from Peru confusing Fawcett and Pan American-Grace Airways.

e. Arranged meetings, entertainment and trips for visiting Chilean journalists.

f. Wrote and prepared special distribution from Washington, D. C., of a news story to feature new Pan American-Grace Airways services as feature of Pan-American Day.

h. Conferred with Farrar & Rinehart, Publishers, in behalf of securing proper credit and representation for Pan American-Grace Airways in connection with their Pan America "good-will" prize novel plan.

i. Initiated with officials of the wire services, consideration of establishment of additional South American news bureaus or improvement in personnel of bureaus already established, looking toward transmission of news material of interest to the company to have published in the United States.

j. Conferred with motion picture producers relative to the re-editing and reforming of the Pan-American-Grace promotional film and the editing of the script required by these changes.

k. Conferred with various authors projecting trips to South America on behalf of their specialization on West Coast of South America and for their inclusion of material of value and benefit to Pan American-Grace Airways.

l. Prepared general story on Panagra plans and activities for general distribution through the Senor Letters to the press and publishers.

[fol. 3417]

m. Made outline for, wrote final draft, and directed distribution of:

1. Travel story on West Coast hotel facilities.

2. "Trade" report on current traffic trends.

3. Progress report in terms of new routes, etc.

n. Interviewed Pan American-Grace Representative from Lima for press material on traffic, competition, special details of service.

o. Enlisted support of press protecting Pan American-Grace Airways' interest on calls for giving up airline equipment for Britain.

p. Conferred frequently with reporters, wire service editors and special writers on directing or controling news reports concerning developments in (a) Ecuador (b) Bolivia.

(c) Peru, at time of grounding Lufthansa.

q. Several conferences with publishers toward publication and distribution for air travel guide book for Pan American-Grace Airways territory.

r. Several conferences outlining detailed assignment for author to secure material for guide books and assemble, write and distribute releases of press stories on trip over the Pan American-Grace Airways lines.

s. Interviews with candidates for position of press officer for Pan American-Grace Airways in New York. Also conferred with Pan American officials, in New York and Miami, relative to the transfer of a Pan American employee to this office to act for Pan American-Grace Airways.

Designed three separate programs to secure necessary detailed information for Pan American-Grace Airways and for its passengers distribution, in publishable form, to the U. S. press and other informational channels. These programs have covered definite courses of action for the individual assigned to Pan American-Grace Airways work and have outlined, in terms of specific assignments, material required and how it is to be prepared and distributed. A supplementary program was analyzed for the distribution of applicable information through airline informational outlets served by the Pan American Airways offices in the field.

[fol. 3418] In addition to those and other specific items of work, the writer has conferred almost daily with Mr. Righi, temporarily assigned to the task of securing specific information from Pan American-Grace Airways upon which the public relations and publicity work is absolutely dependent.

This involves my detailed outline of specific information required, the draft of specific stories to be developed, the specific distribution to be made. In those cases where such information is received, the writer has personally made the final drafts of the articles for publication and has personally supervised the distribution of these releases.

This process involves not only the original assignment but analysis of Mr. Righi's report and re-assignment of his effort to other Pan American-Grace activities.

. . . . .

[fol. 3419]

WORK PERFORMED FOR PAN AMERICAN-GRACE AIRWAYS

1. DEPARTMENT: Public Relations
2. NAME OF EMPLOYEE: Arrigo Righi
3. POSITION: Public Relations Representative
4. WHERE EMPLOYED: New York
5.
6. Memorandum of work done under Panagra assignment —May 12 to July 1, 1941, for which period a detailed report was required:

May 12	—Meeting with Mr. De Groot to obtain material for a West Coast hotel story.
May 13	—Preliminary draft submitted. Preliminary contacts for distribution.
May 14	—Redrafting of story on basis of Mr. De Groot's corrections.

May 15 —Obtained pictures and story of arrival Peruvian Ambassador in London. Doctor Benavides. Air mailed this material to Panagra, Lima.

May 16-20—As instructed, made direct presentation of West Coast hotel story through personal call and telephone to the following:

"Travel"
"Hotel Bulletin"
"Travel Agent"
"World Telegram"
"Chicago Daily News"

May 20 —First drafted special travel story for N. Y. Herald-Tribune. Mr. Dunlap, Travel Editor for this newspaper, wanted to make it into a general Latin American story. Following up your conversation with him, he agreed to confine the story to Panagra. This story was prepared and appeared on Sunday, June 1st.

May 23 —Interviewed Mr. De Groot to secure material for "New Horizons."

May 26 —Requested biographical story on President Roig of Panagra.

[fol. 3420]

May 27-29—Obtained a clearance for this story and called on Grace & Co. to obtain details.

June 2 —Contacted Captain Harris, on Panagra's Bolivian development. Prepared tentative text for possible release.

June 3 —Contacted Panagra for further details re: Roig sketch.

June 4 —Continued efforts to obtain detailed material Bolivian story. Held conversations with U. P. and other press agencies, holding them off pending clearance.

June 5 —Interviewed George Smith from B. A. to obtain "personal" material for Panagra sports story. Also for "New Horizons." Tentatively drafted skiing story in this connection. Wrote piece "Motoring on West Coast" for "New York Motorists."

June 6 —Prepared special story for "New Horizons" to appear in June number with illustrations.

June 10-14—Prepared various short items "New Horizons" Mannix picture, etc.

June 17 —Held long conversation Captain Harris and collected statistical material, partly from Mr. De Groot, for Washington news services.

June 18 —Obtained Panagra list for distribution President Trippe's lecture.

June 19 —Assembled statistical material for general "Development" story based on Panagra's first quarter operations.

June 23-25—Drafted preliminary biographical story for "Atlanta Journal" on James W. Spratlin, Panagra Communications Superintendent.

June 26 —Discussed with Captain Harris details American Aviation Daily report on Bolivian developments. With Mr. De Groot planned story on new Quito hotel facilities.

June 27 —Obtained statistics for American Auto Association, Washington, D. C. Having collected data from Mr. De Groot, began drafting release on third quarter Panagra operations.

June 30 —Personally followed through on distribution of the two resulting press releases —Progress and Trade Trends.

Letter No. 1104

SUBJECT INTERLINE AGREEMENT

Lima, September 26th 1941

Pan American Airways, Inc.
NEW YORK

Attention: Mr. R. C. Lounsbury

For your information Grace Line offices on the west coast for some reason are not permitted to endorse the unused value of tickets to Panagra as outlined in Bulletin #720, page two last paragraph. It appears that the reason for this is that Grace Line offices are not allowed to make refunds without first consulting the issuing office.

Will you please take this matter up with Grace Line and endeavour to have this matter clarified as we feel that both carriers should authorize their offices to endorse the value of tickets over to each other.

I might add, that both Grace Line and Panagra have been given a black eye more than once by passengers when after deciding to change their reservations they have found out that Grace Line will not endorse their tickets to Panagra.

NEW YORK COPY

TRAFFIC

Lima, December 19, 1941

PANAGRA
NEW YORK.

Attention: Mr. H. J. Ruiz

Your P 485.

We have been working on the report requested in your letter No. 241 and will endeavor to forward same to you by next Wednesday's plane, but please appreciate the fact, in order to give you the information which you desire, we must carefully study thousands of reservation messages.

I fully realize the importance of promptly sending you accurate information, but to do so means putting both Ribeyro and Jones full time on this job. This was not possible until recently as both men were out on the line including myself. We are, however, now working hard on this job.

I am of the opinion we can furnish you with some very valuable information based upon events dating from December 7th of this year. In fact, it is quite possible we will be able to prove our point by preparing a supplementary report for the period December 7th to date, but I feel it may be a hard job to do that based on the six month's report.

I make this statement without having yet completed the report you asked for, therefore, I may be wrong in my above calculation. If, however, you will read over my letter P-5269 of March 1st., 1941 on this same subject you will see that even early in the year our line was saturated and we could neither receive from or give to Panair much more business.

Before closing, I note your report on southbound traffic was based wholly upon passengers carried and refused. I might mention, mail and express loads are responsible to a very large extent for reduced number of seats available over our bottle neck and so I think this should be born in mind when studying any question concerning the use of payload and amount of payload available for passengers.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 371

FIFTH TRIP

NEW YORK,
January 29, 1942.

Pan American-Grace Airways, Inc.,
South American General Offices,
LIMA.

Attention: Mr. T. J. Kirkland

With further reference to my 795 P of January 22nd, on the subject of the Fifth Trip, attached herewith please

find copy of the letter I have written Mr. Grayson which is self-explanatory.

You will note that the attached schedule does not show all of the Panagra operations. Mr. Grayson has a form similar to the one shown herein which he utilizes for simplicity in his own office in order to avoid the additional complication of showing all the voluntary operations. Consequently this schedule was drawn up in the form desired by him rather than in the form we require for our own operating information.

Panair are still struggling with the Post Office to secure authorization for their fourth trip with the 307 between Miami and Balboa. They now anticipate that this change will occur in any event not later than February 14th, and probably February 7th. Mr. Grayson has told me that he believes that he will be able to give us clearance on our proposed fifth trip operation, even if Panair do not institute their additional Boeing operations, since he realizes the advantages to the public probably outweigh the disadvantages to the Post Office in the one day delay of mail delivery from the United States to La Paz and the other Diagonal points as far as Cordoba, if no additional direct service to and from the United States is furnished by Pan American. Consequently it is in order for you to proceed with your plans to make the schedule changes we have discussed and we will cable you as soon as we, ourselves, have definite clearance from Washington, in order that you may institute suitable publicity in all countries with regard to the additional services and the schedule changes.

/s/ H. R. Harris

[Stamp—Received by Air Mail—Oct 6 1942—American-Grace Airways, Inc.]

Messrs
South American General Office,
LIMA—PERU

Attention Mr. J. H. Nelowet
South American Comptroller.

Dear Sirs,

PANAGRA FINANCIAL CONTROL.

We are in receipt of your letter Private 14 of 5th September, on the above named subject in which you refer to a conversation you had with Mr Vidal, and from which you mention that during Mr Simon's recent visit to New York, he had discussed with Mr Vidal the advisability of having Mr Jorge Raby assigned as Financial Controller over all commitments and expenditures of the Panagra in Chile, and the best means by which Mr Raby would be in a position to exercise this control in due form.

There is no doubt that Mr Raby would be a very adequate and competent person to take charge of these functions, but on this matter there must have been a slight misunderstanding on the conversation which Mr. Vidal had with Mr. Simon.

Mr Simon informs us that he discussed only in general with Mr Vidal on the advisability of having some responsible party connected with our agency in Santiago, assigned to control Panagra expenditures throughout all Chile, and that he agreed with this general idea. On these lines we also received a letter from Mr Vidal, dated 10th July, which we enclose in copy for your information.

In answer to Mr Vidal's letter and in accordance with Mr Simon's conversation above referred to, we gave Mr

Guillermo Smith, Accountant of Panagra in our Santiago Agency, whose general competence you know as he has worked in Lima some time, special authority to control all expenses, and to report on same directly to the General Management to whom in the future he would be directly responsible. Mr Smith's salary was raised on taking over these new functions, and an assistant has been named, to help in his ordinary duties as accountant.

We enclose a copy of the memorandum dated 27th August, addressed to Mr Guillermo Smith informing him of his new appointment, and of the manner in which we understand this should be carried out.

Any doubt which might be encountered by Mr Smith in the carrying out of his duties, would be consulted with Mr Raby in his capacity as Assistant Controller of the Company, but it is absolutely impossible for Mr Raby to take over this post.

The efficient control of Panagra in the manner outlined in your letter No 14, is a full time job and Mr Raby's time is dedicated to the financial control of all Grace & Cia. (Chile) S.A., activities in Chile, as well as to the study [fol. 3427] of new tax laws, preparation of tax returns, dividend estimates, bi-yearly audit reports of all factories and agencies, general exchange and currency position, etc. This enumeration by itself forecloses any possibility of adding more work to Mr Raby. Apart from the above mentioned duties, he has to travel all over the country in connection with his work.

The volume of detailed accountancy work done by the Santiago office for Panagra Lima, is enormous and very specialized, as it has to follow certain pre-determined formulae and plans laid out by the Lima office. We feel, therefore, that to be able to understand and control such an accountancy, it must be handled by a man thoroughly conversant with Panagra work, besides which various Panagra Departments usually receive instructions directly from their respective department heads in Lima, and frequently act on same without consulting the Agency.

Similarly the maintenance, communication and publicity departments issue instructions directly to their corresponding department heads in Santiago, Antofagasta, Arica, regarding purchases, personnel and other routine matters. It is because of this that we feel that Panagra should have their Controller, duly assisted who would act as a coordinator between the various Panagra Departments in Lima and the local Agency.

We feel that Smith is a first class employee and is thoroughly familiar with Panagra accounts and other routine matters. He may not as yet have the status that Lima and New York seem to desire for this job, but as far as our present personnel disponibilities in Santiago allow us, we feel that it is the best approach to the solution desired by New York and yourselves.

We would very much appreciate your comments on this subject.

Yours very truly,

p.p. Grace & Cia. (Chile) S. A.

PRIVATE

NEW YORK COPY

PAN AMERICAN-GRACE AIRWAYS INC.
SOUTH AMERICAN GENERAL OFFICE
LIMA, PERÚ

OFFICE SPACE ANTOFAGASTA

LIMA, December 15th, 1942.

Grace & Cia., (Chile)
Agents for Panagra,
SANTIAGO.

Att: C. M. Pereira.

As you know the present office site in Antofagasta is not quite satisfactory for the reason that the Panagra section is located practically on the docks and actually in a warehouse. When I was in Antofagasta the other day, I spoke to your Manager about the possibility of moving the Panagra section to the International Machinery Company and it developed that Mr. Berger and I spoke with the Manager of IMACO and all concerned endorsed the idea.

It was pointed out by Mr. Berger that he was pressed for space in his present office and for that reason and also because of the better location provided by International, he was in favour of transfering Panagra section into the above new quarters. The Manager of the International also favoured the idea because they now have space which is not being occupied and from a business angle it would also be advantageous because Panagra customers who are also customers of IMACO would be directed to the same building where their name is prominently on display. In other words, it would be a good advertisement for them

Mr. Berger will be writing you on the above subject and Mr. Salsilli upon his return to Santiago will take this matter up with you in further detail. We have already drawn floor plans as per copy attached, and I would greatly appreciate if you would give this matter your consideration.

One advantage of the plan of course is that the Panagra section would not be located outside of the Grace organization which conforms strictly to the Grace policy laid down by New York and of course the advantages of having an attractive sales office are fairly obvious.

/s/ J. E. MUHLFELD

(Original misplaced)

January 27, 1943

MEMORANDUM TO Mr. O. G. Balz

TRIP TO SOUTH AMERICA

You are proceeding to South America, leaving here on or about February 1, for the express purpose of assisting the Lima organization in connection with the following problems:

1. New system of accounts becoming effective as of January 1, 1943.

2. 1943 budget and its effect upon our net earnings for the year 1943.

3. Placing on Panagra payroll of such agency personnel as are handling exclusively Panagra work, retroactive to January 1, 1943.

4. Audit of agency expenses at Lima (including Sago expenses) and points south, the territory north of Lima having been covered in your last trip.

5. Prompt settlement of insurance claims in connection with last week's accident in Peru.

6. Miscellaneous.

Herewith is a brief summary of my views:

New system of accounts

Every attempt should be made to have the 1942 audit by Price Waterhouse and the final closing of the Lima books completed at the earliest possible moment bearing in mind that, for tax purposes here, we must have by March 15 a fairly accurate idea of what our net earnings for the year 1942 have been.

So far as the 1943 monthly accounts are concerned, under the new system established by the CAB every at- [fol. 3430] tempt should be made to dispatch January not later than March 15, and subsequent months at 20-day intervals until the accounts are on schedule. In this connection it is important that complete accruals be made at the end of each month starting with January, as otherwise the Lima figures are likely to prove misleading.

1943 budget

We expect to hear shortly from Mr. Kirkland by cable as to the monthly total of the proposed 1943 budget, including depreciation and obsolescence reserves. Due to pressure of other urgent matters the budget itself has not come forward, and it is expected that it will be mailed from Lima during the early part of February. You should discuss thoroughly with Mr. Kirkland the relationship between the local budget and the company's earnings as shown by the New York books, and render all possible assistance in connection with this important problem.

Airways personnel

For your information, the instructions going forward from Grace headquarters in New York to the various agencies along the West Coast are as follows:

"1943 It is the intention to transfer to the Panagra payroll the salaries of the Grace employees devoting 100% of their time to Panagra work whether in connection with plane calls or otherwise, although the individuals in question remain under the general direction and supervision of Grace. This is subject, of course, to Panagra's confirmation that the full time employment of such personnel is necessary. A Panagra representative, probably Mr. Batz, will leave shortly on a trip over the line during which he will take up with the Grace agents direct the details of this transfer which will give all concerned an opportunity to work out any special problems presented by the plan to complete mutual satisfaction."

It will be necessary for you to stop long enough at each [fol. 3431] agency to determine what employees devote 100% of their time to Panagra work and to form an opinion as to whether all such employees appear necessary. When there is any doubt as to whether an employee devotes 100% of his time to Panagra work, such employee is not eligible to be transferred to the Panagra payroll. You should be in constant touch with Mr. Kirkland and the Sago organization in connection with the foregoing and complete arrangements at the earliest possible moment to place the personnel involved on the Panagra payroll retroactive to January 1, 1943.

The following questions may be expected to arise:

(a) liability under social laws

(b) earned vacations

(c) traveling expenses

(d) life insurance

It has been agreed here that Panagra will not take over any liability of any consequence. In other words, Grace's liability to employees in connection with years of service is to be paid over to Panagra, except in countries where payments are currently made into Government banks. Grace will grant or otherwise liquidate earned vacations.

Any travel expenses due foreign employees will be the subject of a special study by you. Premiums on life insurance policies issued under the law will be paid by Panagra as they fall due after January 1, 1943.

Group insurance should be offered without delay to all employees taken over by Panagra.

Audit of agency expenses

Unless the agency expenses south of Lima have been audited on the spot by someone connected with the Sago organization before you are ready to start on such a trip, it appears desirable that you take over this work in order to relieve the congestion at Sago headquarters. The audit [fol. 3432] of the Lima expenses, including Sago, should be conducted by you in any event. As customary, a written report addressed to Mr. Kirkland with copies to all concerned will be required from each point and it should be written before leaving the agency involved.

Insurance settlements

We are particularly anxious that Group Insurance payments and other liquidations in connection with the company employees who lost their lives last week be handled as expeditiously as possible. The New York underwriters are prepared to effect payment as soon as all required information is received from Lima both as to Group Insurance and Voluntary compensation coverage. We have cabled Lima today in this connection.

With respect to claims resulting from the death of passengers, these cannot be settled as rapidly, but an attempt should be made to avoid unnecessary delays.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 375

bcc: Mr. Trippe
Mr. Friendly

February 21, 1946

Mr. Harold J. Roig, President
Pan American Grace Airways, Inc.
135 East 42nd Street
New York, New York

Dear Harold:

We have discussed the matter of your proposed operation of the two Pan American Grace Constellations with Mr. Shannon and Mr Vidal on the basis of Mr. Shannon's memorandum to me of February 16th. This matter was referred to our Executive Committee meeting on February 19th. The Committee felt that the operation as outlined would result in excessive cost to Pan American Grace as well as providing uneconomical utilization of this equipment.

I have been requested by the Committee to submit to you a plan whereby Pan American Airways, Inc. would be willing to contribute two Constellation aircraft to a pool to be formed with Pan American Grace's two Constellation aircraft making a total of four aircraft of this type. With this fleet, an efficient operation could be conducted from the Miami base serving both the East and West coasts of South America by providing a daily service from Miami to Lima and a three times weekly service from Miami to Rio. This would result in a utilization of a little over nine hours per day per unit which could be still further improved, as for example, through a second daily service between Miami and Balboa, if warranted, or a daily Miami-Barranquilla trip. In support of our plan, I attach a memorandum outlining in detail the economic disadvantages of the proposal submitted in Mr. Shannon's memorandum and justifying in every respect our suggestion that a pool of equipment be formed to increase the utilization of the equipment to a satisfactory point, where the cost per mile will

be comparable to that which we expect to obtain in our Constellation operations elsewhere.

I need hardly elaborate on the point that a through service from Miami to Lima, such as would be provided by the proposed equipment interchange, would be highly desirable from the standpoint of the traveling and shipping public.

We are confident that our proposal is entirely practical and in the interest of Pan American Grace Airways, as well as the public interest. If you will kindly advise me that you concur in principle, I shall immediately take the necessary steps to coordinate this program, and put it into effect at the earliest possible moment.

Very truly yours,

Braniff Airways, Inc.
Mr. Chas. E. Beard, Vice President
Love Field
Dallas 9, Texas

Dear Mr. Beard:

This will acknowledge receipt of your letter of August 30th requesting certain airport and route facilities operated by Pan American Airways and its affiliated companies for a survey flight which is scheduled to depart Brownsville September 1st enroute to Rio de Janeiro, via Balboa, Bogota, Quito, and Lima. This is to advise that Pan Amer

ican Airways will agree to furnish the necessary airport facilities over your certificated route at those station operated by Pan American. With respect to the affiliated companies, I will endeavor to immediately communicate with them with respect to making the airport facilities under their jurisdiction available for this first survey flight, and will advise you of their decision.

The services to be rendered at the airports operated by Pan American Airways or its affiliates, Avianca and Panair do Brasil, subject to approval in the case of the latter two companies, will include ramp facilities, refueling (where available by PAA or its affiliates), communications (including flight guard, position reports, arrival and departure messages, and the use of navigational aids along the route) and meteorology facilities, including terminal weather and route forecasts.

The only airports in the above itinerary where the facilities are actually available by PAA are Brownsville and Balboa, as the balance are under the jurisdiction of the affiliated companies. With respect to the airports operated by Panagra, it is suggested that you address a letter directly to that company, in care of their New York Office, which I will agree to transmit directly to them for their decision, in order to expedite the matter.

It is understood that, upon your return from this first survey flight you will initiate negotiations with this office as to the specific ground services which are to be rendered Braniff Airways at the airports operated by Pan American, and the rates to be charged, beginning with Braniff's first familiarization and training flight. The rates for this first survey flight will be determined in accordance with PAA's scheduled charges established for itinerant aircraft at those points which are controlled by Pan American.

Very truly yours

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 377

July 8, 1954

Mr. Andrew B. Shea, President
Pan American-Grace Airways, Inc.
7 Hanover Square
New York, New York

Dear Andy:

Those handling our current contract forward negotiations with the pilots have given me a copy of the National pilots' agreement which covers the reciprocal arrangement between them and Capital. I know you will be interested in looking this over.

As I mentioned, we are planning to put in the through flight between L.A. and Brazil about September 1. Traffic estimates relating to a similar through flight to the West Coast look equally attractive, and I am hoping we could start the through California West Coast service at the same time.

Our people feel that the pilot problem which we discussed can be met only through some sort of equitable reciprocal service. Also, only by a through California West Coast service can we hope to compete effectively with Canadian Pacific and the other through foreign flag services which are already planned and which will tap not only U. S. and Canadian West Coast traffic, but through Orient traffic as well.

The problem you raised of having a chartered Pan American aircraft on the West Coast I am sure you will agree is a minor one. In recent years, nearly all American flag airlines have concluded charter arrangements permitting them

flight service. The public is educated to seeing aircraft of one carrier flying over routes of another carrier. The CAB also seems sympathetic to such arrangements which provide improved service to the public.

Sincerely,

JTT:ke

PAN AMERICAN WORLD AIRWAYS, INC., EXHIBIT 378

July 21, 1954

MEMO TO FILES

SUBJECT: LOS ANGELES WEST COAST THROUGH FLIGHT

Mr. Trippe is telephoning Mr. Shea today, accepting Mr. Shea's compromise offer in connection with the through flight from Los Angeles to points on Panagra's routes.

This compromise was to the effect that PAG would join in the operation of the flight providing PAA would reimburse PAG for any losses incurred after a 90-day introductory period. This arrangement would continue for a period of one year from the date on which the service is inaugurated.

Our initial offer contemplated our underwriting any losses on southbound flights only, where we would be primarily responsible for traffic development. Mr. Shea was concerned whether the Orient traffic which would use the through flight was not largely southbound immigrant traffic, and whether this would leave the northbound Panagra through flight traffic levels below the southbound. To eliminate this contingency we are underwriting the through flight in both directions for Panagra, as stipulated by Mr. Shea.

As a result of our recent meetings with Mr. Lawder, the initially agreed cost of this through flight over PAG's route would be $2.27 per mile. Under Mr. Shea's compromise offer, revenues above this figure, if any, would accrue to PAA

in consideration of our underwriting any revenue deficiencies below the same figure.

This arrangement will provide the through flight service from Los Angeles to points on Panagra's routes, which have been advocated by Exec. Vice Pres. Morrison, Vice Pres. Lipscomb and Exec. Vice Pres. Young as necessary for competitive reasons, with particular reference to existing and potential foreign-flag operators.

This through flight from Los Angeles to points on Panagra's routes will be conducted with PAA aircraft and PAA operating crews. Also, the future use of Panagra crews between the Canal Zone and the Continental United States will not exceed the present schedules and, furthermore, Panagra's requirements for 4-engine flight crew time in excess of that required by present Panagra schedules with 4-engine aircraft will be operated by PAA flight crews operating between Miami and Lima, until reasonable reciprocity is achieved.

[fol. 3437] The detailed time table for this through flight is being worked out by LAD Miami and will be supplied to the Head Office and PAD in the usual manner. Likewise, the opinions and recommendations of PAG officials will be obtained in Miami and New York.

This through flight is to be inaugurated during September 1954, the exact date to be fixed in consultation with PAG management.

All necessary preparations for the service, including advertising and promotional programs and material, will now be initiated.

Mr. Andrew B. Shea, President,
Pan American-Grace Airways, Inc.
7 Hanover Square,
New York, N. Y.

Dear Andy:

In accordance with your talk with Juan, I am enclosing drafts of the papers.

I have also sent to Ken Lawder a copy of the draft of the interchange agreement but not of the two other papers. I would be glad, of course, to send him the others if you so desire.

Sincerely,

Henry J. Friendly,
Vice President and General Counsel.

MEMORANDUM TO
MR. DOUGLAS CAMPBELL

Referring to your letter of August 18th I have the following comments:

(1) Before we get into the detailed proposal it must of course be understood that the Los Angeles Interchange will not be signed unless and until the pilot thru-flight controversy is settled as the Interchange was initially proposed as one means of arriving at such settlement.

(2) Refefring to the last paragraph quoted on page 1 I do not agree and we must insist on our draft as quoted on page 1, otherwise we would be involved in interminable arguments before adding additional flights

and our associates should be willing to rely on our judgment.

(3) I agree to Clause 15 as quoted on page 2 including the additional paragraph as inserted by you.

(4) I do not agree on proposal 1 on page 3 as there is no relation between the Los Angeles agreement and the Miami-Balboa agreement and there is no reason why any provisions that we consider desirable in the Los Angeles agreement should require corresponding modification in the Miami agreement. The only changes in the Miami agreement which we are prepared to accept are those contemplated in Supplement 17 as drafted by us.

(5) I do not agree to Proposal 2 on page 3 because the measure of the quality of service rendered by other carriers would be the standard of other U. S. Flag carriers and the measure should be our own standards or those of PAA as provided in your draft clause on page 2. I consider our standard, and I am sure that PAA considers theirs, as higher than those of "other U. S. Flag carriers operating outside the continental limits of the United States."

Referring to Erwin's suggestion, we do not wish to consider any further sale of DC-6 equipment now but we will be glad to provide aircraft for the Los Angeles Interchange if Pan American is unable to do so.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 382

(Copy of letter to Mr. A. B. Shea)

EXHIBIT 382

August 18, 1954

Dear Andy:

Leslie asked Lawder and myself to meet with him this noon to iron out the differences of view on two paragraphs in the proposed Los Angeles interchange agreement, and after considerable discussion of them I told him I would have to clear any changes with you.

1. Extension to Buenos Aires. Our draft reads:

> "The through flight will terminate initially at Lima, Peru, but shall be extended to Buenos Aires, Argentina, as soon as and for such period as Panagra determines such extension to be commercially and otherwise justified."

In previous discussions during the last week or so they have taken the position that an additional phrase be added reading:

> "it being understood that the through flight shall be extended to Buenos Aires before Panagra adds any other flights to Buenos Aires."

I have objected to that on the ground that, as a matter of principle, we should not make a commitment which would

bind us to take certain action at some unspecified future date, possibly under conditions which we cannot now foresee. Today they proposed some further additional words so that the entire sentence would read as follows:

"The through flight will terminate initially at Lima, Peru, but shall be extended to Buenos Aires, Argentina as soon as and for such period as Panagra determines such extension to be commercially and otherwise justified, it being understood that the through flight shall be extended to Buenos Aires before Panagra adds any other flight to Buenos Aires unless economic considerations dictate otherwise."

[fol. 3442]

2. Clause 15 covering the term of the agreement is proposed by PAA as follows:

"15. *Term*—(a) This agreement shall become effective as of the date of execution hereof, and shall continue in effect for a period of one (1) year thereafter and until terminated by either party upon three months' written notice given not earlier than nine months after the date of execution hereof; provided, however, that such notice may be given only in case experience over the immediately preceding six-months' period shall have demonstrated that the revenue produced on the through flight for the party giving the notice shall have been inadequate in relation to the added cost to such party of operating such flight. The respective presidents of the parties and their successors in office are hereby irrevocably authorized to give such notice in accordance with this agreement.

(b) This agreement shall be cancelled if the Civil Aeronautics Board should enter an order disapproving the same and such order should become final."

We tentatively agreed to these two paragraphs last week, but in our draft inserted an additional paragraph reading as follows:

"(b) If at any time subsequent to December 31, 1954 either party shall consider that this agreement is not

satisfactory because of failure by the other party promptly and adequately to perform any of its obligations under this agreement in such manner as to promote the fullest development of through traffic between points on the respective parties' certificated routes within the spirit and intent of this agreement; or, because either party shall be of the opinion that the services performed for it by the other are not consistent with its established standards in any particular which for a substantial period of time unreasonably interfers with the efficient conduct of or the quality of service on the through flights over its routes, the complaining party may give notice to the other, stating the respect in which it considers the other party's performance to be unsatisfactory. Thereupon, the parties will negotiate in an endeavor to see whether the views of the complaining part can be met. If such negotiations shall not succeed within thirty days reference shall be had to arbitration as provided in paragraph 16(g) to determine whether the complaining party's dissatisfaction is reasonable and if so what measures should be taken to meet its views. If such arbitration determines that the complaining party's dissatisfaction is reasonable, the other party shall be bound to take the action recommended by the arbitrators and thereafter diligently proceed with same. If the other party shall fail to do so, the complaining party may thereupon cancel this agreement upon three months' notice given by its president but such right of cancellation shall not exclude any other remedy."

[fol. 3443] Their proposal this morning under this heading was that either (1) they would accept this paragraph, but simultaneously modify the existing Through Flight Agreement to have the same wording; (2) they would be willing to incorporate in the Los Angeles through flight agreement the *two* corresponding paragraphs in the existing Through Flight Agreement, and that the choice of (1) or (2) is left to our preference. Under (2) the paragraphs would read as follows (after making appropriate modification with respect to maintenance):

"(b) If at any time subsequent to December 31, 1954, PAA shall consider that this agreement is not satisfactory because of failure by Panagra promptly and adequately to perform any of Panagra's obligations under this agreement (including without limitation, such matters as failure to establish the proper schedules for flights under this agreement, failure to handle flights under this agreement in such manner that the schedules shall be duly and punctually performed, failure properly to maintain and overhaul PAA's aircraft used in the service performed under this agreement, or failure to discharge the provisions of this agreement with respect to the selling and handling of traffic) in such manner as to promote the fullest development of through traffic between the continental United States and points on PAA's certificated route in South America within the spirit and intendment of this agreement, PAA may give notice to Panagra stating the respect in which it considers Panagra's performance to be unsatisfactory. Thereupon PAA and Panagra will negotiate in an endeavor to see whether the views of PAA can be met. If such negotiations shall not succeed within thirty (30) days, reference shall be had to arbitration as provided in Paragraph 25 to determine whether PAA's dissatisfaction is reasonable and, if so, what measures should be taken to meet PAA's views. If such arbitration determines that PAA's dissatisfaction is reasonable, Panagra shall be bound to take the action recommended by the arbitrators and thereafter diligently proceed with the same. If Panagra shall fail to do so, PAA may thereupon cancel this agreement upon three (3) months' notice, but such right of cancellation shall not exclude any other remedy.

"(c) If at any time subsequent to December 31, 1954, Panagra shall be of the opinion that PAA's services are not consistent with recognized standards of other United States flag air carriers operating outside the continental limits of the United States in any particular which for a substantial period of time unreasonably in-

terferes with the efficient conduct of the through flights over Panagra's routes, Panagra may give notice to PAA stating the respects in which it considers such services to be unsatisfactory. PAA and Panagra will thereupon negotiate in an effort to see whether the views of Panagra can be met. If such negotiations shall not succeed within thirty (30) days, reference shall be had to arbitration as provided in paragraph 25 to determine whether Panagra's dissatisfaction is reasonable and, if so, what measures should be taken to meet Panagra's views. If such arbitration determines that Panagra's dissatisfaction is reasonable, PAA shall be bound [fol. 3444] to take the action recommended by the arbitrators and thereafter diligently proceed with the same. If PAA shall fail to do so, Panagra may thereupon cancel this agreement upon one (1) year's notice, but such right of cancellation shall not exclude any other remedy."

I would appreciate your telegraphing me your concurrence or non-concurrence at your earliest convenience.

Sincerely yours,

Douglas Campbell

Vice Pres. Leslie
Executive
NY

August 26, 1954

Thank you for your note of August 20th, transmitting Mr. Shea's memo of the same date.

I need hardly say that I was taken aback by Mr. Shea's arbitrary viewpoint, and find it a cause for real regret.

What he seeks in the proposed agreement is, of course, contrary to the comparable provisions which Pan American accepted in the original Through Flight Agreement.

In view of my understanding that Mr. Shea is on vacation, with the consequent difficulty in reconciling our viewpoints directly, and in view of the competitive disadvantage to which Panagra and Pan American are exposed by any avoidable delay in concluding the Through Flight Agreement, I am willing to recommend the following solution for Mr. Trippe's approval:

1. Mr. Shea's viewpoints as to Clauses 2 and 15 will be included in the Agreement as presented for signature, subject however to the procedure outlined immediately below.

2. Within 30 days after the signing of the Agreement, Panagra and Pan American will select a mutually satisfactory arbitrator; in the event of Pan American and Panagra being unable to agree on such a person within 30 days, the President of the American Arbitration Association will be asked forthwith to appoint such an arbitrator within an additional 30 days.

3. The arbitrator so appointed will hear the views of Pan American and Panagra respectively as to Clauses 2 and 15 and decide the following questions in the light of the most equitable possible reconciliation of the parties' respective desires and the proper conduct of the operations contemplated by the Agreement:

   (a) Should the phrase "it being understood that the through flight shall be extended to the area N.W.S. before Panagra adds any other flight to Buenos Aires unless over-riding considerations dictate otherwise" or some modification thereof be included at the end of the second sentence in Clause 2?

   (b) Which of the following alternatives will be adopted?

(i) The two paragraphs of Clause 15 hereunder discussion shall be included in the new Agreement in a form analogous to the Through Flight Agreement, or

(ii) The Panagra draft of the same material shall be incorporated in the new Agreement and simultaneously amended in like manner in the Through Flight Agreement, or

(iii) The Panagra draft shall be included in the new Agreement without any corresponding change in the Through Flight Agreement.

4. Within 7 days after receipt of arbitrator's opinion, his decision will be agreed to by Pan American and Panagra as amendments of the Agreement initially signed.

It seems to me that the above course would serve the requirements of both Pan American and Panagra and would be more than equitable to Panagra.

As to Mr. Shea's comments in the first numbered paragraph of his memorandum, it is also our view that the proposed Agreement will be helpful in connection with the pilot Through Flight controversy, but viewed independently it would still be of obvious advantage to the competitive positions of Pan American and Panagra; and it must be considered in both respects.

Memorandum to: Mr. A. B. Shea
7 Hanover Square
New York, New York

Dear Ansly:

I am sure you have received a copy of my memorandum of August 26th to Doug Campbell, but attach one for your convenience.

As I am sure you know, Pan American has been making plans for a through flight from Los Angeles to Rio and Sao Paulo via Panama and Caracas. It is presently contemplated that this service will be inaugurated November 1, 1954. I believe it would be much to Panagra's interest if the through flight from Los Angeles to Lima were to be inaugurated concurrently. During July we seemed to be making excellent progress on the Pan American Panagra agreement relating to this service, but in recent weeks we seem, unfortunately, to have bogged down. My memo was intended to cure the delay and I hope it has had your favorable consideration. If we are to meet the closing of the November 1st timetables, we cannot afford to lose time in finalizing this agreement, and we should proceed to do this even though the problem relating to the flying by Panagra pilots over our Miami-Panama route may not have been completely resolved.

September 15, 1954

Memorandum to: Mr. John C. Leslie
155 East 42 Street
New York 17, N. Y.

Dear John:

I received your memorandum of September 9th referring to your previous memorandum of August 26th to Douglas Campbell. I regret that you were taken aback by my "arbitrary viewpoint". I do not, of course, consider my viewpoint to be arbitrary.

I feel that it would be unwise and probably unproductive to adopt the arbitration provisions which you suggest and I see no necessity for the adoption of this procedure.

While I recognize, as you do, the benefit to Pan American and Panagra, from a competitive viewpoint, of the initiation of the L. A. Lima Through Flight we certainly cannot undertake the operation in the manner contemplated unless and until the pilot through flight controversy is settled. This situation has now been complicated, as you undoubtedly are aware, by the position taken by the Panagra pilots.

Memorandum to: Mr. A. B. Shea
7 Hanover Square
New York, New York

Dear Andy:

This will acknowledge your memorandum of September 15th concerning the Los Angeles Through Flight.

So far as concerns the agreement relating to this flight, if you are unwilling to have these few points in dispute settled by arbitration, I would think we should make an effort to reconcile our points of view in conference. However, further efforts in this direction would be fruitless under present circumstances in view of your opinion that the operation cannot be undertaken unless said until the pilot controversy concerning the Miami through flights is completely resolved.

I do not share your opinion on the latter point. The small amount of flying which Pan American flight crews would perform once weekly over Panagra's route from Panama to Lima under the Los Angeles Through Flight agreement could only be helpful in resolving the pilot controversy over the large amount of flying by Panagra personnel on PAA's Panama-Miami route. Panagra should not be deprived in the meanwhile of the traffic advantages of the Los Angeles Through Flight.

Dear Andy:

With further reference to my memoranda to you of September 20th and September 16th, they will confirm that Pan American's November 1st timetables, which have now gone to press, will show a once weekly through flight from Los Angeles to Rio and Sao Paulo via Panama and Caracas.

We very much regret that, due to your unwillingness to finalize the Los Angeles Through Flight Agreement until there is a settlement of the controversy between the Pan American and Panagra pilots over the Miami route, it has not been possible to show a Los Angeles-Lima Through Flight via Panama. We certainly hope this can be done in the December 1st timetables.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 388

October 4, 1954

Memorandum to: Mr. John C. Leslie
135 East 42 Street
New York 17, N. Y.

Dear John,

Reference is made to your memoranda to me dated September 16th and September 27th. As pointed out in my memorandum to you of September 15th that while I recognize, as you do, the benefits to both PAA and Panagra from a competitive viewpoint, of a Los Angeles-Lima Through Flight, I am still of the opinion that the initiation of such an operation prior to a settlement of the pilot Through Flight controversy would only complicate that issue.

Frankly, in view of the importance which you give to traffic between the West Co[illegible] of the United States and the West Coast of South A[illegible]rica, a viewpoint in which we fully concur, I was very surprised to learn that in your

September 26th schedule you have completely eliminated the connections at Panama between Panagra's tourist flights and PAA's Panama Los Angeles flights and this without any previous advice to or consultation with Panagra, contrary to the understanding reached some months ago on schedule coordination.

I would further like to point out that while the traffic figures prepared by Mr. Lipscomb indicated that roughly an estimated additional thirty-five passengers per week in both directions would be generated by a Los Angeles-Lima Through Flight I again express the observation that in my [fol. 3452] opinion this is a most optimistic estimate particularly because, as I have previously mentioned to Mr. Trippe, a Through Flight between the West Coast of South America and the West Coast of the United States to be of real benefit to Panagra should include a Mexico City stop to enable Panagra to meet effectively the Lima-Mexico City competition from CPAL. CPAL during the last month has averaged approximately fourteen passengers per flight in both directions between Lima and Mexico City.

Under the circumstances it is most difficult for me to see the justification for Panagra to assume the financial burden of an annual expense of approximately $370,000 of which $120,000 is for charter hire of PAA aircraft under the PAA proposal for a Los Angeles Lima Through Flight. However, as a fair and equitable compromise, I would be willing to have Panagra consider a Lima Los Angeles Through Flight, if, in order to reduce the added cost to Panagra of this additional flying, PAA would be willing to consider a one-weekly Through Flight between Lima and Los Angeles using Panagra aircraft and with Panagra crews flying the sectors Lima Panama and PAA crews the Panama Los Angeles sectors. This assures we can reconcile the different points of view on items still at issue in the August 18th draft of the proposed Through Flight Agreement.

Andrew B Shea

[fol. 3453]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 389

October 21, 1954

Memorandum to: Mr Andrew Shea
7 Hanover Square
New York, N. Y.

Dear Andy:

Thank you for your memorandum of October 4, concerning which I comment as follows:

1. I fear that you have not been fully informed concerning the matter of schedule coordination mentioned in your second paragraph. The schedule patterns to be effective September 26 were discussed in detail by the Pan American and Panagra officials in Miami, and there was agreement concerning the timetable to be used for the Los Angeles Lima Through Flight, if inaugurated. Pan American hoped until the last minute that Panagra would agree to this flight and, therefore, went to press with its September 26 schedules constructed in such fashion as to permit its inauguration without delay or confusion. Specifically, one of the Pan American 515 flights arrives Balboa on Wednesdays at 1600 and is designed to leave for Lima just one hour later, as tentatively agreed with the Panagra officials in Miami.

   A further re-arrangement and improvement of Pan American's trunkline schedules in the Latin-American Division will become effective on December 1, 1954. At this time, a similar provision will be made for a Los Angeles Lima Through Flight transiting Balboa on Mondays; alternatively, southbound PA 515 will have a 6-hour 15-minute connection with PG 333 on Mondays; northbound, in the absence of a through flight, PG 332 will have a 2-hour 15-minute connection with PA 515 on Tuesdays and Thursdays.

Copies of these Pan American December schedules were forwarded to Mr. Kirkland some time ago, and we understand that he has been in Lima endeavoring to work out Panagra schedule changes which would further improve connections between the two carriers.

In this connection, the officials of Pan American's Latin American Division have for some time felt that [fol. 3454] there could and should be more give and take on Panagra's part in the matter of schedule adjustments. I know that Panagra has its problems, but Pan American has theirs also. The need for cooperation becomes even more acute if coordination with Pan American's trans-pacific service is to be provided—the latter being obviously to the advantage of Panagra whether on through flights or connecting flights.

2. While there is no doubt that both Panagra and Pan American would benefit if Pan American were certificated to call at Mexico City between Los Angeles and Panama, I am sure you understand the facts. First, Pan American does not hold such a certificate. Second, Western Air Lines was awarded such a certificate, the present status of which is uncertain. Third, the United States Government has made repeated efforts to negotiate an air transport agreement with Mexico, but so far without success; the question of any U. S. flag carrier operating the Los Angeles–Mexico City sector has been one of the major problems in all of these negotiations.

It remains to be seen whether or when a Pan American application for this service would seem likely to prosper. At best this is a long time off, and the possibility of accomplishing this in the future should not prevent our doing something in the interests of both companies in the present.

3. While I appreciate your suggestion that you would be willing to have Panagra consider a Lima–Los Angeles Through Flight, the conditions which you

now attach would not be acceptable to Pan American and, in my opinion, rest on false premises.

Your first condition is that Panagra aircraft be used in order to reduce Panagra's expenses for charter hire. As you know, Pan American believes that Panagra's fleet is somewhat in excess of current requirements. While supplying aircraft for the Panama/Los Angeles route would improve Panagra's current utilization, this is by no means the only or necessarily the best solution for Panagra. The use of Pan American aircraft over the Los Angeles/Lima route would represent a very small measure of reciprocity for the return which Panagra has been realizing through the use of Panagra's aircraft over Pan American's Canal Zone/Miami route. Second, the so-[fol. 3455] called pilot controversy, concerning which the Pan American pilots feel very strongly, can best be resolved by taking some tangible steps in the direction of flight time reciprocity between the two pilot groups, as you have yourself recognized. This requires that any Los Angeles/Lima Through Flight employ Pan American flight crews all the way to Lima. For Pan American to enter into a new interchange with Panagra which did nothing to solve the problem would, in my opinion, have serious adverse consequences to both companies.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 390

Minutes of Regular Meeting of the Board of Directors of Pan American Grace Airways, Inc. held at the office of Pan American World Airways, Inc., 135 East 42nd Street, New York, N. Y. on the 2nd day of November, 1955 at 4:00 o'clock in the afternoon.

PRESENT:

Messrs.

Erwin Balluder	W. L. Morrison
Henry J. Friendly	H. J. Roig.
Felix E. Larkin	Andrew B. Shea
John C. Leslie	

being a quorum of the Board.

Mr. Shea, President, presided. Mr. Cogswell, Secretary, acted as such.

Minutes of the Regular Meeting of October 5, 1955 were read and approved.

The following financial data was submitted and discussed:

Comparison of Actual Results with Budget for nine months ended September 30, 1955

Comparative Statement of Profit and Loss for September 1955-1954 and nine months ended September 30, 1955-1954

Comparative Statement of Profit and Loss for Quarter ended September 30, 1955-1954 and nine months ended September 30, 1955-1954

Statement of Cash Position as at September 30, 1955 compared to Previous Periods

Cash Position forecast for year ending September 30, 1956

The following capital appropriation was reported:

122(M)	Installation of sequence gate and throttle reverse lock on 4 DC-6B aircraft	$5,643

The following capital appropriations were authorized:

123(M)	Initial Modification to DC-6B N-65260	$35,813
124(M)	Modification of DC-3A Aircraft N-28335	$76,791

[fol. 3457] The President reported on movement of passengers under the National Interchange Agreement for the months of September and October.

The President stated that after full investigation of the relative merits of B-707 and DC-8 projects, he was prepared to recommend the purchase of five DC-8 aircraft at an estimated cost, including cost of spare engines and parts, of approximately $32,000,000. Mr. Leslie inquired as to the consideration which had been given to the B-707, stressing particularly the earlier inauguration of jet service which this airplane would make possible, and expressing his tentative opinion that the 707 was better adapted to Panagra's route structure. It was voted that the President and Mr. Ballinder or Mr. Leslie pursue the matter with all possible despatch and that the President submit final recommendation to the Board for action as promptly as possible.

There was presented to the meeting the form of six non-interest bearing promissory notes, to be dated November 28, 1955, of this Corporation to National Airlines, Incorporated, pursuant to the provisions of Section 4.6 of the Financial Supplement to the Interchange Agreement between this Corporation, National Airlines, Incorporated and Pan American World Airways, Inc., five of said notes being each in the principal amount of $633,333.33 and one thereof being in the principal amount of $633,333.35, and payable as therein provided, and a counterpart of the Agreement, also to be dated November 28, 1955, between this Corpora-

tion, National Airlines, Incorporated and Chemical Corn Exchange Bank, Bankers Trust Company, The Chase Manhattan Bank, The Hanover Bank, The First National City [fol. 3458] Bank of New York, and The New York Trust Company, whereby, among other things, in order to induce each of said banks to purchase from National Airlines, Incorporated one of said notes, this Corporation makes certain agreements and incurs certain obligations.

On motion duly made and seconded, it was unanimously

RESOLVED that the President or any Vice President be and he hereby is authorized to execute and deliver to National Airlines, Incorporated six non-interest bearing promissory notes in the form presented to this meeting, five of said notes being each in the principal amount of $[illegible] and one thereof being in the principal amount of $[illegible], payable in the manner and upon the terms provided therein, pursuant to the provisions of Section 1.6 of the Financial Supplement to the Interchange Agreement between this Corporation, National Airlines, Incorporated and Pan American World Airways, Inc., and to execute and deliver in the name and on behalf of this Corporation a certain Agreement as presented to this meeting, to be dated November 28, 1955, with National Airlines, Incorporated and Chemical Corn Exchange Bank, Bankers Trust Company, The Chase Manhattan Bank, The Hanover Bank, The First National City Bank of New York, and The New York Trust Company whereby, among other things, this Corporation undertakes certain obligations with respect to the prepayment of the principal amount of said promissory notes, together with interest thereon as agreed to be paid by National Airlines, Incorporated, or the issue and exchange, in the manner set forth in said Agreement, for said promissory notes and the notes then outstanding under the Credit Agreement dated June 16, 1954 between this Corporation and certain banks, of a principal amount of Notes, to be issued under and pursuant to the provisions of the Credit Agreement, equal to the sum of said promissory notes and said then outstanding Notes,

agrees to a reduction in the commitments of said banks under said Credit Agreement in an amount equal to the aggregate principal amount of said promissory notes, and undertakes to make certain prepayments from time to time on the Notes presently outstanding under said Credit Agreement.

RESOLVED FURTHER that the proper officers of this Corporation be and each of them hereby is authorized and directed to do and perform all such other acts [fol. 3459] and things and to execute and deliver all such instruments and documents as may be required to carry out the purposes of the foregoing resolution and the terms and provisions of said promissory notes and said Agreement.

There was presented to the meeting Aircraft Lease dated September 9, 1955 between this Corporation and Pan American World Airways, Inc., covering the lease of four DC-6's by this Corporation to Pan American World Airways, Inc. for a period of three years at a rental of $22,500 per month, and the lease by Pan American World Airways, Inc. to this Corporation of one DC-6B for a period of three years at a rental of $22,500 per month, such lease being executed in the name and on behalf of this Corporation by K A Lawder, Vice President and Comptroller.

On motion duly adopted, it was

RESOLVED that the action of K A Lawder, Vice President and Comptroller of this Corporation, in executing in the name and on behalf of this Corporation Aircraft Lease dated September 9, 1955 between this Corporation and Pan American World Airways, Inc., in the form presented to this meeting, be and the same hereby is approved, ratified and confirmed.

On motion duly adopted, it was

RESOLVED that hereafter the regular meetings of the Board of Directors shall be held on the Monday preceding the first Tuesday of each month at 4:30 o'clock in the afternoon at the office of Pan American World Airways, Inc.

Mr. John C Leslie presented his resignation as a Director of the Corporation, such resignation being subject to, and to take effect upon, the election of his successor to such directorship becoming effective.

Mr. Leslie's resignation, effective as stated therein, was accepted with regret.

[fol. 3460] The meeting thereupon proceeded to the election of a Director to succeed Mr. Leslie. Mr. Roger Lewis was duly nominated and unanimously elected a Director of the Corporation, Mr. Lewis' election being subject to, and to become effective upon, approval thereof by the Civil Aeronautics Board, he thereupon to succeed the said John C Leslie or such successor of said John C Leslie as may have been sooner elected and qualified.

There being no further business, the meeting adjourned.

PAN AMERICAN-WORLD AIRWAYS, INC. EXHIBIT 391

Minutes of Adjourned Regular Meeting of the Board of Directors of Pan American-Grace Airways, Inc held at the office of Pan American World Airways, Inc. 135 East 42nd Street, New York, NY on the 20th day of December, 1955 at 4:00 o'clock in the afternoon.

PRESENT:

Messrs Edwin Balluder
Edward L Farrell, Jr
Henry J Friendly
Felix E Larkin
John C Leslie
Franklin Moon
Wilbur L Morrison

being a quorum of the Board.

Mr Balluder, Vice President, presided. Mr Cogswell, Secretary, acted as Secretary of the meeting.

Minutes of Regular Meeting of November 2, 1955 were read and approved.

The resignations of Mr H J Roig and Mr J H Stebbins as Directors, which had been accepted at the special stockholders' meeting of December 5, 1955, were noted with regret. The Secretary was directed to advise Mr Roig and Mr Stebbins to this effect and to specially advise Mr Roig of their appreciation of his twenty-six years of service and hard work for the company.

Mr Balluder reported on Mr Lawder's discussion with the Civil Aeronautics Board in reference to our rate case. He also reported estimated profits for 1955.

The following capital appropriations were reported:

459(LIM)	Three Wollard Passenger Loading Stairs for Cali, Antofagasta and Limatambo	$14,580
126 (M)	Auto approach equipment for four DC-6B aircraft	6,381

[fol. 3462] The following capital appropriation was authorized:

125 (M)	VHF Equipment for five DC-6B aircraft	$54,406

The acquisition of jet aircraft was recommended by the management. Mr Leslie thereupon made the following statement:

"The necessity for Panagra's investing many millions of dollars in jet aircraft, a program which Pan American as a stockholder fully supports, has focused attention on what Pan American has regarded for some time as serious unfairness in the provisions of the Through Flight Agreement of 1946 between Panagra and Pan American with respect to investment, rate of return and related matters. Comparison of the provisions of the 1946 Through Flight Agreement

with that which Panagra recently entered into with National and Pan American abundantly illustrates this. Pan American therefore suggested to the Grace Directors that it would be appropriate to review these provisions of the agreement at this time, when such a large additional investment by Panagra is proposed. The Grace Directors have felt that Panagra's jet order should not be postponed pending such a review. Pan American is willing to go along with the management's recommendations that Panagra should acquire four DC-8 aircraft powered with J-75 engines, subject, however, to the following:

1. Pan American desires to make clear that it intends to call for review of the provisions of the Through Flight Agreement with respect to investment, return and related [fol. 3463] matters, such as, but not limited to, the inclusion of equipment purchase funds, and the sharing of gains on the sale of flight equipment, and, failing the agreement which it hopes to be able to secure, to seek arbitration. It assumes that Panagra will be willing to join in expediting these procedures. Pan American's assent as a stockholder to the proposed Panagra jet order shall not be claimed in any way to prejudice it as a party to the Through Flight Agreement in such review or arbitration.

2. Without limiting the generality of the foregoing, Pan American's acquiescence as a stockholder in the Panagra management's recommendation shall not be claimed in any such review or arbitration to be an admission of the propriety of the decision as to the type, power plant, or number of aircraft, or of the principle that it is appropriate to consider the advantages of DC-8 aircraft powered with J-75 engines for flights that involve the overflying of junctions between National's, Pan American's and Panagra's routes in the absence of an agreement to this end on the part of these other airlines or any assurance that necessary Governmental authorization could be secured.

One of the considerations that has been urged by Pan American in favor of selection of the Boeing 707 aircraft for Panagra was Pan American's fear that selection of the DC-8 by Panagra would lead to a situation in which jet operations

to South America would be instituted by Panagra's competitors before Panagra was in a position to do this. This fear has since been confirmed by Braniff's order for Boeing 707 [fol. 3464] aircraft. In order to improve the delivery situation produced by the management's recommendation of the DC-8, insofar as this lies within Pan American's power, Pan American will make available to Panagra out of its own order for Douglas DC-8 aircraft deliveries earlier than those which Panagra has been able to negotiate with Douglas. Specifically, Pan American will make available one of the two aircraft which Douglas has contracted to deliver to Pan American in February, April, May and August, 1960—the first three of these being one month earlier than Douglas' offer to Panagra. Pan American is also willing to protect Panagra with an option, at least as advantageous as that offered by Douglas, for two additional aircraft for delivery in 1961, it being understood, of course, that exercise of such option must be approved by Panagra's Board of Directors.

Mr. Leslie stated that in the light of the management's recommendations and subject to the foregoing the proper course would appear to be for Panagra to authorize Pan American, as Panagra's agent, to arrange for the sale to Panagra of four of the Douglas DC-8 aircraft which Pan American already has under contract, as outlined above. Whether this can best be done by partial assignment of Pan American's contract or by an amendment of Pan American's contract with Douglas and the making of a new contract by Pan American as agent for Panagra could be subsequently determined."

Upon agreement by the Directors that the aforesaid conditions were acceptable to the company, the management was authorized to purchase four DC-8s with J-75 en- [fol. 3465] gines for delivery in 1960 at an estimated cost of $25,000,000, and to take an option to purchase two more for delivery in 1961.

On motion duly made and seconded, it was unanimously

RESOLVED that a dividend of One Dollar and Fifty Cents ($1.50) per share be and hereby is declared on the capital stock of this corporation payable December 27, 1955 to stockholders of record at the close of business December 21, 1955.

There being no further business, the meeting was adjourned to December 22, 1955 at 4:30 o'clock in the afternoon at the same place.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 392

Panagra Jet Program

Meeting held November 17, 1955

PRESENT: Messrs. Leslie
Balluder
Friendly
Shea
Larkin

JCL Working more on problem—feel more that Boeing best designed for route.

Competitive situation—

1) PAA plans

2) EAL-Braniff plans

Believe Lockheed Electra schedules will give EAL 15 by March, 1959.

PAA plans to put Boeings with J-57 engine on East Coast by spring of 1959.

Has been in PAA's mind that Panagra should inaugurate jet service simultaneously with PAA and would make Boeings available to Panagra to that end.

Don't see how Panagra c[illegible] for a long period against [illegible]tariff and PAA competition with superior aircraft.

SHEA "As far as PAA competition is concerned, are talking only about B.A."

Rather wait one year to get "right" airplane —in long run not going to "hedge-hop."

HJF Better look at things as they are, and then speculate if one wishes.

SHEA His people think DC-8 better—problem of operating J-57 at full power.

[fol. 3467] JCL This thinking comes from piston engine —no problem of operating turbines at 85% power.

SHEA Don't your men consider DC-8 with J-75 a better airplane than 707 with J-57.

JCL Only for transocean routes.

SHEA Wants airplane capable of doing long range stuff if we need it. Better to pay extra money.

JCL Does he know how much?

SHEA No.

JCL We have analyzed it. Analysis requested by Panagra based on ranges not available to Panagra and in seat mile costs.

On plane mile basis annual differential is $307,840 and return is $451,000—for 3 airplanes.

For 4 airplanes $1,011,788 a year.

LARKIN — Panagra technician feel J 57 gives rise to certain technical problems on Panagra route in view of temperature problem.

Runway requirements of DC-8 are less.

JCL — Not satisfied this is so.

While DC-8 is better for take-off, worse for landing.

Runways must be extended for either airplane. If you design a runway fit for landing requirements of DC-8, you will have designed a runway suitable for take-off of Boeing.

SHEA — All we are interested in is in getting best airplane.

Influence by good performance of Douglas. Boeing's performance not so good.

JCL — Boeing flying boat and 377 as airframes excellent. Problems are in engines and in relation to airframe.

[fol. 3468] SHEA — What kind of cooperation.

JCL — Boeing hard to do business with, but gets it done.

BALLUDER — Offset in Boeing experience with big jets.

Douglas may have lots of problems.

SHEA — You're putting a big bet on Douglas.

HJF — We have insurance—bought Boeings because we thought Douglas might be as much as six or eight months behind.

BALLUDER — Douglas 18 months behind for Panagra even if schedule lived up to.

Also don't believe Panagra justified in discounting C-5 engine. We believe real possibility.

SHEA — Would you mind getting Campbell and Kirkland up.

HJF — Would like their written reports.

JCL — Campbell told our people what he wanted and our people gave it to them.

Wouldn't want to foreclose discussions with them, but premature to reach conclusions until our technicians have had their reports and have completed their segment analysis.

HJF — Mustn't disregard domestic orders of J-57.

Lewis, Campbell and Kirkland came in.

SHEA — JCL had made comment as to Boeing with J-57 vs DC-8 with J-75. Would like them to hear.

JCL — Seems to us that each airplane ideal for respective purposes. Thinks Boeing better for Panagra routes.

1) Available *at least* 18 months sooner.

If Panagra has to compete for this period or longer against EAL-Braniff Electras, would be disastrous.

[fol. 3469] JCL 2) 4 Boeings could operate $1,000,000 cheaper and involve $4,000,000 less investment.

Thinks engineering report prepared at Campbell's specifications should be enlarged to include all route segments. Also PAA technical people should have benefits of Campbell and Kirkland reports.

We've been thinking of inaugurating PAA Boeing service on East Coast in spring of 1959—that Panagra should do same—and we would make suitable delivery dates available for Panagra.

CAMPBELL Thinks J-75 has important advantages:

1) J-57 up to its limit and has to employ several thousand pounds of water for this.

J-75 has margins particularly useful in hot weather.

From safety angle, pilot has extra power available if something goes wrong on take-off.

2) Take-off runways—

For existing routes, J-75 wouldn't require as long runways and would be far better if longer nonstops became possible.

KIRKLAND Their feeling is that they should have J-75 regardless of airframe.

No assurance they will have increased runway by 1960 at Lima and Santiago.

Believes higher efficiency of J-75 largely offsets operating economies of J-57.

[fol. 3470] JCL Runway length problem greater for Douglas on landing.

Runway satisfactory for Douglas on landing would be o.k. for Boeing on take-off.

KIRKLAND On Lima runway Douglas now has edge.

JCL Isn't it true that for full volumetric payload need longer runway for DC-8?

KIRKLAND Douglas figures show this at least equal.

JCL What is the airport program?

CAMPBELL Have to take it for granted we will get extension. Bought DC-6 at time when runways suitable only for DC-3.

SHEA "They will extend them."

CAMPBELL But might not extend as far as we want. DC-8 would have advantage.

JCL Hasn't CAA studied Lima airport.

KIRKLAND Various projects are under study.

SHEA Have to assume that runway problem will be solved. Always has been.

JCL Boeing believes J-57 power plant most reliable they have ever had. Premise that reciprocating engines should only operate at 60% power doesn't hold on turbine engine.

LEWIS Reciprocating engine experience leads to greater worry on turbine engine than is warranted. Shouldn't be too concerned about water. GE very successful in water in J-47 engine.

KIRKLAND What about problems in NAL interchange.

HJF What problems does he have in mind? Is Panagra going to let interchange partners furnish aircraft?

[fol. 3471] KIRKLAND Just thought NAL might bring up something.

HJF Is NAL contemplating J-75.

KIRKLAND No—but providing for conversion.

SHEA Asked for ranges.

KIRKLAND DC-8 would have 6000 pounds more payload NY-Lima.

JCL Basic specs show only 2000 pounds difference even on this possibility.

SHEA Would need not less than 4 airplanes—want at least daily service.

JCL 3 would do this at 8 hours per day. Our people expect to do better. But would go to 4 airplanes.

LARKIN — Any other technical problems about J-57 beyond those mentioned?

KIRKLAND — No, they have been covered.

J-75 has more growth possibilities.

BALLUDER — Figures already take into consideration high temperature suggested by Panagra.

JCL — Hate to face Electra competition for 18-24 months.

SHEA — Can't get away from fact that we're buying airplanes for 10 years should get maximum flexibility.

LEWIS — Shouldn't forget enormous experience of Boeings in large jet aircraft. Douglas jet experience not brillant. No one could minimize Douglas transport experience but going into new field. Boeing should have advantage of couple of years.

SHEA — Directed Kirkland and Campbell to deliver technical reports to our people.

We'll study more and talk more.

"Will talk to you next week, John."

[fol. 3472]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 393

Minutes of Regular Meeting of Board of Directors of Pan American-Grace Airways, Inc. held at the office of Pan American World Airways, Inc. 135 East 42nd Street, New York, N. Y. on the 6th day of April, 1959 at 4:00 o'clock in the afternoon.

PRESENT:

Messrs. Erwin Balluder
Edward L. Farrell, Jr.
Henry J. Friendly
Felix E. Larkin
Kenneth A. Lawler
Andrew B. Shea

being a quorum of the Board.

Mr. Shea, President, presided. Mr. Oxley, Secretary, acted as such.

Minutes of regular meeting of March 2, 1959 were read and approved.

The following financial data were submitted and discussed.

Comparative statement of Profit and Loss for the month of February 1959 and 1958 and for the two months ended February 28, 1959 and 1958.

Comparative Analysis Flight Traffic Statistics for the month of February 1959 and 1958 and two months ended February 1959 and 1958.

Comparison of Final audited Results for year ended December 31, 1958 with Estimate.

Comparative Statement of Profit and Loss for month of December 1958 and year ended December 31, 1958 (Final Closing) and December 31, 1957.

Comparative Statement of Profit and Loss for Quarter Year and year ending December 31, 1958 and December 31, 1957.

Statement of Cash Position as at March 31, 1959 and comparison with December 31, 1958 and March 31, 1958.

Cash Position Forecast for year ending March 31, 1960.

[fol. 3473] The following capital appropriation was reported:

RCA LIM 504—Replacement of
Panel Truck for Ezeiza $3,343

The current status of the rate case was discussed. The Board considered the possibility of applying for a temporary rate. It was decided not to press for a temporary rate at the present time, although the matter may be reconsidered in the future if the Civil Aeronautics Board continues to delay consideration of the company's application for a permanent rate.

The President reported that the Link simulator will be delivered four months late. He suggested that in view of the late delivery, consideration should be given to the cancellation of the purchase contract. The possibility of training Panagra pilots on the Pan American simulator at Idlewild will be explored.

The President also reported that conversations are proceeding concerning the possibility of Pan American doing maintenance work on Panagra's DC-8's when an appropriate maintenance base has been established.

On motion duly adopted, it was

RESOLVED that the President is authorized to negotiate with Pan American World Airways the necessary Through Flight Agreement modifications, for subsequent submission to the Civil Aeronautics Board for approval, which will permit Panagra DC-8 aircraft to overfly Balboa, C. Z. and, contingent upon the negotiations with National Airlines referred to in the following resolution, to overfly Miami in the service between New York and Buenos Aires via the West Coast of South America.

[fol. 3474] RESOLVED FURTHER that the President is authorized to negotiate with Pan American World Airways and with National Airlines in order to make the necessary Interchange Agreement modifications, for subsequent submission to the Civil Aeronautics Board for approval, which will permit Panagra aircraft to overfly Miami in the service between New York and Buenos Aires via the West Coast of South America.

There being no further business, the meeting adjourned.

CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.
Docket No. 10,324

In the Matter of the Application
of

URABA, MEDELLIN and CENTRAL AIRWAYS, INC. under Section 401(j) of the Federal Aviation Act of 1958 for leave to abandon its route and certificate.

APPLICATION OF URABA, MEDELLIN and CENTRAL AIRWAYS, INC.

Communications with respect to this Application should be sent to:

ELIHU SCHOTT
Attorney for Uraba, Medellin and Central Airways, Inc.
135 East 42nd Street
New York, N.Y.

Dated: New York, N.Y.
March 18, 1959.

[fol. 3476]

BEFORE THE
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Docket No. .....

In the Matter of the Application
of
URABA, MEDELLIN and CENTRAL AIRWAYS, INC. under Section 401(j) of the Federal Aviation Act of 1958 for leave to abandon its route and certificate.

APPLICATION OF URABA, MEDELLIN and CENTRAL AIRWAYS, INC.

The application of Uraba, Medellin and Central Airways, Inc. (UMCA) respectfully shows to the Board as follows:

1. UMCA is the holder of a certificate of public convenience and necessity issued pursuant to Order Serial No. 749, approved by the President of the United States on November 26, 1940, which authorizes it to engage in air transportation with respect to persons, property and, except as indicated, mail between "the terminal point Cristobal, Canal Zone, the intermediate points, Balboa, Canal Zone, and Turbo, Colombia, and (except with respect to mail) the terminal point Medellin, Colombia."

2. Pursuant to such authority, UMCA is currently operating three round trip flights a week between Balboa and Medellin.

3. UMCA owns no flight equipment and only a very minor amount of ground equipment. It has no employees. In con-
[fol. 3477] ducting its operations described above, it leases aircraft with crews from Pan American World Airways, Inc. by which it is wholly owned.

4. UMCA's operations are and have for many years been unprofitable. In 1958 its operating loss amounted to $59,000. As of December 31, 1958, UMCA had an accumulated net loss of $615,000, which entirely wiped out its invested capital, and left it with a debt to Pan American of $450,000.

5. There is scheduled air service between Balboa and Medellin provided by other air carriers.

6. In the light of the foregoing, abandonment of the route and certificate of UMCA would appear to be in the public interest.

WHEREFORE, UMCA hereby applies under Section 401(j) of the Act, for leave to abandon said route and certificate, and for such other and further relief as to the Board may appear just and proper.

Respectfully submitted,

/s/ ELIHU SCHOTT
Elihu Schott
Attorney for Uraba, Medellin and Central Airways, Inc.

[1] Round trip.

MIAMI TO HABANA ROUTE

Mr. BYRNS. You have a route from Miami to Habana, then a route from Miami through Habana to San Juan, and then another route from Miami through Habana probably to the Port of Spain. You have three routes running through Habana and I take it that these routes are practically under the same company.

Mr. GLOVER. Yes, sir.

Mr. BYRNS. Would it not have been possible to have had what you might call a relay point at Habana? You are paying mileage, as I understand it, from Miami on three routes right through Habana.

Mr. GLOVER. There are just two of them.

Mr. BYRNS. I thought there were three. You are paying poundage to practically the same company on two routes through Habana. In other words, you have two routes from Miami to Habana.

Mr. GLOVER. Yes, sir.

Mr. BYRNS. Does not that create a greater expense?

AIR TRANSPORT AGREEMENT BETWEEN THE UNITED STATES OF AMERICA AND THE UNITED STATES OF BRAZIL.

The Government of the United States of America and the Government of the United States of Brazil, considering:

—that the ever-growing possibilities of commercial aviation are of increasing importance;

—that this means of transportation because of its essential characteristics, permitting rapid connections, provides the best means for bringing nations together;

—that it is desirable to organize in a safe and orderly form regular international air services, without prejudice to national and regional interests, having in mind the development of international cooperation in the field of air transport;

—that it is necessary to conclude an agreement to secure regular air communications between the two countries

have appointed for this purpose their Plenipotentiaries as follows:

The President of the United States of America, His Excellency William Douglas Pawley, Ambassador Extraordinary and Plenipotentiary in Brazil, and His Excellency James McCauley Landis, Chairman of the Civil Aeronautics Board;

The President of the United States of Brazil, His Excellency Samuel de Sousa-Leao Gracie, Acting Minister for Foreign Affairs and His Excellency Major-Brigadier Armando Figueira Trompowsky de Almeida, Minister of State for Aeronautics;

[fol. 3509]

—3—

[Portuguese text omitted]

[fol. 3510]

who, after having exchanged their fullpowers, found to be in good and due form, agreed upon the following articles:

ARTICLE I

The Contracting Parties grant each other the right specified in the Annex hereto, in order that there may be established the regular air services described therein (hereinafter referred to as "agreed services").

ARTICLE II

1—Each of the agreed services may be inaugurated immediately or at a later date, at the option of the Contracting Party to whom the rights have been granted, but not before:

(a) the Contracting Party to whom the rights have been granted shall have designated an airline or airlines for the route or routes specified;

(b) the Contracting Party granting the rights shall have given the necessary operating permission to the airline or airlines concerned (which it shall do without delay, in accordance with the provisions of paragraph 2 of this article and of Article VI).

2—The airlines so designated may be required to satisfy the aeronautical authorities of the Contracting Party granting the rights, that they are in a position to fulfill the requirements prescribed by the laws and regulations normally applied by these authorities to the operation of commercial airlines.

[fol. 3511]

[Portuguese text omitted]

[fol. 3512]

ARTICLE III

1—The charges which either of the Contracting Parties impose or permits to be imposed on the airline or airlines

designated by the other Contracting Party for the use of airports and other facilities shall not be higher than would be paid for the use of such airports and facilities by its national aircraft engaged in similar international services.

2—Fuel, lubricating oils, and spare parts introduced into the territory of one Contracting Party or placed on board airplanes in its territory by the other Contracting Party, either for its own account or for the airlines designated by it, solely for use by the aircraft of the other Contracting Party, shall enjoy, with respect to customs duties, inspection fees and other charges imposed by the first Contracting Party, treatment not less favorable than that granted to the national airlines engaged in international air transport services or to the airlines of the most favored nation.

3—Aircraft of one of the Contracting Parties used in the operation of the agreed services and the supplies of fuel, lubricating oils, spare parts, normal equipment and aircraft stores retained on board such aircraft shall enjoy exemption from customs duties, inspection fees, and similar duties or charges in the territory of the other Contracting Party, even though these supplies be used by such aircraft on flights within that territory.

ARTICLE IV

Certificates of airworthines, certificates of competency [fol. 3513]

—7—

[Portuguese text omitted]

—8—

[fol. 3514] and licenses issued or validated by one of the Contracting Parties and still in force, shall be recognized as valid by the other Contracting Party for the purpose of the operation of the agreed services. Each Contracting Party reserves the right however to refuse to recognize, for the purpose of flight above its own territory, certificates of competency and licenses granted to their own nationals by another State.

ARTICLE V

1—The laws and regulations of one Contracting Party, relative to the entry into its own territory, or departure therefrom of aircraft employed in international air navigation or to the operation of such aircraft within its own territory, shall be applied to aircraft of the airline or airlines of the other Contracting Party.

2—The laws and regulations of one Contracting Party as to the admission into its own territory or the departure therefrom of passengers, crew or cargo of aircraft (i.e., regulations relative to entry, clearance, immigration, passports, customs and quarantine) shall be applied to passengers, crew and cargo of aircraft of the airline or airlines designated by the other Contracting Party, within the territory of the first Contracting Party.

ARTICLE VI

Each of the Contracting Parties reserves the right to withold or revoke the exercise of rights specified in the Annex of the present Agreement by an airline designated by the other Contracting Party when it is not satisfied that substantial ownership and effective control of the airline under reference is in the hands of nationals of the other Contracting Party, or in case of failure by that airline to [fol. 3515]

—9—

[Portuguese text omitted]

—10—

[fol. 3516] comply with the laws or regulations referred to in Article V above, or to fulfill the conditions under which the rights are granted in accordance with this Agreement and its Annex, or when planes put in operation are not manned by nationals of the other Contracting Party, except in cases where air crews are being trained.

ARTICLE VII

The present Agreement shall be registered with the Provisional International Civil Aviation Organization established by the Interim Agreement on International Civil

Aviation signed in Chicago on December 7, 1944, or its successor.

ARTICLE VIII

If either of the Contracting Parties considers it desirable to modify the terms of the Annex to this Agreement, as well as to exercise the rights specified in Article VI, it may request consultation between the aeronautical authorities of the two Contracting Parties, such consultation to be initiated within a period of 60 days from the date of the request. When these authorities agree that the Annex should be modified, or choose to exercise the rights set forth in Article VI, such decisions shall enter into force after having been confirmed by an exchange of notes through diplomatic channels.

ARTICLE IX

Except as otherwise provided in this Agreement, or its Annex, any dispute between the Contracting Parties relative to the interpretation or application of this Agreement, or its Annex, which cannot be settled through consultation shall be submitted for an advisory report to the Interim Council of the Provisional International Civil Aviation

[fol. 3517]

—11—

[Portuguese text omitted]

—12—

[fol. 3518] Organization (in accordance with the provisions of Article III, Section 6 (8) of the Provisional Agreement on International Civil Aviation signed at Chicago on December 7, 1944) [1] or to its successor, unless the Contracting Parties agree to submit the dispute to an Arbitration Tribunal designated by agreement between the same Contracting Parties, or to some other person or body. The Contracting Parties will use their best efforts, under the powers available to them to put into effect the opinion expressed in any such report.

---

[1] Executive Agreement Series 469; 59 Stat. 1519.

ARTICLE X

If a general multilateral aviation convention, accepted by both Contracting Parties, enters into effect, this Agreement shall be modified in such a way so that its provisions will conform to those of the convention under reference.

ARTICLE XI

For the purposes of the present Agreement, and its Annex, except where the text provides otherwise:

(a) the term "aeronautical authorities" shall mean in the case of the United States of America the Civil Aeronautics Board and any person or agency authorized to perform the functions exercised at the present time by the Civil Aeronautics Board and, in the case of the United States of Brasil, the Air Minister and any person or agency authorized to perform the function exercised at present by the said Minister.

(b) the term "designated airlines" shall mean those airlines that the aeronautical authorities of one of the Contracting Parties have communicated in writing to the aeronautical authorities of the other Contracting Party that they are the airlines that it has designated in conformity with Article II of the present Agreement for the routes specified in such designation.

[fol. 3519]

—13—

[Portuguese text omitted]

—14—

[fol. 3520] (c) the term "territory" shall have the meaning given to it by Articles 2 of the Convention on International Civil Aviation, signed at Chicago on December 7, 1944.[1]

(d) the definitions contained in paragraph *a*, *b* and *d* of Article 96 of the Convention on International Civil Aviation signed at Chicago on December 7, 1944, shall be applied to the present Agreement.

---

[1] Treaties and Other International Acts Series 1591.

ARTICLE XII

Either of the Contracting Parties may at any time notify the other of its intention to terminate the present Agreement. Such a notice shall be sent simultaneously to the Provisional International Civil Aviation Organization or its successor. In the event such communication is made, this Agreement shall terminate six (6) months after the date of receipt of the notice to terminate, unless by Agreement between the Contracting Parties the communication under reference is withdrawn before the expiration of that time. If the other Contracting Party fails to acknowledge receipt, notice shall be deemed as having been received 14 days after its receipt by the Provisional International Civil Aviation Organization or its successor.

ARTICLE XIII

The present Agreement supersedes any acts, permissions, privileges or concessions already in existence at the time of the signing, granted for any reason by any of the Contracting Parties in favour of airlines of the nationality of the other Contracting Party.

[fol. 3521]

—15—

[Portuguese text omitted]

[fol. 3522]

—16—

ARTICLE XIV

The present Agreement will come into form thirty (30) days after the date of its signature.

In witness whereof the undersigned Plenipotentiaries have signed the present Agreement and affixed thereto their respective seals.

Done in the city of Rio de Janeiro on the sixth day of September, 1946; in two copies, in the Portuguese and English languages, both texts being equally authentic.

ANNEX

SECTION I.

The Government of the United States of Brazil grants to the Government of the United States of America the right to conduct air transport services by one or more air carriers of American nationality designated by the latter country on the routes, specified in Schedule I attached, which transit or serve commercially the territory of the United States of Brazil.

SECTION II.

The Government of the United States of America grants to the Government of the United States of Brazil the right to conduct air transport services by one or more air carriers of Brazilian nationality designated by the latter country on the routes, specified in Schedule II attached which transit or serve commercially the territory of the United States of America.

SECTION III.

One or more air carriers designated by each of the Contracting Parties under the conditions provided in this Agreement will enjoy, in the territory of the other Contracting Party, rights of transit, of stops for non-traffic purposes and of commercial entry and departure for international traffic in passengers, cargo and mail at the points enumerated and on each of the routes specified in the schedules attached at all airports open to international traffic.

SECTION IV.

The appropriate aeronautical authorities of each of the Contracting Parties will consult from time to time, or at

[illegible] the request of one of the Parties, to determine the extent to which the principles set forth in Section V below are being followed by the airlines designated by the [illegible] acting Parties, so as to prevent an unfair proportion of traffic being diverted from any designated airline through violation of these principle or principles enunciated elsewhere in this Agreement, the Annex, or the Protocol of Signature.

SECTION V.

It is agreed between the Contracting Parties:

a) that the air transport capacity offered by the carriers of both countries should bear a close relationship to traffic requirements;

b) that in the operation of common sections of trunk routes the air carriers of the Contracting Parties should take into account their reciprocal interests so as not to affect unduly their respective Services;

c) that the services provided by a designated air carrier under this Agreement and its Annex shall retain as their primary objective the provision of capacity adequate to the traffic demands between the country of which such air carrier is a national and the country of ultimate destination of the traffic;

d) that the right to embark and to disembark at points in the territory of the other country international traffic destined for or coming from third countries at a point or points specified in the Schedules attached, shall be applied in accordance with the general principles of orderly development to which both governments subscribe and shall be subject to the general principle that capacity shall be related:

1 to traffic requirements between the country of origin and the countries of destination;

[illegible] 2 to the requirements of through air [illegible] operation, and

3— to the traffic requirements of the area through which the airline passes after taking account of local and regional services.

SECTION VI.

It is agreed between the Contracting Parties that, where the onward carriage of traffic by an aircraft of different size from that employed on the earlier stage of the same route (hereinafter referred to as "change of gauge") is justified by reason of economy of operation, and where such change of gauge is to be made at a point in the territory of the United States of America or the United States of Brazil, the smaller aircraft will operate only in connection with the larger aircraft arriving at the point of change, so as to provide a connection services which will thus normally wait on the arrival of the larger aircraft, for the primary purpose of carrying onward those passengers who have travelled to the United States of America or the United States of Brazil in the larger aircraft to their ultimate destination in the smaller aircraft. It is likewise understood that the capacity of the smaller aircraft shall be determined with primary reference to the traffic travelling in the larger aircraft normally requiring to be carried onward. Where there are vacancies in the smaller aircraft such vacancies may be filled with passengers from the United States of America or the United States of Brazil respectively without prejudice to the local traffic, exclusive of cabotage.

SECTION VII.

a) The determination of rates in accordance with the following paragraphs shall be made at reasonable levels, due regard being paid to all relevant factors, such as cost of operation, reasonable profit, and the rates charged by any other carriers, as well as the characteristics of each service.

—21—

[fol. 3527] b) The rates to be charged by the air carriers of either Contracting Party between points in the territory of the United States and points in Brazilian territory referred to in the attached Schedules shall, con-

sistent with the provisions of the present Agreement and its Annex, be subject to the approval of the aeronautical authorities of the Contracting Parties, who shall act in accordance with their obligations under the present Annex, within the limits of their legal powers.

c) Any rate proposed by the air carrier or carriers of either Contracting Party shall be filed with the aeronautical authorities of both Contracting Parties at least thirty days before the proposed date of introduction; provided that this period of thirty days may be reduced in particular cases if so agreed by the aeronautical authorities of both Contracting Parties.

d) The Civil Aeronautics Board of the United States having approved the traffic conference machinery of the International Air Transport Association (hereinafter called IATA), for a period of one year beginning in February 1946, any rate agreements concluded through this machinery during this period and involving United States air carriers will be subject to approval of the Board. Rate agreements concluded through this machinery may also be required to be subject to the approval of the aeronautical authorities of the United States of Brazil pursuant to the principles enunciated in paragraph (b) above.

e) The Contracting Parties agree that the procedure described in paragraphs (f), (g) and (h) of this Section shall apply

1—If during the period of the Civil Aeronautics Board's approval of the IATA traffic conference machinery, either any specific rate agreement is not approved, within a reasonable time by either Contracting Party or a conference of IATA is unable to agree on a rate, or

2—at any time no IATA machinery is applicable, or

3—if either Contracting Party at any time withdraws or

[fol. 3528] fails to renew its approval of that of the IATA traffic conference machinery relevant to this Section.

f) In the event that power is conferred by law upon the aeronautical authorities of the United States to fix fair and economic rates for the transport of persons and property by air on international services and to suspend proposed rates in a manner comparable to that in which the Civil Aeronautics Board at present is empowered to act with respect to such rates for the transport of persons and property by air within the United States, each of the Contracting Parties shall thereafter exercise its authority in such manner as to prevent any rate or rates proposed by one of its carriers of services from the territory of one Contracting Party to a point or points in the territory of the other Contracting Party from becoming effective, if in the judgment of the aeronautical authorities of the Contracting Party whose air carrier or carriers is or are proposing such rate, that rate is unfair or uneconomic.

If one of the Contracting Parties on receipt of the notification referred to in paragraph (e) above is dissatisfied with the rate proposed by the air carrier or carriers of the other Contracting Party, it shall so notify the other Contracting Party prior to the expiry of the first fifteen of the thirty days referred to, and the Contracting Parties shall endeavour to reach agreement on the appropriate rate.

In the event that such agreement is reached, each Contracting Party will exercise its best efforts to put such rate into effect as regards its air carrier or air carriers.

If agreement has not been reached at the end of the thirty day period referred to in paragraph (e) above, the proposed rate may, unless the aeronautical authorities of the country of the air carrier concerned see fit to suspend its application, go into effect provisionally pending the

[fol. 3529] settlement of any dispute in accordance with the procedure outlined in paragraph (h) below.

g) Prior to the time when such power may be conferred by law upon the aeronautical authorities of the United States, if one of the Contracting Parties is dissatisfied with any rate proposed by the air carrier or carriers of either Contracting Party for services from the territory of one

Contracting Party to a point or points in the territory of the other Contracting Party, it shall so notify the other prior to the expiry of the first fifteen of the thirty day period referred to in paragraph (e) above, and the Contracting Parties shall endeavour to reach agreement on the appropriate rate.

In the event that such agreement is reached each Contracting Party will use its best efforts to cause such agreed rate to be put into effect by its air carrier or carriers.

It is recognized that if no such agreement can be reached prior to the expiry of such thirty days, the Contracting Party raising the objection to the rate may take such steps as it may consider necessary to prevent the inauguration or continuation of the service in question at the rate complained of.

(h) When in any case under paragraph (f) and (g) above the aeronautical authorities of the two Contracting Parties cannot agree within a reasonable time upon the appropriate rate after consultation instituted by the complaint of one Contracting Party concerning the proposed rate or an existing rate of the air carrier or carriers of the other Contracting Party, upon the request of either, both Contracting Parties shall submit the question to the Provisional International Civil Aviation Organization or its successor for an advisory report, and each Party will use its best efforts under the powers available to it to put into effect the opinion expressed in such report.

[fol. 3530]

—24—

SECTION VIII.

Changes made by either Contracting Party in the routes described in the Schedules attached except those which change the points served by those airlines in the territory of the other Contracting Party shall not be considered as modifications of the Annex. The aeronautical authorities of either Contracting Party may therefore proceed unilaterally to make such changes, provided, however, that notice of any change is given without delay to the aeronautical authorities of the other Contracting Party.

If such other aeronautical authorities find that, having regard to the principles set forth in Section V of the present Annex, interests of their air carrier or carriers are prejudiced by the carriage by the air carrier or carriers of the First Contracting Party of traffic between the territory of the second Contracting Party and the new point in the territory of a third country, the authorities of the two Contracting Parties shall consult with a view to arriving at a satisfactory agreement.

SECTION IX.

After the present Agreement comes into force, the aeronautical authorities of both Contracting Parties will exchange information as promptly as possible concerning the authorizations extended to their respective air carriers designated to render service on the route mentioned in the annexed schedules or any part thereof. This will specially include copies of authorizations granted together with such modifications as may occur and any annexes.

[fols. 3531-37]

—25-31—

[fol. 3538]

—32—

PROTOCOL OF SIGNATURE

It appeared in the course of negotiations leading up to the conclusion of the Agreement on air services between the United States of America and the United States of Brazil signed at Rio de Janeiro today that the representatives of the two Contracting Parties were in agreement on the following points:

1—The air carriers of the two Contracting Parties operating on the routes described in the Annex of said Agreement shall enjoy fair and equal opportunity for the operation of the said route.

2—When it is verified to be temporarily impossible for the carrier or carriers of one of the Contracting Parties, on a route, to rake equal advantage of the opportunities referred to in 1, above, the situation thus arising will be mutually examined by both Governments for the purpose

of assisting the said carrier or carriers to increasingly participate in the services contemplated on a fair and equitable basis.

3—It is recognized that the determination of tariffs to be applied by an air carrier of one Contracting Party between the territory of the other Contracting Party and a third country is a complex question, the overall solution of which cannot be sought through consultation between only two countries. It is noted, furthermore, that the method of determining such tariffs is now being studied by the Provisional International Civil Aviation Organization. It is understood under these circumstances:

a)—That, pending the acceptance by both parties of any recommendations which the Provisional International Civil Aviation Organization may make after its study of this matter, such tariffs shall be subject to consideration under the provisions of Section V (b) of the Annex to the Agree-

—33—

[fol. 3539] ment.

b)—That in case the Provisional International Civil Aviation Organization fails to establish a means of determining such rates satisfactory to both Contracting Parties, the consultation provided for in Article VIII of the Agreement shall be in order.

SCHEDULE 1

AMERICAN ROUTES TO BRAZIL AND ACROSS BRAZILIAN TERRITORY

Part 1. TO BRAZIL:

a) From the United States of America, via intermediate points in the Caribbean, South America, to Manaus Goiania and Rio de Janeiro or Sao Paulo; in both directions.

Remark:—While the route Manaus-Goiania-Rio de Janeiro is not ready for in-

ternational operation, it will be replaced by the following route: "From the United States of America, via intermediate points in the West Coast of South America, to Campo Grande, Sao Paulo and Rio de Janeiro; in both directions."

Part 2. ACROSS BRAZIL:

a) From the United States of America, via intermediate points in the Caribbean and South America, to Belém, Natel and beyond to Africa; in both directions. (In the event meteorological conditions in the North Atlantic so require, this route may be used also to Europe).

b) From the United States of America via intermediate points in the Caribbean and South America, to Belém-Barreiras-Rio de Janeiro-Sao Paulo, Pôrto Alegre and beyond; in both directions.

c) From the United States of America via intermediate points in the Caribbean, South America to Manaus, Goiania, Guerrá and beyond, in both directions.

Remark:—This route shall be put into operation only when the Manaus-Goiania-Rio de Janeiro route is ready.

SCHEDULE II

BRAZILIAN ROUTES TO THE UNITED STATES OF AMERICA AND ACROSS AMERICAN TERRITORY

1st. Part — TO THE UNITED STATES OF AMERICA:

1. From the United States of Brazil, via intermediate points in South America and in the Caribbean, inclusive of Puerto Rico, to New York or Washington, (alternative), in both directions.

2. From the United States of Brazil, via intermediate points in South America and in the Caribbean, inclusive of Puerto Rico, to Miami and Chicago, in both directions.

3. From the United States of Brazil, via intermediate points in South America and in the Caribbean, inclusive of Puerto Rico, to Miami and New Orleans, in both directions.

2nd. Part — ACROSS THE UNITED STATES OF AMERICA:

1. From the terminal points named in the routes mentioned above by any reasonably direct route to points in third countries, in both directions.

The American Ambassador to the Brazilian Minister for Foreign Affairs

EMBASSY OF THE
UNITED STATES OF AMERICA
Rio de Janeiro, December 30, 1950

No. 242

EXCELLENCY:

I have the honor to refer to the Air Transport Agreement between the United States of Brazil and the United States of America, dated September 6, 1946,[1] and to the agreement reached on October 6, 1950, during consultation between the aeronautical authorities of Brazil and of the United States, which reads as follows:

"It was agreed that the route schedules of the bilateral agreement will be amended by an exchange of diplomatic notes in order to accomplish the following modifications:

"(a) Schedule I, Part 1, will be amended to read in its entirety as follows:

From the United States of America, via intermediate points in the Caribbean, South America, to Manaus, Goiania and Rio de Janeiro and or Sao Paulo; in both directions.

"Remark: While the route Manaus Goiania Rio de Janeiro is not ready for international operation, it will be replaced by the following route: 'From the United States of America,' via intermediate points in the West Coast of South America to Peru and or Bolivia and thence to Sao Paulo and or Rio de Janeiro; in both directions".

"(b) Schedule II, 1st Part, 1, will be amended to read in its entirety as follows:

From the United States of Brazil, via intermediate points in South America and in the Caribbean.

[1] Treaties and Other International Acts Series [1000]; 61 Stat. Pt. 4, p. 4121.

inclusive of Puerto Rico, to New York and/or Washington; in both directions."

The above agreement is acceptable to my Government, and upon receipt of a note confirming it on behalf of the Government of the United States of Brazil, the Government of the United States of America will consider Schedule I and Schedule II of the Annex to the Air Transport Agreement modified accordingly.

[fol. 3550]

Please accept, Excellency, the renewed assurances of my highest and most distinguished consideration.

HERSCHEL V. JOHNSON

His Excellency
RAUL FERNANDES
Minister for Foreign Affairs of Brazil

DE/DAI/676/588.(22)

Air Transport Agreement between Brazil and the United States of America. Modification of route schedules.

MR. AMBASSADOR,

I have the honor to acknowledge receipt of note No. 242 of this date, through which Your Excellency informs the Ministry of Foreign Affairs that the Government of your country, in view of what was established in the third consultation, ending on October 6 of this year, between the aeronautical authorities of Brazil and the United States of America, agrees that route Schedules I and II, annexed to the Air Transport Agreement signed by the two countries on September 6, 1946, shall be modified as follows:

"a) Schedule I, Part 1, will be amended to read as follows:

"From the United States of America, via intermediate points in in the Caribbean, South America, to Manaus, Goiânia and Rio de Janeiro and or Sao Paulo, in both directions. Remark: While the route Manaus-Goiânia-Rio de Janeiro is not ready for operation, it will be replaced by the following route:

"From the United States of America, via intermediate points in the West Coast of South America, to Peru and or Bolivia and thence to Sao Paulo and or Rio de Janeiro, in both directions".

b) Schedule II, 1st Part, 4, will be amended to read as follows:

"From the United States of Brazil, via intermediate points in South America and in the Caribbean, inclusive of Puerto Rico, to New York and or Washington, in both directions".

2. In reply, I take pleasure in confirming to Your Excellency the acceptance by the Brazilian Government of the conclusions reached on the matter by the aeronautical au- [fol. 3552] thorities of both countries, considering, likewise, that route Schedules I and II, annexed to the Brazil United States of America Air Transport Agreement, are modified as above stated.

I avail myself of the opportunity to renew to Your Excellency the assurances of my highest consideration.

RAUL FERNANDES

His Excellency HERSCHEL V. JOHNSON,
Ambassador of the United States of America.

Air Transport Services

Agreement amending the agreement of September 6, 1946, as amended.
Effected by exchange of notes
Signed at Washington December 1, 1958;
Entered into force December 1, 1958.

The Secretary of State to the Brazilian Ambassador

DEPARTMENT OF STATE
WASHINGTON
Dec 1 1958

EXCELLENCY:

I have the honor to refer to the civil aviation consultation which has taken place in Washington between September 19 1957 and November 5, 1958, pursuant to Article VIII of the Air Transport Agreement of 1946 as amended, between the United States of America and Brazil. This consultation concluded with the delegations of the United States and Brazil having recommended to their respective Governments the deletion of Schedule I and Schedule II of the Annex to the Air Transport Agreement and the insertion of a new Route Schedule, as follows:

TIAS 1900, 2190. 61 Stat., pt. 4, p. 4130; 2 UST 460.

ROUTE SCHEDULE

A. An airline or airlines designated by the Government of the United States of America shall be entitled to operate air services on each of the air routes specified via intermediate points in both directions and to make scheduled landings in Brazil at the points specified in this paragraph:

1. From the United States of America, via intermediate points in the Caribbean, Central America, and countries on the West Coast of South America to Sao Paulo and Rio de Janeiro.

2. From the United States of America, via intermediate points in the Caribbean and South America to Belém, Natal and beyond to Africa.

3. From the United States of America, via intermediate points in the Caribbean, Panama, and coun- [fol. 3556] tries on the North and East Coasts of South America to Belém or Manaus, Brasilia, Rio de Janeiro, Sao Paulo, Porto Alegre and beyond Brazil to Uruguay and Argentina and beyond to Antarctica and beyond.

4. From the United States of America, via intermediate points in Middle America and countries on the North and East Coasts of South America to Belém or Manaus, Brasilia, Rio de Janeiro, Sao Paulo, Porto Alegre and beyond Brazil to Uruguay and Argentina.

B. An airline or airlines designated by the Government of the United States of Brazil shall be entitled to operate air services on each of the air routes specified via intermediate points in both directions and to make scheduled landings in the United States of America at the points specified in this paragraph:

1. From the United States of Brazil, via intermediate points in South America and Middle America to Los Angeles and Honolulu and beyond to Japan and beyond.

2. From the United States of Brazil, via intermediate points in South America and the Caribbean, including Puerto Rico, to Miami and Chicago and beyond to Canada.

3. From the United States of Brazil, via intermediate points in South America and the Caribbean, including Puerto Rico, to Washington and New York and beyond to Canada.

C. Any point or points on any route or routes contained in this Route Schedule may be omitted in either or both directions at the option of the airline designated to operate such route or routes.

D. The airlines designated by one contracting party in accordance with the provisions of the Agreement will be permitted to operate other services across the territory of the other contracting party without obligation of landing by the most direct route between the points to be served as long as the safety of operation is not affected. In any case, the use of uneconomic and circuitous routings shall be avoided.

E. Flights of a designated airline which do not serve all the points granted in the routes contained in the Route Schedule may be operated by the most direct route between the points to be served so long as the safety of operation is not affected. In any case, the use of uneconomic and circuitous routings shall be avoided.

[fol. 3557] F. The airlines designated in accordance with the provisions of the Agreement by one contracting party will be permitted to land for non-traffic purposes in the territory of the other contracting party. Every airport in the territory of one of the contracting parties which is open to public use by its national aircraft shall be open under uniform conditions to the aircraft of the other contracting party for such non-traffic purposes.

G. For the purposes of this Annex to the Agreement, the term "Middle America" is interpreted as including only those countries situated on the mainland between South America and the continental United States of America.

The above amendment of the Air Transport Agreement is acceptable to my Government, and upon receipt of a note indicating acceptance on behalf of the Government of the United States of Brazil, the Government of the United States of America will consider the Route Schedule of the Annex to the Air Transport Agreement modified accordingly, such modification to be effective from the date of Your Excellency's reply.

Accept, Excellency, the renewed assurances of my highest consideration.

For the Secretary of State:

WILLIAM P. SNOW

William P. Snow

His Excellency
ERNANI DO AMARAL PEIXOTO,
Brazilian Ambassador.

MR. SECRETARY OF STATE:

I have the honor to acknowledge the receipt of YOUR EXCELLENCY'S note of December 1, 1958, the text of which, in translation, is as follows:

[For the English language text of the note, see *ante*, p. 3617.]

2. In reply, I inform Your Excellency that the Brazilian Government accepts the terms of the above-mentioned note, which, together with this one, shall constitute an agreement, in force from today's date, for amending the Annex to the Air Transport Agreement between the United States of Brazil and the United States of America.

I avail myself of the opportunity to renew to Your Excellency the assurances of my highest consideration.

For the Ambassador of Brazil:

M G VALENTE
Maury Gurgel Valente
Counselor

His Excellency
JOHN FOSTER DULLES,
Secretary of State of the
United States of America.

[fol. 3561]

PAN AMERICAN WORLD AIRWAYS, INC., EXHIBIT 403

AGREEMENT

AGREEMENT made this 17th day of March, 1939, between WESTERN AIR EXPRESS CORPORATION (hereinafter called "Western") and UNITED AIR LINES TRANSPORT CORPORATION (hereinafter called "United"), both Delaware corporations.

WITNESSETH:

RECITALS

A. Western operates Route AM-13 between San Diego, California and Salt Lake City, Utah, and United operates Route AM-1 between Newark, New Jersey, and San Francisco, California, and both parties transport mail, passengers and express over their respective routes, which intersect at Salt Lake City, Utah.

B. For about twelve years the parties hereto and their predecessors have operated such routes and have maintained connecting air transportation schedules via Salt Lake City, between Los Angeles, California and points east of Salt Lake City on United's Route AM-1; and incident to such connecting air schedules through passenger and express transportation has long been and is being sold by each line over the connecting route of the other, in conformity with the universal practice of all air carriers maintaining connecting schedules.

C. United owns nine Douglas DST sleeper airplanes and Western owns two Douglas DST sleeper airplanes substantially identical with United's aforementioned airplanes, which sleeper equipment the parties hereto operate over their respective routes.

D. It is in the public interest that the parties hereto lease to each other at Salt Lake City, from time to time, at the approximate cost of such leasing, certain of their DST sleeper planes, to the end that sleeper airplane passengers traveling on connecting schedules over the respective routes

of United and Western to and from Los Angeles and points east of Salt Lake City may not be required to deplane from a sleeper plane at Salt Lake City and presently enplane on identical sleeper equipment at that point to continue their air journey on a connecting schedule over the con- [fol. 3562] necting line.

E. Such leasing of planes by each party to the other will improve the efficiency of operations of each party and will improve the character of service offered to the public.

F. Such deplaning occurs at inconvenient hours of the night and the early morning, often under adverse weather conditions, is detrimental to the comfort and convenience of the air passengers, and tends to increase operating and maintenance costs of the parties hereto.

G. The aforementioned detrimental deplaning by air sleeper passengers at Salt Lake City cannot be avoided except by the daily interchange and leasing of such sleeper airplanes to and by United and Western at Salt Lake City.

H. It is in the public interest that such leasing of sleeper airplanes be made operative upon the terms and conditions hereinafter set forth.

NOW, THEREFORE, in consideration of the premises and of the covenants herein contained, IT IS AGREED:

1. *Leasing of Planes*: The parties hereto shall lease to each other at Salt Lake City the DST sleeper airplanes owned by them respectively from time to time in order to avoid the above described deplaning at Salt Lake City by air sleeper passengers traveling between Los Angeles and points east of Salt Lake City on connecting schedules of United and Western over their separate respective routes.

2. *No Off-Line Operation*: United shall conduct no operation hereunder excepting over its own route or routes and Western shall conduct no operation hereunder excepting over its own route or routes.

3. *Crews*: The crew of each airplane used in conducting connecting schedule service under this agreement shall consist of one pilot, one co-pilot and one stewardess, who

shall be employed and serve as heretofore only on the routes of their respective employers and shall be subject to direction and control only by their respective employers.

4. *Place of Operation of Leased DST Airplanes*: Western shall not operate any DST airplane owned by United and leased to Western hereunder except on Route AM-13 between Salt Lake City and San Diego, except in an emergency with the consent of United. [fol. 3563]

United shall not operate any DST airplane owned by Western and leased to United hereunder except on Route AM-1 between San Francisco and Newark, except in an emergency with the consent of Western.

5. *Connecting Sleeper Schedules*: The connecting sleeper schedules of the parties hereto at Salt Lake City, for which sleeper airplanes are to be leased hereunder, shall be determined by mutual agreement and shall not exceed two each way daily excepting by mutual consent of the parties hereto.

6. *Number of Sleeper Airplanes*:

(a) To accomplish the aforementioned sleeper airplane leasing each of the parties shall deliver to the other at Salt Lake City, for such sleeper schedules connecting at that point as shall be mutually agreed upon, the sleeper airplane which has been operated to Salt Lake City by the originating line.

(b) United's operations hereunder shall be so conducted by it that subject to prevention by unflyable weather conditions, Acts of God, or conditions beyond its reasonable control, United shall at all times make available to Western such DST sleeper airplanes as may reasonably be required by Western to maintain that number of sleeper schedules which Western could, in the absence hereof, maintain with the DST sleeper airplanes now owned by it.

7. *Delivery of DST Airplanes*: Delivery of DST airplanes used for connecting schedule sleeper service under this agreement shall be made by one party to the other at Salt Lake City on each trip, but delivery may be made at

Burbank when agreed upon by both parties. Each party, upon accepting delivery of a DST airplane from the other, shall execute and deliver to the other a receipt therefor in the following form:

RECEIVED from ..... one DST airplane U. S. License No. ....., complete and in good operating condition, at ....., this ..... day of ....., 1939, at .....M.

(the delivering line)

.....
(name of receiving line)

By .....

[fol. 3564] S. *Authority to Sign Receipts and Accept Deliveries*: Prior to the effective date of this agreement, each party shall give to the other a letter signed by its president or a vice president, setting forth the names and titles of the persons in its employ who are authorized to sign receipts for DST airplanes, and also setting forth the names and titles of persons authorized to accept delivery of DST airplanes and of receipts executed by the other party. Such letters may be amended from time to time by the president or a vice president of the party making the amendment, and such amendments shall become effective upon delivery thereof to the station managers of the other party located at Salt Lake City and Burbank.

9. *Changes in Cabin Arrangements*: The cabin arrangements of the DST airplanes owned by the parties hereto are substantially identical and no material change shall be made in such cabin arrangements unless mutually agreed upon by the parties hereto.

10. *Designation of Owner and Operator of Airplane*: While operating a leased airplane hereunder, each party shall display on the forward cabin wall of such airplane, visible to passengers, a sign of a style and size mutually agreed upon, disclosing the name of the owner and the name of the operator of the airplane.

11. *Change in Airplane Equipment and Accessories*: No material change shall be made in the engines, propellers,

instruments, accessories and operating equipment of the DST airplanes owned by the parties hereto, subsequent to the effective date of this agreement, unless mutually agreed upon by the parties hereto. If any such changes are agreed upon, each party shall complete such agreed changes with respect to its DST airplanes within a reasonable time; provided that Western may, with respect to its DST airplanes, require United to make such changes for it, in which event Western shall pay to United the reasonable cost of making such changes which cost shall be deemed to be the cost to United for the required materials and for requisite direct labor plus a charge for overhead not to exceed one hundred per cent of such direct labor cost.

12. *Tickets*: Tickets sold by either party hereto for connecting schedule transportation via Salt Lake City shall dis- [fol. 3565] tinctly show that the trip east of Salt Lake City is being made via United and the trip west of Salt Lake City is being made via Western, all in accordance with the standard forms of interline tickets now in use by the parties hereto covering the present connecting schedule transportation via Salt Like City.

13. *No Control over Other Party*: The scheduled times of arrival and departure of connecting sleeper airplane schedules at Salt Lake City shall be determined in the public interest by the parties hereto from time to time to provide convenient and advantageous hours for the departure and arrival of passengers, mail and express, and as may be required from time to time by the Postmaster General of the United States pursuant to the provisions of Section 405(e) of the Civil Aeronautics Act of 1938, or amendment thereof. Each party shall have the exclusive right, subject to the orders of the Civil Aeronautics Authority or other governmental authority having jurisdiction thereof, to fix the scheduled stops to be made on its route or routes, and nothing contained in this agreement shall be construed to grant to either party any right whatever (a) to determine whether any trip of the other party shall be operated or cancelled either in whole or in part, or (b) to exercise any control over any operation or business or affairs of or interest in the other party.

14. *Rental for Airplanes*: There will be no rental paid by either party to the other as reimbursement for depreciation expense of the lessor with respect to DST airplanes (exclusive of engines and propellers) leased hereunder.

On or before the fifth day of each month, each lessee shall certify to the lessor the total number of hours the lessee operated, during the preceding month, DST airplanes owned by the lessor.

15. *Rental for Engines*: The lessee of twin row engines leased hereunder shall pay to the lessor thereof the reasonable rental of such leased engines at the rate of $2.88 for each hour of operation of each leased S3-C3G engine by the lessee thereof; $2.65 for each hour of operation of each leased S1-C-G engine by the lessee thereof; and $2.45 for each hour of operation of each leased SB-3-G engine by the lessee thereof, which rates are based on a depreciation [fol. 3566] rate of 4,000 hours of use, less a salvage value of $500.00 on each engine.

On or before the fifth day of each month, each lessee shall certify to the lessor the total number of hours the lessee operated, during the preceding month, twin-row engines owned by the lessor.

On or before the twentieth day of each month, the parties hereto shall settle and pay to each other their engine rental accounts for the preceding month as hereinabove determined.

16. *Rental for Propellers*: In addition to the engine rental provided for above, the lessee of airplane and engines leased hereunder, shall pay to the lessor thereof, the reasonable rental for propellers, (the useful life of which is substantially different than the depreciable life of the airplanes and engines of which they are a part) at a rate of $.54 for each hour of operation of each of such propellers by the lessee thereof.

On or before the fifth day of each month, each lessee shall certify to the lessor, the total number of hours the lessee operated during the preceding month, propellers owned by the lessor.

On or before the twentieth day of each month, the parties hereto shall settle and pay to each other, their propeller rental accounts for the preceding month as hereinabove determined.

17. *Routine Overhauls of Airplanes and Equipment*: Each party shall overhaul or cause to be overhauled the DST airplanes, including propellers, instruments, accessories and equipment which it may own, in accordance with its standard overhaul procedure. In no event shall the character or extent of such overhaul procedure be less than the minimum standards required by the Civil Aeronautics Authority. However, United, at the request of Western, will overhaul such DST airplanes owned by Western in the same manner employed by United with respect to similar equipment owned by it. United will perform such overhauls for Western at a reasonable cost, which shall be deemed to be the cost to United for the direct labor involved, plus a charge for overhead not to exceed one hundred per cent thereof and the cost to United for materials required, plus a charge for overhead not to exceed twenty-five per cent thereof.

In addition to the engine and propeller rental provided [fol. 3567] for above, the lessee of DST airplanes leased hereunder shall pay to the lessor thereof the reasonable overhaul charge applicable to such leased airplanes at the rate of $6.67, for each hour of operation of each of such leased airplanes by the lessee thereof.

On or before the twentieth day of each month, the parties hereto shall settle and pay to each other their airplane overhaul accounts for the preceding month as hereinabove determined.

18. *Overhauls of Engines*: Each party shall overhaul or cause to be overhauled the twin row engines and engine accessories, including carburetors, spark plugs, magnetos, etc., owned by it in accordance with its standard overhaul procedure. In no event shall the character or extent of such overhaul procedure be less than the minimum standards required by the Civil Aeronautics Authority. However, United, at the request of Western, will overhaul Western'

twin-row engines and engine accessories in the same manner employed by United with reference to the twin-row engines owned by United. United will perform such overhauls for Western at a reasonable cost which shall be deemed to be the cost to United for the direct labor involved, plus a charge for overhead not to exceed one hundred per cent thereof and the cost to United for the materials required, plus a charge for overhead not to exceed twenty-five per cent thereof.

In addition to the engine rental, propeller rental, and airplane overhaul charge provided for above, the lessee of twin-row engines leased hereunder shall pay to the lessor thereof the reasonable engine overhaul charge applicable to such leased engines at the rate of $2.46 for each hour of operation of each of such leased engines by the lessee thereof.

On or before the twentieth day of each month, the parties hereto shall settle and pay to each other their engine overhaul accounts for the preceding month as hereinabove determined.

19. *Replacement of Parts*: The entire cost of necessary replacements of major parts of airplanes, such as wings, control surfaces, propellers, instruments, airplane accessories, engine accessories, landing gear and tires (so far as such replacements may be due to wear and tear arising out of the routine operation of the airplanes) shall be borne by the owner of the airplanes on which such replacements [fol. 3568] are made. In the event any such replacement shall be made to a leased airplane by the lessee thereof, the owner shall pay the lessee the reasonable cost thereof which shall be deemed to be the cost to the lessee of the replacement part, and the cost to the lessee for the direct labor involved in making such replacement, plus a charge for overhead not to exceed one hundred per cent of such direct labor cost.

On or before the twentieth day of each month the parties hereto shall settle and pay to each other their parts replacements accounts for the preceding month as hereinabove determined.

20. *Inspection and Maintenance Service*: The airplane and engine inspection and maintenance service performed by each party hereto with respect to all DST airplanes, propellers, instruments, accessories and equipment owned by either United or Western shall be uniform and shall be not less in character or extent than the minimum standards required by the Civil Aeronautics Authority. United shall make such inspection and render such service at all points, except Burbank. For this purpose Western shall maintain five employees at Burbank per round-trip sleeper airplane schedule operated by Western and at least three of such employees shall be competent mechanics.

No charge shall be made by either party against the other for inspection or maintenance service, unless at any time the work of this character required to be done by Western at Burbank shall be of such magnitude that such work cannot reasonably be performed by the aforementioned employees of Western, and in that event United shall promptly reimburse Western for any expenditure made by it for the required additional labor plus a charge for overhead not to exceed one hundred per cent of such direct labor cost.

21. *Ferry Trips*: On ferry trips required to provide airplanes where needed, the hours flown thereon shall be included in the monthly total of the company operating such ferry trips, and shall be taken into consideration in the same manner as pay trips in determining rentals and charges as hereinabove provided.

22. *Gasoline and Oil*: Immediately prior to delivery of [fol. 3569] each airplane operated on connecting schedule service hereunder, the delivering air line, at its own cost, shall fill the gasoline tanks to the extent of 420 gallons and the oil tanks to the extent of 42 gallons. Upon the termination of this agreement, each airplane in the possession of a party hereto as lessee shall be returned to the other party at Salt Lake City with 420 gallons of gasoline in the airplane tanks and 42 gallons of oil in the oil tanks.

23. *Oil Costs*: The lessee of twin-row engines leased hereunder shall also pay to the lessor therefor the cost of oil

placed in such engines at 120 hours intervals after drainage, at the rate of $.068 per hour of operation of each of such engines by the lessee thereof.

The lessor of twin-row engines hereunder shall reimburse the lessee the lessee's cost of oil placed in the lessor's engines by the lessee, after drainage.

On or before the twentieth day of each month the parties hereto shall settle and pay to each other their oil accounts for the preceding month as hereinabove determined.

24. *Damage to Airplanes*: Each party hereto shall have the right to inspect each airplane before accepting delivery from the other party, and the acceptance of such airplane shall constitute an admission by the receiving party that the airplane, including engines, propellers, accessories and equipment, is in good operating condition. Each party shall be responsible for all damage to airplanes in its possession caused by, or arising out of crash, fire, wind storm, land damage, or other casualty, and if such airplane belongs to the other party, the cost of repairing the same shall be paid, or caused to be paid or borne by the party having possession of the airplane when the damage occurred, and if such damage constitutes the destruction of a leased airplane, the party having possession thereof at the time of destruction shall pay or cause to be paid to the owner an amount equaling:—

(a) (1) The value of the airplane and equipment, excluding engines and propellers, as set forth in [fol. 3570] Exhibit "A", attached hereto, less a deduction at pro rata of one per cent per month from February 1, 1939 to the date of destruction; or in an appropriate case.

(2) The value of the airplane and equipment, excluding engines and propellers, as set forth in an amendment to Exhibit "A" which may be filed by either party with the other with respect to any airplane subsequently placed under this agreement, less a deduction at pro rata of one

per cent per month from the effective date of such amendment to the date of destruction; plus

(b) The original cost price of the engine less a deduction of $2.88 for each hour of operation of a S3-C6 engine; $2.65 for each hour of operation of a S14-C6 engine, and $2.45 for each hour of operation of a S13-3C6 engine, from the date of initial operation to the date of destruction, which rates are based on a depreciation rate of 4,000 hours of use less a salvage value of $500.00 on each engine.

(c) The original cost price of the propellers less a deduction of $.54 per operated hour per propeller from the date of initial operation to the date of such destruction.

And the party paying or causing to be paid such amount shall thereupon become the owner of such airplane and equipment, including engines and propellers and all salvage thereof.

25. *Change of Radio Equipment*: Inasmuch as the parties do not operate on the same radio frequency, each party accepting delivery of an airplane hereunder shall make the necessary change of radio equipment and shall then deliver the removed radio equipment to the other party.

26. *Liability and Property Damage Insurance*: During the term of this agreement, each of the parties hereto shall keep in full force and effect at its expense, insurance policies, written by responsible insurance companies, insuring and covering each of the parties as their interests may appear against liability for loss, injury, damage or claims arising out of or in connection with injuries to or deaths of passengers, injuries to or deaths of third persons and damage to or destruction of property caused by or arising out of the operation of or possession of any airplane under this agreement, and such insurance shall be so maintained by each party in the following amounts and with the following limits:

[fol. 3571] Passenger liability insurance not less than $75,000 for each passenger, with a limit of not less than $1,000,000, for any one accident;

Public liability insurance—not less than $50,000.00 for each person, with a limit of $1,000,000.00 for any one accident.

Property damage insurance—not less than $100,000.00 for any one accident.

27. *Aircraft Insurance*: During the term of this agreement each of the parties hereto shall keep in full force and effect at its expense, insurance policies; written by responsible insurance companies, insuring each of the parties as their interests may appear and covering each DST airplane owned by either party hereto in an amount not less than the value thereof as determined by paragraph 24 hereof (including engines, propellers, instruments, accessories and all equipment attached to or contained in the airplane) against damage or destruction caused by or arising out of crash, fire, wind storm, land damage or other casualty which occurs while the airplane involved is in its possession.

Notwithstanding the foregoing, either party may self-insure against said damage and destruction so long as the other party is satisfied that such self insurance procedure adequately protects it against such loss. Upon notification by either party that the self-insurance procedure adopted by the other party is not satisfactory, the party so notified will immediately obtain and maintain at its expense the aircraft insurance above provided for.

28. *Indemnities*: Each party hereto agrees to indemnify, protect and save harmless the other against any and all loss or damage the other may sustain by reason of damage to property, or injuries to or deaths of persons caused by the operation of or possession of airplanes under this agreement while in the possession of such indemnifying party, unless negligence of the other party, jointly or severally, proximately caused such damage, injuries or deaths. Each party shall be responsible for the loss of or damage to any removable airplane equipment installed in any airplane in its possession.

[fol. 3572] 29. *Baggage*: In the event of loss of or damage to baggage or personal effects of a passenger on a

connecting schedule trip, the party whose act or omission caused the loss or damage shall be solely responsible to the passenger, and in case of inability to prove who or under what circumstances the loss or damage occurred, any liability therefor shall be shared equally by the parties hereto.

30. *Definitions*: The term "month", as used in this agreement, shall mean a complete calendar month, except when applied to the first months hereunder which shall be the period from the effective date hereof to and including the last day of such month.

31. *Compliance with Regulations*: All airplanes operated hereunder shall at all times be so equipped, operated, and maintained as to comply in all respects with the rules and regulations of the Civil Aeronautics Authority. Each pilot or co pilot operating any airplane hereunder shall be a pilot or co pilot qualified to act in such capacity in accordance with the rules and regulations of the Civil Aeronautics Authority or any other governmental authority having jurisdiction thereof.

32. *Mainliner*: United shall permit Western to display on its DST airplanes the word "Mainliner", which United was the first to adopt and use, in the same manner as United displays this word on its own airplanes.

33. *Taxes*: In the event either United or Western shall be obligated to pay any sales or use taxes on commodities or materials purchased to operate, maintain or repair airplanes or equipment or accessories relating thereto, such taxes shall be considered a part of the cost of the commodity, material or repair work involved and shall be charged and prorated as above set forth.

34. *Access to Books and Records*: Each party hereto, or a representative designated by it, shall have the right of access, during the term of this agreement and within a reasonable time after the expiration thereof, to the books and records of the other party for the purpose of verifying fly- [fol. 3573] ing hours, costs and expenditures pertinent to this agreement.

35. *Effective Date*: Leasing of sleeper airplanes under this agreement shall commence at such time as is mutually

agreed upon by the parties hereto after the approval hereof by the Civil Aeronautics Authority.

36. *Orders:* This agreement shall be subject to any applicable, valid, and final rules, regulations, or orders that may now exist or that may be adopted hereafter by the Civil Aeronautics Authority or by any other lawfully constituted and empowered governmental authority having jurisdiction.

37. *Term:* This agreement shall continue in force until terminated by either party thereto upon thirty days' advance written notice thereof to the other.

Upon termination of this agreement, airplanes, engines, propellers, instruments, accessories and equipment owned by each party, but in the possession of the other party at the date of termination, shall be returned to the owner at Salt Lake City.

IN WITNESS WHEREOF, the parties hereto have caused this agreement to be lawfully executed this 17th day of March, 1939.

PAN AMERICAN WORLD AIRWAYS, INC.-EXHIBIT 404

THIS AGREEMENT between Pan American Airways, Inc., a corporation organized and existing under the laws of the State of New York (hereinafter called "PAA") and Pan American-Grace Airways, Inc., a corporation organized and existing under the laws of the State of Delaware (hereinafter called "Panagra")

RECITALS.

WHEREAS, PAA was organized in 1927 for the purpose of operating international air transport services; and

WHEREAS, pursuant to Contract No. F.A.M. 5, dated July 13, 1928, and to the provisions of its certificate of public convenience and necessity issued July 22, 1940, as

amended, PAA has operated and now operates air transport services between the Continental United States and the Canal Zone by various routes; and

WHEREAS, Panagra was formed pursuant to an agreement made in the fall of 1928 between Pan American Airways Corporation, a corporation organized and existing under the laws of State of Delaware (then known as Aviation Corporation of the Americas), which then and continuously thereafter owned all of the capital stock of PAA, and W. R. Grace & Company, a corporation organized and existing under the laws of the State of Connecticut, whereby the two companies agreed to associate themselves in the organization of a company half of the capital stock of which was to be owned by each of them, for the purpose of conducting air transport service south of the Canal Zone on the West Coast of South America; and

WHEREAS, pursuant to contract No. F.A.M. 9, dated March 4, 1929, and to the provisions of its certificate of public convenience and necessity issued July 22, 1940, as amended, Panagra has operated international air transport services south of the Canal Zone, such services now including points in western Colombia, Ecuador, Peru, Chile, Bolivia and Argentina; and

WHEREAS, the bulk of the traffic carried by Panagra from and to the Canal Zone originates in or is destined to the continental United States; and

WHEREAS, PAA now owns three Boeing S-307 four-engined land aircraft which are utilized, in part, in maintaining service between the Canal Zone and the continental United States, connecting with the services of Panagra and now has on order, among other types, 22 Lockheed L-49 four-engined land aircraft (such S-307 and L-49 aircraft being hereinafter referred to together with any other four-engined land aircraft acquired by PAA and assigned to the PAA routes described in paragraph 4 hereof as the "PAA planes") and Panagra now has on order three Douglas DC-4 four-engined land aircraft expected to be delivered in 1943 (hereinafter referred to together with any

other four engined land aircraft acquired by Panagra as the "Panagra planes"); and

[fol. 3576] WHEREAS the parties desire to enter into arrangements permitting the exchange of four engined land aircraft on certain of their operations as in this agreement set forth;

NOW, THEREFORE, in consideration of the premises and of the covenants herein contained, it is agreed as follows:

1. *Leasing of Planes*: Panagra shall have the right to tender Panagra planes, together with the engines and propellers therefor, to PAA at the Canal Zone for lease to and operation by PAA on schedules connecting with Panagra on PAA's routes described in paragraph 4 hereof, and PAA shall have the right to tender PAA planes, together with engines and propellers therefor, to Panagra at the Canal Zone for lease to and operation by Panagra on schedules connecting with PAA on Panagra's routes described in paragraph 4 hereof, but neither PAA in the case of Panagra planes nor Panagra in the case of PAA planes, shall be obliged to accept such tender or to lease or operate such planes. Such tender may relate to one or more planes and to one or more scheduled trips and shall be in writing mailed or delivered by the tendering party to the principal office of the other in New York, N. Y., not less than days before the scheduled day of arrival in the Canal Zone of the plane so tendered or, if relating to more than one plane or trip, then not less than days before the scheduled arrival day in the Canal Zone of the first such plane or trip; the acceptance or rejection of such tender shall be in writing mailed or delivered to the principal office of the tendering party in New York, N. Y. not less than days before such scheduled day of arrival. Whenever any such tender shall be accepted the resulting lease and the operations thereunder shall be governed by the terms and provisions of this agreement hereinafter set forth. Any tender accepted may be cancelled as to any scheduled trip or trips by either party hereto by written notice mailed or delivered to the principal office of the other party in New York, N. Y., not less than days before

the scheduled trip. The point of exchange in the Canal Zone shall be Albrook field, Balboa, or such other point as may be determined upon by the parties and approved by the governmental authorities having jurisdiction in the premises.

2. *No Off-Line Operation*: PAA shall conduct no operation with Panagra planes leased hereunder except over its own route or routes, and Panagra shall conduct no operation with PAA planes leased hereunder except over its own route or routes. Since PAA now holds no certificate of public convenience and necessity for operations south of the Canal Zone to the west coast of South America it will not in any manner hold itself out as conducting operations from the Canal Zone to the west coast of South America; and since Panagra holds no certificate of public convenience and necessity for operations north of the Canal Zone it will not hold itself out as conducting any operations north of the Canal Zone. Except in case of emergency, no operation with leased planes shall be conducted on any routes other than those specified in paragraph 4 of this agreement.

[fol. 3577] 3. *Crews*: The crew of each plane used in conducting scheduled service under this agreement shall be employed by and serve only on the routes of its employer and shall be subject to the sole direction and control of its employer.

4. *Place of Operation of Leased Planes*:

(a) The place of operation by PAA of the Panagra planes shall be:

(i) PAA's route or routes between the Canal Zone and Miami, Florida, either non-stop or with such intermediate stops not more than in number and not involving a deviation of more than miles from the direct airline distance as PAA may determine; or

(ii) In the event that, pursuant to its application to the Civil Aeronautics Board, Docket No. 373, PAA shall receive authority to operate between the Canal Zone and New Orleans, Louisiana either non-stop or via Guatemala and Merida or via Havana, then such route or routes so authorized.

(b) The place of operation of the PAA planes shall be the route of Panagra between the Canal Zone and

5. *Connecting Schedules*: If the parties agree regularly to accept each other's tenders of planes so as to permit an interchange of equipment on connecting schedules at the Canal Zone, it is the intent of this agreement that the number of revenue miles to be flown by the PAA planes on the routes of Panagra in each month shall approximately equal the number of revenues miles flown by the Panagra planes on the routes of PAA during each month; and the number of connecting schedules to be operated by leased planes and the portion of the route of Panagra over which the PAA planes shall operate shall be fixed to accomplish this result as nearly as sound and efficient operation, the rendering of convenient service to the traveling public, and the expedition of mail and express permit.

6. *Delivery of Leased Planes*: Delivery of leased planes under this agreement shall be made by one party to the other at the Canal Zone unless some other point is mutually agreed upon. Each party upon accepting delivery of a leased plane from the other shall execute and deliver to the other a receipt therefor in the following form:

[fol. 3578] "Received from

.....

(The delivering line)

Under the Contract, dated , between Pan American Airways, Inc. and Pan American-Grace Airways, Inc., one 4-engined airplane, United States License, No. , complete and in good operating condition at , this day of , 194 , at M.

.....

(The receiving line)

By .....

Lessees receiving planes hereunder shall cause such planes to complete their round trips and return to the Canal Zone as soon as practicable.

[fol. 3587]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 407

(See opposite)

7. *Authority to Sign Receipts and Accept Deliveries*: Prior to the effective date of this agreement each party shall give to the other a letter signed by its President or a Vice-President setting forth the names and titles of the persons in its employ who are authorized to sign receipts for planes leased under this agreement and also setting forth the names and titles of persons authorized to accept delivery of such planes and of receipts executed by the other party. Such letters may be amended from time to time by the President or a Vice-President of the party making the amendment, and such amendments shall become effective upon delivery thereof to the President or a Vice-President of the other party.

8. *Designation of Owner and Operator of Plane*: While operating a leased plane hereunder each party shall display on the forward cabin wall of such plane, visible to passengers, a sign of the style and size mutually agreed upon, disclosing the name of the owner and the name of the operator of the plane.

9. *Tickets*: Tickets and other documents sold by either party hereto for connecting schedule transportation shall distinctly show that the trip north of the Canal Zone is being made via PAA and the trip south of the Canal Zone is being made via Panagra, all in accordance with the standard forms of interline tickets now in use by the parties hereto. All revenues from the transportation of passengers, express and mail on schedules operated north of the Canal Zone by PAA with leased Panagra planes shall be for the account of PAA to the same extent as on schedules operated by PAA planes. All revenues from the transportation of passengers, express and mail on schedules operated by Panagra south of the Canal Zone with leased PAA planes shall be for the account of Panagra to the same extent as on schedules operated by Panagra planes.

[fol. 3579] 10. *No Control over Other Party*: The scheduled times of arrival and departure of connecting schedules at the Canal Zone shall be from time to time determined by the parties hereto in the public interest to provide convenient and advantageous hours for the departure and

arrival of passengers, mail and express and as may be required from time to time by the Postmaster General of the United States pursuant to the provisions of Section 405(c) of the Civil Aeronautics Act of 1938 or amendment thereof. Each party shall have the exclusive right, subject to the orders of the Civil Aeronautics Board or other governmental authority having jurisdiction thereof, and to the provisions of paragraph 4 of this agreement; to fix the scheduled stops to be made on its route or routes. Nothing contained in this agreement shall be construed (a) to grant to either party any right whatever to determine whether any trip of the other party shall be operated or cancelled either in whole or in part, or (b) to exercise any control over any operation or business or affairs of or interest in the other party.

11. *Rental for Planes*: The respective lessees shall pay as rental for the planes leased hereunder sums determined as follows:

(a) There shall be determined the total cost to PAA of the planes owned by it of the type or types leased to Panagra, and the total cost to Panagra of the planes owned by it of the type or types leased to PAA. Such cost shall be the cost of the aircraft fully equipped, including instruments, aircraft communication equipment and miscellaneous flying equipment, but excluding engines and propellers, delivered and ready for use on the routes of the lessor including engineering and development expense and the cost of ferry flights.

(b) Panagra will pay to PAA as monthly rental for the PAA planes, a sum determined by dividing the cost of the PAA planes, determined as provided in subparagraph (a), by, and multiplying the quotient by, a fraction of which the denominator is the total hours flown by such PAA planes during such month and the numerator is the hours flown by the PAA planes during such month on the routes of Panagra.

(c) PAA will pay to Panagra as monthly rental for the Panagra planes, a sum determined by dividing the cost of the Panagra planes, determined as provided in subparagraph (a) by and multiplying the quotient by a fraction of which the denominator is the total hours flown by such Panagra planes during such month and the numerator is the hours flown by the Panagra planes during such month on the routes of PAA.

(d) On or before the 25th day of each month, each party shall certify to the other the information required to make the computations provided for in subparagraphs (a), (b) and (c) for the preceding month, [fol. 3580] and settlements for the rental charge due for each month shall be made on or before the last day of the following month.

12. *Rental for Engines*: The lessee of engines leased hereunder shall pay to the lessor thereof as rental for such leased engines, an amount determined by dividing the cost of each engine so leased by 5000 and multiplying the quotient by the number of hours flown by such engine on the routes of the lessee.

On or before the twenty-fifth day of each month, each lessee shall certify to the lessor the total number of hours during the preceding month the lessee operated engines owned by the lessor.

On or before the last day of each month, the parties hereto shall settle and pay to each other their engine rental accounts for the preceding month as hereinabove determined.

13. *Rental for Propellers*: Each lessee shall pay to the lessor as rental for propellers at a rate of $ for each hour of operation of each of such propellers by the lessee thereof.

On or before the twenty-fifth day of each month, each lessee shall certify to the lessor, the total number of hours during the preceding month the lessee operated propellers owned by the lessor.

On or before the last day of each month, the parties hereto shall settle and pay to each other, their propeller rental accounts for the preceding month as hereinabove determined.

14. *Routine Overhauls of Planes and Equipment*: Each party shall overhaul or cause to be overhauled its planes, including propellers, instruments, accessories and equipment, to be leased hereunder, in accordance with its standard overhaul procedure. In no event shall the character or extent of such overhaul procedure be less than the minimum standards required by the Civil Aeronautics Administration.

Each lessee of planes hereunder shall pay to the lessor thereof a reasonable hourly charge for such overhaul.

On or before the last day of each month, the parties hereto shall settle and pay to each other their plane overhaul accounts for the preceding month as hereinabove determined.

15. *Overhauls of Engines*: Each party shall overhaul or cause to be overhauled its engines and engine accessories, including carburetors, spark plugs, magnetos, etc., to be leased hereunder, in accordance with its standard overhaul procedure. In no event shall the character or extent of such overhaul procedure be less than the minimum standards required by the Civil Aeronautics Administration.

[fol. 3581] Each lessee of engines hereunder shall pay to the lessor thereof a reasonable hourly charge for such engine overhaul.

On or before the last day of each month, the parties hereto shall settle and pay to each other their engine overhaul accounts for the preceding month as hereinabove determined.

16. *Replacement of Parts*: The entire cost of necessary replacements of major parts of planes, such as wings, control surfaces, propellers, instruments, plane accessories, engine accessories, landing gear and tires (so far as such replacements may be due to wear and tear arising out of the routine operation of the planes) shall be borne by the

owner of the plane on which such replacements are made. In the event any such replacement shall be made to a leased plane by the lessee thereof, the owner shall pay the lessee the reasonable cost thereof which shall be deemed to be the cost to the lessee of the replacement part, and the cost to the lessee for the direct labor involved in making such replacement, plus a charge for overhead not to exceed per cent. of such direct labor cost.

On or before the last day of each month the parties hereto shall settle and pay to each other their parts replacements accounts for the preceding month as hereinabove determined.

17. *Inspection and Maintenance Service*: Each of the parties shall give to the leased planes, engines and propellers of the other party plane, engine and propeller inspection and maintenance service of the same extent and general character as is performed by such party with respect to the planes, propellers, instruments, accessories and equipment owned by it; provided, however, that inspection and maintenance at the Canal Zone shall continue to be performed by PAA under existing arrangements whereby Panagra reimburses PAA for Panagra's ton-landing proration of expenses, and arrivals of leased planes at and departure of leased planes from the Canal Zone on the routes of the lessees shall be considered for purposes of such a proration as arrivals and departures of planes owned by the lessees. Such plane, engine and propeller inspection and maintenance service shall be not less in character or extent than the minimum standards required by the Civil Aeronautics Administration. No charge shall be made by either party against the other for inspection or maintenance service except in respect of the services rendered by PAA at the Canal Zone as aforesaid.

18. *Ferry Trips*: On all ferry trips required to provide planes where needed, the hours flown thereon shall be included in the monthly total of the company operating such ferry trips, and shall be taken into consideration in the same manner as pay trips in determining rentals and charges as hereinabove provided. Flight tests and other

non-revenue flights shall likewise be included, but time spent in loading and unloading, warm up, and engine tests shall not be included.

[fol. 3582] 19. *Gasoline and Oil*: Immediately prior to delivery of each leased plane hereunder, the delivering party, at its own cost, shall fill the gasoline tanks to the extent of gallons and the oil tanks to the extent of gallons. Upon the termination of this agreement, each plane in the possession of a party hereto as lessee shall be returned to the other party at the Canal Zone with gallons of gasoline in the gasoline tanks and gallons of oil in the oil tanks.

20. *Oil Costs*: The lessee of engines leased hereunder shall pay to the lessor thereof the cost of oil placed in such engines at hour intervals after drainage, at the rate of $. p. hour of operation of each of such engines by the lessee thereof.

The lessor of engines hereunder shall reimburse the lessee the lessee's cost of oil placed in the lessor's engines by the lessee, after drainage.

On or before the last day of each month the parties hereto shall settle and pay to each other their oil accounts for the preceding month as hereinabove determined.

21. *Damage to Planes*: Each party hereto shall have the right to inspect each plane before accepting delivery from the other party, and the acceptance of such plane shall constitute an admission by the receiving party that the plane, including engines, propellers, accessories and equipment, is in good operating condition. Each party shall be responsible for all damage to planes in its possession caused by, or arising out of crash, fire, windstorm, land damage, or other casualty, and if such plane belongs to the other party, the cost of repairing the same shall be paid, or caused to be paid or borne by the party having possession of the plane when the damage occurred. If such damage constitutes the destruction of a leased plane, engine, or propeller, the party having possession thereof at the time

of destruction shall pay or cause to be paid to the owner an amount equaling:

(a) The cost of the plane and equipment, excluding engines and propellers, determined as set forth in sub-paragraph (a) of paragraph 11 less a deduction at pro rata of per cent. per month from the date of acquisition to the date of destruction;

(b) The original cost of each engine less a deduction of one-five thousandth of such cost for each hour of operation thereof;

(c) The original cost of each propeller less a deduction of $. for each hour of operation thereof;

and the party paying or causing to be paid such amount shall thereupon become the owner of such plane and equipment, engine or propeller, and all salvage thereof.

[fol. 3583] 22. *Liability and Property Damage Insurance*: During the term of this agreement, each of the parties hereto shall keep in full force and effect at its expense, insurance policies, written by responsible insurance companies, insuring and covering each of the parties as their interests may appear against liability for loss, injury, damage or claims arising out of or in connection with injuries to or deaths of passengers, injuries to or deaths of third persons, and damage to or destruction of property caused by or arising out of the operation of or possession of any plane under this agreement, and such insurance shall be so maintained by each party in the following amounts and with the following limits:

Passenger liability insurance not less than for each passenger, with a limit of not less than for any one accident.

Public liability insurance not less than for each person, with a limit of for any one accident.

Property damage insurance not less than for any one accident.

23. *Indemnity.* The lessee shall in each case indemnify, protect and save harmless the lessor against any and all loss or damage which the lessor may sustain by reason of damage to property and injuries to, or deaths of, persons caused by the operation of, or the possession of, planes under this agreement while in the possession of the lessee, unless the negligence of the lessor, jointly or severally, proximately caused such damage, injuries or death. Each party shall be responsible for the loss of or damage to any removable plane equipment installed in any plane in its possession.

24. *Baggage.* In the event of loss of or damage to baggage or personal effects of a passenger on a connecting schedule trip, the party whose act or omission caused the loss or damage shall be solely responsible to the passenger, and in case of inability to prove where or under what circumstances the loss or damage occurred, any liability therefor shall be shared equally by the parties hereto.

25. *Definitions.* The term "month," as used in this agreement, shall mean a complete calendar month, except when applied to the first month hereunder which shall be the period from the effective date hereof to and including the last day of such month.

26. *Compliance with law, etc.* All planes operated hereunder shall at all times be so equipped, operated, and maintained as to comply in all respects with the rules and regulations of the Civil Aeronautics Administration or any other governmental authority having jurisdiction thereof. Each pilot or co-pilot operating any plane hereunder shall be a pilot or co-pilot qualified to act in such capacity in accordance with the rules and regulations of the Civil Aeronautics Administration or any other governmental authority having jurisdiction thereof.

[fol. 3584] 27. *Taxes.* In the event that either PAA or Panagra shall be obligated to pay any sales or use taxes on commodities or materials purchased to operate, maintain or repair leased planes or equipment or accessories relating thereto, such taxes shall be considered a part of the cost

of the commodity, material or repair work involved and shall be charged and prorated as above set forth.

28. *Access to Books and Records*: Each party hereto, or a representative designated by it, shall have the right of access, during the term of this agreement and within a reasonable time after the expiration thereof, to the books and records of the other party for the purpose of verifying flying hours, costs and expenditures pertinent to this agreement.

29. *Effective Date*: Leasing of planes hereunder, if any, shall commence and the effective date of this agreement shall be days from the execution hereof.

30. *Government Approval*: This agreement shall not become effective unless approved by the Civil Aeronautics Board pursuant to Section 412 of the Civil Aeronautics Act of 1938, as amended. If this agreement is not so approved, the negotiation and terms hereof and any application filed or acts done hereunder shall be without prejudice to the future position of the parties. Nothing in this agreement contained shall be deemed to constitute a modification or waiver of any prior agreements or understandings between the parties or between Pan American Airways Corporation and W. R. Grace & Company.

31. *Orders*: This agreement shall be subject to any applicable, valid, and final rules, regulations, or orders that may now exist or that may be adopted hereafter by the Civil Aeronautics Board or by any other lawfully constituted and empowered governmental authority having jurisdiction.

32. *Term*: This agreement shall continue in force until terminated by either party thereto upon years' advance written notice thereof mailed or delivered to the other at its principal office in New York City, N. Y.

Upon termination of this agreement, planes, engines, propellers, instruments, accessories and equipment owned by each party, but in the possession of the other party at the date of termination, shall be returned to the owner at the Canal Zone.

IN WITNESS WHEREOF, the parties hereto have caused this agreement to be duly executed this day of 194 .

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 405

TESTIMONY OF MR. H. J. ROIG
CAB DOCKET NO. 779
September 30, 1943

p. 1146:

BY MR. REYNOLDS:

Q. Now, Mr. Roig, if you will turn, please, to PG-2 on page 5, which is minutes of Pan American-Grace Airways meetings. The pages are not numbered, but it is the last page for the minutes of the meeting of March 18, 1931.

(Discussion had off the record.)

Q. Referring to the statement which you made, which begins the long paragraph on that page, if you want to read it while we wait—

The Witness: I would like to. Yes, I have read it.

Q. What is the proposed extension to which these remarks referred?

A. As I recall it, it was a Pan American extension from Rio or Santos to Buenos Aires on the East Coast.

pp. 1148-1149:

Q. What happened after this statement on the minutes was made?

A. I am not in a position to state beyond the fact that I was told that the suggestion was continued. Ultimately the East Coast route was extended to Buenos Aires without any reduction of the Panagra services.

Q. Or Panagra compensation for mail?

A. That is correct.

Defendants.

I. TESTIMONY OF JUAN T. TRIPPE IN CAB DOCKET 779 WHICH PAN AMERICAN INTENDS TO OFFER IN EVIDENCE

pp. 1499-1506:

By Mr. Friendly:

Q. Now, will you go back to the early days and tell us what were the plans of Pan American for the development of its route in the year 1927?

A. Pan American's plans in 1927 were to create an American flag system of air transportation in Latin America in competition with the French and German lines which had already established themselves there.

Q. In connection with your testimony as to these early days, have you examined certain documents to refresh your recollection as to precise dates and the like?

A. Yes, I have examined the historical documents which are in one of the exhibits here, and also certain other documents which will be presented in the course of my testimony.

Q. Did Pan American's plans in 1927 include an airline down the West Coast?

* * * * * * *

A. They did from the onset.

Q. Will you tell us, please, who were the owners of Pan American Airways in 1927?

* * * * * * * * *

[fol. 3591] A. The ownership in 1927 was divided between a group composed of former pilots who had served in the first world war, including myself, and another group headed by R. F. Hoyt of Hayden Stone & Company, who represented several large stockholders and who was chairman of our Board.

Q. What were the first steps which you took toward carrying out the plans that you mentioned for an airline down the West Coast of South America?

A. We investigated the operating feasibility of a route down the West Coast and examined the statistics on passenger travel and mail travel to the countries to be served.

Then we set about to acquire the necessary operating rights.

Mr. Cahill: May I have the "we" defined, please?

The Witness: The Pan American Airways, Inc.

* * * * * * * *

Q. What did Pan American do to secure these operating rights?

A. Pan American found that the situation in Colombia was extremely complicated, and I shall come back to this problem and cover it in detail.

We determined that the country where it was most practical to get ourselves established was Peru. We were very fortunate in that there was already operating in Peru a company controlled by Mr. Hoyt and his associates known as Huff Daland Dusters, Inc. This company had initiated the dusting of cotton by airplane in the southern United States and was engaged in dusting operations in Peru.

Q. Can you tell us who were the officers of Huff Daland at that time?

A. Mr. Edgar Gott then president of Keystone Aircraft Corporation was president of Huff Daland, and Mr. C. E. Woolman and Captain now Colonel, Harold Harris were vice presidents.

[fol. 3592] Q. Mr. Woolman is the gentleman who is now vice president of Delta?

A. That is correct.

Q. Did Pan American determine to work through Huff Daland to acquire operating rights in Peru?

A. Yes. Mr. Hoyt took the position, with which I thoroughly agreed, that since Huff Daland was already on the ground in Peru and since Mr. Woolman and Colonel Harris were understood to enjoy the respect of the Peruvian Government, it would be much better to proceed through Huff Daland and then, after these operating rights had been secured, merge the Huff Daland organization and equipment into Pan American.

Q. Were the arrangements as to the acquisition of rights by Huff Daland embodied in writing?

A. Yes, they were.

* * * * * * * * *

Q. Did you meet Colonel Harris at about this time?

A. Yes, I did. Colonel Harris had pioneered the dusting of cotton both in Louisiana and in Peru, and both he and Mr. Woolman had acquired considerable experience in operating aircraft in that country. I had Colonel Harris meet Mr. Priester, our chief engineer, to discuss the technical problems involved.

From that time on we worked very closely with Colonel Harris in regard to the negotiations for the Peruvian operating rights, and with plans for our West Coast air transport operation generally.

* * * * * * * * *

Q. Where were these first conferences between Colonel Harris, yourself, and Mr. Priester?

A. They were in New York.

[fol. 3593] Q. When did they occur?

A. Toward the end of 1927.

Q. When did you see Colonel Harris again?

A. He returned to Louisiana and afterward I met him at Havana early in 1928 where we had further discussions.

Q. Meanwhile did Mr. Woolman institute negotiations

for the concession in Peru pursuant to the letter which is page 1 of Exhibit P-34?

A. Yes, he did.

Q. And were those negotiations successfully concluded?

A. Yes, under date of May 29, 1928, Huff Daland was awarded an operating concession and under date of June 27 an airmail contract.

Q. And are those the documents that appear on pages 2 to 19, inclusive, of Exhibit P-34?

A. Yes, those are.

Q. Now, at about the time when these operating rights were secured, was there a change in the arrangements between Pan American and Huff Daland, and, if so, tell us what that change was?

A. Yes. As a result of discussions between the officers of the two companies, during the spring of 1928, it was agreed that Huff Daland should continue in its dusting operations and that Pan American should take over the concession for the air transport operations. Accordingly a new arrangement was made between Mr. Gott and myself whereby Pan American would take over only the Peruvian operating concession and airmail contract.

Q. Was the arrangement between you and Mr. Gott embodied in a letter dated June 20, 1928, a copy of which appears on page 42 of Exhibit P-34?

A. It was.

[fol. 3594] Q. Up to this time had any arrangements been made for any participation by W. R. Grace & Company in the airline which Pan American was setting up down the West Coast?

A. No, not to my knowledge.

Q. Was Pan American taking other steps in May, June, and July of 1928 to carry out its program for air transport service in Latin America?

A. Yes. During June, 1928, we revised our corporate structure and raised some two and a half million dollars of new capital. On July 13, 1928, we were awarded two important foreign airmail contracts, one a contract known as foreign airmail route No. 5 from Florida to the Canal Zone with a provision for an extension along the north coast of South America, and the other known as Foreign Airmail Route No. 6, Foreign Airmail Contract No. 6, and

the other known as Foreign Airmail Contract No. 6, from Florida to Puerto Rico, with a provision for an extension to Trinidad.

Q. What steps did Pan American take to avail itself of the Peruvian concession?

A. We had considerable discussion as to setting up the corporation which was to take over the Peruvian concession and airmail contract. It was our thought at the time that it might—

pp. 1508-1519:

Q. Would you continue, Mr. Trippe?

A. It was our thought—and I would say again that I refer to the officials of Pan American Airways at the time—that it would be best to have the Peruvian corporation organized for this purpose.

Our idea was that this Peruvian corporation would initially operate the portion of the route in Peru under subcontract from Pan American Airways along the same lines [fol. 3595] as subsequently was done in Mexico and Brazil, and that after the service had been established for a time, the American flag company, Pan American Airways, would take over, as was done later in Mexico and Brazil.

Our Board of Directors authorized this at a meeting on July 18, 1928.

Q. Does a copy of that resolution appear on page 43 of Exhibit P-34?

A. It does.

Q. What else was done with a view to taking advantage of the Peruvian concession?

. . . . . .

A. Our vice president and counsel was asked to prepare a detailed plan for the organization of this company.

Mr. Cahill: Who is he, if I may ask.

Mr. Friendly: That was Mr. Thach.

The Witness: Mr. Thach at the time.

A. (Continuing) He did this under date of August 1, 1926.

Q. Does a copy of that plan appear on pages 44 and 45 of Exhibit P-34?

A. It does.

Q. What else was done by Pan American at this time with respect to operations in Peru?

A. Pan American also gave consideration to the personnel of the company. We felt it extremely desirable that the company should have the advantage of the services of Colonel Harris who was already personally familiar with air operations on the West Coast of South America. It was arranged that he was to become the vice president and operations manager of a wholly-owned Peruvian company with headquarters in Lima.

[fol. 3596] It was to serve as president of this Peruvian company and other officers of Pan American were to hold the other corporate offices except for an assistant secretary and an assistant treasurer to be located in Lima.

Q. Did Pan American do anything about procuring equipment at this time?

A. Yes. We ordered the fleet of S-38's including equipment for the initial operation of the sector between the Canal Zone and Guayaquil. Pan American used two of these planes to initiate this operation for account of Pan American-Grace in 1929.

Q. Had Pan American done anything to secure operating rights in other countries along the West Coast route?

A. In the summer of 1928 Mr. Woolman, for Pan American's account, and acting on its behalf, had instituted negotiations for operating rights in Ecuador. Pan American Airways had instituted negotiations in its own name to secure operating rights in Pan American, rights not only for operations in Central America and the North Coast of South America, but also down the West Coast of South America.

Q. What was being done about Colombia at this time?

A. We were negotiating with Dr. von Bauer, but at this time, namely the spring and early summer of 1928, we had not succeeded either in arranging for the purchase of control of his Colombian company, the Scadta, or in getting his consent to any other arrangement whereby we could operate through Colombia.

Q. Will you tell us, please, who Dr. von Bauer was?

A. Dr. von Bauer was an Austrian. He was the manager and part owner of the air transport company which had been established in Colombia early in 1920, known as Scadta, and, which took over a previous effort by French interests in Colombia which had failed.

[fol. 3597] The principal stockholders of Scadta were Dr. von Bauer and his brother, both Austrians.

Dr. von Bauer, along with Dr. Olaya Herrera, Colombian Minister to Washington, had represented Colombia at the Havana International Aviation Conference, and he was the principal spokesman for Colombian aviation there.

Dr. Olaya Herrera later became president of Colombia. He was a close personal friend of Dr. von Bauer.

Q. How did you meet Mr. von Bauer?

A. I met him through Mr. Hoit, our Board Chairman.

Dr. von Bauer or his brother, in some way, had been associated with Mr. Hoit's firm in the cotton business.

Q. Why did you go to Dr. von Bauer in connection with obtaining the right for Pan American to operate through Colombia?

A. Dr. von Bauer had been working for some years on plans to expand Sacada to the South through Ecuador and into Peru; to the north through the Canal Zone and Central America to the United States, and to the East as well.

Q. By east, you mean into Venezuela?

A. Into Venezuela and Curacao. He also had been working on a direct Caribbean service from Barranquilla via Kingston to points in Cuba and thence to the United States. In fact, he was attempting to expand his company in all directions and at the same time retard the expansion of the United States service south of Panama.

Dr. von Bauer had not succeeded by the summer of 1928 in getting rights to operate to the Canal Zone or into the United States.

Q. Had Pan American developed any other plan? By "other" I mean other than an arrangement with Dr. von Bauer, to acquire a position in Colombia and secure operating rights for its services along the north and west coast of that country.

[fol. 3598] A. Yes. There had been organized in 1927 a Colombian company known as Sacada for the purpose of operating in Colombia in competition with Scadta including both transportation and aerial mapping work in that country. A substantial interest in this company was owned by Mr. Sherman Fairchild and Mr. Graham Grosvenor who became directors of our company in the summer of 1928.

We worked out a program with Mr. Fairchild and Mr. Grosvenor whereby we could acquire 70 percent of this company, the balance to continue to be owned by Colombian business people.

Pan American expected, through Sacada to set up a competitive transport service in Colombia, both on the Magdalena River and on the so-called circular land plane route.

* * * * * * * * *

A. (Continuing) Pan American expected, through Sacada to set up a competitive transport service in Colombia, both on the Magdalena River and on the so-called circular land plane route connecting a number of the important cities in Colombia such as Bogota and Medellin with Barranquilla on the north coast and Cali on the west coast.

Q. Who was to work out these arrangements in Colombia?

A. Mr. H. Case Wilcox, now a colonel in the United States Army.

Q. Did you personally have discussions with Mr. Wilcox in the summer of 1928?

A. Yes, I did.

Q. Did Mr. Wilcox proceed immediately to Colombia at that time?

A. No, he did not.

Q. Can you tell us why?

[fol. 3599] A. He was unable to proceed at the time but he did go to Colombia for us about four months later.

Q. Now, let us see if we can summarize the situation as it existed at this time: Pan American had an operating concession in Peru?

A. That is correct.

Q. And it had instituted negotiations for the necessary rights in Panama and Ecuador?

A. That is correct.

Q. And it had these arrangements to which you have testified with regard to Colombia?

A. That is correct.

Q. And it had ordered equipment to enable it to begin operations over the northern part of the west coast route?

A. It had.

Q. And it had arranged for the services of Colonel Harris on the west coast of South America?

A. Yes, and it had the United States mail contract for the route from Miami to the Canal Zone.

Q. When did you first hear of a proposal—and by "you" I mean you personally—that W. R. Grace & Company might take an interest in the company that was to operate under the Peruvian concession?

A. I did not hear of it until around August, 1928.

Q. How did you hear of it?

A. Mr. Hoit told the officers of Pan American that he had conversations with Mr. Iglehart, and I think Mr. Patchin of the Grace Company, whereby the Grace Company might acquire up to a 50 percent interest in our route from the Canal Zone down the west coast of South America.

Mr. Reynolds: Mr. Friendly, if you don't mind, when you summarized, you did not give a time. Is it your point in [fol. 3666] Mr. Trippe's testimony that all of these arrangements summarized had been completed before any connection with Grace arose?

The Witness: That is correct.

Mr. Friendly: I was referring to the end of July or the early part of August, 1928.

Q. Did you see Colonel Harris again at about this time?

A. Yes. Colonel Harris had come to New York for discussions with us as to the steps to be taken in setting up the operations in Peru. At about this time Colonel Harris informed me that at Mr. Hoit's suggestion he had met with certain officers of the Grace Company.

Q. Did Colonel Harris give you this information in writing or orally?

A. In writing and also orally.

Q. Did Mr. Hoit ask you in 1928 to prepare a memorandum of the plan and transmit it to the Grace Company?

A. He did.

Mr. Friendly: I would like to have marked for identification a document entitled dated, August 15, 1928, and headed draft memorandum, west coast operations.

Q. Is the document marked Exhibit P-148 the document which you prepared?

A. It is.

Q. Did you transmit this document to the Grace Company?

A. I did.

Q. To whom?

A. To Mr. Cogswell.

Q. Did you send a copy of it to Mr. Hoit?

A. I did.

[fol. 3661] Q. Did you receive any communication from him about it?

A. I did.

Mr. Friendly: I would like to have marked for identification as the exhibit next in number P-149, a copy of a letter dated August 17, 1928, from Mr. Hoit to Mr. Trippe.

pp. 1525-1526:

Q. Did Pan American, under the letter of August 31, 1928, act and join with Grace in organizing Peruvian Airways Corporation?

A. Yes.

Q. When was the organization meeting of Peruvian Airways Corporation held?

A. On September 6, 1928.

Q. And at that time did Pan American and Grace each subscribe to half of the capital stock of Peruvian?

A. They did.

pp. 1529-1531:

Q. Mr. Trippe, you have before you the letter of August 31, 1928, which appears on Page 46 of Exhibit P-34. I ask

you whether any suggestion was made before the sending of that letter that the company which is described in the fourth paragraph of that letter, in which Grace was given an option to participate, might operate north of the Canal.

A. There was not.

Q. After the receipt of the letter of August 31, 1928, what was done to carry out the plan which is set forth in it?

A. Peruvian Airways Corporation was organized. Mr. Harris was elected vice president, and I as Pan American's nominee was elected president and in charge of the company's operations as provided under our arrangement with the Grace Company.

The other three officers—Mr. Patchin, Mr. Bush, and Mr. Cogswell—were Grace officials.

[fol. 3602] Q. Now, would you turn, please, to Pages 48 through 50 inclusive of Exhibit P-34, and I ask you whether the extracts from the minutes of the meeting of Peruvian Airways Corporation set forth on those pages correctly describe the action taken at the meeting of September 6, 1928.

A. They do.

Q. What was done next to initiate operations in Peru or on the West Coast?

A. We arranged to have operations actually initiated by Mr. Woolman in the name of Huff Daland for the account of Peruvian Airways Corporation between Lima and Talara on September 13, 1928, utilizing one of the single-engine Fairchilds which Huff Daland had already in Peru. At the end of the month—

Q. (interposing) That is, the month of September, Mr. Trippe?

A. That is right. At the end of the month of September Mr. Harris arrived in South America and undertook a survey of the complete route from the Canal Zone to Valparaiso.

On November 28, 1928, Huff Daland concession was transferred into the name of the Peruvian company.

Q. Did the negotiations which Pan American had had instituted in Ecuador and Panama, to which you have testified, bear fruit?

A. Yes. The negotiations instituted by Mr. Woolman in

Ecuador during the summer of 1928 resulted in a contract obtained by Colonel Harris on February 22, 1929.

Early in 1928 Pan American obtained operating rights in Panama. The portion of these relating to the West Coast was subsequently assigned to Pan American Grace.

Q. In the fall of 1928 did you have any discussion of the Colombian situation with representatives of W. R. Grace and Company?

[fol. 3668] A. Yes. We had several meetings during the fall of 1928 in Mr. Hoit's office.

Mr. Hoit, Mr. Patchin, the Grace vice president representing Grace, and Mr. Cogswell was also there most of the time.

Q. Mr. Hoit and you represented Pan American; is that correct?

A. That is correct.

Q. Would you tell us what took place at those meetings?

A. We went over the entire program with respect to Colombia.

I recall that we discussed it at great length, working from a map which hung on Mr. Hoit's wall.

Mr. Patchin confirmed that the rights along the West Coast would be obtained through our Colombian company for the joint company if Grace decided to come in, that similar rights would be obtained through our Colombian company for Pan American along the north coast, and that operations in Colombia would be conducted by our Colombian company itself.

Q. When you refer to the Colombian company you mean the company which you have previously described, known as Sacada?

A. That is correct.

Q. Did Mr. Patchin approve that program?

A. Yes; it is my recollection that he did.

Q. What did you do then with respect to Colombia?

A. We went actively ahead with the plan for solving the Colombian problem through our Colombian company Sacada.

Early in January Mr. Wilcox was able to leave for Colombia.

pp. 1532-1537:

Q. Is the document which has been marked for identification as Exhibit P-150 the letter of instructions which you gave to Mr. Wilcox prior to his departure for Colombia? [fol. 3604] A. Yes, it is.

Q. And does Paragraph 3 of the document, which has been marked P-150, embody the program which had been worked out at these meetings in Mr. Hoit's office with respect to Colombia?

A. Yes, it does exactly as cleared.

* * * * * * * *

Q. How did you intend the program, which is outlined in Exhibit P-150, to tie in with the arrangements set forth in the letter of August 31, 1928, from W. R. Grace and Company, in the event that Grace decided to exercise its option to take up to a 50 percent interest in the company to be formed?

A. The West Coast franchise from the Panamanian border to the Ecuadorian border was to permit the Colombian company Sacada to operate as subcontractor to the International American Flag operator which would be the joint enterprise in the event Grace exercised their option, or Pan American if they did not.

Q. Would you please explain to us what you mean by subcontracting?

A. Yes. There were several cases where our American flag company, operating the international service, for one reason or another, was unable to operate on its own account and had to subcontract sections to a national company—an associated national company.

For example, early in 1929 we had to subcontract operations to Mexico City to our Mexican subsidiary, and this continued for some years.

A similar arrangement was also carried out in Brazil with respect to operations along the East Coast.

Q. That is, before Pan American Airways, Inc. had a right to go through Brazil in its own name?

[fol. 3605] A. That is correct.

Q. Were those subcontracting arrangements which you described known to the Post Office Department?

A. Yes, and approved by them.

Q. What happened in connection with the Colombian situation after your letter of January 5, 1929, to Mr. Wilcox?

A. Dr. von Bauer stopped at New York, returning from Berlin to Colombia, early in January 1929.

Q. Did you have any discussions with him?

A. I told him we were disappointed at the fixed position he had taken during the past year, and that Pan American was proceeding to organize its own operations in Colombia, having given up hope of working in Colombia through Scadta.

Q. Did Dr. von Bauer's point of view, as to making some arrangement with you, change after you had told him this?

A. It did, completely, and he was willing to deal with us.

Q. Did you come to an understanding with him?

A. We reached a general understanding, but he was unwilling to enter into a formal contract at that time.

Q. Was your understanding oral or in writing?

A. It was oral.

Q. Can you tell us the general terms of the understanding?

A. The general basis, as I recall it, was as follows: Pan American agreed to buy von Bauer's stock, his brother's stock, and any other European-owned stock that he could acquire and tender to us, provided that the total amount tendered was sufficient to give us complete stock control of the company.

He was to withdraw at once all opposition to the granting of permission by Colombia to our operating along both coasts of Colombia.

[fol. 3606] The management of Scadta was to remain in his hands. Representing the Colombian postal administration he was to conclude a postal agreement with the United States Post Office Department covering the onward dispatch of Colombian airmail.

He would give us the exclusive use of Scadta's facilities on the north and west coast in order to permit us to organize through services quickly.

Also it was agreed that at such time as we acquired a stock control of Scadta he would interpose no objections to Scadta operating only in the interior of Colombia, and

would give the Pan American Airways system preferential end-on connections at Colombia border ports.

Q. Did Dr. von Bauer lay down any conditions in regard to this understanding?

A. He did. Dr. von Bauer insisted, as a condition of the deal, that the entire arrangement be kept entirely confidential.

He took the same position when the formal contract was executed a year later, permitting us only to tell our general counsel Mr. Elihu Root and Mr. Friendly, who prepared the contract, and our board.

Q. What reasons if any did Dr. von Bauer give for this position?

A. He stated that it would be impossible for him to go back to Colombia if it were known that he was preparing to sell the controlling stock in the Colombian airline to American interests, particularly in view of the prevailing strong anti-American sentiment that prevailed in Colombia at that time.

He also pointed out, in view of the political situation, that we would not be permitted to hold the Scadta investment if the fact of our ownership became known in Colombia.

[fol. 3607] Finally, he pointed out that it would make it impossible for him to continue as the head of the Scadta organization, especially after the violent anti-American attacks that he had personally brought about in the public press and elsewhere during previous years.

Q. Did Dr. von Bauer carry through under the understanding that you have just described?

A. Yes, he did.

Q. What did he do?

A. He went at once to Washington to see the Colombian minister.

Q. Who was the Colombian minister at that time?

A. It was Dr. Olaya Herrera to whom I have already referred.

Q. What other steps did Dr. von Bauer take in pursuance of the understanding which he had with you?

A. By a letter dated January 28, 1929, he confirmed that part of the arrangement relating to the use of Scadta's facilities on the west coast of South America.

pp. 1537-1538:

Q. Can you fix the date of your understanding with Dr. von Bauer to which you have testified?

A. I cannot remember the exact date. However, I do remember that the arrangement was made at my apartment and on a Saturday or Sunday approximately a week or ten days before this letter of January 28, 1929, which you have shown me.

Q. Did you advise the State Department of the arrangements which you had made with Dr. von Bauer?

A. Yes. I advised the Secretary on a personal and confidential basis.

Q. Did you communicate to any officer of W. R. Grace and Company at the time the results of your conference with Dr. von Bauer?

[fol. 3608] A. I did tell them, about this time, about the agreement for the use of the facilities, but did not feel able, under the circumstances, to tell them the rest.

p. 1540:

Q. Taking the question as revised, Mr. Trippe, will you tell us how you planned, under your understanding with Dr. von Bauer, to work out the operation down the west coast?

pp. 1541-1542:

A. Under our arrangement with Dr. von Bauer we expected that it would be possible for the American flag services to operate along the coasts of Colombia in their own name.

Under the previous program relating to Sacasa, of course, we would have had to operate along the coast by subcontract to this company.

Q. Did you consider that this change would be an advantage or disadvantage to the proposed joint company in the event that that was formed?

A. This would be, in my opinion, a very great advantage to the proposed joint company if it were formed, and to Pan American Airways if it were not.

Insofar as the service in Colombia was concerned the change would merely substitute Scadta, a going organization, authorized to operate in Colombia, for a company which hoped to secure such rights.

In this connection, I think it would be of interest to the record to point out that Scadta is the oldest airline in the Western Hemisphere, and generally understood to be the oldest airline in the world along with KLM; the national airline of the Netherlands.

Q. Was one of the purposes for making the arrangement with Dr. von Bauer the opening of the way for the west coast airline?

[fol. 3669] A. Definitely. That was the most pressing reason for making the arrangement.

Q. Was an agreement subsequently made between the United States Government and the Colombian Government with respect to operating rights for air transport companies?

A. Yes. There was an agreement entered into between the two governments.

p. 1546:

Q. Now, coming back to the fall of 1928, will you tell us what other steps you took with a view to inaugurating air transport service down the west coast?

A. Pan American prepared very detailed and elaborate estimates as to the capital required for the proposed service.

Q. Did you submit those to W. R. Grace and Company?

A. Yes, we did.

Q. For what purpose?

A. For the purpose of enabling them to determine whether they wished to take up their option to the stock of the through airline, and of agreeing upon the capitalization of the airline in the event that they decided to come in.

pp. 1548-1550:

Q. How was the matter of the capitalization of the proposed joint company finally settled?

A. We finally compromised by setting up the company months later, with a capitalization of only one million dollars in lieu of the two million which Pan American had believed to be proper.

Q. Up to the end of January 1929 had Grace exercised its option to subscribe for any part of the stock of the company which was to be formed to operate from the Canal down the West Coast?

A. Not to the best of my recollection.

* * * * * * *

[fol. 3610] Q. Can you tell us when Grace did exercise its option to subscribe for half of the stock of the company to be formed to operate from the Canal Zone down the West Coast?

A. My recollection is that we were informed of Grace's final decision only a day or two before they actually subscribed on February 21, 1929.

Q. Did you submit the bid for Contract F.A.M. 9?

A. Yes. I was authorized by Pan American-Grace to submit a bid on this contract.

Q. And the bid so submitted appears on Pages 67 to 70 of Exhibit—well, without going into the pages, the bid you have before you—P-34—did you submit the bid which appears on Pages 61 to 64 of Exhibit P-34?

A. I did.

Q. And on March 2, 1929, Pan American-Grace was awarded the contract as appears by the order on Page 65?

A. That is correct.

Q. And the contract itself appears on the pages immediately following.

You executed that contract on behalf of Pan American-Grace Airways?

A. I did.

pp. 1556-1557:

Mr. Friendly: I would like to have marked for identification a document headed "Immediate Release, March 2, 1929, Information Service, Post Office Department."

Examiner Brown: The document referred to may be marked Exhibit P-156.

(The document referred to was marked Exhibit No. P 156 for identification.)

Q. Have you ever seen the document which has been marked P-156 before?

[fol. 3611] A. I have.

Q. Is it the press release which was issued by the Post Office Department at the time of the award of the contract for Foreign Airmail Route No. 9?

A. It was.

pp. 1599-1601:

Q. Reference has been made in prior testimony, Mr. Trippe, to a company operating between the Canal and Medellin, Colombia, known as UMCA. Does Pan American own a majority of the stock of this company?

A. Yes, we do.

Q. Who owns the rest of the stock?

A. A Colombian citizen, a Dr. Mejia.

Q. Can you tell us the circumstances under which Pan American came to acquire its ownership in this company?

A. Yes. Dr. Mejia had been interested in the development of cargo service by air from points in Colombia to the Canal and other areas. He had secured from the Colombian Government an exclusive franchise to operate air services from Medellin to the Colombian border at the Gulf of Uraba, the concession covering a zone 50 miles on either side of the line from Medellin to the Gulf. The concession also provided 12 months within which to make a survey and bring in outside interests to assist him in the development of the operation.

All this had occurred without any participation on our part. After acquiring the concession, Dr. Mejia came to New York to seek to interest capital. In the spring of 1931 he made an arrangement with us whereby we would undertake the survey and if this proved successful would join with him in the organization of a company to operate under the concession.

Q. Was the survey made?

A. Yes, it was made by Mr. Allan Winslow and by Captain Fred Clark, one of our senior pilots.

[fol. 3612] Q. Who was Mr. Allan Winslow?

A. Mr. Winslow was an American ace in the last war and the first American flier to bring down a German plane. He represented Pan American in Colombia at the time.

Q. Was the making of this survey by Pan American publicized in the Colombian press?

A. Yes, very extensively.

Q. Did Pan American thereafter proceed to organize, with Dr. Mejia, a company which is known as UMCA?

A. Yes, it did. UMCA is an abbreviation, the full corporate title being Uraba, Medellin, and Central Airways, Inc. UMCA is a Delaware Corporation.

Q. Was the concession with respect to operations between the Canal and Medellin, which had been originally granted to Dr. Mejia, subsequently transferred to UMCA?

A. Yes. In 1932, by formal action of the Colombian Government.

pp. 1606-1610:

Q. There has been testimony that in the fall of 1937 there occurred another discussion or controversy about the Cali operation. Would you tell us what gave rise to that, please?

A. The controversy followed the unfortunate loss of one of Pan American-Grace's two S-43's in attempting a night landing near the Canal. Since the operations could not be sustained with the one remaining S-43 and since the S-43's had proved to have insufficient capacity for this route as we had anticipated, there was another opportunity for considering the question of the equipment on the bottleneck between the Canal Zone and Guayaquil.

Q. What position did the Grace directors take at this time?

[fol. 3613] A. They wished to substitute twin-engine land planes and out through Cali on an interior route over which the type of plane proposed would have very considerably restricted carrying capacity.

Q. By the way, I think in that question I used the general term "the Grace directors"; actually, your conversations at this time were carried on almost entirely with Mr. Roig and Mr. Garni, were they not?

A. That is correct.

Q. And Mr. Patchin and Mr. Cogswell simply appeared at the directors' meeting and acted in accordance with the same views which Mr. Garni and Mr. Roig had expressed?

A. That is the case.

Q. And on your side the discussions were carried on primarily by yourself and Mr. Rihl with some participation by Mr. Young?

A. That is correct.

Q. Mr. Morris didn't get into these operating questions very deeply, either, I take it?

A. That is also correct.

(Discussion had off the record.)

Q. What position did Pan American take in these discussions?

A. We felt that this proposal was distinctly against the interests of Pan American-Grace, and we again advanced the proposal of a nonstop direct operation between the Canal Zone and Guayaquil which we had been urging since 1933.

Q. Why did Pan American take that position?

A. The proposal of routing the international services on an interior route through Cali meant that all of our international passengers would have to be hauled on a roundabout course involving two crossings of the Andes [fol. 3614] and more than 180 miles longer than the direct route, although the direct route could then be operated by four-engine flying boats, and, of course, could be operated with even greater speed and capacity by the four-engine land aircraft which were expected to be soon available.

Q. Were detailed estimates of the relative speed and cost of operation with an S-42-B nonstop between Cristobal and Guayaquil and of operation with a DC-3 on the route through Cali prepared at this time?

A. Yes. The matter was gone into very thoroughly. Detailed estimates of the S-42-B operation were prepared by our staff and estimates of the DC-3 operation were made by Mr. Vidal, and each of them checked the other estimates.

Q. Did Pan American's proposal at this time contemplate that Pan American-Grace must purchase flying boat equipment from Pan American?

A. Not at all. We offered either to sell this four-engine equipment or to charter it or to work out any other equitable arrangement that would enable this direct service to be instituted.

Further, because of the fears expressed by the Grace Directors as to the cost of operating the larger equipment, we offered a demonstration service of from three to six months under which Pan American itself would absorb any differential in the cost of operating the direct route with the four-engine equipment as compared to the estimates submitted by Mr. Vidal for operating the twin-engine land types.

Q. Just so the record may be clear, Mr. Trippe, there has been testimony as to an offer of a somewhat similar character made by Pan American in earlier years with respect to the S-43. I want it to be clear that this was an offer with respect to the S-42-B as against the DC-3; is that correct?

[fol. 3615] A. That is correct.

Q. You do recall a somewhat similar offer having been made in the earlier discussions of the S-43 as against the S-42-B?

A. That is also correct.

Q. Why was Pan American willing to make this offer?

A. For two reasons: first because of our interest in overcoming the Pan American-Grace bottleneck and offering greater capacity for through business to South America, and second because of our own interest in getting more business for our four-engine equipment between the United States and the Canal.

Q. Did Pan American's proposal contemplate that Pan American-Grace should entirely omit Cali by flying the direct route?

A. No, and I would like to stress this point. Our proposal contemplated that Pan American-Grace could carry the through traffic on the short low altitude direct route and would continue to serve Cali via a spur or shuttle route. We believed that this would provide maximum capacity and service for the whole west coast operation, and at the same time better serve Cali on the west coast of Colombia as well.

Q. In these discussions as to the land plane service into Cali at the end of 1937 as distinguished from the discussions in late 1936 and early 1937, to which you have testified with regard to the operation of the S-43 into Cali, did any question arise as to possible conflict between the proposed operation into Cali and Pan American's position in Scadta?

A. No. You understand that operation in Cali had actually been instituted before this time.

Q. That is, operation by Pan American-Grace?

(fol 36161) A. That is correct. We took the matter of the new land plane route up with Dr. von Bauer and he again agreed to support on the part of Scadta Pan American-Grace's application with the Colombian Government for an interior west coast route.

Q. Do you know whether Scadta did in fact cooperate in the establishment of this overland route by Pan American-Grace?

A. I know only that Mr. MacGregor expressed appreciation over the attitude and cooperation which Dr. von Bauer had extended.

pp. 1611-1612:

Q. Did the Pan American-Grace management in the discussions in late 1937 and early 1938, recommend the operation of twin-engine land plane interior services to Cali?

A. Yes, they did.

Q. Did that recommendation have any effect upon Pan American's action?

A. Yes, it did. It was only because of their recommendation that is, the recommendation of the management that Pan American agreed to this operation.

Q. Does Pan American now feel that the decision made in 1938 to operate all of the through west coast flights via the interior land plane route through Cali was wise?

A. We do not, and have not at any time since. We believe that through traffic to Ecuador and points south should be by direct four engine service and that Cali should be served by a scout or shuttle service as we have urged since 1938.

Q. What are the reasons for that, briefly?

A. We think that this twin engine service on a round

about route through the mountains of Colombia is decidedly [illegible] to the direct service to Ecuador, Peru, Bolivia, Chile, and the Argentine, that could have been offered by Pan American Grace in connection with, first with the four engine S 42's, and later with the four engine Boeing 307's, and that Cali should be served by local trips or shuttle service in addition to the through international schedules. Much as on the east coast we run certain express services and other local services.

pp. 1613-1617:

Q. Did Medellin come into the discussions that took place in 1937?

A. Yes, in a certain way.

Q. Would you please state how?

A. The Grace directors were interested in being able to utilize Medellin as a refueling stop.

Q. Was there any discussion of Pan American Grace stopping at Medellin as a regular port of call for taking on and discharging traffic?

A. I think it was mentioned by the Grace directors, but we took the position that Medellin was not within Pan American Grace's territory and I understood that they agreed.

Q. Was there any further discussion on this subject?

A. Yes, there was some discussion as to what would happen if Pan American Grace should stop at Medellin for refueling, and there should then be pressure, either real or synthetic, for Pan American Grace to accept traffic at that point. We took the position that if Grace was in agreement with us as I understood they were, that Medellin was not in Pan American Grace's territory, that they should be willing in that event either to shift the route or to transfer the revenue from such traffic to Pan American in whose territory Medellin was situated.

[illegible] Q. After the discussions in 1937, was there any further suggestion of Pan American Grace's operating into Medellin by the Grace directors?

A. I don't recall any except when they suggested that Pan American Grace purchase our interest in LAMCA and

thereby acquire by agreement the right to operate in this territory.

Q. Did Pan American at any time in these discussions in the fall of 1937 and early 1938, or for that matter, at any other time, suggest that it would withdraw its proposal of a nonstop service between Cristobal and Guayaquil if Grace would agree that Pan American-Grace was never to operate north of the Canal?

A. No. We never have made any such proposal.

Q. Why is that?

A. We felt that this question was covered in our original agreement and to our mind it had nothing whatever to do with the method of providing better service between the Canal Zone and the west coast countries.

Q. Was this matter of operation by Pan American Grace between the Canal and Miami injected into the discussions in regard to Cali?

A. Yes, it was.

Q. When and by whom?

A. It was brought up by Mr. Garni at a meeting in my office immediately before the directors' meeting on January 27, 1938, at which we provided a quorum to enable the Grace directors to vote through their proposal for the interior land plane route.

Mr. Garni asked whether if Grace would not push its program for this interior route Pan American would agree to turn over to Pan American Grace the service between the Canal Zone and Miami.

Q. Who else was present at that meeting?

[fol. 3619] A. Mr. Rihl and Mr. Roig, and Mr. Rihl made a record of the discussion immediately thereafter, and I have checked my own recollections against this.

Q. By the way, Mr. Trippe, where is Mr. Rihl now?

A. Mr. Rihl is now in Brazil.

Q. Could you tell us generally how long he has been there and what he is doing?

A. He has been there nearly a year, and he is engaged in active work with the Brazilian Government having to do with negotiations between our Brazilian subsidiary, Panair do Brasil, and the Brazilian Government with which the War and Navy Departments are also concerned.

Examiner Brown: We will take about a two minute recess.

(Whereupon a short recess was had)

Examiner Brown: Will you proceed, Mr. Friendly?

Q. Mr. Trippe, after this incident of January, 1938, to which you have just testified, when did W. R. Grace & Company next bring up the question of Pan American Grace's coming through to the United States?

A. Shortly after the Civil Aeronautics Act was passed in the summer of 1938.

Q. What position did Grace take at that time?

A. Grace demanded that they be allowed to take over control of Pan American Grace Airways through the purchase of additional stock, and that the Pan American Grace route be extended to some point in the United States such as New Orleans under their management.

Q. And what position did Pan American take?

A. Pan American stated that it was not interested in considering any such demand.

Q. Did Pan American give any reasons for this?

[fol. 3620] A. We considered, as we have always considered, that the operation conducted by Pan American Grace Airways is a part of the Pan American System and that it was our air connection down the west coast connecting with our trans-Caribbean and Central American services.

Q. What did Pan American suggest in an effort to meet the situation?

A. We suggested again that this conflict of interests be settled through a buy or sell arrangement.

Q. How was it that Pan American was willing to make this buy or sell offer in 1938?

A. Because we were convinced that this part of our system could be made more valuable to us than to W. R. Grace & Company.

Q. Did this buy or sell idea interest Grace & Company?

A. Yes, it seemed to at first. They went into the whole matter, examined the figures, and made us an offer.

Q. What was the offer?

A. Mr. Garni said that the top figure that he would recommend was $1,250,000 for our half interest.

Q. And what position did Pan American take in regard to this?

A. Pan American's position was that it would pay substantially more than that for Grace's half interest.

Q. Did you inform Grace & Company of Pan American's position?

A. I did, and by letter.

p. 1617:

Q. What happened after you wrote this letter?

A. Nothing happened for some time. Then there was an exchange of letters between Mr. Iglehart and Mr. Whitney, then chairman of our Board.

[fol. 3621] pp. 1619-1623:

Q. After this meeting of the Pan American Board of Directors which was held on December 28, 1938, were there further talks between Mr. Iglehart and Mr. Whitney?

A. Yes, there were.

Q. Did those talks lead to any proposal being submitted?

A. Yes, they did lead to a proposal.

* * * * * * *

Q. Is the document which has been marked for identification Exhibit P-166 the proposal by W. R. Grace & Company in January, 1939?

A. It is.

Q. Is that the proposal which was discussed at the meeting of Pan American's executive committee on January 17, 1939, which appears on pages 42 and 43 of the Exhibit P-37?

A. It is.

Q. The minutes state that the meeting disapproved the proposed arrangement for granting authority to negotiate a standard of connecting service required of this company, under paragraph 2 with definite provisions for arbitration. Can you tell us why the Pan American directors disapproved the proposal which is Exhibit P-166?

A. The principal objection was that the only standard applicable to the connecting service was Grace's "reasonable satisfaction."

Q. Did you subsequently discuss this matter with Mr. Roig?

A. Yes, I did.

Q. Referring to Paragraphs 2 and 5 of the document which has been marked P-166, did Mr. Roig state whether Mr. Iglehart intended the arbitration provisions of Paragraph 5 to apply to the connecting service matter that is referred to in Paragraph 2?

[fol. 3622] A. Yes. He said that Mr. Iglehart had not so intended.

Q. Did Mr. Roig then make a substitute proposal?

A. Yes, he did.

Mr. Friendly: I would like to have marked for identification as Exhibit P-167 a paper consisting of one paragraph.

Examiner Brown: The document will be marked Exhibit No. P-167.

(The document referred to was marked Exhibit No. P-167 for identification.)

Q. Is the paper which has been marked P-167 a copy of the substitute proposal with reference to arbitration which was made by Mr. Roig?

A. Yes, it is.

Q. Did Pan American refuse to accept this also?

A. Yes, it did.

Q. Why?

A. Because although the language was different, the effect was just the same as the proposal which we had already turned down, namely, that if Mr. Iglehart disagreed with Mr. Whitney, the case was decided against us.

Q. And after this the arbitration clause in the agreement of February 14, 1939, which appears on page 16 of Exhibit P-35 was finally worked out and agreed upon?

A. That is correct.

Q. What reasons led Pan American to enter into the agreement of February 14, 1939?

A. We had tried every other compromise without success. We knew that because of Mr. MacGregor's desire to retire a new issue would shortly arise in an attempt to secure an independent president. It seemed best in the

interests of avoiding a stalemate that we accept the Grace suggestion on management in return for their agreement that the issue of the extension was not to be raised again [fol. 3623] except on the finding of an arbitrator that our connecting service was inadequate. We were, of course, also mindful of the ill effects of a public quarrel between the two principal American flag transportation systems in Latin America, ours in the air and Grace on the water.

Q. At the time of the 1939 agreement, did Pan American consider whether the agreement required approval by the Civil Aeronautics Authority, as it then was, under the section of the Act relating to acquisitions of control?

A. No. We did consult counsel on the question whether the agreement was one requiring approval under Section 412 of the Act, and were advised that it was not.

Q. Do you know the extent to which the matter was submitted to the Civil Aeronautics Authority?

A. Yes. I was present at a meeting where this problem was discussed with members of the staff of the Authority. There were present at this meeting Mr. Pogue, who was then general counsel; Mr., now Lieutenant Colonel, Gates; Mr. Cogswell; Mr. Cooper; Mr. Friendly; and myself, Mr. Cogswell representing Grace, and Mr. Cooper, Mr. Friendly, and myself, Pan American.

Q. Can you tell us what took place?

A. There was a good deal of discussion as to whether the agreement was one between air carriers. To the best of my knowledge, the question whether the agreement was subject to Section 408 of the Act was not discussed at all.

Q. Was Mr. Roig at that meeting?

A. He was not.

Q. Did the members of the Civil Aeronautics Authority staff who were present express any opinion on its behalf?

A. No, the discussion was entirely informal and both Mr. Pogue and Mr. Gates made it clear that they could not and would not attempt to commit the Authority as to whether the agreement should be filed.

[fol. 3624] Q. And was the agreement ever filed?

A. Not to the best of my knowledge.

pp. 1623-1627:

Q. When did Grace next bring up the proposal that Pan American Grace extend to the United States?

A. In the fall of 1940.

Q. What reason did they give for bringing up the matter at that time?

A. The reason given was the application which had been filed by American Export Airlines for a certificate between New Orleans and the Canal Zone. They said they were afraid that American Export would get this route as against Pan American, and would then find that the New Orleans-Canal Zone route did not offer sufficient traffic in and of itself, and would probably seek to extend its lines down the west coast in competition with Pan American Grace.

Q. In connection with this request by Grace, was any complaint made concerning the connecting service of Pan American between Miami and the Canal?

A. Not to my knowledge.

Q. Was any claim made by that time of breach by Pan American of the February, 1939 agreement?

A. No.

Q. What happened when the proposal was made?

A. We told the Grace people that we could see no reason for departing from our agreement of 1939 and that we were not impressed by the reasons which they had advanced.

Q. Was the proposal dropped?

A. We heard nothing further about it for some months.

Q. When did Grace again bring up this matter of extending Pan American Grace north from the Canal?

A. They brought it up again in the spring of 1941.

[fol. 3625] Q. What reason did they give for bringing it up again at that time?

A. It was again the New Orleans issue, which was now about to be heard.

Q. Were there further discussions of the matter during the spring of 1941?

A. Yes, there were, largely with Mr. Rihl.

Q. Was there any change in Pan American's position?

A. No. Not at all.

Q. Some reference has been made to the failure of the Pan American directors to attend meetings of the Board of Directors of Pan American-Grace at this time, which were called to consider the proposal that we have been discussing. Can you state what the reasons were for this?

A. The reasons were stated in a letter which Mr. Rihl wrote to Mr. Roig while I was absent from the country.

Q. I call your attention to page 28 of Exhibit P-33, which contains a letter dated June 19, 1941, from Mr. Rihl to Mr. Roig. Is that the letter to which you refer?

A. Yes, it is.

Q. This same exhibit contains on pages 30 to 32, inclusive, certain correspondence as to a request made by Pan American for a stockholders' meeting. Why did Pan American ask to have that meeting called?

A. We thought it would be well to have such a meeting at which the company's position would be confirmed by formal vote so that there would be no reason for Grace to keep bringing this matter up again in the future.

Q. Did Pan American attend the stockholders' meeting?

A. No they did not.

Q. Why not?

[fol. 3626] A. The night before the meeting our counsel, Mr. Friendly, and I were summoned to Washington on what we considered a very important War Department matter. We asked for an adjournment for several days over the fourth of July week end, but Grace declined to accord this.

Q. Were you advised by Grace during July that unless Pan American would consent—this is July, 1941—that unless Pan American would consent to the filing of an application by Pan American-Grace for an extension north of the Canal, Grace would file an application for the New Orleans-Canal Zone route on behalf of its 100 percent owned subsidiary, Gulf and Caribbean?

A. Yes, we were so advised.

Q. Did Pan American make any request that Grace should not file that application?

A. None at all.

Q. Were you also advised by Grace during July that unless Pan American would consent to the filing of an application by Pan American-Grace, the Grace Company would request the Civil Aeronautics Board to institute a proceeding to determine whether Pan American was justified in the position it had taken?

A. Yes; that is correct.

Q. What did Pan American do as a result of that?

A. We told Grace that we had an agreement with them made in 1939 which provided for arbitration on this very question of an extension by Pan American-Grace north from the Canal Zone, and that although they had made no claim of any breach on our part under the agreement, we were entirely willing to go to arbitration on the agreement as provided.

Q. Did Grace advise Pan American of its position in writing?

A. Yes, it was.

[fol. 3627] pp. 1698-1700:

Q. Now, let's get back to where we were. We just had marked for identification, I think, Exhibit P-168, which is a letter from Mr. Iglehart to Mr. Whitney. I don't recall whether you had stated whether that is a copy of a letter that was received by Mr. Whitney at about that time.

A. Yes, that is the letter.

Q. You testified this morning as to the position which Pan American took in regard to this proposed extension at the time and I ask you how Pan American's position was conveyed to W. R. Grace & Company.

A. It was conveyed by Mr. Whitney in two telephone calls to Mr. Iglehart, made during the meeting of our executive committee on July 21, 1941; both of these were heard by the other directors present as well as myself, and they were later confirmed in writing.

Q. Now, is the writing to which you refer the letter of July 22, 1941, which appears on page 36 of Exhibit 35?

A. Yes, it is.

Q. Did Mr. Whitney ever say to you that he did not consider the arbitration provisions of the agreement of Febru-

ary 14, 1939, to be applicable to an extension of Pan American Grace to New Orleans?

A. No. Not only did he never say this to me, but his telephone talks with Mr. Iglehart during the meeting of our executive committee on July 21, 1941, which I heard, in which he requested arbitration under the 1939 agreement, related specifically to an extension to New Orleans.

Q. Would you turn, please, to page 24 of Exhibit P-37? There is a minute of the meeting of the executive committee held on July 22, 1941, which authorized the forwarding of a written communication confirming the telephone request which Mr. Whitney made to Mr. Iglehart for arbitration. Was Mr. Whitney present at that meeting?

[fol. 3628] A. Yes, he was, and our minutes so show.

Q. Did Grace ever answer the letter of July 22, 1941, proposing arbitration?

A. Not to my knowledge.

Q. Didn't they ever answer it?

A. Well, not for four months, and then only after we had again offered to arbitrate under our agreement.

pp. 1703-1704:

Q. Following Mr. Ribl's letter of July 22, 1941, did you have any further discussions with Grace & Company in regard to the Canal Zone-United States service?

A. Yes, we did.

Q. Will you please state what they were?

A. Late in July or early in August, 1941, Mr. Roig suggested that Pan American and Pan American-Grace might arrange for an interchange of equipment along the general lines of the interchange agreement between United Airlines and Western Air Express which had already been approved by the Civil Aeronautics Board.

I remember that Mr. Roig had the Board's opinion with him at our conference.

Q. What did you say to that proposal?

A. I said that it seemed a very constructive proposal and that I would be glad to discuss it further.

Q. Will you tell us, please, why Pan American looked with favor on this proposal?

A. For a number of reasons. We thought that the interchange of four-engine equipment between the two com-

panies at the Canal would be of benefit to the traveling public, eliminating the bottleneck between the Canal and Guayaquil. We thought it would be an operating economy to both companies as well. In addition, Mr. Roig's suggestion appeared to provide a solution for a principal, [fol. 3629] long standing controversy between our two companies which was distasteful to all concerned.

Q. Did you take the matter up with your executive committee?

A. Yes, I did, and they were unanimous in approving the interchange program.

p. 1704:

Q. Now, in putting this matter up to you, did Mr. Roig state that his proposal was an interchange along the general lines of the United Airlines-Western Air Express arrangement?

A. He did.

pp. 1705-1706:

Q. How was this matter of the interchange left by you with Mr. Roig?

A. There were a number of questions that were left open for further discussion. For one thing, the discussion had started on the basis that the northern half of the interchange arrangement should be the route between the Canal Zone and New Orleans for which Pan American had applied. However, Mr. Roig said that he would like to consider whether we would be willing to make the arrangement apply to the Canal Zone-Miami route either in substitution for or in addition to New Orleans.

Q. That he would like to consider or that he would like you to consider?

A. He would like me to consider.

Q. All right.

A. There were questions such as how we would arrange to have approximate equalization of the mileage flown by each company's planes on the question of flight crews and other operating details. While, of course, we did not reach an agreement on all these matters, we were close enough together to take the matter up with counsel.

[fol. 3630] Q. I will ask you whether Mr. Roig stated at the time of your conference with him that he would not ac-

cept any arrangement that would involve a reciprocal interchange.

A. He did not.

Q. Was a draft of an interchange agreement sent?

A. Not for some time. During the next two weeks Mr. Friendly had conferences first with me, then, I understand, with Mr. Cogswell and Mr. Roig, and still later with Mr. Roig and myself. As a result of this last conference we asked Mr. Friendly to work up a draft of an interchange agreement for consideration. Then Mr. Friendly was taken ill, and was out of the picture for several months. In the meantime all of us in Pan American were very much occupied with getting a trans-African transport and ferry route to the Middle East organized, and under way. This project was of such a nature that it took precedence over either Pan American or Pan American-Grace business. As a result, we did not have time to follow up on the interchange agreement.

Later such a draft was prepared by other counsel and was sent to Pan American-Grace early in November.

Q. By "other counsel" you mean other people in our office, do you not?

A. That is correct.

pp. 1707-1708:

Q. Had there been any changes in the equipment situation since your discussion with Mr. Roig in August, which affected the interchange agreement?

A. Yes. All my discussions with Mr. Roig on the interchange agreement had dealt with the interchange of four-engine equipment. By the late fall it was known that neither company could receive any of the four-engine land aircraft which it had ordered until the spring of 1943. As a result of [fol. 3631] this, the the only aircraft which could practicably be chartered were our Boeing 307's. We were not in a position to make a firm commitment with respect to these particular aircraft at the time nor did we ask any such commitment from Pan American-Grace, but we thought it desirable to set up a flexible arrangement under which these aircraft could be operated through to Guayaquil if they were available and Pan American-Grace was willing to accept them.

Q. Was Pan American willing to enter into an interchange agreement with Pan American-Grace along the lines of the United Airlines-Western Air agreement?

A. We definitely were, and have ever since, and are today. The United Airlines-Western Air interchange deal was an agreement entered into between two completely separate companies for the purpose of providing a through service of advantage to the public and also of advantage to both carriers. We, in Pan American, have never understood why our joint company should not be allowed to enter into such an arrangement with us. If the draft which we submitted differed in certain respects in form from the United Airlines-Western Air agreement, it was not our intention to depart from it in substance,—

* * * * * * * *

A. (Continuing)—and if Mr. Roig had desired to work out an arrangement along the United Airlines-Western Airlines ideal, we would have been entirely receptive to any suggestion for changes in the language of the draft.

p. 1709:

Q. Would Pan American have been willing to consider any other suggestions in regard to the draft interchange agreement which it submitted?

A. Yes, of course we would. The document submitted was our draft and we were and always have been willing to discuss the matter.

[fol. 3632] Q. Did you ever hear anything further from Mr. Roig about the interchange arrangement?

A. Yes. We got a letter from him.

Q. When was that?

A. Some weeks after we had sent him the agreement, and I think the day before Grace & Company filed its petition to have Pan American-Grace required to extend to the United States.

pp. 1717-1718:

Q. Was it [problem of Pan American-Grace extension in northern Argentina] so arbitrated?

A. No, it was not.

Q. Why not?

A. We had another meeting with the Grace people at which we suggested the name of an arbitrator. They agreed

to take his matter under consideration. We urged that the arbitration be held as soon as possible and be in as simple form as possible. However, we were not able to get Grace to proceed with this arbitration.

Q. Did Grace deny that an agreement for payment to Pan American had been made?

A. No, not to my knowledge.

Q. Was this matter discussed in connection with the February 1939 agreement?

A. No, not to my recollection.

Q. Has the matter been dropped by Pan American?

A. Only in the sense that after several unsuccessful attempts to get Grace to proceed with the arbitration we did not keep bringing the matter up.

pp. 1746-1743:

Q. I think we have now reached a point where it is appropriate for me to ask you the question which was suggested be deferred yesterday:

[fol. 3633] To summarise the reasons why Pan American has refused to consent to Grace's request that Pan American-Grace be authorized to apply for an extension of its route north from the Canal.

A. Pan American Airways, as early as 1927, had taken steps to organize an airline from the United States to the Canal Zone, and from the Canal Zone down the West Coast of South America.

A United States airmail contract between the United States and the Canal Zone was awarded the company in July 1928.

Prior to that time the active steps which I have mentioned have been undertaken by Pan American to provide service along the west coast.

This was all sometime before there was any arrangement for any possible participation by Grace & Company.

When Grace & Company finally did come into the picture it was only to take a $25,000 participation in a small company which we were to operate in Peru, with an option to buy a half interest in our west coast airline if they decided to do so at a later date.

It was understood that, in the event Grace should decide to exercise their option, our through airline down the west coast was to be under our trade name, which there was also a definite understanding covering the territory to be served by the jointly owned company in relation to other parts of Latin America which were either already served or for which plans were under way on the part of Pan American.

In either words, the airline down the west coast of South America was either to be owned 100 percent by Pan American, or in the event Grace exercised its option it would be owned more by Pan American and up to 50 percent by Grace & Company.

In either event it was to be an integral part of the Pan American system under our operating control, just as much [fol. 3654] so as the line down the east coast of South America, or any other of the Latin American trunk line services that Pan American Airways system has developed in South America.

The West Coast airline is an end on carrier to our trans-Caribbean and Central American services. We have no competitive interests against it.

Every through air passenger down the west coast is a passenger carried over the Pan American lines either across the Caribbean or through Central America, and every through passenger coming from the west coast is a through air passenger over our trans-Caribbean or Central American services.

In this respect our trans-Caribbean and Central American services, together with the west coast service, provide a through Pan American system air service to west coast points and via the west coast to Buenos Aires, just as our service down the east coast of South America provides a through Pan American system air service to east coast points and via the east coast to Buenos Aires, except that Grace, having exercised its option, acquired as our partner on the west coast, a 50 percent interest in the profits or losses of that sector.

Grace's suggestion that this west coast line of the Pan American system in which they are given the opportunity to acquire 50 percent of the stock be now made a competitor

to Pan American Airways is, in our view, a breach of the agreement between the two companies, which was first made in 1928, and which was reaffirmed in 1939.

If this company, in which Grace has had an option to purchase up to 50 percent were to be extended to Miami the company originally created to serve as our end on connection for our Miami Canal Zone service would become the means of destroying that service, at least so far as through traffic to the West Coast of South America is concerned, [fol. 3635] and thereafter Pan American-Grace Airways would not be part of the Pan American Airways system as it was set up to be, and which it has been all these years, but would be an airline competing with Pan American.

In this respect the effect on Pan American Airways of what is proposed here is quite different from that of the proposal that a competitive outside airline be authorized to fly between the United States and the Canal Zone, or even down the West Coast.

Under such a situation Pan American-Grace would continue to be a part, and a most important part, of the Pan American system.

The issue, therefore, as we see it, is not simply whether Pan American-Grace Airways should be allowed to fly between the Canal Zone and Miami in competition with Pan American, but also whether our west coast line now operated by Pan American-Grace Airways should be separated from the system, and Pan American would thereafter be deprived of the benefits of its end-on connection to west coast points which Pan American itself had under way before any arrangement with Grace, and which Pan American-Grace was organized to provide when Grace took up its option.

For these reasons, our directors have felt that the interests of our 9,000 stockholders in every state in the Union would be so prejudiced by this proposal of Grace that we were bound to oppose it in every way.

* * * * * * *

[fol. 3636] By Mr. Cahill:

pp. 2034-2036:

Q. Continuing on this Cali stop, Mr. Trippe: in your testimony, you stated on direct that the interior route to Cali involved a course more than 180 miles longer than the direct route to Guayaquil, page 1608. Do you recall giving such testimony?

A. Yes, I do.

Q. By the words "direct route," you are not referring to the route as previously flown along the coast, are you?

A. No, I am referring to the route as proposed by Pan American directors at that time and possible with the four-engine equipment.

Mr. Friendly: What page is that, Mr. Cahill?

Mr. Cahill: 1608.

Mr. Friendly: I can't find it there. If you are not going to offer any more questions, it is not important.

Mr. Cahill: We might as well check it up. I want the full page reference in the record.

(Discussion had off the record.)

Q. This route, you say, the Pan American directors favored, what was that route, Mr. Trippe?

A. It was the route from Cristobal to Guayaquil for the direct trunk line service and the route from Cristobal to Cali or Balboa to Cali for the local service.

Q. Now, this route from Cristobal to Guayaquil: was that the so-called Grace Circle Course or Route?

A. That is right.

Q. Now, this four-engine equipment that you say, the Pan American directors were suggesting at that time, was that land or marine equipment?

[fol. 3637] A. That was marine equipment with indicated delivery of four-engine inland equipment at a later date.

Q. When was the dated date for the delivery of the four-engine land equipment to which you refer?

A. Well, in 1939.

Q. Now, the DC-3 land plane has a faster speed than the marine equipment you refer to, has it not, Mr. Trippe?

A. Yes, slightly faster, block to block.

Q. What would you say—175 as against 150, for the S-42-B?

A. No, it would be my impression, perhaps about eight or nine miles an hour, cruising speed, long distance cruising speed.

Q. I want to be fair to you in these answers. Your own exhibit, I think, shows the deviation that I have suggested, namely 175 for the DC-3 and 150 for the S-42-B.

Examiner Brown: There may be a difference there in the cruising speed and the block to block speed.

Mr. Cahill: And the block to block, that could be?

The Witness: Yes, and, of course, that depends on the distance of the flight. The cruising speed has to come materially down when long distance flights are attempted with the DC-3.

Q. You agree with your exhibit P-161 as to the cruising speeds, do you not? That shows DC-3 cruising speed 175 and S-42-B cruising speed 150.

A. Again, you would have to interpolate as to the distances that you were going to consider the cruising speed at. For instance, if I can illustrate my point: with the four-engine Boeings, we have what we call a short-range cruising speed of around 168 miles an hour and a long-range cruising speed of perhaps 45 miles an hour less. In other words, the cruising speed has a direct relation [fol. 3638] to the distance of the attempted flight. It depends on the horsepower output of the engines and, of course, at a lower cruising speed, a larger pay load is available on extended distances.

pp. 2037-2038:

Q. And did you do it [ask Pan American Grace not to serve Medellin and Turbo]?

A. Some of the Pan American directors did it. Whether I did it or Mr. Rihl did it, I am not sure. The issue definitely came up and I understood was agreed to by the Grace directors at the time.

By Mr. Harlan:

pp. 2129-2130:

Q. Turning to page 16 of this exhibit, the minutes of the executive committee meeting for August 3, 1937; in the last sentence, it is stated there that the president stated that there were "other circumstances," which made it desirable to transfer control of Scadta essentially to a group of native Colombians. Could you tell us what were those other circumstances?

A. Well, as I stated previously, that was about the time that we were suspicious that the Nazis might in some way have gotten control of Dr. von Bauer. We were rather suspicious because of the fact that both at that time and again a year later, there were offers to purchase control of this company by him, and I think the sentence you have reference to probably refers to a statement along those general lines, which I made to the Pan American executive committee as of that date. We had nothing definite to go by but it just didn't seem reasonable that he should be so anxious to pay us what we considered a very attractive [fol. 3639] price for a substantial part of the stock which we owned in the company, and for that reason we more or less began to watch things in a way that we hadn't before, because up to that time there had been no suspicion on our part that he wasn't acting purely as an individual.

pp. 2131-2133:

Q. I understood that reason, that is, that you were afraid there would be a conflict of interest with Panagra, but that was set forth in the preceding sentence, and then there is this sentence which says that there were other circumstances. I wanted to know what the other circumstances were.

A. It seems to me that that last sentence relates to that general subject, that it would be desirable in our opinion to have Pan American Grace hold part of this stock, and if that were not feasible that it would be desirable that control go not to Dr. von Bauer, even though a proposal was made at that time and at a later time which seemed very attractive, that from the point of view of the United States

and American aviation that it would be helpful that none of the preceding two things happen; that the control be placed in native Colombians, but we didn't see how there was any way to bring that about. This stock was bearers stock, you see, and there was no effective way that we knew of that we could assure it being held by any group of native Colombians. They would be free agents and it seemed that Dr. von Bauer was very anxious to acquire this stock and was willing to pay us what seemed to us a very high price to get control of the majority block.

Q. Actually control of Scadta never was put in the hands of the native Colombians; is that not correct?

A. No, the majority stock today is still owned by Pan American Airways.

[fol. 3640] Q. And you don't remember any other circumstances than those you have already related, which made it seem desirable to transfer that control to native Colombians?

A. No. Of course, there was always a possibility there, that air transport might be brought under the same general type of restriction that prevailed with respect to other public utilities in Colombia. In general, public utilities in Colombia were required to be owned, so far as the majority of the stock was concerned, by Colombian nationals, but there again the question of Colombian nationals was difficult for American citizens to qualify for. German citizens would qualify as Colombian nationals by simply taking out papers and retaining their German citizenship as well. The question had arisen from time to time in previous years as to what effect this might have on the American position if a decree law was enacted in Colombia which would bring air transport within the same general type of restriction that applied to other public utilities. As a matter of fact, legislation along those lines was enacted, I believe, a year later, and it was a problem that I think it fair to state caused us and Pan American a lot of headaches and also caused Government officials concerned a lot of headaches.

Q. The legislation which was passed didn't require majority control to be in the hands of natives?

A. Yes, it did.

Q. How does it come, then, that Pan American still controls Scadta?

A. Well, the date on which that legislation will become effective has been postponed. I don't think I can go into that unless we go into executive session.

[fol. 3641] By Mr. Reynolds:

p. 2179:

Q. What about the services.

A. (Interposing) Competitive to a minor degree, I would say.

pp. 2179-2181:

A. . . . .

I should state here also, Mr. Counsel, that under the laws of Colombia, as I referred to earlier this afternoon, there is a requirement that the majority of the stock of Scadta, now called Avianca, be owned by nationals, and the date of that law becoming effective was 1942, so that had not some other circumstances intervened which we can't discuss here Pan American today would not be in a position to have Avianca or what was formerly Scadta as a subsidiary, and it has not been by our action that that situation has continued during the past year.

I think, for the purposes of long range planning, it would be fair to state that Avianca will not be a subsidiary of Pan American Airways.

Q. Mr. Trippe, do you mean to infer that that your stock will be offered indiscriminately to anyone who wishes to buy it, or as a practical matter won't you be a bit careful about this new stockownership interest?

A. To the greatest degree possible, definitely. I might say also in that connection, that the laws of Colombia have been changed so as to provide for registered stock, so that when the stock is ultimately transferred to Colombian interests it will be possible for the Colombian Government to be fully apprised of the ownership of the stock which, of course, is most desirable.

Q. Well, just as a practical matter, there is nothing to interfere in many sales of stock, offering the stock through

[fol. 3642] a bank or through a particular house, and having connected with the sale a privilege of a look at the brochure and determining whether it is acceptable to the seller that the stock will pass to his hands.

Now, there is nothing about the Colombian law or the Colombian setup that changes that picture, is there, Mr. Trippe.

A. Not that I know of. I felt that we have carried this investment at a considerable sacrifice in recent years, a sacrifice to our stockholders and to our company, and I am sure we want to continue to carry it until word is made known to us that the situation has changed.

Q. Now, with respect to the service to the point of Corumba, is there any doubt in your mind but what Pan American and subsidiaries are in a competitive position with Panagra for traffic moving to and from that point, Mr. Trippe?

A. It would be my opinion that there is absolutely no competition with respect to traffic moving there. The route to Corumba, together with our Brazilian company furnishing end-on carrier service between the Atlantic and Pacific Coast.

Q. Traffic from the United States to Corumba, I suppose, is of an insignificant amount, but whatever there is from that point of origin to point of destination, you are in a competitive position; isn't that true?

A. I wouldn't feel so, no, sir, because of the much shorter distance to Corumba by way of the west coast as compared to the service to Rio and thence backtracking to Corumba.

Q. What would you say about Asuncion? Panagra enters into the picture itself there to a lesser extent than the east coast service, does it not?

A. Yes. I don't think Asuncion is all by Pan American-Grace at the present time.

[fol. 3643] Q. Any passenger seeking transportation from Miami automatically would be routed through Rio?

A. That is correct; yes, sir.

pp. 2187-2189:

Q. Of course, before they actually did that, Mr. von Bauer was subject to the direction of Pan American through stock ownership, was he?

A. No, I wouldn't say that Dr. von Bauer was subject to the control of Pan American through the stock ownership. Definitely not through these years. You have got to appreciate the conditions in Colombia as they existed at the time. First, when we brought into the company, there was certainly a great hostility to the United States manifest in a number of directions. The good neighbor policy of this administration had not begun to take effect. Many citizens in Colombia looked back to what they considered the affront of the United States in backing up the independence of Panama and ultimately acquiring the Canal Zone. There was this controversy between Scadta, as then constituted, and our Government in an attempting to get into the United States.

There was the general fear of all North American activities at that time in Colombia.

Q. And Dr. von Bauer was independent enough that he wouldn't follow your direction even though you owned some 80 percent of the stock?

A. Definitely, because we felt that if we had an open controversy immediately there would be enacted legislation that would require that we divest ourselves of a majority of the stock. All other utilities in Colombia were subject to such regulatory legislation, and we felt that with the standing that the directors of Scadta had at the time, and did enjoy for many years thereafter, that an open [fol. 3644] controversy between Pan American and Scadta or Pan American Grace and Scadta could only end in a decree law that would bring about an independence of the company, and we were particularly concerned about that fact for the period 1937 and subsequent years.

p. 2197:

Q. You have testified that your investment in Scadta has not been profitable, as illustrated by the fact that the dividends have only been two and a half percent.

A. Three and a half percent on our investment.

pp. 2214-2216:

Q. Mr. Trippe, why was it that Pan American acquired Nyrba in the first instance? Was it a matter of competitive possibilities or what?

A. No. I think Nyrba was just about ready to fold financially when we acquired them, and I think it was done only after the matter had been taken up with the Department of Justice and approval had to the purchase of Nyrba by that department.

Q. When you purchased Nyrba's entire assets, including aircraft, did you get any concessions or operating rights along in the deal?

A. Some we had to get out of in order to attempt to salvage bonds that were set up. Most of the concessions we thought were liabilities.

Q. In your purchase, you reimbursed Nyrba for its development costs?

A. Yes. Nyrba had on its books, of course, an item representing its own development activity, and I believe the purchase was on a basis of a balance sheet as of a certain date.

Q. The balance sheet included $2,390,776.24, for development costs, according to the exhibits in the Pan American-Latin American rate case?

[fol. 3645] A. I wouldn't recall the exact figure.

Q. You will take that subject to check, anyway?

A. Yes.

Q. And the total book value per share of Nyrba stock was approximately $10. Now, your original deal with Nyrba was to pay them cash, but, as the deal was consummated, you finally did exchange stock; that was the idea, wasn't it, Mr. Trippe? Didn't you pay in stock?

A. I don't think there was any original deal in terms of cash alone.

Mr. Friendly: Do you mind my stating, I have a fairly clear recollection of it. As I recall it, the purchase price was to be paid in two parts—the first half—this is my best recollection, was a specified number of shares of Pan American stock. The second half was to be either a certain

amount in cash or that same amount in cash translated into Pan American stock, at Pan American's option.

Mr. Reynolds: That was the first contract?

Mr. Friendly: That was the only contract. To be complete, I should say that the contract also provided that during the interval between the payment of the first installment and the payment of the second installment, a check would be made of the physical assets that were being transferred, and that to the extent that it was found that any of the representations or warranties which were made in the contract were not fulfilled, an equivalent reduction should be made in the second installment and a reduction was made—of course, I don't remember the exact figure.

A. That summary would be my recollection of the arrangement.

[fol. 3646] pp. 2218-2219:

Q. When you purchased Nyrba, it was still operating from New York to Buenos Aires, was it not, Mr. Trippe, or maybe Florida?

A. I think it was operating all the way through to Santiago, Chile, at least a spasmodic operation. I don't know whether you would grace it with the name "scheduled operation."

Mr. Friendly: Just to get it clear, I just wondered whether you caught the phrase "from New York"?

Mr. Reynolds: I later added "and Florida."

A. It was Miami, I am confident.

Q. Where were they operating in the interior of Argentina when you bought Nyrba?

A. I think on the route Buenos Aires-Cordoba-Tucuman and Salta, would be my recollection. They were also operating across to Santiago, Chile, on the route Pan-American-Grace utilized.

Q. Let's concern ourselves with the operation from Buenos Aires to Cordoba to Salta, and I would like to know, Mr. Trippe, on what frequency Nyrba was operating at the time you purchased it.

A. On that route?

Q. Yes.

A. I wouldn't recall. The whole operation of Nyrba, to the best of my recollection, was spasmodic. In other words, there was no regularity to amount to anything.

pp. 2226-2227:

Q. That 1939 agreement was proposed and entered into so far as Pan American was concerned for the purpose of settling all your disputes and all your issues, wasn't it, Mr. Trippe?

[fol. 3647] A. No. I recall it was set up to take care of this suggestion by Grace that there be a northern extension by Pan American-Grace from the Canal to a point in the States, and we thought that there was definite machinery set up to cover any possibility of Grace asking for such an extension.

pp. 2238-2243:

Q. Now, Mr. Trippe, let's refer to the minutes of Pan American again, P-37, Page 33, meeting of the executive committee of Pan American Airways, Inc., set forth under date of February 4, 1931, at the top of the page. If you will read that extract please.

A. Yes, I have read it.

Q. Can you tell us that that program was discussed with W. R. Grace & Company and was agreed to and put into effect?

A. Well, the program as I understand it relates to the desirability of a uniform postal structure—

Q. (interposing) Tariffs and schedules?

A. Yes.

(continuing)—being quoted to the Argentines government.

That, of course, is necessary under the international postal code practice of the Berne Bureau.

In other words, postal tariffs have to be coordinated not only in general zones but throughout the world. In other words Argentina has to be in a position of quoting its service, we being Argentina's contractor not the American Government's contractor, for postal service to all coun-

tries, including the United States, and obviously it would be impossible to have the Argentine Government in a position to be quoting different tariffs. They are all standardized throughout the world.

Q. This minute, you say, refers only to a uniform postal service as it affects your dealings with the Argentine Government?

[fol. 3648] A. That would be my understanding. And further also, while the quotations to Argentina were in terms of postal gold francs, they had to relate directly to the quotations for service in the reverse direction by the United States Government to the Berne Bureau, which of course were quoted partly in dollars, we being then on a gold standard ourselves, and partly in gold francs, and I think the tariffs were worked out in consultation with the Post Office Department officials concerned in Washington, particularly Mr. Lamielle who was the expert on that subject.

Q. You do have uniform passenger and freight fares also between Miami and Buenos Aires via either coast, Mr. Trippe?

A. Yes, sir. I believe that has been the practice of the companies.

Q. And is that by definite agreement, Mr. Trippe, or by what?

A. No agreement that I know of. It is just a kind of arrangement that is usually entered into by different carriers serving a common point.

For instance, the domestic lines in this country operating, say, between New York and Los Angeles via different routes, will quote the same through tariffs between the common terminals.

Q. Mr. Trippe, has there ever been an occasion during the history of Panagra where lower rates have been proposed for Panagra, or a more rapid schedule has been proposed which you felt should not be put into operation, and therefore opposed, because of its possible effect on the east coast operation?

A. None that I know of. There was one schedule proposed, I recall, of a one-day service between the Canal Zone and Lima which we had certain reservations about as to its

practicability, but it was put in, and I don't believe ever carried out with any degree of regularity, however.

[fol. 3649] Q. That was a question of practicability and not one of faster flying time between Miami and Buenos Aires accomplished thereby on the west coast as compared to the east coast?

A. We had no objection to the schedule being filed, but we felt it was going to be difficult of accomplishment, and it was filed, and I don't think it proved to be practicable in later days.

Q. Since your rates are uniform between the common points Miami and Buenos Aires, and further since the distance actually traveled by Panagra is shorter, Mr. Trippe, just why is it that Panagra cannot operate at a lower rate for that through traffic than Pan American can on the east coast?

Examiner Brown: Will you read the question, please, Mr. Reporter?

(Whereupon the pending question, as above recorded, was read by the reporter.)

Examiner Brown: I don't understand the question, Mr. Reynolds.

Mr. Friendly: I wonder if Mr. Reynolds could rephrase that.

Mr. Reynolds: Yes, I would be pleased to.

Q. As a matter of business operation, Mr. Trippe, couldn't Panagra operate more reasonably from Miami to Buenos Aires in conjunction with the connecting service than Pan American could from Miami to Buenos Aires down the east coast, and thereby afford a saving to the public in lower fares?

A. Well, I think that is a question difficult to answer, Mr. Reynolds. First of all, the difference in mileage is not very substantial, you appreciate, over the cut-off on the east coast. Second, even though there was a fairly substantial amount, isn't that the sort of thing that is often down by carriers working between common terminals?

[fol. 3650] For instance, I have in mind the tariff between Miami and Cali. The distance is longer by way of Cristobal

than by way of Barranquilla, and yet Pan American absorbs a substantial part of the differential, don't you see.

In other words, to make the route by way of the Canal Zone to Cali as cheap, from the point of view of the public, as is the shorter route by way of Barranquilla to Cali.

Q. It is also the most costly route of the two which determines the minimum at which you can get a fare in that instance, is it not?

A. No. I would say it was just the reverse: that it is the lower rate of the two, because the tariff by way of Cristobal, which I have just referred to, I know was reduced to come down to the tariff by way of Barranquilla.

You see, Scadta operating in local currency and quoting their tariffs in Colombian pesos is able to quote a pretty low rate on the sector between Barranquilla and Cali, if my recollection doesn't fail me, and the rate by way of Pan American to Cristobal, and thence to Cali by Pan American-Grace, was reduced to meet the other rate, and Pan American took a substantial part of the reduction on that part of the route.

Q. It hasn't reached a point where anybody is losing any money on it, however; it is just a matter of not quite as much profit on the operation as otherwise would be the case?

Mr. Friendly: I wonder if we have enough data? It seems to me to determine whether you are losing any money you have to get into allocations of cost.

Mr. Reynolds: I think that will be stipulated, Mr. Friendly.

Mr. Friendly: We may be losing money on the whole passenger service.

Q. One other thing, Mr. Trippe, on the matter of rates and fares. If you have any question about my figures I [fol. 3631] assure you that they can be checked by counsel from the exhibits.

I would like to know why, over a period of years, it apparently has been necessary to have from two to five cents per mile higher fare on a mileage basis between Miami and the Canal Zone than it has been on practically any other

segment of the Pan American Airways operations or system.

A. Well, of course, the operation is a very considerably expensive one, as is particularly the case with a nonstop service, or for the service via Camaguey, or even for the service via Kingston as in the early days. The operation between Kingston and Cristobal, for instance, as compared with the operation between Kingston and Barranquilla was about 135 miles longer nonstop flight, and the pay load capacity of the plane was reduced not only to cover the gas for that amount but also the gas for the higher reserve that would have to be carried with the longer route in proportion to the reserve carried on the shorter route.

In terms of pay load it would be my recollection that on the Commodore, for instance, there was frequently eight or nine hundred pounds additional pay load if service to Cristobal was operated via Barranquilla as compared to the service operated direct to Cristobal.

That is a very substantial part of the total pay load available for any equipment then in operation here or anywhere else in the world, and of course that makes the operation more expensive.

Another illustration would be the 307 direct service which would be a very good illustration.

Q. Larger aircraft and so on?

A. Larger aircraft and still a very limited pay load promised even on the carrying capacity of the larger aircraft over shorter distances.

[fol. 3652] p. 2255:

Q. Now, Mr. Trippe, I wonder if you know as yet who drafted the Panagra certificate of incorporation, who drew it up?

A. No, I don't. I have a suspicion, but I don't know.

Mr. Reynolds: Although that is not awfully good evidence, just to assist us, I wonder if we could have his suspicion as a suggestion?

Examiner Brown: I have no objection.

Mr. Cahill: We will state that.

Mr. Reynolds: You have that information?

Mr. Cahill: Yes. It was prepared under the supervision of Mr. Cogswell.

Mr. Reynolds: And is the same true of the Peruvian certificate?

Mr. Cahill: Yes.

II. TESTIMONY OF JUAN T. TRIPPE IN CAB DOCKET 3500 WHICH PAN AMERICAN INTENDS TO OFFER IN EVIDENCE.

p. 3405:

By Mr. Friendly:

Q. Mr. Trippe, have you seen the exhibit which has been identified as Exhibit CON 24, which is entitled "Statement of negotiations relating to agreements between National, Pan American, Panagra, and W. R. Grace and Company"?

A. I have.

Q. Does that exhibit fairly represent what occurred insofar as it relates to meetings at which it is stated that you were present?

A. The meetings referred to occurred many months ago, and stretched over a very considerable period of time. Many different people were present.

[fol. 3653] However, insofar as reference is made to meetings at which I was present, the facts as outlined correspond generally to my recollection.

pp. 3408-3409:

Q. Would Pan American have entered into these agreements with National without a provision for stock participation?

A. No. I am confident they would not.

Q. Would Pan American accept, insofar as you know, a condition approving only so much of these agreements as relate to the leasing of equipment, but without provision for stock participation?

A. No. I am confident our Board of Directors would not accept such an arrangement.

p. 3605:

By Mr. Hardy:

Q. Mr. Trippe, you stated that, with respect to the through flight operations between New York and Latin America, that you would also be faced with foreign competition.

Will Avianca compete with the National-Pan American-Panagra through flight arrangement?

A. Will they?

Q. Yes.

A. As far as I know they will. It would be a matter to be determined by the Board of that company.

Q. Well, Pan American owns what per cent of Avianca?

A. It owns something between 45 and 50 per cent, I believe, and has one director on the Board of Directors.

Q. You do not know what routing Avianca will fly in competition to this arrangement between National, Panagra and Pan American?

[fol. 3654] A. I haven't any idea. Avianca inaugurated their services to the States without any suggestion from us, and without, in fact, knowledge on our part that that decision was going to be reached.

pp. 3641-3642:

By Mrs. Just:

Q. You do know, however, do you not, that Pan American Airways owns certain stock in Latin American companies?

A. That is correct.

Q. To what extent does Pan American participate in their management?

A. Well, as I attempted to outline yesterday, the larger companies in which we hold a minority position operated entirely independently of Pan American Airways.

Take, for instance, our largest single investment, which is Panair do Brasil. We hold one directorship on the Board of Directors of that company.

Without our knowledge, the Board of Directors of that company determined to inaugurate service between Rio and

Buenos Aires paralleling Pan Americans and have actually put such an operation into effect.

I would say that we sit as investors in these Latin American operating companies, in general.

---

p. 3643:

Q. Are there any wholly owned companies other than hotel companies?

A. Of a national character?

Q. Of any character, Mr. Trippe.

A. Well, of course, we have one company here, Uraba, Medellin and Ceatral Airways, that is an American flag company holding a certificate in the United States, that [fol. 3655] operates a small shuttle between the Canal Zone and Medellin, that is a wholly owned company.

Q. And Pan American would participate in the management of that company?

A. Well, we own a hundred per cent of it. The Board of Directors is responsible entirely to Pan American, and it operates as a subsidiary under our management.

TESTIMONY OF R. C. LOUNSBURY IN CAB DOCKET 779 WHICH PAN AMERICAN INTENDS TO OFFER IN EVIDENCE

p. 2904:

By Mr. Friendly:

Q. Now, has it been the practice throughout the years to establish a uniform rate between Miami and Buenos Aires via both coasts?

A. Yes; it has.

Q. And in establishing those rates, whose route is controlling: Pan American or Pan American-Grace?

A. Pan American-Grace route is controlling because it is shorter.

[fol. 3657]

I. TESTIMONY OF H. J. ROIG IN CAB DOCKET 779 WHICH PAN AMERICAN INTENDS TO OFFER IN EVIDENCE

pp. 745-751:

By Mr. Cahill:

Q. Now, Mr. Roig, if you want to resume your seat, I am going to go into the question of the organization of Panagra.

Are you acquainted with a man named Harold R. Harris?

A. I am. Very well.

Q. When, for the first time, did you meet him?

A. I think sometime around '29, '30 or '31. I can't recall the exact date.

Q. Had Mr. Harris been connected with a company known as Huff Daland Dusters?

A. Captain Harris, as he then was, was a World War aviator in the first war. He is at the present time a colonel in the United States Army connected with the Army Transport Service for which service he was released by Panagra at the very special request of General Arnold. His present title is Colonel and if you don't mind, I will call him Colonel.

Colonel Harris, following the first world war, had gone [fol. 3658] to Peru in the employ of Huff Daland Dusters, that company being engaged in dusting cotton by airplane. There is a great deal of cotton grown in Peru and the dusting problem is a serious one, and the airplane provided a method of covering large areas by dusting from the air.

He was connected with that business.

That company had a concession from the Peruvian Government which, in addition to covering its operations in Peru, also authorized it to undertake commercial operations carrying the mail from Peru to the United States.

Q. Now, when and where did you first meet Colonel Harris?

A. Well, as I have said, I don't recall the exact time or place. It was in one of those three years—'28, '29, '30. I met him on the coast in '30. I met him in Panama, I know, in the summer of 1929. Whether I had met him previous to that, I have searched my memory and I just can't be sure.

Q. Do you know what brought Colonel Harris to New York in the spring or summer of 1927?

A. Oh, yes—

* * * * * * *

A. I am very well acquainted as to what happened at that time.

Q. What happened?

Mr. Friendly: I would like to have it made clear in the record.

A. I have had conversations with Colonel Harris as recently as the last ten days.

Q. Now, will you tell us, Mr. Roig?

A. Colonel Harris is a man of a good deal of vision and while he was engaged in his operations in Peru, he had given a great deal of thought to the question of the impor- [fol. 3659] tance of aviation development in South America. He had not merely thought and dreamed about it, but he had made extensive studies, some trips around, and he had collected a great deal of valuable data on the subject. He had gone further and he had actually prepared a map show-

ing prospective routes. That original map still exists. It is an historical document, and I think it ought to be in the record in this case.

Q. I show you this paper and I ask you is this a copy of matter which you told us Colonel Harris had at that time?

A. That is a copy of it.

Mr. Cahill: I ask that it be marked for identification.

Examiner Brown: The document referred to will be marked for identification as Exhibit G-52.

(The document referred to was marked Exhibit No. G-52 for identification.)

A. It is rather interesting to note how closely that map gives the Panagra route as it is operated today including the diagonal service.

It also shows the East Coast route more or less as it was operated prior to the inauguration of the cut-off service between Belem and Rio.

In the summer of 1927—spring or summer, Colonel Harris came to New York with his map and he went to see Mr. Richard Hoyt at that time a partner in the firm of Hayden Stone & Company.

Examiner Brown: Would you identify that company for the record?

The Witness: Hayden Stone & Company was a banking firm in New York City.

A. (Continuing) That firm had some sort of relationship or control over another concern which I think was called [fol. 3660] Keystone Aircraft Corporation, which, in turn owned the Huff Daland Dusters Company. It was natural, then, when Mr. Stone came to New York with his ideas and his project, to get some support for making it a reality, he should go to Mr. Hoyt.

Q. Mr. Hoyt was a partner in the Hayden Stone firm, I take it?

A. Oh, yes. And I think he was also—well, I know he was interested in commercial aviation development in two or three directions at the time.

Mr. Hoyt also, by the way, had prior to that time had various conversations with W. R. Grace & Company particularly Mr. Patchin, as W. R. Grace & Company had for some time following the Lindbergh flight, been making quite independently of Pan American, with any relationship to their similar activities at that time, studies of quite an extensive character collecting data, making contracts, secured a report from the late General Bard who made a goodwill flight around South America, had had an engineering report prepared, conferred with Postmaster General and other Government officials and gone into it in quite an extensive way.

* * * * * * *

A. When Colonel Harris made his call on Mr. Hoyt, Mr. Hoyt sent for Mr. Trippe—

* * * * * * *

The Witness: I endeavor to testify only to the fact that these—that such conversations took place, that I know of my own knowledge. I shall not testify as to the conversations and I shall not testify to what was said.

Examiner Brown: Go ahead.

A. I refer to the conversations of Mr. Patchin and Mr. Hoyt. Mr. Trippe came to Mr. Hoyt's office and discussed—Mr. Trippe, at that time, I might say, was one of the [fol. 3661] group that was interested in the formation of Pan American, which was then being formed, in one of its predecessor corporations. And Mr. Hoyt also at the same time and at the same interview suggested that Colonel Harris see W. R. Grace & Company, who had been in touch with him and were studying this question of South American aviation.

Colonel Harris did see representatives of W. R. Grace & Company and from that joint meeting there was later formed—well, and the discussions which ensued from it—there was formed Peruvian Airways, a $50,000 corporation, of which Pan American owned half and W. R. Grace & Company, and that company subsequently was succeeded by the present Pan American Grace Airways, a one million dollar corporation with similar stock ownership.

Q. Peruvian Airways was organized in the fall of 1928, was it not, Mr. Roig?

A. That is right.

. . . . . .

pp. 754-756:

Q. Now, turning to the first flights on the route, and beginning with Panagra's predecessor, Peruvian Airways: do you recall when it was that Peruvian Airways made its first flight on the route?

A. Yes, September 13, 1928. Just fifteen years ago, flight between Lima, Peru, and Talara, the big oil center in northern Peru.

Q. Was that a commercial flight?

A. Oh, yes.

Q. Did they fly a single-engined Fairchild on that occasion?

A. Yes.

[fol. 3662] Q. Now, starting from that standpoint, the route was thereafter extended, was it not?

A. I might use the map again.

Q. Yes, will you tell us how and when, to the extent that you wish?

A. Lima is here (indicating), capital of Peru. Talara is up here (indicating).

Examiner Brown: To the north?

The Witness: To the north, yes.

A. (Continuing) That was the first flight. From there the line was extended rapidly in both directions, north to Guayaquil and then following not the route shown on the map but a route proceeding to Salinas on the Coast and around the Coast up to Cristobal; southward the route was extended from Lima across Peru over the northern section of Chile, a nitrate and mining section, down through the beginning of the Agal section to Santiago, and from there it was carried over the Andes, not in a line including Cordoba at that time but in a straight line following the railroad from Mendoza to Buenos Aires and the mail was delivered in—the first mail from the United States was

delivered by Panagra in Buenos Aires on Columbus Day, October 12, 1929, slightly over a year after the initial flight.

Q. So that the first United States mail delivered in Buenos Aires was delivered by Panagra; is that true?

A. That is right.

Examiner Brown: Read that question back.

(The question was read by the reporter.)

Examiner Brown: Make that correction.

A. The mail had come from Miami to Cristobal via Panama. Panagra began in the Canal Zone then as it does today. To the best of my knowledge, the completion [fol. 3663] of that route to Buenos Aires carried American aviation further from home than it had ever been before up to that time. Nyaba was operating some services on the East Coast, but they were not connected through services to the United States.

Q. Was it after carrying of the first air mail to Buenos Aires by Panagra from the United States that the route was extended to Montevideo or was it before that time?

A. It was substantially at the same time. We flew across the Plate River which separates Buenos Aires from Montevideo and we did have a final terminal for some years at Montevideo and Uruguay.

pp. 759-760:

Q. I am going to take up that in a moment; but I am going to ask you two more questions along that line.

There have been differences in the Board of Directors, have there not, on the various steps in this program of development and progress that you mentioned?

A. There have on some of the steps but it would be a great mistake if anyone got the impression that there has been a difference of opinion on everything that happened.

Q. As a matter of fact, Mr. Roig, on all the questions up to the instant one, the extension to the United States, the differences have been resolved, have they not?

A. With the exception of the terminal in the United States and the publicity question, we have reached a conclusion among ourselves, yes, on all these questions.

Q. Leaving aside the publicity question for the moment, and also, of course, the instant question, which is for the Board to consider, these differences have not been permitted to block the steady progress and development of which you speak, in your opinion, have they, Mr. Roig?

[fol. 3664] A. Well, except to the extent that the present controversy has blocked for some years our coming to the United States, and that publicity may have had some bearing, I don't think very direct. The very fact that these other matters have been settled and that they have been in number relatively few, shows that they have gone on, and that isn't a matter of opinion, the record shows it.

pp. 836-837:

By Mr. Friendly:

Q. Would you say that, since your election as president, Mr. Ribl and Mr. Young and Mr. Dean had been cooperative in their approach to matters relating to Pan American Grace operations between the Canal and Buenos Aires, always omitting this question of publicity?

A. Well, omitting the question of publicity, the question is whether they had been cooperative in connection with this matter of the terminal in the United States?

Q. No. I said relating to the operation of the services between the Canal and Buenos Aires.

A. Oh, yes. The idea that we were in each other's hair all the time is nonsense, of course. We have been running a big business. We have been running it for 15 years and making a great success of it. Most of these questions that have been referred to, if they were controversial, it wasn't between the stockholders and the directors as such, and they weren't even controversial. It might be just things on which there was a difference of opinion.

I was anxious to get the opinion of Mr. Ribl and the others, not only because it might reflect the stockholder's opinion, but because they were experienced men in this business, and when we didn't agree about something it didn't mean there was a great stockholders' controversy [fol. 3665] about it; it was just the day to day the way people get together when you are running a business.

pp. 840-842?

Q. Going back to the initiation of the enterprise, did you have any personal participation in the negotiations that led up to the writing of the letter of August 31, 1928? By "personal participation" I mean participation in meetings other than among yourself and your associates.

A. No. As so defined the answer is no.

Q. Who were the representatives of W. R. Grace and Company who did conduct the negotiations with the representatives of Pan American?

A. Mostly Mr. Patchin, to some extent Mr. Cogswell, on at least one occasion Mr. J. P. Grace, and on one or two or perhaps three occasions Mr. D. S. Iglehart.

Q. So the record may be clear, Mr. Hoyt is now dead, is he not?

A. Yes.

Q. Has been since about '35 or '36?

A. Well, I wouldn't have thought it was quite that long, but five or six years anyway.

Q. In connection with Col. Harris' trip back to the United States, don't you know that that actually was in the fall of 1927?

A. My best recollection was that it was along about the spring of '28.

Q. You haven't verified your recollection against any documents as to that date?

A. Well, only relating it to the time when Peruvian Airways was formed, and the first flight of Panagra, which was in September 1928, and I thought that that date checked (fol. 3866) with what Col. Harris told me the other day, but I might be mistaken on the date.

Q. Have you read Exhibit P-34, which contains various documents relating to this early history?

A. No, I don't think I have read that exhibit. I read the Pan American answer, and I read P-51, both of which were highly inaccurate in their statements.

Mr. Friendly: I move to strike that out.

Examiner Brown: It may be stricken.

A. I don't recall having read that.

Q. Don't you know that the concession which Huff Daland Dusters obtained in Peru on May 29, 1942, was obtained with a view to operation by Pan American?

A. I do not know that, no. I never heard it until this minute. First time I ever heard it.

pp. 934-937:

Q. Then, you had talks in July or August of 1941 with Mr. Trippe as to a possible settlement of the controversy between the two companies through an equipment interchange agreement, did you not?

A. A point was reached, I think, in '41 where I suggested as a possible solution, whether it would not be possible to work out some plan under which Panagra might come through to a United States terminal over Pan American's franchise. I think in that connection I mentioned some adaptations of the rule in the Western Airline case, which was then a fairly recent decision, not, however, ever intending and making the making it very clear that I didn't intend that there should be a literal application of that, or that what I meant involved operations over Panagra's route by Pan American.

There were discussions of that subject with Mr. Trippe [fol. 3667] and with Mr. Friendly, and I think I had one discussion with Mr. Root. The lawyers were to endeavor to prepare a draft agreement which might carry out such a program.

There was internal delay in getting the draft in shape, and, in fact, no draft was submitted until some time later when it was submitted in connection with some correspondence then being had between W. R. Grace & Company and Pan American, and it was submitted at that time as a proposal of Pan American's and not as an attempt to carry out the discussions which we had been having, and I was, of course, perfectly willing to accept it as a proposal of Pan American's, because it bore no resemblance to the proposal that I had made or the ideas that we had discussed.

That agreement which was called a traffic exchange agreement was a mere agreement of mutual options under which

Pan American had the option to tender four-engine equipment to Panagra if they saw fit and Panagra had the option to accept the tender if they desired. Conversely, the other company had the same option. Neither could force the other to do anything. It was meaningless as far as Panagra was concerned, because, of course, Panagra had no four-engine equipment at the time. It carefully provided a method of operation which would have meant that Pan American's crews would have operated Panagra's planes north of the Canal Zone so that none of the sanctions which have been discussed from the standpoint of operations and maintenance and so on would have existed.

The agreement from Panagra's standpoint, I considered, and always have, utterly valueless and essentially phoney.

Q. Did you ever submit a counter draft?

A. I did not.

[fol. 3665] Q. Isn't it a fact that after your talk with Mr. Trippe, Mr. Igleheart told you that he didn't want anything done about this equipment interchange?

A. I was never told anything of the kind. I pressed and pressed and pressed. I pressed you and I pressed your office, and I pressed Mr. Trippe for a long period. I kept a diary of the telephone conversations and the stalls that I got, going on for months.

Q. You know you didn't press me, don't you, Mr. Roig?

A. I don't recall anything of the kind. You were taken ill shortly after, so you dropped out. From there on, I certainly didn't press you, Mr. Friendly.

Q. That happened about a week after your first discussions with Mr. Trippe, did it not?

A. When you became ill?

Q. Yes.

A. Well, you know, and I remember having a meeting with you in Mr. Trippe's office, and I think that was the last discussion I had with you on the subject. Whether we had had discussions prior to that meeting, I don't particularly recall. You are quite right. After you became ill, you dropped out of the picture for several months.

p. 1104:

By Mr. Reynolds:

Q Well, are your view that Panagra should or should not set up a joint arrangement in Miami, for instance, such as is in Buenos Aires?

A. I think Panagra in that event should have a more extensive traffic organization than it has at the moment. I would like, however, if it were at all possible, to work that out in such a way that we could cooperate and work with the fol. 3669 Pan American organization so far as that might prove possible, without prejudice to either company.

pp. 1150-1152:

Q. Now, when the LaPaz extension was under consideration in 1935, the Board of Directors meeting of January 2, 1935, the minutes for which appear in G 14 on page 73, authorized Grace to acquire the LaPaz rights.

Mr. Friendly: Just for the sake of clarity, Mr. Reynolds, those are the minutes of W. R. Grace & Company.

Mr. Reynolds: Correct.

The Witness: What is the page reference?

Mr. Reynolds: G 14, page 73.

Q. You explained that somewhat in your testimony yesterday, I believe, Mr. Boig, but I am still not clear as to why Panagra did not take those rights in its own name in the first place.

A. Well, because although Bolivia had been under discussion for a long time, going back several years before this date, the opportunity to secure the concession to operate this route, and with a subsidy from the Bolivian Government by this route, I mean from LaPaz to the Pacific Coast point originally TACA, later Arica that opportunity came up quite suddenly, was presented by cable, and it called for prompt action, failing which the concession would have been given to someone else, and I immediately got in touch with the Pan American. I don't recall at that moment whether it was Mr. Trippe or Mr. Rihl to secure their approval to Panagra's accepting the concession; and they took the matter under consideration, and it was some time before they got around to making up

their minds, and the business couldn't wait that long, and in order to save it, W. R. Grace & Company took the concession in its own name.

[fol. 3670] Q. At that time there was no president of Panagra? Mr. MacGregor apparently didn't have authority to go ahead and do that himself; is that right?

A. Well, that is correct, and it is not a matter which would ordinarily be done by anyone without the approval of the Directors.

Q. Did you know, previous to the time when the opportunity arose, that Pan American had some objection to it or not?

A. No, I don't recall.

Q. It was just a matter of not being able to get a decision; is that it?

A. That is the situation as I recall it.

pp. 1172-1173:

Q. Mr. Roig, to what extent do the needs of the east coast service enter into the setting of the rate for the west coast service?

* * * * * * *

A. I don't know to what extent the east coast factors may have influenced Pan American. They have not influenced Panagra's decision as to the rate except that it may have occurred to us that, in the earlier days—to some extent now—that on a mileage basis the west coast rate might be lower, but it is a well-known fact in transportation that mileage is not always by any means the determining factor and no matter how low we made the rate on the west coast Pan American could have made an equal or lower rate on the east coast, regardless of mileage.

Q. In your rate making procedure has Pan American never suggested that a certain rate would have to be higher, or couldn't come down because they just couldn't meet it on the east coast?

[fol. 3671] A. I don't recall any such issue having actually been reached in any of my discussions.

Q. Incidentally, when both companies operated for a short time between Montevideo and Buenos Aires, the

rates there were the same for both services, were they not?

A. I don't recall that.

Q. It was quite a way back.

A. Yes. And not a very important factor. I would assume that they had been.

pp. 1347-1348:

By Mr. Cahill:

Q. Some questions were put to you by Mr. Friendly, as I recall, in regard to concessions obtained by W. R. Grace and Company, Mr. Roig; do you recall that?

A. Yes, I do. I can't add very much to the answer that I gave at that time. Grace and Company has had considerable experience over the years in dealing with governments of all these different countries in relation to matters which might or might not be termed concessions, and there have been some that could technically be called that, I suppose.

In the days when we got permission to operate mole or dock properties in different countries, permits would be required there.

In the Canal Zone, when we erected our building, being in the zone, arrangements had to be made with Canal Zone authorities for permission, and there have been a variety of similar negotiations and dealings with various government departments in the different countries on a variety of matters.

H. TESTIMONY OF E. J. ROIG IN CAB DOCKET 525 WHICH PAN AMERICAN INTENDS TO OFFER IN EVIDENCE

p. 3613:

By Mr. Gambrell:

Q. Will you, as one who has long studied air transportation between this country and Latin America, state whether [fol. 3672] in your opinion there is sufficient traffic potential between the United States and the Canal Zone, to support an air service in addition to that of Pan American?

A. I really have not made a complete study of that question. My studies have been limited quite largely to the feasibility and desirability of Paragra's extending through that section to a gateway in the United States. And the considerations which governed my conclusions under that heading only to a slight extent are related to the local traffic movement between Balboa and the United States. In other words, there are many considerations back of that position which have no relation, instance at all, and which are, therefore, applicable only to Paragra.

III. TESTIMONY of H. J. ROIG IN CAB DOCKET 3560 WHICH PAN AMERICAN INTENDS TO OFFER in EVIDENCE

pp. 4660-4674:

By Mr. Schneider:

Q. Why does not Paragra now operate through flights beyond Balboa over the routes of Pan American to either Houston or New Orleans?

A. Well, I think up to— Is the Pan American New Orleans route in operation by Pan American now?

Q. New Orleans-Balboa route?

A. Yes.

Q. By Pan American?

A. Yes.

Q. It has been in operation for a long time.

A. I was thinking of something else when I asked that question.

The reason that up until the time of last July, when I ceased to be president, Paragra had not gone into those other areas was because the volume of traffic at the time didn't seem to justify it.

[fol. 3678] Q. You don't consider that you are under any legal disability at the present time, from operating your planes through to New Orleans and Houston, do you?

A. Our agreement with Pan American, our through flight agreement, provided specifically for New Orleans. I don't remember if it covered Houston or not.

Q. That is, the agreement provided that when Pan American obtained non-stop traffic from New Orleans to the Canal Zone, that the agreement would be extended to get that Panagra's flights to go through to New Orleans?

A. That is right.

Q. And it is your testimony that Panagra has not done that—that it availed itself of that opportunity because it does not consider at the present time that sufficient traffic is available? Is that your answer?

A. That was the reason up until last July, as far as I was concerned.

pp. 4644-4646:

Q. If these agreements are approved in the proposed form, is it your opinion that Pan American and Panagra will be in competition for traffic from New York to Buenos Aires?

A. Oh, as far as Panagra is concerned, our competitive position will be vastly improved.

Q. Will the two companies be in competition with each other for that traffic?

A. Definitely, so far as Panagra's standpoint.

Q. How will that competition be effected? Separate ticket offices?

A. No.

Q. Same ticket offices? You would continue the present arrangement in Buenos Aires, with the same ticket office?

fol. 3674 A. As far as I know.

Q. Well how will the competition become effective?

A. I might point out—

Mr. Burns: Go ahead.

The Witness: As far as B.A. is concerned, the question of ticket office there, I don't know whether you are aware that Panagra also has its own representatives in Buenos Aires—

By Mr. Schneider:

Q. But you have only one ticket office, do you not, and that is shared by Pan American and Panagra?

A. Yes, a consolidated ticket office, quite a common practice.

Q. What happens when a passenger walks in, Mr. Roig, and wants to go to New York?

A. Well, judging by the volume that has been moving on the West Coast in recent months, I think Panagra gets a fair deal.

Q. That wasn't the answer to my question.

I said what happens when a passenger goes into that ticket office and says, "I want to go to New York."

How is he handled, by the clerks in the ticket office? Do they give him a time table and tell him to take his pick, or do they tell him that it is better up the West Coast because they have DC-6's, with sleepers, as compared with the DC-4 sleeperettes on the East Coast?

A. Well, I haven't been in the position of actually doing it, but from my conversations in Buenos Aires with people who have been, it is my understanding that they tell the man the facts about both trips.

If he is a passenger who is going to stop in Rio, or for any reason wants to come up the East Coast, that settles that.

[fol. 3675] Similarly, if he wants particularly the West Coast, that is easy.

If he is a through passenger to New York, and not interested in the stops, he would be told that on the West Coast he had a Panagra DC-6 and a shorter schedule; and that no doubt he would be told that on the East Coast while it took a little longer he could come straight through to New York and avoid the connecting service at Miami.

Q. In other words, as far as that passenger's handling in that office is concerned, no special effort is made by Panagra to attract that man to Panagra?

A. Oh yes.

Q. No special effort is made by Pan American to attract that man to Pan American's line?

A. I hope the counterman is in that position.

Q. You hope he is attracting him to your line?

A. No, no, because I wouldn't expect to get that kind of an unfair break.

I hope the counterman is reasonably neutral, but fair to both.

But, the influence on the passenger has been exercised very frequently by a Panagra solicitor, or by, tomorrow, an organization there, or by Panagra advertising, or vice versa, by Pan American's advertising.

Q. But as to a man who walks in there without having been approached by Panagra or Pan American in advance, when he goes in there he is given a complete story of both services, and no special effort is made to route him one way or the other?

A. That is my understanding; and that is the terms of our agreement with Pan American.

Q. That is an agreement of 1939, which has been renewed?

A. No, the through flight agreement.

[fol. 3676] Q. The through flight agreement?

A. Yes. And all I can say is that judging by the results it works out reasonably well.

pp. 4648-4649:

Q. * * * * *

Will you tell me how Panagra competes for a passenger to Buenos Aires, with Pan American, other than by its own separate ads in the magazines?

A. Well, we have in New York the general traffic manager of the line and his staff, in the New York Office, who are actively promoting, in a variety of ways, the merits of the West Coast service.

Q. Well, they are the general headquarters personnel. They are not the solicitors, and so forth, that you have out on the line.

A. Well, we haven't any ivory towers in traffic. They are pretty active.

Q. When Mr. deGroot was your general traffic manager, he wasn't running around the streets selling tickets.

A. Well, he was coming pretty close to it. He was traveling around visiting the travel agents and keeping in contact.

Q. Is it your testimony that the general headquarters personnel in New York are your traffic organization in New

York, and that is all? Is that the only traffic organization you have in New York?

A. That is the Panagra traffic organization, yes.

Q. Otherwise, you rely upon Pan American's organization in New York?

A. Well, yes, but don't forget we rely very largely on the travel agents, as they do too, and we maintain direct contacts with them.

[fol. 3677] Q. Right. But if a passenger, wanting to go to B.A., walks in to the Pan American office of New York, how is he handled? In the same way as he is in Buenos Aires?

A. That is the idea. The agreement also, you will recall, provides that in principal Pan American U. S. traffic offices we would have a special Panagra representative and he is supposed to look after the situation.

pp. 4707-4708:

By Mr. Russell:

Q. In that regard, I noticed that the contract which you and National agreed upon, that is National's Exhibit Nat-98—you will recall, I am sure—provided for a term of 99 years, whereas the agreement which was finally signed and presented to the Board for approval here contemplates expiration in 1960. That is the most distant date.

Can you tell me why you didn't work out a 99-year deal, as you started to?

A. Well, I think the 99 years reflected—as that number of years always does—an idea of permanency, and that is what we had in mind in just picking out that symbolic figure.

Actually, our previous experience had shown that there wasn't much likelihood of getting approval of 99 years. The Pan American-Panagra agreement, I think, was submitted in that form and the Board cut it down to three.

I don't think I was present when the 10 was put in, but I presume that was thought to be a little more realistic.

pp. 4726-4727:

By Mr. Hardy:

Q. With respect to your statement, Mr. Roig, you make great ado about the fact that it has been your ambition for some 21 or 22 years to get a route from Balboa through to New York; isn't that correct?

[fol. 3678] A. Yes.

Q. Did Panagra ever apply for such a route?

A. No.

Q. It did not?

A. No.

Q. Would you consider that if you had such a route, that it would be better than the deals at issue here?

A. Yes.

Q. In any respect? I mean in all respects.

A. Not in all respects, but in many respects.

I think from the standpoint of the traveling public, which is a very important factor, assuming that this agreement works out satisfactorily, the result would be substantially the same.

But from the standpoint of the company, and the owners, why naturally you would have a very handsome profit if you had this route all the way through as your own.

TESTIMONY OF ROBERT H. PATCHIN IN CAB DOCKET 779 WHICH PAN AMERICAN INTENDS TO OFFER IN EVIDENCE

pp. 3059-3061:

By Mr. Cahill:

Q. Mr. Patchin, when did you first meet Mr. Richard F. Hoyt?

A. In May 1928—no, I met Mr. Hoyt a year or so previously, but not in any relation to aviation.

Q. What position did Mr. Hoyt occupy at the time, Mr. Patchin?

A. Mr. Hoyt was a partner of Hayden Stone and Company of New York City.

Q. Did you meet Mr. Hoyt prior to the formation of The Aviation Company of the Americas, which was formed in June 1928?

A. Yes. I met him in May.

Q. How did you happen to come into contact with Mr. Hoyt?

A. Well, in the course of my affairs about aviation and the study on the subject, I heard that he was very much

interested, very active. There were a number of companies in the aviation situation stirring up the development of the business.

[fol. 3680] I heard of him, was told by persons of his activity, and I called him up one day and went over and called upon him.

Q. I show you a memorandum dated May 23, 1928, entitled "Memorandum for Mr. Iglehart", relating to a conversation had by you with Mr. Hoyt.

Mr. Cahill: I ask that this be given a number for identification.

Examiner Brown: It will be marked for identification G-143.

(The document referred to was marked for identification as Exhibit G-143.)

By Mr. Cahill:

Q. I ask you whether G-143 accurately sets forth the substance of your conversation with Mr. Hoyt related therein.

A. I believe it does; yes, sir.

Q. This memorandum was made practically contemporaneously with the conversation with Mr. Hoyt, was it not, Mr. Patchin?

A. Yes, sir.

Q. Will you tell us how many conversations you had with Mr. Hoyt between May and August of 1928?

A. I can not recall the number, but there were several where I talked with him in his office, and I believe he came over and called on some of my associates in Grace and Company. I used to meet him occasionally outside.

pp. 3097-3098:

By Mr. Friendly:

Q. I would like to ask you a few questions about your talk with Mr. Hoyt on May 23, 1928. Do you have a copy of G-143 before you?

A. Yes, I have it.

Q. I want to refer to the statement in the second paragraph: "It is his understanding that the Post Office Depart [fol. 3681] ment will soon advertise for bids for mail service from Cuba to Colon via Central America and later will advertise for bids on a mail contract from Colon to Valparaiso," and then consider in connection with that the sentence at the bottom of the page: "He said that he recognized that we were in an advantageous position which was the reason why he hoped we could cooperate with the Pan American Airways, but that if we were disposed to go ahead on our own, he would be inclined to stand aside," and so forth. Now, is it your testimony that this offer to stand aside applied to the Cuba-Colon route or to the route farther south or to both?

A. I think it applied more particularly to the west coast of South America.

Q. I think you testified this morning that Mr. Hoyt told you either at this talk or shortly thereafter that Pan American was planning to move right in on the route to the Canal, had he not?

A. I think he left me with that impression. How definite that was, I don't know. I notice it isn't mentioned here, but that was implied, at least.

Q. Did you, on behalf of Grace & Company, express any interest in this Cuba-Colon route?

A. No, we did not.

p. 3699:

Q. Now, it did come to your attention, did it not, that this route from Cuba to the Canal or, rather, as it turned out, a route from the United States to the Canal, which Mr. Hoyt told you about, was advertised on May 31, 1928?

A. Yes.

Q. You knew that that had been issued, did you not?

A. The advertisement was issued on the 31st of May?

Q. Yes.

A. Did I know it when?

[fol. 3682] Q. Did you know it shortly thereafter?

A. I am sure I did.

Q. Did W. R. Grace & Company consider subquitting a bid on that route?

A. No.

p. 3127:

By Mr. Wanner:

Q. Referring to that sentence, the first sentence of the second paragraph, did his [Mr. Hoyt's] statement in that connection indicate to you that he had in mind financial participation of W. R. Grace and Company?

A. Not entirely.

Q. You say "not entirely"?

A. No, I don't think so. I don't think it was just that.

Q. Did it include financial participation?

A. Well, I suppose so, yes.

Q. You don't know definitely, though?

A. Why, yes. He had said that they were obliged to raise some capital.

Q. Pardon me?

A. The memo says that they were obliged to raise some capital—over on the next page. It says they would require people to come in.

TESTIMONY OF W. F. COGSWELL IN CAB DOCKET 779 WHICH PAN AMERICAN INTENDS TO OFFER IN EVIDENCE

pp. 3311-3312.

By Mr. Reynolds:

Q. Mr. Cogswell, you drafted the charter for the Peruvian Corporation, as I understand it, as set forth in Exhibit G-105; is that correct?

A. I drafted it or it was done under my supervision, yes.

Q. And with whom did you consult after having prepared the draft?

A. I have no distinct recollection on that point, Mr. Reynolds.

Q. Do you know whether it was submitted to Mr. Trippe or any of the gentlemen of the Pan American organization?

A. I have no recollection either in the affirmative or the negative. In other words I don't remember doing it and I don't remember not doing it.

Q. Well, do you remember from what source if any you took the statement of purposes set forth in that charter?

A. I think I probably took the statement of purposes from the charter of some airline.

[fol. 3684] Q. But you have no direct recollection on that; is that right?

A. Well, I know that Mr. Morris sent me, at Mr. Trippe's request, the charter of a Delaware corporation known as the Buffalo Central Airlines, I think it was, and I had that, and then I sent that back, and I think I may have used that as a guide.

Q. And was there a meeting of the representatives of the two owners to approve the charter before the actual process of obtaining a certificate of incorporation was undertaken?

A. I have no recollection that there was, and I have no recollection that there wasn't.

Q. Now, when you drafted that charter, I suppose you have no recollection as to whether there was any discussion as to the territory in which the company was to operate; is that right?

A. I don't recall any.

Q. When you drafted the charter for—

First, I assume it is understood that you also drafted the charter for the original Panagra corporation also.

A. That is right.

Q. And, in drafting that charter, you merely copied the purposes in substance from the previous charter; is that right?

A. Yes, I think so.

Q. That is, the previous charter of the Peruvian company.

A. That is right.

TESTIMONY OF DOUGLAS CAMPBELL IN CAB DOCKET 3500 WHICH PAN AMERICAN INTENDS TO OFFER IN EVIDENCE

pp. 4905-4906:

By Mr. Burns:

Q. Mr. Campbell, have you a judgment with respect to the success of the through flight with Pan American, so far as traffic is concerned?

A. Yes.

Q. Would you give us that judgment, please?

A. In the 12 months preceding the inauguration of the through flight operation, namely, the period June, 1946, to May 31, 1947, inclusive, the through passengers carried by Panagra and Pan American from Panagra points, to and from Miami, numbered 12,322.

Examiner Brown: 12,322?

The Witness: That is correct.

In the 12 months period after the inauguration of the through flight agreement, which began May 31, 1947, the number of through passengers was 14,865; and it will be noted from our Exhibit PGR-23; to which I added the actual

1949 figures yesterday afternoon, that in the calendar year 1949 the number of passengers to and from Miami was 17,613.

Excerpts from the testimony of W. Irving Glover, Second Assistant Postmaster General of the United States.

1. *Hearings on H.R. 7213 and H.R. 8337 Before the Committee on the Post Office and Post Roads, House of Representatives*, 70th Cong., 1st Sess. (Jan. 12, 1928), pp. 15-17

Mr. Glover. Mr. Chairman and gentlemen, the Postmaster General has covered the subject so fully that there is very little left for me to say, I am afraid. Speaking to the Pan American air bill, I want to say that I believe the Post Office Department, with the other executive departments, are intensely interested in this. There is a great deal, sir and gentlemen, that I would not like to go on the record. I would like to have just a round-table talk with you for a minute and tell you the picture back of this.

The Chairman. Do you wish this off the record?

Mr. Glover. If I may, please.

(There then ensued discussion which the chairman ordered not reported.)

Mr. Glover. I can say, with the great strides aviation has taken in this country, that there is no concern in the

United States, as rich, strong, and big as they are, that [fol. 3688] can start a line from Key West and go to Cuba and across the long stretch of air there down the coast, the same line that Colonel Lindbergh has taken, and open our markets and increase the trade in Central and South America, and do it on the proceeds they receive on the freight and express they carry without Government backing. We must be fair and honest with ourselves, and the Government has to stand by us for a while.

The Chairman. Was Colonel Lindbergh's trip promoted by the Government?

Mr. Glover. No, sir. I think that was entirely financed from his own pocket, if I am correct. But he has led the way, and within a few hours at their meeting in conference in Habana—our President goes down there—they will discuss these matters. They want to be friendly with the United States. They are friendly, but they are demanding air mail service. They want you to come down there and cut down the upward of 12 or 14 days from the capital of Costa Rica to New York, and if we do not do it they are asking, "Well, then, you have no objection to our taking our place in the world by having these foreign lines fly over the Panama Canal, through Mexico, into the United States," and it is a very difficult thing for us to say, "No, gentlemen, we will not establish any air mail service from the United States, and we will not permit any air mail to come into the United States with foreign capital."

* * * * * * *

Mr. Kelly. The Department of Commerce has assured me, General Glover, that our business with Central and South America decreases just as we have no communication. For instance, the further away and the longer it takes to make communication, business drops off, and the Bureau [fol. 3689] of Domestic and Foreign Commerce insists that if we could get rapid air mail transportation we will get increased business.

Mr. Glover. Absolutely right. Here is the French line who have gotten past the stage of talking about a bill. They have introduced a measure in the French House of Deputies, and they have appropriated millions of gold francs for a line from France to South America, and we stand

idly by and debate the question of whether we should go into Pan America, or whether we should close the door and say: That field is entirely lost to the American commercial interests, and, gentlemen, I make the prediction that we are slowly slipping in Central America and Pan America.

Mr. Ramseyer. What is your opinion if this bill were made into law, and you could make the proper negotiations with Mexico and the Central American countries, whether you have got companies here who are able and willing to go into this and do this work?

Mr. Glover. At the present time the contractor for the route between Key West and Havana is pioneering the way themselves, taking the dollar out of their own pockets. They have bought a plane and they are putting on three of their own representatives and they are going over this very same route, down through the Central American countries; just a tour of good will.

Mr. Ramseyer. They are doing it now?

Mr. Glover. They are preparing within the next 10 days, the Pan American Airways.

* * * * * * *

Mr. Romjue. I notice on page 2 of this bill there are two methods provided for the pay for transportation of the mail. For instance, it says in one place it shall not exceed $2 or more.

[fol. 3690] Mr. Glover. Yes.

Mr. Romjue. And in the other instance it is based on poundage.

Mr. Glover. Yes, sir.

Mr. Romjue. In view of what the General has said about the development, and with which I agree, does that really mean we have only one method and that by poundage, because if they were getting $2 per mile only, wouldn't that have a tendency to lessen the development of the mail?

Mr. Glover. That was put in there for the express purpose that we did not know whether we wanted to pay the contractor on the poundage basis or the mileage basis. It is so much in the creative state that nobody knows.

Gentlemen, I hold nothing up my sleeve. This line has to be subsidized and the amount of that subsidy will depend

upon the action of you gentlemen after you have given us the authority, and we want it either on the pound rate or the mileage basis.

Mr. Romjue. I don't see any harm in that.

Mr. Ramseyer. Did you say this line has to be subsidized or not subsidized?

Mr. Glover. As I say again, this line must be subsidized for a period. We must stand back of whoever takes it over.

Mr. Ramseyer. Of course it would depend afterwards on the appropriations Congress made.

* * * * * * *

2. *Hearings on H.R. 11801 Before a Subcommittee of the Committee on Appropriations, United States Senate*, 70th Cong., 1st Sess. (Dec. 10, 1928), pp. 29-30

Senator Overman. I can see where it would be of great benefit, but it will be very costly, because the returns will be very little, I suppose.

[fol. 3691] Mr. Glover. I will agree to that, Senator. It will always be costly; but the great South American countries, where is the last stand of commercial development, I think should be claimed by the United States. I am sorry I did not bring with me a map of the French line, the Aerial Postale, which is already flying three days a week from France right to the east coast of South America; and if it had not been that your Post Office Department had started circling the Caribbean Sea by putting in these contracts, they were already knocking at your door, asking to come in with the foreign lines, the French, the Germans and the English; and of course the State Department was far from happy to know that these foreign lines were coming in asking that they be received at Colon and flying on to Key West.

3. *Hearings on the Post Office Appropriation Bill, 1931, Before a Subcommittee of House Committee on Appropriations, House of Representatives*, 71st Cong., 1st Sess. (Nov. 19, 1929), p. 128

Mr. Byrns. Suppose you should establish a line from Buenos Aires. As I understand it, this line now extends from Santiago to Buenos Aires, across the Andes.

Mr. Glover. Yes, sir.

Mr. Byrns. Would it be the idea to keep all of those routes in operation? In other words, if you had a line down the east coast to Buenos Aires, would you then continue the other line across the Andes, for which we are paying a pretty high price?

Mr. Glover. Yes, sir; I admit that.

Mr. Byrns. What would be the advantage of having a route between Buenos Aires and Santiago?

Mr. Glover. The advantage would be this, that we have to keep it there alongside the parallel line of the French and Germans, which is now going over there. The advan- [fol. 3692] tage would be in paralleling their line. The Germans are coming up the west coast now, paralleling the Pan American Grace Line. It is just a question for you to decide whether you want to withdraw from down there and leave it to these foreign aggressions, so far as the commercial development is concerned.

Mr. Byrns. Are those private lines, or are they under the Government?

Mr. Glover. They are private lines, just as ours are.

Mr. Byrns. But they are being subsidized by the Government.

Mr. Glover. Yes, sir. The French have just within the year subsidized the French lines to the extent of $5,000,000 gold additional.

4. *Hearings on the Treasury and Post Office Departments Appropriation Bill (H.R. 8351) Before a Subcommittee of the Committee on Appropriations, United States Senate*, 71st Cong., 2nd Sess. (Feb. 5, 1930), p. 20

Senator Oddie. Mr. Glover, can you tell us in a brief way, what the activities of the foreign air-mail companies are, the foreign aviation companies?

Senator McKellar. He has just been telling us about that.

Senator Oddie. I was out of the room then.

Senator McKellar. He just covered that a few moments ago.

Senator Oddie. The activities, for instance, between the west and the east coasts of South America.

Mr. Glover. The principal development there, Senator, has been the development of the aeropostale, which is a

very heavily subsidized line by the French Government, having a contract for 10 years with a subsidy of $8,000,000 a year, and they are flying from Toulouse down to Dakar, and across to Natal, and to Pernambuco, and so on, down the coast. It is a very successful service. They have some 40 ships in operation, 80 pilots, and it is a very worthwhile organization.

[fol. 3693] The Germans are also coming across from the west coast of Africa to the east coast of South America through the Deutch Luftbausa Co.

Just recently one of the officers of the company has been here, and called on the Postmaster General, and I had the pleasure of talking with him, and he told somewhat of the developments down there and what they have in mind.

Senator Oddie. Well, what are their arrangements for transferring mail from the American ships to the foreign?

Mr. Glover. Well, that is a problem that we have had to meet, Senator. Of course, you can understand that that is a problem, and we have never been interested in allowing foreign countries to come into the Panama Canal Zone. You can, of course, appreciate why.

Senator Oddie. Yes.

Mr. Glover. But there is a certain condition in the northern tier of States of South America which made it necessary for us to get down across there, and in turn for that we would have to give them landing rights in the Canal Zone, and so that has been done; and we are perfectly willing now with our American lines which are now operating from Cristobal over to Paramaribo—we are willing to meet the French and Germans there and take their mail and carry it into the Zone ourselves rather than allow foreign operated companies to come in there, which would be the result if we did not go down into that territory.

The whole Caribbean Sea has been covered by air mail lines and the northern territory of South America has been covered as far as Paramaribo, on the east coast, and covered as far as Montevideo, by the line going down via Santiago and over the Andes, as I said, to Buenos Aires and Montevideo, and so only that space in South America [fol. 3694] from Montevideo up via Rio and around the cape to Paramaribo is not covered.

Senator Phipps. Now if we contract for a new line from Montevideo up to Rio, we will be duplicating foreign lines now in existence, will we not?

Mr. Glover. Yes, sir.

Senator Phipps. That are operating now.

Mr. Glover. Yes, sir.

5. *Hearings on the Post Office Appropriations Bill, 1932, Before a Subcommittee of the House Committee on Appropriations, House of Representatives*, 71st Cong., 3rd Sess. (Nov. 15, 1930), pp. 127-128

Mr. Wood. In these contracts that are now running, have you any way of scaling these contracts so as to bring the amount that you will have to pay out within this appropriation of $7,000,000?

Mr. Glover. On some of the lines we can do that. We did that on No. 9, from Cristobal to Montevideo; we reduced that for the second trip. The rate was $1.80 and we reduced that to $1.60 for the second trip.

Mr. Wood. That is the largest one you have?

Mr. Glover. Yes, sir.

Mr. Wood. Can you do that with some of the rest of them?

Mr. Glover. No, sir; we can not.

Mr. Wood. Why?

Mr. Glover. Well, the provisions in the contract will not allow a reduction, and we feel that these lines that have gone down there and pioneered into Central America and South America ought not to be cut down the same as we might some of the other lines.

Mr. Thatcher. It would have to be a voluntary matter on their part? In other words, under your contract, have you any discretion in the matter?

[fol. 3695] Mr. Glover. No, sir. In the lines to Central and South America, when you take into consideration the fact that our Government has spent almost $40,000,000 in lighting the way, giving radio service, intermediate landing fields, and all the safety that goes to the art of flying in this country to our operators here, when you consider that these operators have gone down to Central and South America and have had to pay their way, they have had to pay

for their radio stations and their weather reports and all their landing fields, you will understand the situation.

Mr. Wood. How are you getting along on those two lines in South America, one on the east coast and one on the west coast?

Mr. Glover. Since you gave us permission last year to increase the frequency on the west coast, the business has also increased, and the business on the east coast is now united with the service across the Andes.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 418

IN THE UNITED STATES DISTRICT COURT

FOR THE SOUTHERN DISTRICT OF NEW YORK

Civil Action No. 90-259

UNITED STATES OF AMERICA,

Plaintiff,

v.

PAN AMERICAN WORLD AIRWAYS, INC., W. R. GRACE AND COMPANY, and PAN AMERICAN-GRACE AIRWAYS, INC.,

Defendants.

Excerpts from the testimony of Walter F. Brown, Postmaster General of the United States (1929-33); *Hearings Before the United States Senate Special Committee on Investigation of Air Mail and Ocean Mail Contracts*, 73rd Cong., 2nd Sess. (1934)

pp. 2458-2463:

The Chairman. May I ask you to read this letter into the record, please, sir, if it is your signature? First, I will ask you to read the one of July 2, 1931, from Captain Doe to you.

Mr. Brown. Do you want me to read this one first?

The Chairman. Yes, because it precedes the other one.

Mr. Brown (reading). "July 2, 1931" — it is on the stationery of Eastern Air Transport, Sperry Building, Manhattan Bridge Plaza, Brooklyn, N. Y. [Continues reading:]

Thomas B. Doe, President.

Hon. Walter F. Brown,
Postmaster General, Washington, D. C.

Dear Sir: The situation in Cuba is rapidly coming to the point where, in order to protect our interests and carry out our agreement with the Cuban Government, it will be necessary for us either to enter into a working agreement with Pan American or an open fight. Up to the present they have, through control of the business from Miami to Havana, made it difficult for us to develop as we should. Twice I have taken steps to prevent lines being opened between Miami and [fol. 3697] Havana, in hopes that Mr. Trippe would eventually see the wisdom of concentrating on the through business and leaving the local business to our Cuban company.

At present we are operating mail and passenger lines from Havana to Santiago and from Santiago to Antilla and Baracoa, under government guarantee that enables us to about break even. Cubans resent the moves made by Pan American to encroach on the strictly Cuban business, and I am convinced that the money and effort spent by Pan American in trying to force us out of Cuba is building up ill-will, whereas a proper working agreement, which would enable us to proceed with our plans to develop the Cuban business would build up good will for both of us and effect important economies.

I believe that a continuation of the present attitude would result in another service from Miami to Havana, with a working agreement between the Seaboard Air Line Railway and our Cuban company. I also believe that the Cuban Government would welcome such a

move, as it would produce more traffic and therefore more revenue for Cuba. They, of course, know that Pan American has a $2 a-mile contract, and many of them feel it is unfair for this to be used as a club to prevent their developing their own aviation.

I am making every effort to arrange a proper agreement, rather than have an open fight, and I am taking the liberty of enclosing letter from Mr. E. W. Smith, receiver for the Seaboard Air Line, and also letters from Mr. W. D. Pawley, president of our Cuban company, which, of course, were meant to be confidential and which I would appreciate your returning to me.

I would not presume to bother you with this matter if it were not for the fact that we wish to, in every way, cooperate with your plans for development of aviation, and do not wish to make any move which is contrary to your desires. I appreciate that you are loath to step into these matters, but would certainly like to have such indication of your wishes in this matter as you might feel at liberty to give me.

Very truly yours,

Thomas B. Doe.

The Chairman. Will you look at the next letter and see if that is your signature, and if it is, read it into the record, please.

Mr. Brown. I think it is. It is very badly blurred, but I think probably it is.

[fol. 3628] July 7, 1931.

Capt. Thomas B. Doe,
Eastern Air Transport, Inc., Sperry Building,
Brooklyn, N. Y.

My dear Captain Doe: Your letter of July 2 has received careful attention. While I, of course, appreciate the desirability of cordial relations existing between the various interests that are carrying the mails by air, I am of the opinion that the Department ought

not to be drawn into controversies that are wholly outside our jurisdiction.

I have stated frankly to the air mail operators that in the present state of the industry it did not seem the part of wisdom to invade each other's territory with competitive services and that I did not believe that money paid for postal service should be used to set up services to injure competitors. In pursuance of this policy I suggested the abandonment by the Pan American Co. of the domestic field in the United States, and as a result of that suggestion you are now negotiating with the Pan American Co. for the taking over of their Atlantic City service. Their field is the international service to Mexico, Central and South America, and the West Indies. Consistently with the policy outlined, it would seem improper for any of our domestic air mail operators to use mail pay to invade the peculiar field of the Pan American Co.

For your information I have another letter from Mr. Vidal, of the Ludington Lines, protesting against the extension of your service to Atlantic City, and again offering to carry the air mail from New York to Richmond at a saving of a thousand dollars a day over the compensation paid the Eastern Air Transport Co.

Sincerely yours,

And apparently my signature.

The Chairman. I see you stated in this letter, "In pursuance of this policy I suggested the abandonment by the Pan American Co. of the domestic field." Is that correct?

Mr. Brown. The Pan American Co. on numerous occasions tried to edge into the domestic field, and I thought as they were getting $2 a mile for their operation, and we were paying these domestic fellows just barely their out-of-pocket costs, that that was not a good policy.

The Chairman. Did you suggest, as you have stated here—

[fol. 3699] Mr. Brown. That Pan American keep out of the domestic field?

The Chairman. Yes.

Mr. Brown. Yes.

The Chairman. Did you also suggest that other companies keep out of the foreign field?

Mr. Brown. Well, I suggested to Doc very plainly there, I think, that that seemed to me a wise disposition of the services in the state of the art at that time, where it could live only on a subsidy.

* * * * * * *

The Chairman. I will ask you now to look at this letter to the Secretary of State, dated June 25, 1929, and if it is your signature, read it into the record.

Mr. Brown. It is my signature.

Office Postmaster General,
June 25, 1929.

The Honorable Secretary State.

My dear Mr. Secretary: I have your letter of June 21 in the matter of rendering diplomatic service to American companies seeking concessions to the establishment of service to Guatemala and El Salvador.

As stated in previous correspondence, the Pan-American is the contractor on route no. 5 between Miami and the Canal Zone, whose contract provides for extension of service on the route to Guatemala and El Salvador. The same company is contractor for this Department on air mail, route no. 8 from Brownsville, Tex., to Mexico City, or Vera Cruz, Mexico, and the contract for service to that route provides the service may be extended to Vera Cruz, Port of Mexico, and—

Some other place I cannot pronounce—

Mexico to one or more places in Mexico. This does not apply for air mail service. Since the Pan American Airways has a contract for this Department under

which service may be extended, it is requested diplomatic assistance be rendered that company in preference to any other company.

The Chairman. May I ask, Mr. Brown, if it is not true you wrote a number of other letters to the State Department [fol. 3700] ment asking them to give a preference to Pan American in South American countries over all other companies, American or foreign?

Mr. Brown. I don't remember any such letters. If you have them, I will be very glad to tell you whether I did.

The Chairman. Don't you remember that was your policy?

Mr. Brown. Well, we had a contract with Pan American, and we were trying very hard to help them get enough revenue so they could return postage to us and make the company self-sustaining. It seemed as though one company with a contract was enough for us to support at that time. We had a contract with Pan American; we were interested in their making good under the contract. I don't know whether this Latin American company was a United States company, or whether it was not; but I do know that whatever we did in the matter we did with a view to making Pan American self-sustaining so the burden on our Government would be very small, so the postage would be sufficient to pay the $2.

The Chairman. Returning to the question, the question that I would like to ask you is if you remember—and I assume you would remember your general policy—

Mr. Brown. I think I told you no.

The Chairman. I did not understand you to say no.

Mr. Brown. I don't remember any such letters.

The Chairman. I did not ask you about the letter. I asked you if you did not remember it was your policy as expressed to the State Department, the policy under which you acted for several years, that the Post Office Department asked the State Department to give a preference to the Pan American over all other companies, foreign or American, in South American territory. Was not that the acknowledged and accepted policy of the Post Office Department?

[fol. 3701] Mr. Brown. Well; perhaps it was. I would not dignify it with the term "policy", but that is the practice we certainly followed on several occasions.

The Chairman. Do you remember when another American company started to establish a line on the west coast of South America?

Mr. Brown. No; I don't unless you mean at the time that Mr. New awarded the contract to Pan American.

The Chairman. Do you remember whether or not the State Department at first declined to render diplomatic assistance to Pan American in preference to other companies, American companies?

Mr. Brown. I have no recollection of that whatever.

The Chairman. I will ask you to look at the last paragraph of this letter on pages 2 and 3, from the State Department [give the date, and the one to whom it is addressed.

Mr. Brown. This letter is addressed to the Postmaster General, June 21, 1929. The Postmaster General at that time was Mr. New. I do not know anything about the whole matter.

The Chairman. I want to see what they said their policy was.

Mr. Brown. I don't know whether that is an "s" or not. I think that is a "9".

The Chairman. I think that is "9".

Mr. Brown. I think that is "9", but it is a very bad "9". You want me to read something on the second page?

The Chairman. The last paragraph, if you desire. If you look over it, it might be you would want to read it all.

Mr. Brown (reading):

> This Department is very reluctant

I think perhaps we had better read the whole letter. (Reading:)

[fol. 3702] June 21, 1929.

The Honorable the Postmaster General.

Sir: With further reference to your letter of June 7, 1929, regarding the policy to be followed in rendering diplomatic assistance to American companies seek-

ing concessions for the establishment of air mail services in Latin American countries, I have the honor to request an expression of your views regarding the situation which has arisen in Guatemala and El Salvador because of the competition there between two rival American companies.

Both the Pan American Airways and the Latin American Airways, which is understood to be a corporation financed on the Pacific coast of the United States, have been endeavoring to obtain concessions for the extension through Guatemala into El Salvador of the routes which they propose to establish from the American border through Mexico to the Guatemalan frontier. Their competition, both in Guatemala and El Salvador, has been of such a nature as to make it possible that no American company will obtain the desired privileges, and their activities have, therefore, been a source of concern both to this Department and to its representatives abroad. The problem of extending diplomatic support to the companies concerned has been made difficult not only by their rivalry between themselves, but by the fact that both propose to operate through companies incorporated in Mexico. It has not been the practice of this Department to extend assistance in obtaining business to foreign corporations, even though their stock is controlled by American interests.

The American Minister at Guatemala City recently reported that he had succeeded in persuading the two companies to abandon their activities against one another upon the understanding that the Pan American Airways would seek permission to extend its Miami-Cristobal service to Guatemala and El Salvador, while the Latin American Airways would seek permission to establish a service from the Mexican frontier to Guatemala City. It appears, however, that the Pan American Airways subsequently refused to abide by this agreement on the ground that your Department had "ordered" the company to extend its present Browns-

ville-Mexico City route to Guatemala. The situation with regard to assisting the two companies diplomatically is, therefore, still a difficult one.

This Department is very reluctant to extend diplomatic assistance to one American company against the other, particularly where the interests of different sections of the United States appear to be involved, as in the present case where one company appears to be endeavoring to establish a route from the western part of the United States into Central America, and the other from Texas. It would be unfortunate on the [fol. 3703] other hand if the rivalry between the two companies resulted in the failure of either to obtain permission to enter Guatemala and El Salvador. In this connection information regarding the views of your Department with respect to air mail service in the countries referred to would be very helpful.

I have the honor to be, sir,

Your obedient servant,

Henry L. Stimson.

For the Secretary of State.

The Chairman. May I ask if it is not true, and if you do not recall, that in every single instance where a contract has been sought by the Pan American during your administration, and the same contract was sought by others, that your Department has requested the State Department, and has taken the position that you desired that the assistance be rendered to the Pan American Co.?

Mr. Brown. Well, no contracts were ever awarded by me to the Pan American Co. except two, I think. The matters referred to in these letters are concessions in these cities. The contract let or awarded on the 2d of March 1929, just before I came to the Post Office, provided for extensions of service under the terms of those contracts into all these cities in Central and South America. Now, when it was time to start the service, of course, an American company could not fly into those countries without the

permission of the Government, and the right way to deal with the Government, as we all know, is through our own Government, through the State Department. So we were interested in the Post Office Department in seeing our contractor who was carrying our mail under our contract would have the concessions necessary to make him live up to the contract. I was not asking the State Department to give Pan American any contracts.

The Chairman. I will change the question. Is it not true that during your entire administration when there came [fol. 3704] up a question as to whether the Pan American Co. would get a concession in South America, or some other company would get a concession in South America, that you asked the State Department to intervene through its ambassadors and consuls in favor of the concession to the Pan American Co.?

Mr. Brown. I don't know as to that, but I know that I did on several occasions.

The Chairman. Is it not also true in several occasions where the parliaments of the country had unanimously voted against the concessions being granted to Pan American, that you asked the State Department to assist the Pan American in obtaining the concessions?

Mr. Brown. I have to answer that in the negative, because I never heard that the parliaments did object.

The Chairman. You never heard there were any objections among the members of the parliaments or law-making bodies?

Mr. Brown. No; I never did.

pp. 2465-2466:

The Chairman. Did you know after these objections had come from not only these countries, but many others, that the State Department—

Mr. Brown. Please tell us what "these companies" mean.

The Chairman. This company, Pan American—these countries I have just asked you about—that the State Department continued to send messages in favor of the Pan American to Panama, Honduras, Guatemala, El Salvador,

Chile, Bolivia, Peru, Colombia, Venezuela, Ecuador, and Brazil?

[fol. 3705] Mr. Brown. I didn't know that, but I think the State Department finally reached the conclusion the United States Government was in partnership with the Pan American in a mail service to South America in which they took the mail from our country down and brought the mail from the other countries back, and they are very anxious to get a complete service and justify the expenditure, and I suppose the State Department did just what I did, tried to make a success of it.

The Chairman. Don't you know the State Department's attitude was based on answers to specific inquiries from them to you as to what their policy should be from time to time with reference to these concessions?

Mr. Brown. I think when we started—some of it comes back to my mind now—when we started the conversations with the State Department, they were not aware that we had a contract, had made a contract with Pan American for this service, and they thought they were asked to choose between two companies that were on the same footing, but when they finally reached the conclusion the Government itself had an interest in Pan American, then I think they exerted themselves in every proper way.

The Chairman. Do you not know in some instances the other American companies had started out first in South America?

Mr. Brown. It did not make any difference about that because they did not have any contracts with our country.

The Chairman. They could have gotten them, could they not?

Mr. Brown. They did not get them. There was one contract let, and only one, in South America, except that small contract down to San Quas, and subsequently extended to Montevideo.

[fol. 3706] The Chairman. Do you remember the Tri-Motor Safety Airways case in which they had a contract in South America?

Mr. Brown. No; I don't. They did not have any contract with the United States Post Office Department.

The Chairman. They could not get any, could they?

Mr. Brown. I do not know whether they were in existence when the Pan American contract was awarded or not.

The Chairman. Did you know that in compliance with the request of the Post Office Department, and the policy the State Department set in a document no. 811.7961/1-17:

> That we would be justified in informing our lines in Argentine, Brazil, Chile, and Venezuela that Pan-American Airways as an American concern, is entitled to all proper diplomatic assistance, but no assistance should be rendered to Tri-Motor Co. because of the probability such an assistance would be helpful to foreign as against American interests.

Mr. Brown. Would be heplful to foreign?

The Chairman. Yes; do you remember the Tri-Motor Co. at all?

Mr. Brown. No; I don't, but I would think if Mr. Stimson thought another company was working in the interests of some foreign organization, that he would be entirely within his rights in doing what he could to circumvent it.

The Chairman. Did you know that only a few months previous to this action by the Department that it had instructed the Embassy in Paris to support the Pan American Airways in negotiations looking to the establishment of air service in Latin America, then pending with the French interests, Leltonera, the same company whose alleged arrangement with the competitor of Pan American was shortly thereafter deemed sufficiently threatening to offer certain support—with still other companies competing with Pan American?

Mr. Brown. I didn't know about that. There was quite a bit of competition between our company and the German [fol. 3707] and French companies. They were all trying to get a footing, and our State Department was supporting the American company.

The Chairman. The evidence in the State Department shows the Tri-Motor was an American company.

Mr. Brown. I cannot help you with the Tri-Motors, for I don't know anything about it.

pp. 2639-2641:

Senator Austin. I would like to ask you something about Pan-American. Your attention was called to the question of whether preference was shown to Pan-American as against other American companies in respect to the carriage of foreign mail. I would like to ask you what would have been the effect on the Government's return from the Pan American's operations in South America if a competing American company had entered the field there and received the United States mail contract?

Mr. Brown. Well, if I get the drift of it, perhaps I can explain it with a little time. The Pan American contract, which was let before my time, awarded before my time, provided for the carrying of mails from the United States to South American countries, and the carrying of the mails back to the United States from South American countries. The Post Office Department fixed the rates, the postage rates, for outbound air mail destined to South American countries—that is, the postage that nationals in our country would have to put on letters that were being dispatched to South American countries. Under the terms of the contract, Pan-American was to get $2 a mile each way, and any postage that they got on the return trip from South America for bringing letters to our country from South American countries was to belong to the United States, and to be credited on what we owed them.

The Department, as I say, fixed the postage outbound from the United States to these other countries, and re- [fol. 3708] quired that Pan American collect from the same countries the same rate on north-bound, or United States-bound mail—that is to say, the rate that we fixed in moving mail from our country to South American countries, Pan American was obliged to get from these countries in dispatching mail to us. Now, if another company had gone into that field down there and taken a contract to move the mails from South America to the United States, and agreed to pay him at a lower rate than the rate we had fixed up here for carrying the mails south-bound, which necessarily was the rates Pan-American had to collect, at once those countries would have said, "Here, we are not going to pay

Pan-American more than we have to pay any other company" and the matter would have had a complication which was a very serious one, and would at once have reduced the amount of postage the United States would have got for moving that mail to our country, and the United States was really in partnership with Pan-American, because we pay $2 a mile outbound and inbound and get all the revenues both ways to apply on it, and the more revenue we can get, the quicker the whole operation will be self-sustaining; and so for that reason the Post Office Department was anxious to get concessions for Pan-American in the Central and South American countries, to swell that revenue that all applied on the contribution the United States Government was making to this operation.

Does that make it clear?

Senator Austin. Yes, sir. I am going to ask you, however, a hypothetical question, which I think is very near the facts. Assume that an American company, known as Nyrba, procured concessions from Argentina, Uruguay and Brazil to carry mails from those countries to the United States for rates of $10 per pound downward, what would have been the effect on the financial return to the United [fol. 3709] States from South American mails if Nyrba Company with those contracts had been incorporated in our foreign mail operations?

Mr. Brown. Well, the average charge that the Post Office Department made for outbound mail to South American countries was about $25 a pound, what was collected, and that was the amount that Pan American had to pay the Post Office Department for any mail it moved to our country originating in those South American countries.

Now, if any other company had taken the north-bound mail at a lower price, the natural thing that would happen would be that Pan American would get no north-bound mail, at least unless they met the price, and if they met the price, our Government would not get it—that is all; and if we did not get the mail at all we would not get the revenue.

Senator Austin. In net cash, it would mean this, does it not, that the whole north-bound revenue would come out of the United States in an assumed case like that?

Mr. Brown. Yes, sir.

Senator Austin. And it would therefore be against the public interest, would it not?

Mr. Brown. Exactly.

Senator Austin. Now, then, as a matter of judgement for this committee to pass upon, and perhaps recommend to the United States Senate, in your opinion, should we recommend any other practice than to support our partner in that carriage of foreign mails?

Mr. Brown. No; I think it is the only thing that has any common sense at all.

[fol. 3710]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 419

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Docket No. 2423

In the Matter of

PAN AMERICAN-PANAGRA AGREEMENT

Room 5042, Commerce Building
Washington, D. C.
Thursday, December 19, 1946

The above entitled matter came on for argument before the Board at 10 a.m., pursuant to notice.

BEFORE:

JAMES M. LANDIS, Chairman
OSWALD RYAN, Vice Chairman
HARLLEE BRANCH, Member
JOSH LEE, Member.

APPEARANCES:

HENRY J. FRIENDLY, 135 East 42nd Street, New York, New York, and

FOWLER HAMILTON, Southern Building, Washington, D. C. on behalf of Pan American Airways, Inc., 135 East 42nd Street, New York, New York.

GERHARD A. GESELL, 701 Union Trust Building, Washington, D. C., on behalf of Panagra.

E. SMYTHE GAMBRELL and W. GLEN HARLAN, 825 C&S Bank Building, Atlanta, Georgia, on behalf of Eastern Air Lines.

WILBUR LA ROE, JR., 743 Investment Building, Washington, D. C., on behalf of Port of New York Authority, 111 Eighth Avenue, New York 11, N. Y.

EDW. D. RAPIER, 1025 Whitney Building, New Orleans 12, La., on behalf of Orleans Airport Commission, New Orleans, Louisiana.

L. L. HIGHSAW, JR., Public Counsel.

HUBERT A. SCHNEIDER, 815—15th Street, Washington, D. C., on behalf of Braniff Airways.

—3—

[fol. 3711] Mr. LaRoe: Mr. La Roe.

Mr. Chairman, counsel have agreed if it meets with your convenience to let me go ahead of Braniff, since I favor the principle of through routes and uninterrupted service.

Chairman Landis: Public Counsel?

Mr. Highsaw: Mr. Highsaw.

Chairman Landis: 45 minutes.

I guess we are ready to proceed.

ARGUMENT OF HENRY J. FRIENDLY, PAN AMERICAN AIRWAYS, INC.

Mr. Friendly: I plan, Mr. Chairman, to use about 35 minutes.

I would appreciate a warning at 30. It is with something more than ordinary pleasure that we are here today to place before the Board the Through Flight Agreement between Pan American Airways and Panagra.

We think this agreement is constructive in the highest sense. Constructive because it eliminates a barrier to the free flow of air travel between the United States and seven

great nations of South America, because it provides better air service to people who are now air travelers, and by so doing will make more air travelers. Constructive also because it does all this without unwarranted duplication of facilities or schedules. And constructive finally because it represents a solution of a problem which has been of deep concern to the Board and, I assure you, also to the parties, for many years.

Let me outline the division of labor for today's argu-

—4—

[fol. 3712] ment between Mr. Gesell and myself. My argument will be devoted entirely to the agreement which is sometimes called Agreement "A" between Pan American Airways, Inc. and Panagra, and as to that agreement I shall deal primarily with what might be termed general public interest considerations.

Mr. Gesell will discuss certain features of that agreement relating to problems that are peculiarly Panagra problems. He will argue the legal question as to whether this involves Panagra's performing air transportation north of the Canal Zone and will cover all questions relating to Agreement B between the two parent companies.

First, a statement, necessarily brief, of what the agreement provides.

The basic principle of the agreement is that Pan American as requested by Panagra, will charter aircraft which Panagra operates into Balboa from Lima or points farther South, for through operation from the Canal Zone over one of Pan American's routes to the Continental United States.

The aircraft are to be operated by Panagra's flight crews.

Pan American will pay Panagra a charter hire consisting of the direct flight expenses, an allocated amount, which we estimate to be about $43,000 a year at the outset, representing such portion of Panagra's indirect expenses as are directly related to the services performed, and a reasonable return on Panagra's investment in the aircraft used.

The initial route over which these flights are to be operated, is Pan American's certificated route between the

—5—

[fol. 3713] Canal Zone and Miami. However, if and when

the Board permits a straightening out of our route to New Orleans, in accordance with an application which we already have on file, Panagra may request that through flights be operated also over that route.

Now, the agreement also takes account of Pan American's pending domestic route application. It provides that if the Board grants Pan American the route from Miami along the East Coast, flights under the agreement may proceed to Washington and New York, the two points that are of primary importance for Panagra traffic, and likewise from Miami to Chicago.

There are also provisions that, subject to suitable certification and subject to the existence of sufficient traffic, stops might be made at Philadelphia and Boston, and that the agreement might ultimately be applied to the operation, if it is authorized, between New Orleans and Chicago.

Now, the through flights provided for in this agreement are not simply to be superimposed upon service which Pan American is offering and its certificated routes. Rather, they are to be an integral part of Pan American's service.

Not only will all revenues and expenses on these flights North of the Canal be for Pan American's account exactly as with flights performed by Pan American's own aircraft, these flights will be available for and used by local as well as through passengers and that is an important point.

Panagra's traffic to or from the Canal splits at that point. About 60 per cent of it goes to the Miami gateway, the rest

—6—

[fol. 3714] to the Western gateway.

Now, that means that, to maintain a satisfactory load factor on through flights that are operated even to Miami, which is the heaviest gateway, it is important that Panagra be able to draw—or that these flights rather, be able to draw—on local Balboa-Miami traffic.

Now, it is true that the through flights are to be scheduled primarily for the convenience of the through traffic, and that the agreement provides for reasonable space assignments to prevent them from being blocked by local traffic—something, I may say, which the intervenors seek to make

appear very wicked indeed, although of course it is every day practice for every airline and for that matter, on every airline in the United States.

However, these flights will receive substantial support from local passengers.

The agreement thus permits Panagra's traffic to reach the United States on Panagra's aircraft operated with Panagra's crews, but with the flights north of the Canal an integrated part of Pan American's already certificated operations.

It provides also practical measures for enabling that Panagra traffic to be effectively sold.

Pan American is to continue as general sales agent for Panagra, as it has been ever since the two companies started. The advantages of such an arrangement seem to me to be obvious.

Panagra by itself could never afford sales offices and an organization for dealing with travel agents throughout the

—7—

[fol. 3715] United States, of anything like the same extent as Pan American's.

However, the agreement recognizes Panagra's separate identity and makes detailed provision for its development from a traffic and sales standpoint.

At all airports in the United States to which Panagra's aircraft may be operated under this agreement, its name is to be displayed, and if it desires a reasonable number of its own traffic and Panagra service employees may be stationed.

Pan American also agrees that at its more important city sales offices it will designate a particular Pan American employee who is to be specially charged with promoting the sale of Panagra traffic.

—8—

[fol. 3716] In short, we have tried to set this agreement up from a traffic and sales standpoint in a way in which Panagra will receive the benefit of Pan American's sales effort exactly as it would if it were any other part of Pan American's operation, except that Panagra's individuality, corporate and otherwise, is to be fully preserved.

Now, I am going to leave to Mr. Gesell to outline to you the provisions of the agreement relating to maintenance and training. We made this agreement for 99 years. We did that, not because that term has any particular magic, but because it is symbolic of an agreement intended to be permanent and while we intend to bind ourselves, we of course had no intention of similarly binding the Board. We drew the agreement knowing full well that it required approval under section 412 and that such approval could be withdrawn at any time if experience under the agreement or other factors made it appear adverse to the public interest.

Now that, of course, is the barest outline of a contract some 24 printed pages long. I was a little pained at the statement in public counsel's brief that this contract to which Mr. Gesell and I had devoted nearly two months of intensive work, "was drawn in a great hurry", and in general was a pretty sloppy performance.

If there are defects in the text, I can assure the Board that they are the result of personal inadequacy on the part of the draftsman and that they don't come from lack of time or application by the party.

If the criticism is simply that in an agreement intended to last for a long time, we didn't intend to dot every "i" and

. . . . . .

—12—

[fol. 3717] another petition will have to be filed and the formality of another hearing had.

Now, let's look at the approach that must be made to this case. Under either 412 or 408, it is altogether different from that in a certificate case. Before the Board may disapprove this agreement, it must be shown that it is contrary to the public interest but the difference is not merely one of burden of proof.

Here, the parties already have the franchise to carry the traffic to which this agreement relates. Therefore, we do not have such questions as possible burdens on the treasury for additional mail pay, or even for that matter, of competitive effect upon other carriers, unless, of course, the situa-

tion calls into play the monopoly provisions of 408 B, a suggestion which is made here only by Eastern, and which I don't think even warrants reply.

The bundle of rights in a certificate, a fortiori, whatever there is in a certification application, does not include a right to prevent improvements in the service of carriers already certificated. You made that very clear in your opinion in the United Western case. This through flight agreement serve the public interest, first and foremost by doing just what it says, namely, permitting through flights.

That is a statement of fact that is simple and plain and easily understood and yet unless it is sufficiently emphasized it becomes lost in the fog that is generated by the intervenors, who by building up small incidents to tremendous proportions, seek to obscure the simple fact that it is a very good thing not to route passengers out of here at

—13—

(fol. 3718) Balboa in the middle of the night. It is for the purpose of serving those passengers. The American Tourist going to Quito. The Chilean business man enroute to New Orleans, the Peruvian delegate to the U.N. in New York, that this company has spent the millions of dollars that it has in developing air service and that this Board was called into exist.

It is for those people, not Braniff, Eastern, or for that matter, Pan American of Panagra, that all that was done. The record here shows that during the first half of 1946, nearly 7500 passengers traveled between the United States and points on Panagra's route south of Balboa. Sixty per cent of those, or about 25 a day, passed through the Miami gateway. That number, of course, will increase. It has got to increase tremendously to support the new American flag and foreign flag competition which lie ahead.

Yet at present, everyone of those Panagra passengers has to change planes at Balboa. Bad as connecting services have been in the past as compared with one plane service, they will be relatively worse in the future. With the speed of the DC6, for example, the additional hour required for a connection at Balboa over and above the stop that would have to be made on a through flight, is the equivalent of a

quarter of the flight time from Balboa to Miami, and sleeper planes introduce a still further problem.

The exhibits here show that suitable afternoon departures, either from New York or Buenos Aires, will put schedules through Balboa in the early morning. A rather exact parallel, in every day experience, to this requirement of a Balboa transfer on a DC6 flight between New York and

—14—

[fol. 3719] Buenos Aires, would be if all rail passengers between New York and Florida were required to get out of their berths at Richmond. We passed that long ago in our rail service. And yet, everything I have said up to this point leaves out the worst feature of a connecting service, namely, the danger of a missed connection. The relative infrequency of the schedules into and out of Balboa, as compared with those at important junction points within the United States, makes the consequences of such a missed connection peculiarly severe, and the length of the route on either side of Balboa accentuates the risk of such a miss.

I think it is fair to ask just what there is in this agreement so contrary to the public interest that you gentlemen should require a load of passengers to be dumped out at Balboa 365 nights a year, and on some of those nights find there connections missed.

I suggest that the burden of persuasion which that simple fact places on the intervenors—and I include public counsel there—is a very considerable one, particularly considerable when we consider that section 2 of the Act places upon you a mandate to coordinate transportation between air carriers—a mandate, incidentally, of precisely the same dignity as the often referred to phrase in that section about competition. I suggest that that burden of persuasion is not met by such generalities as talk about undesirable patterns of interchange and the like.

The public simply should not be asked to tolerate the inconvenience of this transfer, and they don't have to tolerate it. South American travelers originating in, or destined to, the portions of the United States served by Braniff,

—15—

[fol. 3720] will use that carrier's service. Passengers to New York can use the services of Braniff and National

connecting at Havana which will involve only one change of plane as compared with the two now required for Panagra and Pan American, and, I think it is only a question of time—or should, I say, rather, of timing—before Braniff and National will make arrangements to eliminate even that.

Moreover, those are by no means the only choices which a traveler will have. While this country has undoubtedly the power to shackle its service between the west coast of South America and Eastern United States, by requiring one change of plane at Balboa and another at Miami, it cannot force others to do the same. The Bermuda agreement provides for British service from New York to Santiago once the British are already operating at Buenos Aires. I don't think you gentlemen have any doubts that there will be an Argentine company operating up the west coast directly between the traffic centers in the northeastern United States.

There is the Peruvian company which General George is now heading, in all likelihood a Chilean company, there are two Colombian companies already authorized to operate into Miami. One of them goes as far as Ecuador and the other as far as Peru already, and then can extend. No one can seriously believe, I think, that a New York business man going to Santiago will have very much difficulty in choosing between a through sleeper service on BOAC, for example, and a three-plane service on Eastern, Pan American and Panagra.

We ought also to beware of the fallacy that comes from thinking only in terms of United States citizens going to

—16—

[fol. 3721] South America. A large amount of the traffic on this route consists of South Americans coming to the United States. United States carriers are going to have a hard enough time competing for the patronage of those people against their own national flag airlines and we ought not to make that task harder unless we are serving some real and substantial public purpose by so doing.

Before I pass to other matters, I want to dwell on one thing which I mentioned previously, namely that this agreement represents a voluntary solution of a troublesome prob-

lem. I can assure you that the last thing that I have in mind doing today is to debate the pros and cons of the so-called Panagra extension controversy, now happily resolved if you approve this agreement, but I think in view of some of the arguments that will be made, you ought to realize that that disagreement reflects a sincere and honest difference of opinion, both as to what Panagra was intended to be and as to what, in its own best interests, it ought to be.

Pan American did not participate in creating Panagra in 1929 simply to make an investment. It conceived Panagra rather as an extension of its already authorized line from Florida to the Canal, and we consider that original intention to be still the best and soundest intention, not only for Pan American but for Panagra also.

We believe that Panagra owes a great deal of its success to the fact that it has been a part of the Pan American Airways system just as it owes another part to the contributions that have been made by W. R. Grace and Company. To place Panagra in paralleling point to point competition

[fol. 3722] with Pan American between the Canal Zone and the United States would have meant a complete and violent change in that relationship, and in our judgment would have seriously impaired the value of our stockholders' investment in Panagra itself. I am not asking you to say that those views are right, although I happen to think they were. I do think it important for you to know that this record shows them to be the views not of one man but of Pan American's entire Board of Directors—views unanimously adhered to after long discussion and after the opposite point of view had been fully and ably presented to the individual Directors by our friends in W. R. Grace and Company, and that holding those views as we do, we feel bound by fiduciary duty to our stockholders to maintain them to the limit of our ability in every proper way.

Any voluntary adjustment of this controversy had to take account of this fundamental view of Pan American's, just as it had to take account of Grace's equally fundamental view, that Panagra's traffic must have direct access to the United States in Panagra's planes operated by Panagra's crews. One of the virtues of the agreement, as I see it,

is that while of course it contains certain concessions, as any such agreement must do, it does not—and indeed it could not—have reaped abandonment by either of the parties of any principle which either of them regarded as fundamental. It is because the agreement meets the fundamental views of both parties that we are so certain that it is a good agreement and a workable agreement. That is why we are so sure that it is so much better than any solution, whatever it might be, imposed as a result of continued litigation and yielded to only as a matter of compulsion.

—18—

[fol. 3723] Now, in the time that remains, let me turn to some of the arguments that will be made against this agreement.

First, it will be claimed that the agreement eliminates competition between Pan American and Panagra. The agreement simply does nothing of the sort. The only competition which has ever existed between Pan American and Panagra is for traffic between the northeastern part of the United States and the two common points of Buenos Aires and Montevideo. The routing is generally controlled by the travelers plan for intermediate stops.

Many passengers wish to go down one coast and up the other, and the traveler whose sole objective is to get to Buenos Aires without intermediate stop as rapidly as possible is a fairly rare bird.

The traffic that is truly competitive is certainly less than five per cent of Panagra's revenue, and, of course, is a very much smaller proportion of Pan American's. The agreement in no way adversely affects Panagra's position to compete with Pan American for that traffic. On the contrary, it very much improves it.

At the moment, Panagra is in a poor position to compete with Pan American for this Buenos Aires traffic or to compete with anyone else's for it. This agreement assists Panagra by eliminating one of the two changes of plane now required, by bringing Panagra's planes into Miami, and as we hope, ultimately to New York, as well as by the traffic and sales provisions which I have mentioned. At this point I should deal with one provision in the agreement to which I did not refer in my initial outline. That is section 13 A,

—19—

[fol. 3724] where the parties recorded their intention that at some reasonable time after the agreement had been working, they would sit down and consider a pooling agreement with respect to traffic to these two common points of Buenos Aires and Montevideo. There is no certainty that any agreement of that sort will ever be made, still less certainty as to what its terms and conditions will be, and, of course, any such agreement would be subject to further approval by the Board.

Far from there being anything sinister about that provision it was inserted rather as a matter of full disclosure, with the thought that if such an agreement were later to be made and submitted, we would not want the Board to feel that there had been any lack of candor about our intentions at the present time.

We have assumed, of course, that the Board's order will leave no room for doubt that it is not now approving even the principle of pooling, and if that is not enough, the Board can disapprove this particular provision without the slightest effect upon anything else in the agreement.

Chairman Landis: Your thirty minutes has passed.

Mr. Friendly: Thank you.

Now, let me turn to what I think is the real argument on the subject of competition, and that is that the agreement terminates the litigation which might have made Panagra a parallel competitor of Pan American on this sector between the Canal Zone and the United States. That, of course, is a sector where Panagra never has competed with Pan American. It is a sector where any possibility of Pan-

—20—

[fol. 3725] agra's competing with Pan American rests entirely upon conjecture as to the outcome of litigation which is still a long way from being concluded.

There is not a shred of evidence in this record that additional competition for Pan American between the Eastern United States and the Canal is required. We have already been given American flag competition by the connection between Nation and Braniff at Havana, a service which has as yet even to be begun, and if it be said that National's and Braniff's is a two-carrier service, what is Pan American's

service at the present time from any city except Miami itself, and the traffic we all know doesn't come from Miami.

Moreover, this sector of the Caribbean will be traversed by every foreign airline operating between the Eastern United States and west and South America, British, Argentine, Chilean, Peruvian, and Colombian.

Yet, the traffic on which all those operations must depend —and I am including the local traffic now as well as the thru traffic—amounted during the first six months of 1946, to about enough to sustain one flight a day with a four-engine airplane, and that is more than the Crozier figure to which you referred in your opinion in the Latin American case.

Of course, that volume will grow, but it will have to grow a good deal to provide reasonable loads for the eight airlines already indicated more than there are on any route within the United States, not to speak of the steamships which were not operating in the first half of 1946, but will be some time in 1947.

To my mind, this whole idea that Panagra must be required in the public interest to compete with Pan American

—21—

[fol. 3726] on the sector between the Canal Zone and the United States, is simply a throw back to a condition that may have existed in 1942, when you instituted docket 779 but the basis for which has now completely disappeared.

I think it is no secret that in 1942 many people in the government and outside the government believed that the most desirable pattern of American flag air service in Latin America would be obtained by utilizing Panagra as a vehicle for competition with Pan American, and, of course, such a pattern would obviously have required something more than the certification of Panagra to the continental United States. But since that time, an entirely different plan has been provided. It has been provided by the certification of no less than seven competing American flag lines and particularly by the extension of Braniff to almost all important traffic points on either coast of South America, and superimposed upon that is a volume of foreign competition, particularly by the Latin American nations, which

certainly was never anticipated in 1942, or for that matter, as I believe, in 1945.

Yet, with more carriers indicated for operation between the Canal Zone and Miami than there are between New York and Chicago, the intervenors continue to mouth this cry of monopoly, and to urge that Panagra be forced to compete with Pan American, and that this constructive solution which the parties have arrived at, should be rejected by you in order that they may be forced to compete with each other on a sector where there is no showing that there is even traffic to support the competition much less to require it.

Thank you

—24—

[fol. 3727]

ARGUMENT OF GERHARD A. GESELL

PANAGRA

Mr. Gesell: I would also like notice after thirty minutes, Mr. Chairman.

I appear here, of course, for Panagra. Panagra most earnestly asks the Board to approve the through flight agreement, and make it immediately effective in order that Panagra's traffic may have the benefit of direct one plane service between the East Coast of the United States and the West Coast of South America—something that has been long awaited and very much needed in Panagra's whole picture.

I concur in the arguments that Mr. Friendly has made about the question of the public interest, and I am going to try to be very careful not to cover the same ground.

I do think there are certain features of this agreement which have to be examined from the point of view of Panagra, and I would like to call attention to those at the outset before I turn to a discussion of some of the legal points which have been raised by Public Counsel and intervenors, and some of the specific arguments.

The Board has recognized, in its opinions, that while, of course, it is concerned primarily with broad considerations of National policy in carrying out the objectives of the Act, there are situations that arise where the strengthening of an individual carrier is required for the sound development of the national system of which that carrier is a part. This is such a case.

We think the Board will want to consider most carefully the extent to which this through flight agreement will pro-

25

[fol. 3728] mote the economy and efficiency of Panagra's operations, and enable it to continue what we believe has been a significant role in the development of American air transportation in Latin America.

There has been so much talk about this question of passenger inconvenience at the Canal Zone that I want to emphasize a somewhat different feature of the through flight problem.

It is perfectly clear that the inconvenience to traffic at the Canal Zone is enormous in terms of expense, in terms of time; in terms of delay, but I think you have to look at Panagra's picture a little more broadly than just that question.

Panagra is going through a transformation, a transformation which I think is greater and more fundamental in its operations than any other certificated carrier, whether it be a domestic carrier or a foreign carrier.

Panagra developed its system in terms of being not only a through trunk international carrier, but by developing feeder routes, off-line routes, in an international service.

You know it has extensive services in Ecuador, extensive services in Bolivia, extensive services in the Argentine and Peru, and that a very substantial amount of its traffic is traffic carried between various Latin American countries.

I am sure the Board recognizes what is happening to that traffic.

Cabotage rights, which Panagra has enjoyed are diminishing. They were cancelled the other day in the Argentine

26

[fol. 3729] effective January 1. That represents a substantial reduction in Panagra's revenues.

It may require us to come here and consider with the Board the discontinuance of the diagonal route. It is also clear that the bilateral air agreements that are being negotiated are affecting Panagra's traffic picture.

Mr. Mitchel on his current traffic mission is proposing bilateral agreements of which the Board is fully aware. The effect of those upon Panagra's inter-South American country traffic is difficult to estimate now but it is certainly going to have an effect and we think it is going to be a diminishing effect as far as the traffic is concerned.

That means that Panagra's future, Panagra's growth, Panagra's development, is dependent upon its ability to serve the through traffic between the United States and South America.

That traffic already accounts for 51 per cent of Panagra's revenue, but it is going to account for a substantially greater amount. The development of the tourist traffic, and of course the diminishing of the other traffic, are all going to put the through traffic into a very dominant position.

Now, Panagra must be in a position to attract that traffic. If Panagra cannot attract that traffic it will go to competitors. Panagra doesn't want it all. Panagra wants its share. It can't compete with the one plane direct service of Braniff, touching the lucrative points and skipping all the difficult operating points, the difficult traffic points, and

—27—

[fol. 3730] it can't compete with these many foreign competitors who are coming.

Public Counsel, to my amazement, says that the foreign competition is speculative, and he seems to suggest that Panagra should sit still, patiently await that competition to develop, and then come in and talk to the Board.

We must anticipate it and it is only by anticipating that we are going to keep ourselves in a position to hold the important role we have had.

Chairman Landis: It would be difficult, wouldn't it, to think of Panagra's international route pattern as fitting in with the general route patterns being negotiated by countries including the United States and bilaterally?

Mr. Gisella: I think so, Mr. Landis. I think it is more than difficult. I think it is almost impossible as it is now

set up. Six points, I think you serve in Bolivia, if I am not mistaken. Probably more than that.

Chairman Landis: Probably more, and negotiate for perhaps eight to 10 points in Peru.

Mr. Gesell: Probably four or five or six in Peru and maybe eight or ten in Ecuador and six or seven in Argentina.

Chairman Landis: It is hard to think of those points as points for the development of international traffic. Local traffic, yes.

Mr. Gesell: Panagra's conception, of course, Mr. Landis, was that the proper way to develop an international system was to have way to way traffic which would promote adequate frequencies, promote strong equipment, but it is true

[fol. 3731] that that conception is not consistent with the bilateral air agreement approach which is being negotiated by this government now, and that is why I say the through flight agreement is so important.

Chairman Landis: In order to observe a through pattern of that nature, the United States' position would have to be, broadly speaking, that of insisting upon cabotage, the grant of cabotage from other nations, also a completely unrestricted fifth freedom, a position which, if it were being demanded of the United States reciprocally, I am afraid, would not find much favor.

Mr. Gesell: I am sure the chairman understands that I am not criticizing the policy. I am pointing out its effect upon Panagra which I say is more deep biting and more significant than upon any other American flag carrier.

I am not criticizing the policy at all and I think we would get into a discussion quite beyond this agreement.

Chairman Landis: I am not criticizing it, myself, but simply trying to gauge the kind of position that the United States will have to take with reference to world affairs, world air affairs, if it were going to redeem Panagra's route pattern.

Mr. Gesell: It would certainly have to retrace many of the steps already permanently taken, it seems to me, but that establishes, it also seems to me, the deep effect of what is happening upon Panagra.

The point, of course, is not that we must have a route pattern which is consistent with the bilateral and international agreements but that we must have a route consis-

—29—

[fol. 3732] tent with those agreements which will enable us to attract traffic, and this through flight agreement, in the opinion of Panagra, places us in such a position.

Now, we not only obtain, through the through flight agreement, a direct one plane service between points in the United States and points on Panagra's route—something which I think the Board in the Latin American decision recognized was desirable in the overall pattern, but we obtain under this agreement rights and opportunities efficiently to develop that through traffic.

I am not talking alone about sales which, of course, is important to the efficient operation of through flights under a cooperative arrangement such as this.

Mr. Friendly has talked about that.

I would like to talk about the maintenance and training provisions of the contract for a moment. Let's take maintenance.

Panagra has, as the Board is aware, taken commitments not only to take on DC-6 sleeper aircraft, very promptly on the delivery schedule, but it has also equipped itself with DC-4 aircraft.

Those aircraft are large complex multi-motored equipment, as the Board realizes—something quite different from the DC-3.

For Panagra to maintain those planes in South America, at its shops at Lima, or at some other point on its route, would require it in the first place to expand its facilities—an expenditure involving over a half million dollars—it would be required to employ some 300 additional mechan-

—30—

[fol. 3733] ics, and it would be confronted with a tremendous organizational and management problem on top of its present route and traffic problems.

Chairman Landis: Wouldn't the CAA also have to establish some inspection service in Lima if you established your shops down there?

Mr. Gesell: We have our shops down there and it has such a thing now, but I am talking that this must be expanded and changed. The machinery and equipment for the larger planes is quite different.

Panagra has also, although it hasn't been able to maintain its equipment well and up to CAA standards outside the United States, Panagra's costs have been tremendously high, because of maintenance away from the United States.

Mr. Lee: Higher than they would be in the United States?

Mr. Gesell: Very appreciably higher, Mr. Lee. The reasons for that are set forth, and unchallenged on this record. I will briefly review them to point out the problem.

Panagra must maintain much larger inventories. The cost of its equipment and material is much greater due to the transportation. It is perfectly true that national labor in those countries is less expensive than national labor here, but the per hour productivity of that labor, no matter how carefully trained, no matter how carefully supervised, is nothing comparable to what the good American mechanic can do in the United States.

Now, we have made very careful estimates of the effect of these maintenance provisions on our operations, and they

31

[fol. 3734] show a saving for one year in maintenance alone for Panagra of $581,000. That is a substantial item for Panagra, and it comes about because our maintenance can be pooled and integrated and fed into the maintenance shop—extensive shops—which you all are aware Pan American maintains at Miami.

We will both get the benefit of larger overhead and we will have substantial savings. The Board has seen and heard a great deal, I think, recently about the desirability of cooperative arrangement in this field of ground facilities of which maintenance is one.

This is a concrete, definite, practical, proposal that will involve very substantial savings. We have shown in detail that our equipment can be fed into this route and brought up there, that Pan American's maintenance schedules and work loads are such that they can take care of this, and we have shown this substantial savings that will help us to

maintain with Pan American a direct one plane through service which is efficient and able to compete with foreigners and others, and the same thing is true of the training.

I wonder if any of you on the Board appreciate Panagra's training problem. Panagra was recruiting its men here and taking them to South America. The expense per annum for travel and training of employees who don't work out, because they don't like South America or because they are wrong under some different heading, is $12,000 a year. Just traveling expense.

By recruiting and bringing these fellows down, by pooling with Pan American in the states, we get not only the

32

[fol. 3735] access to the most modern equipment and the latest developments in the art, but we are relieved of substantial expense and in a much better position to recruit and train our people.

Chairman Landis: There seems to me quite a difference between those two arguments.

In order to get the benefits of so called pool maintenance you have to fly your planes up to the shops?

Mr. Gesell: That is right.

Chairman Landis: But in order to get the benefits of pooled training, this extension—not the extension but rather the opportunity to fly these planes profitably up to the United States—doesn't seem to me a requirement.

Mr. Gesell: I think so. Let's take the question of pilot training: Pilots need refresher courses and constant training, as the Chairman is aware.

If our pilots come to the States on productive flying under this agreement, if our pilots are based in the States and can take their training and work with the CAA in joint maneuvers with other airlines and on the radio beams and everything, because they are there in the normal operation of their business, our savings are tremendous compared to getting them up there for that purpose and I think that any operating man would agree that the best place for a training base is close to where operations take place and crews are based.

So that it ties into the through flight arrangement even under the training heading.

The same is true of radiomen and other types of per-

[fol. 3730] sonnel

I think that the Chairman will recognize also that I am referring to these matters not alone because of their relation to the through flight, but to show the comprehensive way in which this very basic problem has been approached.

Now, I think there is another way to look at this matter from Panagra's point of view which I am going to suggest to the Board.

All of us in Panagra are sincerely behind this agreement, not only the personnel of Panagra, but Grace and Pan American and PAA and anyone who has anything to do with it. We are confronted here, however, with what seems to me a rather desperate argument from some of the intervenors who say, that, "Isn't it a terrible thing that Panagra hasn't been allowed to apply for a route in its own name?"

Public Counsel suggests that 779 is the best way out of this problem, and Eastern, a vigorous opponent of solution of the Panagra problem by way of routes, now suggests that it is a terrible thing that that solution isn't possible.

I submit that some of the intervenors that you will hear here are not concerned with Panagra's problem of the merits of the solution but they are anxious to keep the controversy alive. They profit by it. They pick off it. They are not looking at this thing from the point of view of the public interest whatsoever, but I would like to meet the question of whether we should be permitted to apply for a route in our own name, head on.

[fol. 3731] I don't think it is determinative of this issue. If this agreement and arrangement here is in the public interest I can't see that it is determinative whether some other or different procedure would have been better or worse.

779 offers very little as the Board is aware.

If the Supreme Court decides in favor of Grace we are back into protracted proceedings before the Board on merits under every heading, and we see ahead years and months of very onerous litigation, but let us look at some of the

advantages which Panagra obtains under this arrangement, which the record clearly establishes would not have been available to it had it filed a new route application, because I think the argument can be met that way on its merits.

I want to point out in the first place that the service to the public under this arrangement is in every respect the equivalent of the service which would be available if Panagra had its own certificate extended.

The public will travel in a direct one-plane service, a safe service, a service with modern and efficient aircraft, with good meals—an excellent service in all respects.

The fact that Pan American and Panagra provide it jointly rather than Panagra providing it alone does not alter that fact.

Now, the advantages that we get under this arrangement—and ones that were important in reaching the decision on the part of Panagra to enter into the arrangement, are these: the maintenance problem which I have already talked about. Pan American would not have made its facilities

—35—

[fol. 3737] available to us if we had come there on our own certificate, and the testimony is clear on that.

The testimony is also clear under the hearing of training, to the same effect. The testimony is even more clear as to the sales agency situation with respect to which Mr. Friendly has already discussed.

Panagra also under this arrangement is relieved of the obligation of making substantial capital investments which would otherwise be necessary—and that is not a minor consideration in these days of economy and difficult problems in maintaining load factors and showing black figures.

Panagra would not have had as ready access, as we believe we would get under this arrangement, to a number of United States points—at best Miami, beyond all hopes New York, and certainly not opportunities which this agreement presents of Panagra aircraft proceeding to such points as New Orleans, Washington and others.

Also, Panagra's load factors would not be sufficient, in our opinion, in our own, to maintain these through flights except under most strenuous and energetic solicitation of local business between Balboa and Miami.

We are left in this position to develop the international traffic and we get the benefit of PAA's local traffic in our load factors and moreover we are relieved from the very burdensome litigation and placed in a position where we can start to compete now, and not months and years later.

Mr. Ryan: Compete with Pan American you mean?

Mr. Gesell: To compete with Braniff, to compete with the foreign competitors, and to try to get back from Pan

—36—

[fol. 3738] American, under this arrangement, some of the traffic from Buenos Aires which now, of course, is preponderantly in their favor because of their better service.

This enables us better to compete for Buenos Aires traffic, there is no question about that, but I am not pitching this argument on the question of competition with Pan American, but we are in a much better position to compete with them if we had through direct one-plane service between the United States and Buenos Aires. There is no question about that.

Chairman Landis: The solution of extending Panagra northward, on that point, your argument was more or less to this effect: that if this agreement is disapproved, the case now pending in the Supreme Court of the United States would go on. Perhaps as a result of that, Panagra will be in a position to file an application for an extension, and then you would have to go to the merits on that before the Board, and you said more or less you would be in the situation in which you are now.

I am just wondering about that. Time changes scenes a great deal. By the time you went through all that and found that legally Pan American was in a situation to file that application, it may be that three or four or five or six other American carriers would be certificated, that a number of foreign carriers might have entered the scene. It is practically a do or die proposition for you, now, isn't it?

Mr. Gesell: Yes. There is no question about it.

Chairman Landis: It isn't something for the future?

—37—

[fol. 3739] Mr. Gesell: That is why I emphasized the time factor. We must have opportunity now and this agreement provides it. I had intended to speak at some length

to you about this other argument concerning the inherently bad situation which prevails in Panagra, in the view of the intervenors, who have seized upon an isolated phrase in an opinion in the Panagra Terminal Investigation of this Board, written on a jurisdictional opinion without reviewing the case on its merits.

I am not trying to tell the Board what it meant when it referred to an inherently bad situation. I suppose the Board knows that, but the record shows here clearly that there has been only one basic controversy in perhaps operations. That has been this extension problem. The line has prospered and grown.

The partners have cooperated under many headings. There has been a great deal of pioneering and efficient service, and if this solution, which we believe is a solution, is accepted by the Board, any cause for future deadlock or difficulty is eliminated.

Now, I think I had best turn immediately to a discussion of the legal questions which are raised. The first of these is the question whether or not Panagra requires an amendment to its certificate under Section 401 to operate under this agreement.

Chairman Landis: Here is a convenient place, I think, to recess for ten minutes if we can break into your argument. I think you have about 10 minutes left.

(Recess taken.)

* * * * * * *

—45—

[fol. 3740] over the certificated route. Of course, here we have the radio controls and the operational and ground controls which is quite something different than in the motor field.

Chairman Landis: You ought to develop gliders.

Mr. Gesell: Yes. Some kind of chain of gliders might do it. I wanted to also discuss in my final point this question of Section 408.

Chairman Landis: Your time is about up. About two minutes.

Mr. Gesell: I hope I can go over just a bit. I guess I can take it off rebuttal.

I want to cover this section 408 problem.

There has been a great deal of talk about it. I want to first make clear that the problem has two aspects. One is whether or not Grace and Pan Corp are essential parties to this proceeding, and second, whether the parent company agreement should have been formally filed for approval.

It, of course, was filed as an exhibit and has been before us. I want to make clear what the record shows on this parent company agreement situation. It was attached to Pan American's petition as an exhibit. It has been before the Board since the proceeding was initiated. We stated at the pre-hearing conference, and again on the record, that all facts concerning the execution, operation, and meaning of the parent company agreement were before the Board for consideration.

We presented witnesses from Pan Corp and Grace who were examined at length concerning the agreement, and every aspect of it was gone into. We even said that it was

—46—

[fol. 3741] our view, and we so stipulated it and made clear, that if the Board didn't like some provision of the parent company agreement, it could require its modification as a term or condition attached to the approval of the through flight agreement.

And then, so that there would be absolutely no question about it, we filed a stipulation in this proceeding which was specifically stipulated to by Grace and Pan American Corp, which said, "You can make us parties in this proceeding if you want, from the outset, we recognize the jurisdiction and the power of the Board over us," and they said, "We are here and you can do what you wish concerning us."

That stipulation is set forth in the appendix to our main brief. So that on the facts there has not only been no concealment of this parent agreement but the fullest exploration of all its terms and provisions and the parties to that agreement, Grace and Pan Corp, have recognized and acquiesced in and bowed to any jurisdiction which the Board wishes to take over them in connection with this proceeding.

So that as far as any problem of essential parties is concerned, I can't see that it exists at all.

The other question, however, is whether or not the parent company agreement required approval because under the agreement Grace was acquiring control of Panagra. That seems to be the gravamen of these various arguments about 408—the assertion that Grace has acquired control of Panagra.

We say that is not the case. In the first place, to bring

—47—

[fol. 3742] the agreement before the Board, the Board must find that Grace is an air carrier or a common carrier or a person controlling an air carrier. There has never been any determination on those issues except by Examiner Nye in one of the proceedings, who found that Grace was neither a common carrier nor an air carrier.

We think it falls in none of those categories. It certainly isn't a person controlling an air carrier within the meaning of the section because whatever may be its control of Panagra of a negative sense, the statute obviously has in mind the control—a person who controls one air carrier who seeks to acquire control of another carrier.

But we don't have to decide those because I think on the merits it is perfectly clear that there has been no acquisition of control here by Grace.

Pan American and Grace each continue to own 50 per cent of the stock. Mr. Roig who has been the only President of this company and who has served in that position since 1939, continues in office.

Now, what is then perhaps the difference? Has the President gotten additional powers? Perhaps through that angle it could be said, and that seems to be the argument particularly of Eastern, that the President here has gotten in some way, solidified in a position under the parent company agreement, which gives Grace control.

That is not the fact on the record. The testimony is explicit that the powers of the President had been substantially reduced by this agreement. His activities have been limited in that he has not as much control over the

—48—

[fol. 3743] section of one of the key personnel, the Vice President in Charge of Operation. And there is nothing

in this contract which changes the basic fact that the President is not in a policy position. He remains in the administrative position he has always held in Panagra, a position where he must proceed in consultation with both groups of shareholders and proceed on policies which both groups of shareholders determine.

His testimony in this proceeding was explicit that he had an administrative and not a policy post and that hasn't been changed by this proceeding at all. I think his position has been weakened moreover by the fact that he can now be removed. He used to be a President, sitting in this position and there was no machinery for his removal.

That doesn't exist any longer. The contracts are explicit as to his removal. The cases which Eastern Air Lines has cited in one of its—I can't remember whether it is the first, second or third filing of the particular motion concerning the power to appoint the President being a determinative factor in control are in cases not involving a fifty-fifty company, cases not involving whether there has been an increase in the character of control from an affirmative to a negative control.

They are cases involving small family bus companies where mothers, aunts, sisters and uncles bring in from the outside a trained operator to carry on after the old man has died and he is given policy as well as administrative functions.

Clearly such a man is in a totally different position

49

[fol. 3744] in relation to motor carrier than Mr. Roig is in relation to Panagra under the facts as the Board knows them to have existed in Panagra's case.

I, therefore, conclude, again asking the Board to approve the agreement making it immediately effective.

Mr. Lee: I want to ask one question, Mr. Chairman.

Obviously there are some nice questions here, legal questions, as to whether this should be a 401 or 408, and so on. Then there is the question of competition more or less.

What do you conceive to be the real issue in this case though?

Mr. Gesell: I think it is the public interest.

Public interest in terms of providing direct one plane service between the East Coast of the United States and the West Coast of South America, public interest in terms of all of the factors we have had mentioned concerning passenger convenience, concerning building up Panagra as a strong competitive unit, public interest under all of the different standards that the Act in Section 2 indicates—efficiency and economy of its operations, the coordination of air transportation—all of those things we talked about.

Mr. Lee: Do you agree with Mr. Friendly that the competition issue is relatively small and unimportant in this case, that there would be as much or more competition, and even so it is still small, it will be cooperative?

Mr. Gesell: I take it you are talking about competition between Pan American and Panagra?

[fol. 3745] Mr. Lee: Yes, that is what I had in mind.

Mr. Gesell: Because I think Mr. Friendly and I both agree that there is plenty of competition independent of that, but as to that issue, I quite agree that this agreement establishes no competition between Panagra and Pan American north of the Canal, but I say,—and I don't know whether Mr. Friendly touched on this or not—that this agreement enables Panagra better to compete with Pan American for the important Buenos Aires traffic, so to that extent, I think it even furthers the competitive picture.

Mr. Lee: It seems to be competitive and cooperative, if you understood Mr. Friendly, that passengers would have the choice of going down one side of South America and coming back the other.

Mr. Gesell: That is right. Of course, Mr. Lee, I am sure you will recall the statement of Justice Brandis, that the Sherman Act, and those who were concerned with competitive questions, never intended that the competitors couldn't contract in order that competition can exist.

Mr. Lee: But generally the competitive issue between Pan American and Panagra, it is your position and Mr. Friendly's that that is relatively small in this case.

Mr. Gesell: Yes. We say that what has happened with the development of air transportation, is that Panagra

is no longer to be looked upon as an independent regional competitor, along the lines of Mr. Burden's Book "The Struggle for Latin American Airways," for example, that that competition has been supplied by the Board and through Braniff and has been supplied by the great rise

—51—

[fol. 3746] in foreign competition.

Mr. Lee: That is all, Mr. Chairman.

Mr. Branch: Mr. Gesell, I wonder if the public interest couldn't well lie in the question as to Panagra being an independent carrier, independent all the way from Buenos Aires to the United States.

I ask that question and make that observation because I also wonder if maybe some of the competition that Panagra now is facing might not have materialized had Panagra been an independent carrier from B.A. to the United States. If that is true, or if that is a fair assumption, then I am wondering if Panagra still remaining subordinate, and having no extension in its own right to the United States, might not still face some questions of whether there is further needed competition direct from the East Coast down the West Coast of South America through the Canal Zone. All of those questions it seems to me seem to hinge around whether this arrangement provides the competition necessary in the public interest.

I agree with you that this is a public interest question pure and simple, and I don't know—I am not sure in my own mind—but those points do arise in my mind—and I would like to have you, just for a minute or so, see if you could do anything to help me on the question of whether or not we don't still have a problem in competition or lack of competition.

Mr. Gesell: Well, I think I would approach it this way, Mr. Branch.

I would first urge upon you that you take a look at

—52—

[fol. 3747] conditions as they exist today. We have had so much of that Panagra problem up before us so many times and so many different ideas have been advanced as to what its role is, that perhaps in the process some of us have solidified one idea or another as to what its role should be.

You will recall that in this proceeding, in the Latin American case, Braniff urged it be certified into this area because it said one of the advantageous things about that would be that it would bring Pan American and Panagra together in some kind of cooperative arrangement. Whether that was the factor or what the factors were that brought about this agreement it is difficult to say. It has been the product of that. It has been the product of the recognition of the impossibility of obtaining any approval from Pan American to come up as an independent carrier and it has been Panagra's recognition of the fact that its opportunities to compete are not necessarily only in the direction of Pan American, but that it has got to fight for its life against a rising flood of American and foreign competition.

Now, this agreement can be in the public interest, it seems to me clearly, even if it doesn't, in the opinion of the Board, provide sufficient competition in this area. It can be in the public interest because of its effect on coordinated transportation, aid and convenience to the passenger, economy and efficiency of operations, and these other headings.

Now, if the agreement is approved on that basis, and not because it is a means of creating additional compe-

[fol. 3748] tition—because that is only one of the tests—a test which perhaps can be over-emphasized—the Board can take a look at this picture and see whether there is enough competition.

Mr. Branch: Yes and you can't have the—

Mr. Gesell: I would suggest that they not do that until they see what the operations under this agreement show, but that would be for the Board to determine, and I don't think the case should be approached from the narrow question of competition alone. That is just one of the factors.

Mr. Branch: This doesn't change the competitive status between Pan American and Panagra?

Mr. Gesell: Except that it puts us in a better position to try to get some of their traffic at B.A. We can't do a thing without this agreement. We can't compete with

that one plane direct New York San Juan Buenos Aires route.

Mr. Branch: Now, on this lease arrangement, you bring your plane and your load passengers whatever it is up to the Canal Zone and under the charter contract you turn them over to Pan American and Pan American brings them over its certificated route from the Canal Zone to Miami?

Mr. Gesell: That is right.

Mr. Branch: And hopes to bring them to other places, as I understand it?

Mr. Gesell: We hope they will bring them to New York.

Mr. Branch: So you have no more control over it after it leaves the Canal Zone.

[fol. 3749] Now, what happens on these turn trips? Panagra's plane with its name on it and its pilots sitting in the cabin, fly to the United States. When they start back, on whose account are they flying, who sells the tickets going back, who controls the traffic when it leaves?

Mr. Gesell: Pan American under all those headings.

Mr. Branch: So then the competition isn't as clear as it would be, were there two different setups, two operating?

Mr. Gesell: Well, we have a common sales agent Pan American.

Now, Pan American as a common sales agent has taken on obligations under this contract not to discriminate against the East and West Coast traffic.

Mr. Branch: What do you expect to get in the way of traffic to B.A. from the United States?

Mr. Gesell: We expect to get, in traffic that doesn't itself indicate its own route, an equal share. You understand that most of the traffic indicates its own routing. A man says, "I want to go via Lima, I want to go via Santiago, I want to go to Rio," and that gets decided.

Mr. Branch: Oh, of course.

Mr. Gesell: But in the cases where the man is undetermined, we expect to get an equal share of the traffic, judging relative frequencies and matters of that sort.

Mr. Branch: But the tickets are still sold by Pan American?

Mr. Gesell: They are still sold by Pan American, but the agreement contains very detailed provisions to safeguard against any possibility of discrimination and in the

—55—

[fol. 3750] event discrimination should occur, which Mr. Roig, and Panagra, and Grace, and every one are confident will not, because of the manner in which this agreement was entered into, there are provisions in this contract for discontinuing Pan American's sales agency.

Mr. Branch: There was a time not so long ago, was there not, when Panagra had the time and distance advantage between the Canal Zone and B.A., which perhaps it still has, but never was allowed to enjoy the benefits of such time and distance advantage.

Pan American brought the traffic down from the United States to the Canal Zone, and for a long long time it went around by way of Barranquilla and back up while your planes waited at the Canal Zone to take it down to B.A.

In recent years there have been some direct planes and the services have been increased. I don't know how many there are now, how many connections you get direct with Miami?

Mr. Gesell: We get connections for every service we run in there now.

Mr. Branch: For every service you run in?

Mr. Gesell: Yes.

Mr. Branch: So that you don't have the same problems you had a few years ago?

Mr. Gesell: I think it was more than a few years ago. I think it was many years ago.

Mr. Branch: It doesn't seem very long that I was trying to get Pan American to give you a direct service to the Canal Zone?

—56—

[fol. 3751] Mr. Gesell: It was quite a ways back.

Mr. Branch: My questions are directed to the point—maybe it isn't a good one—this arrangement doesn't in any way clear up what might have been lack of competition which may be of interest to the public.

Mr. Gesell: If your decision is that none of these public interest questions which Mr Friendly and I have dis-

cussed here today are as important as launching Panagra as a wholly independent competitor of Pan American, if that is your decision. I can't conceive on the facts how it can be—but if that is your decision, this agreement doesn't accomplish that.

This agreement enables us far better to compete, even with Pan American, and certainly better to compete with Braniff and certainly better to compete with the foreigners. It encourages competition, but it doesn't put us in the position of an independent competitor to Pan American and I don't quite see how that role can be suggested in the light of Pan American owning 50 per cent of Panagra, and in the light of the close working arrangements we have had under the heading of traffic and maintenance and technology of all kinds.

I think it may be an unrealistic approach.

Mr. Branch: So your contention and Mr. Friendly's contention is that regardless of the question of competition, this arrangement does provide something in the public interest and ought to be considered on that basis. If there is any additional competition needed because Panagra is still an arm in the branch of Pan American then

57

[fol. 3752] the Board can consider that.

Mr. Gesell: The Board can consider that.

Mr. Branch: The thing before us is the matter of improving the existing condition.

Mr. Gesell: That is right and we would hope that before the Board embarked on considering the competitive situation any further, it would do two things: it would wait a reasonable time to see what happens under this agreement, and it would wait a reasonable time to see what the traffic and competition is in this highly growingly competitive area.

We think we are going to have, Mr. Branch, in just plain fact, we think we are going to have a situation where we, if we were operating between New York and Washington, we will have 41 competitors, that is what we think we are up against. That is the simplest way I can say it.

Judging the traffic, making fullest allowance for the potentials, putting it against the situation which exists

right now between Washington and New York, we think we will have the equivalent of 41 independent competitive airlines, and we think that is pretty hard competition.

Mr. Roig's testimony is explicit and detailed on that and I trust the Board will have an opportunity to glance at it.

Mr. Branch: Thank you.

Mr. Ryan: Mr. Gesell, there would be just as much competition between the United States and South America, through this agreement, as Pan American may permit, will there not?

—58—

[fol. 3753]. Mr. Gesell: I don't understand that question.

Mr. Ryan: I understood you to say Pan American will have control of all of the solicitation agencies facilities within the United States. If Pan American wants to, it could divert traffic, could it not?

Mr. Gesell: No. No it cannot.

Mr. Ryan: Why?

Mr. Gesell: If it diverts traffic it violates the contract.

Mr. Ryan: I mean to say you have the power to divert traffic?

Mr. Gesell: I think it hasn't the legal power. If it diverts the traffic it violates the contract. We can take them immediately to arbitration under this agreement. They cannot, under this agreement, prevent Panagra from taking them to arbitration and if the arbitrator finds that they have discriminated they lose the sales agency.

So, I say, it is unrealistic to say they can discriminate.

Mr. Ryan: How do you know whether or not there has been any discrimination, if you do not have ticket agents alongside the Pan American ticket agents in the United States?

Mr. Gesell: Panagra has been accustomed to watching Pan American in the light of Pan American's sales agency activities.

We have statistics as to what is happening to the traffic. We have many friends who travel over Pan American as well as Panagra. We will have under this arrangement full access and close relations to the actual people selling

—59—

[fol. 3754] the tickets. You understand that in these sales agencies a man, while a Pan American employee, will be designated to watch particularly for Panagra's business just as they will designate a man to watch the North Atlantic or a man to watch the South Pacific, and we will have much opportunity and many ways of knowing whether there is discrimination and if there is discrimination Panagra will take forward the rights it has under the contract, and the matter will be resolved.

I don't think that is going to happen.

Mr. Ryan: If this agreement is approved, and Pan American lives up to the agreement in that respect, there will develop a friendly competition between two branches of the Pan American system, insofar as this operation is concerned?

Mr. Gesell: This agreement doesn't quite reach that stage. If you are talking by analogy, I think it even goes too far. Panagra does not become a branch of the Pan American system. It has its independent management, it has its independent Board of Directors, it continues as a separate identifiable carrier under the management of a different person—W. R. Grace and Company.

Mr. Ryan: I didn't mean that. I meant insofar as this route is concerned, insofar as this operation is concerned, there will be a kind of friendly competition between two branches of the same system.

I am not implying by that question that I think there should be competition between two branches of the system, but I am saying, as a practical fact, it will be a kind

—60—

[fol. 3755] of such competition as will exist will be a friendly competition between two branches of the same office, will it not?

Mr. Gesell: I think it will be competition, and I think it will be friendly.

Mr. Ryan: Let's say cooperation.

Mr. Gesell: Perhaps I haven't adequately made clear to you that Panagra will have its own traffic generating organization as it has today. Not only some staff in the United States, but a tremendous organization in South

America too, and the competition isn't going to be simply the competition where all traffic is sold by a single sales agent.

There is going to be real competition. We are going to sell people on the idea that Quito is a lot better place to go than Rio de Janeiro, that the fishing at Santiago is a great deal better than the fishing at some point on Pan American's route wherever it is. There is going to be real competition.

Mr. Branch: But the people in South America know that, don't they? It is the people up here you want to tell about it.

Mr. Gesell: That is right and we are going to tell them.

Mr. Branch: Do you have sales agencies in the United States?

Mr. Gesell: We have under this agreement a sales agency in the Chrysler Building, with an independent advertising program, with independent persons who call upon the traffic agents.

—61—

[fol. 3756] Mr. Branch: Where do they sell?

Mr. Gesell: They sell in the United States.

Mr. Branch: Where do they advertise?

Mr. Gesell: They advertise in Time Magazine, and all the other periodicals. I am sure you must have seen some of those advertisements.

Mr. Branch: I was just trying to remember.

Mr. Gesell: There has been an extremely active program ever since the war ended to generate that traffic and I am sure if you glanced at any of the periodical currently in your office you will see it, and our Panagra man go and call upon the PAA sales agency setup. You see PAA sales agency is of two kinds. They have got Pan American offices, main coordinating offices, but they have a great mass of agents—people in hotels, people in the steamship business, people in the railroad business, people in travel agencies, and we are in direct contact with those people. We are sending them literature. We are calling upon them. We are urging them to sell Panagra traffic. We are pointing out the advantages of the Panagra route and we are trying to generate traffic in the United States. We are doing it.

Mr. Branch: Under this contract, as I understand you, you are not permitted to sell tickets. They are all handled by Pan American, but you are permitted to have agents who are advertising and trying to convince people that you have something to offer them, and they should go your way?

Mr. Gesell: That is right.

Mr. Branch: I suppose you could have such an educa-

—62—

[fol. 3757] tional agency in Miami as well as in New York?

Mr. Gesell: Yes, surely.

Mr. Branch: And any other place you wish?

Mr. Gesell: Surely. There is nothing in this contract that prohibits that in any way. It is a centralized Panagra Company-wide program that needs some central direction, and it has been in New York for that reason. We have travel films, we are showing them to the agents. We have a very active program.

Chairman Landis: By the way, when I go down here to Union Station and ask for a ticket to New York, do I get it over the Pennsylvania or the B and O?

Mr. Gesell: You get a separate ticket, I think.

Chairman Landis: I don't know. I would like to know.

Mr. Gesell: They ask you which way you are going and you get a separate ticket.

Chairman Landis: Suppose I say "Which way is the best?" what answer would I get?

Mr. Gesell: It depends on the question of which is best—you would probably have to talk to the Pennsylvania man and the B and O man.

Chairman Landis: Who is the man I talk to. Is he a Pennsylvania man?

Mr. Gesell: I understand he is a Pennsylvania man.

Chairman Landis: It is the Union Station.

Mr. LaRoy: It is the Washington Terminal.

Mr. Gesell: I don't know who he is. Maybe he is an employee of the station.

Chairman Landis: You do have separate ticket offices

—63—

[fol. 3758] in Buenos Aires, don't you?

Mr. Gesell: Oh, yes. Well, in Buenos Aires we have a combination agency with Pan American that has existed there for a long time.

Chairman Landis: Today?

Mr. Gesell: Today. We have separate ticket offices all along the West Coast, at all our points.

Chairman Landis: But this agreement, as I remember it, does not extend the point sales agency idea—that is, not the joint sales—but the Pan American sales agency idea, to points other than points in the Continental United States. Is that all?

Mr. Gesell: Well, it continues it in the United States and does not extend it to South America at all. You see it has always been in the United States. That has always been off-line for Panagra, but Panagra has its own organization.

Chairman Landis: So far as competition between Pan American and Panagra is concerned, this agreement does, according to your contentions, improve the service from Miami and Eastern points to Buenos Aires, so far as Panagra is concerned?

Mr. Gesell: That is right.

Chairman Landis: And that improved service you contend enables you to compete more effectively with Pan American than you do today?

Mr. Gesell: That is right. For the common point traffic.

Chairman Landis: For the common point traffic?

Mr. Gesell: And it also enables us to attract people

—64—

[fol. 3759] better to non-common points. A man would be more likely to go to Santiago to fish than if he has to change.

Chairman Landis: I was looking at it from the competitive standpoint. How else does it improve your capacity to compete with Pan American than that?

Mr. Gesell: Other than to the common points.

Chairman Landis: No. To the common points.

Mr. Gesell: It enables us better to compete for the Buenos Aires traffic by reason of the fact that we have under the arrangement a direct one plane, faster service, but it doesn't affect the solicitation of traffic at Buenos Aires.

Chairman Landis: If I may make my point I think it is this: Admitting the efficacy of the agreement to increase your capacity to compete with Pan American, does it at the same time reduce your willingness to compete because of the fact that solicitation along this line in the United States is in the hands—

Mr. Gesell: I don't think so at all.

Chairman Landis: That is the point.

Mr. Gesell: I don't think so at all. I see no reason at all why we should do that.

Chairman Landis: That is the argument against that.

Mr. Gesell: We have developed quite a long ways since the ancient and hoary days of 779. We have quite an independent set up and satisfactory set up in the United States and we are developing a business to Buenos Aires via the West Coast and anything that will help us get our traffic there more efficiently helps us in that drive.

[fol. 3760] and the notion that Pan American is also selling tickets doesn't affect that.

The competition still is there. There is nothing in this agreement that diminishes the situation at all. In fact, I think it approves it on the solicitation level even.

Mr. Branch: If you are in the United States and free to act independently you ought to get the lions share of that business, oughtn't you, from B.A. to the United States, instead of just impartial provision?

Mr. Gesell: Well, Mr. Branch, I don't know. Let's see where we are. Are we talking with Panagra stopping at Miami.

Mr. Branch: I am talking with Panagra coming to the United States, wherever it may be. Whether it is New York or anywhere else?

Mr. Gesell: It is a tremendous difference. The traffic generates around the New York area. We think as long as Pan American has this route here (indicating on map) down through San Juan direct to New York, even if Panagra's planes come under this agreement to Miami under Pan American's route, that we probably won't get the lion's share of the business because we think—

Mr. Branch: You think they will be picked up at New York?

Mr. Gesell: Yes, and we think it is a better service. We think it is a lot better service.

Mr. Branch: I think maybe you are right.

Mr. Gesell: The traffic isn't down here but if this route here is filled in between New York and Miami through

—66—

[Vol. 3761] the domestic case and if this agreement becomes operative so we can fly sleeper planes from New York to Buenos Aires we are going to give them a hell of a good run for their money and probably beat them because we are going to have a faster service and an equally efficient service and I should think we would have more than they do of the traffic.

Mr. Branch: But they sell the tickets at more than you do and give you an impartial livision?

Mr. Gesell: No. You haven't read the contract.

Mr. Branch: I thought you said that?

Mr. Gesell: I said the contract speaks against discrimination, and you, I believe, have mentally said an equal share of the business. The contract says they must develop Panagra traffic in the same way as they develop their own without discrimination which means that if they have the advantage we have the advantage by way of routes and we should get the traffic.

Mr. Branch: Do you expect to do that?

Mr. Gesell: I think if we get to New York we will have more of the Buenos Aires traffic than they do.

Mr. Ryan: Is this agreement responsive to that suggestion in the Latin American aggreement that Panagra—I hate to quote it because I don't recall just what it does say—I wish you would check on it—that Panagra should be brought to the United States.

Mr. Gesell: I think the Board said that they would welcome the filing of an application to enable the determination of whether Panagra should come to Miami, New York or some East Coast point. They were speaking in terms of a route application. This is not a route application.

67

[fol. 3762] Mr. Ryan: I think it is responsive to the substance of the Board's thinking on that.

Mr. Gesell: I think the Board must determine that, Mr. Ryan, not I, but I think it is responsive to the mandate, the spirit of the mandate and the problem that the Board was concerned with. I think the Board was anxious to fill this gap—a direct one-plane service between the East Coast of the United States and the West Coast of South America. I think this fills it and I think it does it efficiently.

Mr. Ryan: Earlier you said something about Braniff having been put in in the Latin American decision, had created a competition, and that this was to enable Panagra better to meet that competition.

Braniff operates and would take care of the traffic competitively from Houston and New Orleans but Braniff doesn't extend to the East Coast of the United States. Therefore, would it be necessary, in order to provide a balance of competition between Braniff and the Pan American-Panagra system, to extend Braniff to the East Coast of the United States from the Canal Zone.

Mr. Gesell: Well, Braniff has a little more than a route from Houston. Braniff has a big system as of course you are aware all through the central part.

Mr. Ryan: If I were in New York I wouldn't want to go to Chicago and then take Braniff.

Mr. Gesell: Probably not. I think we are talking there about, roughly, 40 per cent and they would have a direct one-plane service there. One way to balance that is to

68

[fol. 3763] give us a direct one-plane service to a bulk of the traffic also.

Mr. Ryan: To Houston?

Mr. Gesell: Even though it is not the same traffic. Even though it is not the same but I think we all have in mind and cannot get out of our mind the fact that the Board brought Braniff across here, [indicating on map] out of its way to Havana, and brought National down to Havana, and we can't get out of our mind the fact that eventually we are going to be confronted with direct one-plane competition by Braniff throughout this whole area.

Now, Braniff, of course, has no such plan indicated in the record. Mr. Schneider has been careful to point out that he knows of no such thing but we think it is inevitable. We think when Braniff becomes familiar with Latin American problems—and I must say they are getting familiar very fast, with their survey flights and what not—we think they will come to it. But we also have one-plane direct competition from the foreign airlines. It is not alone a question of Braniff. We are confronted with direct one-plane competition by BOAC.

I hope if you will go by the Mayflower you will notice the offices they have. Somebody says that is speculative competition. I can't understand. And we are going to have direct one-plane competition from the Chileans, from International, from Peruvian International Airways. We have it in the northern part of our route both from TACA and Avianca now and I imagine there will be others.

Mr. Ryan: So you interpret this agreement then in the

[fol. 3764] light of the Latin American decision as an answer to the Braniff competition plus the foreign competition to which you would be subjected which, as I understand your argument, changes somewhat the decision from what it existed prior to the Latin American decision.

Mr. Gesell: That is right.

Mr. Ryan: In other words, now you are trying to fund your resources and trying to meet the competition of Braniff and the foreigners, and sustaining the public interest from the standpoint of a need for that kind of competition to South America rather than a competition between pre-existing carriers to South America. That is really your position, I think.

Mr. Gesell: Precisely except, as you stated it, you put it, I believe, in a negative sense. We think we are doing something affirmative here quite apart from this competition thing. We think we are creating a direct one plane service to fill this gap, and that it is needed.

Mr. Ryan: That is right but also there would be a public interest in strengthening the Pan American-Panagra system would there not, by putting it in a better position to meet the competition that has been put down there by the United States and by foreign air carriers?

Mr. Gesell: That is our view and we think that competition is far greater than anything we have had so far today.

Chairman Landis: The extent of competition of Pan American and Panagra have been subjected I mean Pan American flag competition—has always been within the

70

[fol. 3765] control of the Board, hasn't it?

Mr. Gesell: Even under the mail pay contract days, as a practical matter, it was difficult to operate without the mail contracts and the award of those contracts, and the control of the Post Office Department.

Chairman Landis: So that the government has always controlled the extent of competition?

Mr. Gesell: Yes.

Chairman Landis: Except insofar as Panagra and Pan American may not have competed with each other because of Pan American's 50 per cent control of Panagra.

Mr. Gesell: Yes, that is true. Of course, I think we have an American form of competition now, Mr. Chairman, that I am not sure the government can control, and I speak of the pseudo foreign competition.

We are confronting now and we are going to more and more, American competition in this area that I think nobody can control. We are confronted with Peruvian International Airways, for example, with essentially American and Canadian competition, and the Board I doubt has much control over that, nor the President. Peru determines that General George and his associates are a Peruvian carrier, and I think we are into an area where we are going to meet American competition, even in spite of the Board's efforts.

Chairman Landis: What is to stop Panair do Brasil being designated as the Brazilian carrier up to New York?

Mr. Gesell: Nothing at all.

Chairman Landis: Nothing at all.

Mr. Gesell: Nothing at all. There is in the minds of

71

[fol. 3766] some of us, however

Chairman Landis: It may be that your control over Panair will stop it coming into competition directly with Pan American.

Mr. Gesell: We have our TACA problem too.

Chairman Landis: But it is not all white?

Mr. Gesell: It is not all white, no. I don't intend to make it that.

Chairman Landis: That is all I have.

Mr. La Roe.

Mr. LaRoe: I am ready, sir.

ARGUMENT OF WILBUR LAROE

PORT OF NEW YORK AUTHORITY

Mr. La Roe: May it please the Board, the Port Authority was permitted to appear as friends of the court here after two intervening petitions had been denied.

Under those circumstances I do not feel it would be right for me to present the same kind of argument that I would make if I had been permitted to intervene. I feel that one who is permitted to intervene as friend of the court has a certain obligation to deal with principles and to try to be helpful to the Board rather than pleasing his special case.

For that reason I shall make no further reference to New York in my argument. Why is this little case of such tremendous importance. Why are the eyes of the whole aviation industry on this case?

The answer, I think, lies in the fact that there is a very important principle involved here. Last month on

. . . . . .

[fol. 3767]

ARGUMENT OF HUBERT A. SCHNEIDER

BRANIFF AIRWAYS

Chairman Landis: We will have to adjourn in ten minutes. Can you fix your argument accordingly?

Mr. Schneider: If it would be of convenience to the Board I would like to go straight through but if the Board would like to have me stop in ten minutes I will try to find a good breaking point.

Chairman Landis: We would like to make use of that ten minutes if at possible.

Mr. Schneider: Let me say this is not an interchange. There seems to be some confusion there and the best authority I can find you on that statement is Mr. Roig himself as well as counsel for both of the parties. There was much conversation during these hearings as to whether this agreement would be better or worse than an interchange or why an interchange hadn't been worked out and Mr. Roig vehemently stated that he had no interest in an interchange, that that had been suggested to him many years ago by Pan American and he had no interest in Pan American's planes going over his routes.

He wanted his planes to go north and his traffic to go north. I believe Mr. Gesell suggested, "Let's avoid the use of the word interchange. It is a one way street. Panagra's planes go north. This not an interchange."

In the time allotted to me I can not cover all the points involved in this very intricate contract. I suppose the time has now come for some of us to tell you what we think is wrong with it and why it is not in the public interest. Now, the parties here asked you substantially to confine your

—83—

[fol. 3768] examination to the four-corners of this agreement, look within the four corners as to whether it is in the public interest. They don't want you to go outside at all except perhaps to look at contract B in deciding whether contract "A" is good.

Now, I say that you can't do that. You can't determine whether contract "A" is in the public interest without going outside of it. You have got to decide a number of other questions. You have got to decide first:

Who are the parties that have made this question?

What is the likelihood of their working out some of the very complicated provisions here?

What is the background of this contract?

What produced it?

That is what I would like to do in part of the time I have to review the history of that contract and what brought it into being because I don't agree that you can look only at the four corners of this instrument and decide the ques-

tion as posed by the statute under 412. You will recall that back in 1940 when Pan American sought entry into New Orleans, Mr. Roig, then president and still president of Panagra, became quite disturbed about that development. He thought an extension from Guatemala to New Orleans and the Canal Zone would foreclose an entry of Panagra in the future which he was then trying to get and he asked for authority of the Board of Directors to file application and was turned down.

The Pan American Directors on Panagra's Board, didn't see eye to eye with him or with the other directors on this point and they refused to sanction the filing of any such application by Panagra. This gave rise to one of the most

—84—

[fol. 3769] bitter controversies that this industry has yet had. Pan American refused to sanction any action by Panagra which it conceived to be adverse to its own best interests. Its directors refused to attend meetings called to consider this very question and they refused to consider Panagra's welfare divorced from Pan American.

Numerous attempts to solve this difficulty were unsuccessful with the result that Grace was finally compelled to file bitter complaints and various documents with this Board and Pan American filed numerous bitter answers.

Efforts by the Civil Aeronautics Board to reconcile the outstanding differences met with no success. Pan American was adamant in its refusal to permit Panagra to come to the United States. You know that. This resulted in the now famous 779 proceeding in which the Board on its own initiative and without any application from Panagra sought to inquire into the question and into the advisability of whether Panagra should be permitted in its own name to come to some point in the United States.

Mr. Ryan: Required to come to some point. Wasn't it? Wasn't it mandatory?

Mr. Schneider: I believe you were looking at the question from whether the public convenience and necessity under section 404, I believe, the amendment provision of the Act, required the extension of Panagra to the United States.

Now, the full record of that proceeding, the 779 proceeding, has been incorporated by reference into this proceeding. True, over the objections of Mr. Gesell and Mr. Friendly. But we felt that we had to have the whole picture to deter-

85

[fol. 3770] mine the question here, so you do now have it. The Examiner admitted it. Now, I haven't any intention to review all of 779. I wasn't in that case. I haven't any where near the familiarity with it that you have, but I do say that you should have it in mind, and the things that were said and the things that went on there are part and parcel of what is going on here today.

Now, that record probably involved as much mutual recrimination and charge and counter charge, or what perhaps might be called aeronautical billingsgate, as any case you have ever had and today they say, "All is light, peace on earth, good will toward men, it is Christmas, we are happy".

Chairman Landis: Sometimes they come.

Mr. Schneider: I intend to show you that they have not yet arrived at that point, sir. I say that record contains in it as unsavory a episode in air transportation as I hope I or any of us will ever see and if this were the answer I would welcome it.

Personally, I have always been sorry that in the 779 case you didn't decide the case on the merits and that you felt compelled to go off on a procedurely point. Apparently, you were of the same minds if I interpret your decision in the Latin American case correctly.

However, the Board's decision holding that it lacked jurisdiction to extend Panagra to the United States did not end the controversy. Grace appealed the Board's decision and met with some degree of success in the second circuit in New York and there also the Court recognized the unhealthy situation existing between those parties but

86

[fol. 3771] the fight continued. Pan American appealed the decision of the Second Circuit to the Supreme Court of the United States and apparently it was at that time determined that only the highest court in this land should tell it how to conduct its investment in Panagra and whether or not what it was doing was in the best interests of the public.

Only the Supreme Court should tell them what to do on that, not you. Both parties at this time were beyond reconciliation. Both were determined that the other was guilty of improper motives. Each was determined to force his will upon the other. And that is where the matter stood last May. That is history and it is history contained in the records of 779 and in the records made up in the second Circuit and presumably which would have been made in the Supreme Court, but in May of this year, something happened.

You issued your decision in the Latin American case and your decision brought about something which neither party had apparently expected and which threw as much confusion into Pan American's camp as it did into Panagra's camp.

Suddenly, Pan American and Grace were confronted with another American line having been extended into South America over the top of their company, Panagra. Each had felt himself so secure in his own domain in South America that this contingency had apparently never occurred to them.

While they had been grappling on the mat over the United States extension for Panagra, this Board with the approval of the president, extended Braniff into South America and it is nice for me to speculate whether this Board would have extended Braniff into South America or whether the

—87—

[fol. 3772] president would have told you to put a second line into South America had these parties presented at that time such an agreement as they presented after the fact.

Now, Mr. Friendly, and Mr. Gesell would have you believe that as of the date of the Latin American decision, or shortly thereafter, both parties decided to lay aside their differences and animosities and that they then took the pledge, the pledge serving the public interest.

I believe, however, that a fair interpretation of Mr. Roig's very frank testimony—and let me say to you that never has been a franker witness that appear on this stand before this Board than Mr. Roig—would lead you to the simple conclusion that the fact that the Braniff extension scared

them out of their wits and forced them to abandon their suicidal and mutually destructive struggle in the fact of a common foe. It was no sudden realization of its obligations to the public interest or to the travelling public over Panagra's routes which led Panagra into this agreement; nor was it any change in the course or objective which led Grace to abandon its efforts to get Panagra into the United States in its own name. It was the extension of Braniff into South America. Consider Mr. Roig's testimony.

He stated, without any reluctance at all, that almost immediately after the Latin American decision he called a meeting of the Board of Directors of Panagra to consider this new development, particularly in the light of your language in the Latin American decision that you mentioned, Mr. Ryan, as follows:

"In view of the facts above outlined", in lieu of which

—88

[fol. 3773] you review the unhealthy situation, "we feel that the joint owners should in the public interest cooperatively enable Panagra to apply for access to the east coast of the United States."

Now, note especially that your decision said, "enable Panagra to apply", and there is nothing in that language about an agreement to bring Panagra's traffic to the United States over Pan American's route.

Chairman Landis: I am afraid I will have to stop you here. We will reconvene at 3 p.m.

(Whereupon, at 12:50 P.M. a recess was taken until 3 p.m. the same day.)

—89—

[fol. 3774]

3 p.m.

AFTERNOON SESSION

Chairman Landis: All right.

You may resume, Mr. Schneider.

ARGUMENT OF HUBERT A SCHNEIDER

BRANIFF AIRWAYS (Continued).

Mr. Schneider: Before we adjourned at the noon recess I had been reviewing the history of controversy between Pan American and Grace and I brought you up to the point of the Latin American decision and was about to tell you what this record shows transpired after the Latin American decision and I told you that Mr. Roig, the President of Panagra called a special meeting of his Board of Directors to consider the Latin American decision and particularly the language in the decision which I read to you.

Now, Mr. Roig had hoped, I am sure to use the language I quoted to bring Pan American around to his point of view—that is, the Grace point of view. However, as it turned out he was doomed to disappointment.

Before coming to the Panagra Board meeting, the Pan American directors on Panagra decided to check in with their own Board to see how they should vote at this forthcoming Panagra meeting.

As the record in this case shows, Pan American instructed its directors on Panagra to continue to withhold approval of Panagra's filing an application for entry into the United States in its own name.

Now, mind you, Pan American took this position right after your decision in the Latin American case and in the

—90—

[fol. 3775] face of the very clear, I think, and unmistakable language that I quoted to you.

I would like to read a few excerpts to you from the Minutes of the Board of Directors meeting of Pan American Grace which Mr. Roig called right after the Latin American decision. I think that will shed some light on just how this agreement came about. This meeting was called for the

fifth of June 1946 very soon after your decision and after a number of routine matters to be taken up by the Board, Mr. Roig brought up the question of the Latin American decision.

It says here: "The President referred to the decision of the Civil Aeronautics Board in the Latin American route case, Docket 525 and he referred specifically to the following statements in the Board's decision." and there it set forth in the minutes the same thing that I read to you.

"After that Mr. Roig stated that this meeting had been called to enable the joint owners cooperatively to enable Panagra to apply for access to the East Coast of the United States in accordance with the said opinion."

Thereupon, Mr. Garni, a Director of Grace offered a resolution to implement Mr. Roig's desires.

"Mr. Garni stated, in support of his resolution that it was the desire of W. R. Grace and Company to comply with the decision of the CAB and the President of the United States and that the resolution he was offering and which the Grace directors were prepared to vote for was intended to implement such compliance. He stated that the most satisfactory route from the point of view of the public

—91—

[fol. 3776] interest and of Panagra, which would comply with the foregoing should be from Balboa to New York via Havana, Cuba and or Miami, Florida, as proposed in the resolution and he recommended that we apply for that route." But he indicated they might be able to work out some other route.

Thereupon, Mr. Dean, one of the Pan American directors on the Board of Panagra stated that the subject matter of Mr. Garni's resolution had been discussed at great length at a meeting of the Board of Directors of Pan American Airways Corporation held on the previous day and that after such discussion the Pan American directors had unanimously adopted the following resolution which I would like to read:

"Resolved that in the opinion of this Board, the Board of Pan American Corporation, an extension of Pan American Grace Airways from Balboa to Miami or New York would not be in the best interests of Pan American Grace

Airways and likewise would not be in the best interests of this corporation, meaning Pan American, or its stockholders, and that consequently, the representatives of this corporation on the Board of Pan American Grace Airways, be instructed not to take action authorizing an application for such an extension by that company."

Now, you will note that there is nothing in that resolution about the public interest which Mr. Friendly and Mr. Gesell were talking about and there is nothing there about dumping passengers at Balboa.

Mr. Ryan: What is the date of that?

Mr. Schneider: That is the fifth of June of this year.

Chairman Landis: Would you read that again?

—92—

[fol. 3777] Mr. Schneider: The resolution in its entirety?

Chairman Landis: That portion you read.

Mr. Schneider: "Resolved that in the opinion of this Board an extension of Pan American Grace Airways, Inc. from Balboa to Miami or New York would not be in the best interests of Pan American Grace Airways Inc. and likewise would not be in the best interests of this corporation or its stockholders, and that consequently the representatives of this corporation on the Board of Directors of Pan American Grace Airways be instructed not to take action authorizing an application for such an extension by that company."

Now, this resolution talks about the best interests of Panagra and the best interests of Panagra and it is apparent that there was no change of heart on the part of Pan American after the Latin American decision insofar as permitting Panagra to come to the United States in its own name.

Now, I say that this resolution displays the same arrogant domination of Panagra and the same complete disregard of the wishes of this government which Pan American has always displayed on this question.

Now, reference was made this morning about fiduciary relationships and I don't want to debate with Mr. Friendly or with Mr. Gesell on that subject but I would like to raise the question of whether the Pan American directors on Panagra don't have some fiduciary relationship to Pan

agra separate and apart from the corporation which sends them there as their nominees.

Mr. Dean, after offering that resolution went on to state

93

[fol. 3778] that as a matter of record he wished to make it clear that in the opinion of Pan American the portions of the CAB decision which were quoted by Mr. Roig had not been approved by the President and that the President had merely approved the Board order and the certificates.

Mr. Dean on behalf of Pan American directors and Pan American Airways, Inc. urged that consideration be given to an arrangement whereby Panagra's planes might operate over one or more of Pan American's routes north of the Canal Zone.

Mr. Garni's resolution was put to a vote and it failed of passage on a four to four split.

Then the discussion went on of Mr. Dean's proposal relating to Panagra's planes flying north and the Grace directors said they would like to think it over and there the meeting adjourned.

Now, from a reading of these minutes it is apparent that Mr. Roig didn't get from Pan American what he had hoped for.

Instead he was turned down again, but this time the matter wasn't dropped at that point because Pan American this time offered to work out with Panagra an agreement along the lines of the present contract.

Remember that they never offered such a contract before and that Grace had never asked for such a contract before. The whole history of these two companies shows nothing of a contract of this nature. It does show an interchange proposed by Pan American many years ago but vehemently turned down by Mr. Roig at that time.

94

[fol. 3779] Mr. Roig stated quite frankly to Pan American that he would not go along with any such agreement as this unless he saw it spelled out in detail first. He had too much experience, he said, with Pan American to agree on something in principle without seeing the details worked out first.

The details were worked out by Mr. Gesell and Mr. Friendly and the agreement was submitted and approved.

Now, let me say this for Mr. Roig. He did a magnificent job at the hearing trying to sell this agreement and I am sure that he is convinced that it was the best deal that he could get under the circumstances but let me repeat "under the circumstances."

Obviously Mr. Roig was not going to admit at the hearing that there was anything wrong with the agreement.

As he said at the hearing he had been beating his head against a stone wall for years trying to get Panagra into the states in its own name but without any success but no one will convince me that Mr. Roig's attitude toward this agreement isn't to a great extent colored by the realization that this is all he can get out of Pan American.

Now, to support that statement, let me read to you one or two questions.

Mr. Lee: Mr. Schneider, excuse me, my question may come out of the fact that I missed some of the first of your oral argument. What is it you are trying to prove? The attitude? And if so, does that apply to this, and how?

Mr. Schneider: The way I led into it was this way, Mr. Lee: I stated that Mr. Gesell and Mr. Friendly were contending that the public interest question that is involved

—95—

[fol. 3780] here had been determined within the four corners of this instrument and I contend that that is not so, that you must go beyond the instrument, itself, to take along at the circumstances which gave rise to the agreement, the parties to the agreement, the provisions of the agreement and the likelihood of their being worked out in a harmonious and satisfactory way in the light of this background because when you look at the agreement you will find that it isn't a self executing document.

I want to cover that later in my argument but I had been painting a picture of the history of this thing against which the agreement must be measured as to whether it is in the public interest.

At least, that is my contention that it must be construed in that light.

This is on page 476 of the transcript, when Mr. Hickey of the Department of Justice was cross examining Mr. Roig.

"Q. In other words, your belief in competition amounts to this, that you are willing to sacrifice a competitive opportunity for the sake of getting Panagra's line extended to the United States, isn't that correct?"

Mr. Gesell interpolated there that this was argumentative.

"A. That is not correct, Mr. Hickey and I really don't feel it is a fair question. I don't consider that I am sacrificing something that I never had, that I have worn my hair grey and my bodies bare trying to get a great deal of the effort being not only with Pan American Airways but with the Civil Aeronautics Board and

96

[fol. 3781] the United States Courts, and have been at every stage of the game refused.

"Now, how could you say in the light of my performance and my efforts to get this route, that I am now prepared to sacrifice it for what you say in eliminating competition. I can't agree with that. I consider it an absolutely unfair conclusion."

A little bit farther down the page on 477 Mr. Hickey asked this question:

"Q. I quite agree that your efforts have been vigorous and that you have made every effort to obtain it. I am merely stating that what you have done now you have merely precluded yourself from making the effort that you have made so arduously in the past. That is a fact, is it not?"

"A. I expect I have precluded myself for the time being but there comes a time when you just can't bang your head against a stone wall forever. When everybody who has the authority to give you what you want refuses to give it to you, you have to do something to improve the competitive position in the rest of your picture."

That is a very frank statement.

In other words, Mr. Roig was willing to take a bird in the hand rather than two in the bush, if I may be permitted

to it, that figure of speech, which doesn't add to the dignity of the Supreme Court.

The Braniff threat was immediate. The Supreme Court remedy was remote and it depended on subsequent favorable action by you.

—97—

[fol. 3782] Mr. Roig faced a dilemma and I can sympathize with his position but the "voluntary" solution of a dilemma does not automatically carry with it the label of public interest. That has to be earned.

Now, as I have stated before, you can't divorce this contract from its background. They go hand in hand. You must remember that those who now profess to be offering this contract as a public interest solution were engaged in a bitter struggle only yesterday and will be again tomorrow if you disapprove this contract.

This contract is full of provisions which are left to future negotiations and agreements by the parties.

I ask you if you have any assurance when you read this contract, in the light of this background, any assurance that these parties can agree on these points, points which are vital to the satisfactory performance of the contract.

The contract as I have said is not self-executing, it is pregnant with possible differences of opinion, and the arbitration provisions of the contract are no solution.

Arbitration was available to the parties in the past, it was not used or successful.

Public Counsel will probably spend a great deal of time discussing the detailed provisions of the contract and I haven't time to go into them except to mention only a few.

In my opinion this agreement by its terms will place Panagra in the position of engaging in air transportation between Balboa and Miami without possessing a certificate covering it. If this type of a contract is approved without

—98—

[fol. 3783] proceeding under Section 401 of the Act then I am afraid that the route certificate concept of Section 401 goes out of the window.

Now, the question was raised this morning as to who is holding out to the public, who is the party holding out as a common carrier to the public, and Mr. Gesell said it is obviously Pan American.

Well, I can't agree with him. Panagra's name is on the airplane, Panagra's crews are in the airplane, Panagra's insignia is worn on the uniforms of the hostesses and the pilots. The whole show is a Panagra show except there is a sign in the airplane which says, "This plane is being operated by Pan American" and there also is in the vestibule of the Carlton Hotel, as you go into it, a sign that says, "This hotel has a liquor license" and I doubt if you have ever seen it and I doubt if any of you ever take the trouble saying that "This airplane pursuant to so and so of the Civil Aeronautics Act is being operated by Pan American Airways."

Panagra's name on the contract is to be displayed on the counters of the United States. The whole agreement contemplates that the public shall think of this as Panagra. I say that comes as close as you can get to a 401 case.

Chairman Landis: That would be evidence, wouldn't it, that Panagra was really competing with Pan American.

Mr. Schneider: That would, yes.

Chairman Landis: I thought the argument was that there wasn't any competition?

—99

[fol. 3784] Mr. Schneider: That is the external part of it. Then we come to who sells the tickets over this pseudo Panagra operation. I will come to that as to who sells the tickets. Because the public doesn't buy the tickets on the basis of the airplane. They buy the ticket first and then see the airplane, I think.

I also believe that this contract presents Section 408 problems which neither Pan American nor Panagra have presented for your approval.

If the Board can get around the section 401 problem and find that no new air transportation is involved then it seems to me that you have to hold that the contract involves a lease of a substantial part of Panagra's properties, and that is a 408 problem.

That requires approval under Section 408, and no application for approval of such a lease of a substantial portion of Panagra's properties has been filed with you. But the big thing in the problem that bothers me, and this goes to the heart of the whole thing and this, I think should

bother you, is the provision in Section 13 of this contract whereby the parties agree to negotiate in the future a pooling agreement for United States Buenos Aires and United States Montevideo traffic.

That is Section 13 of the contract.

You will recall that Pan American and Panagra are now on paper at least to compete for traffic between these points in South America and the United States.

This competition which because of the San Juan cut off now favors Pan American will become more acute if Pan

—100—

[fol. 3785] agra is extended to Miami or New York or it should become so.

This provision for a future pooling agreement in my opinion fowls the whole contract because it reveals the type of economic thinking these parties are capable of in this day and age of competition, and it indicates to me how they will conduct themselves under this contract if that kind of provision is in there.

It is true, you will get a chance to look at that, you will get a chance to turn it down but doesn't it give you some idea of how the rest of the contract will be performed.

Talking about negotiating a pooling agreement whereby they will arbitrarily allocate to themselves certain portions of the New York to Montevideo, New York to B.A. traffic without regard to the competitive advantages which either party may enjoy by way of superior equipment, shorter mileage, more scenic route and so forth, and they forget all of that and say, "We will pool the traffic and arbitrarily allocate between ourselves."

Why? I say the answer to that question is so that they may fortify themselves to meet the competitive threat of Braniff. They are agreeing in advance not to compete with each other, I say, between B.A. and New York. They want to conserve their energies to turn them loose on Braniff.

Braniff has had some experience in the United States competing with big fellows—American, TWA, and Eastern. We have been competing with those fellows for 10 years or more and we are not afraid of competing with Panagra or Pan American down there.

101

[fol. 3786] What we don't want to have to do is to have to compete with Pan American or with W. R. Grace and Company, in a combination of Panagra with the ghost of Pan American always standing behind them.

We will meet anybody down there in free and open competition but that is not what this argument calls for.

Chairman Landis: I thought you were arguing for an extension of Panagra up to the United States?

Mr. Schneider: I may very well be doing that and I may say that I think it would be more in the public interest to extend Panagra into the States.

Chairman Landis: That would really give a good show on the West Coast.

Mr. Schneider: Yes, sir.

Chairman Landis: But I am trying to get your argument. I don't quite get it. You argue: (1), that Panagra should be extended to the United States. That is really the solution to this problem.

Mr. Schneider: No, I haven't come to that point yet. I am going to say that later.

Chairman Landis: Well, it looked to me as if that was implied in your other argument.

Mr. Schneider: I am saying that this agreement will merely strain competition.

Chairman Landis: Mr. Roig had taken that position.

Mr. Schneider: That is right.

Chairman Landis: He urged it upon the Board, Pan American withstood that and offered him something which was less to his liking than the extension of Panagra.

102

[fol. 3787] Mr. Schneider: Mr. Roig doesn't agree that it is less to his liking. That would be unfair to him.

Chairman Landis: I don't think so according to the testimony there.

Mr. Schneider: I don't think he would agree with that statement. That is his testimony, yes, sir. It is subject to interpretation.

Chairman Landis: His testimony more or less is to the effect that I tried for a long time to get this thing.

Mr. Schneider: That is right.

Chairman Landis: "I couldn't get it so I agreed to this agreement which I think is beneficial."

Mr. Schneider: That is right.

Chairman Landis: "Which I think is beneficial to Panagra" and I don't just get the theory of what you are trying to get at when you say the fact that Mr. Roig didn't get everything he wanted makes this thing against the public interest.

Mr. Schneider: Sir, I have just about two pages left here and I think that at the completion of that I think I can bundle it up and then come back to your question if I haven't satisfied it.

Chairman Landis: I would like to get it.

Mr. Schneider: All right.

Now, I said I believe before your question that we had no fear of competing with Panagra out in the open or Pan American out in the open, the way we compete with other fellows in the United States right out in the open but I say

—103—

[fol. 3788] under this agreement there is a combination whereby they agree among themselves in effect not to compete with themselves but to turn all their guns loose on us and the foreigners.

Now, these parties don't even compete with each other now and I don't know for the life of me where Mr. Gesell got the information which he gave to some of you people this morning because if you will go and read Mr. Roig's testimony and Mr. de Groot's testimony that was given up in the Wardman Park hearing a week ago, it is absolutely contrary to the statements he made that they maintain separate offices down in B.A. and that they maintain sales agents in the United States.

The testimony is the reverse of that there.

In Buenos Aires today the only Panagra ticket that you can buy effectively is through a subsidiary 100 per cent owned by Pan American, a ticket corporation, 100 per cent owned by Pan American, which undertakes to sell Pan American and Panagra ticket and for that statement I rely upon the testimony of Mr. de Groot given last week, in another record to be sure.

Now, if that is competition then Eastern Air Lines here in Washington might just as well give up its office and let American sell its tickets to New York or we in Chicago might just as well give up our office and save the money and let American sell our tickets to Dallas.

That is not the type of competition that we are used to, that you are used to, or the type of competition that Panagra is going to be exposed when we get down there.

—104—

(fol. 3789) So far as the United States is concerned Mr. de Groot stated that their sales force in New York consisted of him and his people in the general office of Panagra in the Chrysler Building.

There is no Panagra office on the street. There is no Panagra salesman out selling tickets on the streets in New York. He admitted that under cross examination.

The tickets are sold by Pan American.

Now, I would like to conclude now mind you before I conclude I have not said one word about diversion from Braniff. I stood before you yesterday and admitted to you that as far as I am concerned, personally, I think diversion is one of the weakest arguments a person can make down here on a public interest question, and I am not going to argue to you that this should be turned down because it is going to divert from Braniff.

Braniff hasn't even started yet. I couldn't even measure the amount of diversion but it does strike me that when you put us into Havana you had some misgivings about our route and were trying to strengthen us by a connection with National.

To the extent that that is going to be fulfilled if this agreement plus the [*Pan*] American domestic route case is going to be fulfilled I don't know we will have to take our chances on that but I am not going to make a diversion argument on that now.

I think the public interest things I have talked about now far outweigh any diversion from Braniff.

The thing is a lot bigger than that, so I would like to

—105—

(fol. 3790) conclude and close my argument not as counsel for Braniff so much but as an individual.

In my opinion this contract does nothing to cure the basic difficulty between Grace and Pan American which has constantly plagued Panagra and the development of Panagra. Rather, I think that Panagra should be made a completely independent company and allowed to work out its own destiny.

If they can come down here and prove under Section 401 of the Act that public convenience and necessity requires the extension of Panagra to the United States that is what you should do. But I think American Air Transportation, American flag air transportation requires that this Board find somewhere within this Act the power to make this company a truly independent company and we are not afraid to compete with them down there if they are so made.

—106—

[fol. 3791] Chairman Landis: How are we going to do that?

Mr. Schneider: Sir, I wasn't in the 779 case, so I am not too familiar with all the legal problems involved there.

As I said earlier, I regret that the Board couldn't find in the Act the power to do what they set out to do, that they went off on the procedural point which contributed nothing to the basic difficulty.

And I would suggest that the Board should themselves—

Mr. Ryan: You referred to that before. What do you mean by "procedural"?

Mr. Schneider: You construed your powers under the Act not to permit you to extend Panagra to the United States and never got to the merits as to whether they should be extended.

The 779 case never went on to the merits as to whether there was a public need to extend Panagra.

Mr. Ryan: It is pretty substantive. Whether we have the power is pretty substantive.

Mr. Schneider: I mean, you didn't get to the purpose of the investigation as to whether there was a need or wasn't a need. You went off on the language of power.

Chairman Landis: Have you read Judge Frank's opinion in that case?

Mr. Schneider: Yes, sir.

Chairman Landis: What did you think of it?

Mr. Schneider: Not having all the background of 779, it left me quite confused.

Mr. Ryan: It would have left you confused anyhow.

—107—

[fol. 3792] Mr. Schneider: Let me put it this way: Were I in your shoes and had Judge Frank's mandate remanding the opinion, I am inclined to think I would call him up and say "Come again", because I am not quite sure what he does want you to do.

What he does do is to recognize with you the unhealthy situation that did exist.

Chairman Landis: Even assuming—let's take your assumption—that it is an unhealthy situation, but if you take the other assumption that you can't cure it, that there is no power to cure it under the Civil Aeronautics Act, how does this worsen the situation if it helps a little bit?

Mr. Schneider: I don't think it helps a bit.

Chairman Landis: It seems to me that you have the burden of proof to show that.

Mr. Schneider: I will accept that burden.

Chairman Landis: Other than the mere fact that it builds up Panagra's service a little better so it can compete with Braniff, which you admit?

Mr. Schneider: Mr. LaRoe makes a fine argument here today in regard to carrying passengers all the way through with the least inconvenience. That is true and it should be done if possible.

But with this, on paper, competitive situation that we have now at B.A. and Montivideo between Pan American and Panagra which isn't competition at all—they are not fighting each other on the streets trying to sell passengers down there—Panagra has delegated to Pan American B.A. the sale of its tickets.

That is the situation today between here and the Canal

—108—

[fol. 3793] Zone. How will it be worsened? You bring them up to Miami under this agreement and they delegate again to Pan American the sales under this thing.

Mr. Roig says "If Pan American doesn't sell tickets, I will abrogate the contract." How are they going to find

out? Pan American is getting seven passengers this way for every one that goes that way (indicating).

Now, if my competitor is carrying 7 to 1 ratio with me I get out of his ticket office and I open up one of my own and I hire some salesmen.

Now, why does it get worse? It gets worse when you get to Miami because the same thing that happens here happens when you get to Miami.

The same small office will decide which passengers to this way and which to that way.

And you have got the same thing going on in New York and that isn't competition in the public interest as this company knows it.

Chairman Landis: That is happening now?

Mr. Schneider: It will be intensified. They haven't even got a chance at it in Miami today. Pan American isn't making any effort to sell any tickets at Miami over Panagra. There is no word of evidence about that. We talked about the ads this morning. The ads that come out of the New York office are put out by Pan American World Airways System.

Mr. Friendly: I think we should have these ads before we talk about them, as well as some of this other record that Mr. Schneider has been quoting from.

Mr. Schneider: If I am wrong on that, I stand corrected.

—109—

[fol. 3794] But I thought you were referring to the Pan American World Airways System map.

Chairman Landis: We don't want the record misquoted.

Mr. Schneider: If I am wrong, I want to be corrected.

Chairman Landis: But the point I am trying to get at: I am trying to get at how it worsens the situation. You take the assumption that the thing is bad. Take the other assumption. You can't correct it by forcing the extension of Panagra up to the United States. What is there in this agreement that is bad?

Mr. Schneider: It freezes for 99 years. It seems to me it is just an abdication to expediency. The through service argument, so far as I am concerned, isn't that strong. That you must swallow all the other things.

Chairman Landis: We can control that. We can give them a three-year certificate so far as that goes.

Mr. Schneider: That is right.

Chairman Landis: Why not try that?

Mr. Schneider: I think that is a good idea. If the through service argument is so convincing to you, I say try that.

Chairman Landis: In other words: take this provision of the contract, 99 years, and say 3 years and after 3 years come back and we will see whether we continue it.

Mr. Schneider: And knock out Section 13 and knock out some of the other bad provisions, then we will draw a new contract.

Then we will have to come back and have a new hearing perhaps but we were approaching this contract, sir.

—110—

[fol. 3795] Chairman Landis: But this Board has not merely a plain veto. It doesn't have to veto the whole contract. It has a partial veto and can pick out these things in the contract that it says are against the public interest and say "no" on those and say "yes" to the others.

Mr. Schneider: Approving to the parties knocking out of the contract the following provisions?

Chairman Landis: Yes.

Mr. Schneider: It may be.

Chairman Landis: And looking at it that way isn't there something there that is good and that ought to be saved out of this threatening shipwreck?

Mr. Schneider: Mr. Friendly answered that question on cross examination.

I think I have the provision here. There are provisions in here that are good, at least they contend they are good, about training, they are good about maintenance; they are good about the sales arrangement.

In cross examination, Mr. Friendly was asked the question if they were to get the States in their own name would continue these maintenance and sales and training arrangements that you now perform to your associate company, Panagra, and Mr. Friendly said, "That would be silly to do that."

Chairman Landis: When was that?

Mr. Friendly: Could you give us the page?

Mr. Schneider: Yes, sir. I will read it to you. On page 513 of the transcript, question by Mr. Gesell of Mr. Friendly: "I wasn't quite clear, Mr. Friendly as to whether or not you were saying that in the event Panagra were

—111—

[fol. 3796] to come to the United States on its own route, Pan American would continue or discontinue its activities on Panagra's behalf in the nature of its sales agency and engineering services and other assistance in view of the competition which would be created."

"A. Well, I can only say, Mr. Gesell, what I would recommend and what would seem to me to be likely. As to any sales activity or assistance of that sort, I would recommend in the strongest possible terms that that be discontinued. I don't see how we could be in paralleling competition with Panagra between the United States and Balboa and be acting as its sales agent."

Now he doesn't say anything about their not being in competition between B.A. and New York.

He goes on: "I would also recommend that we discontinue any other service which involved the slightest sharing of confidential information or anything of the sort, I think the only things that we might continue would be the type of things that we have done and are doing with our competitors such as this agreement which has been marked with PA Exhibit 32 which is an agreement for radio and so forth, with Eastern at San Juan, for sharing certain operating facilities with Eastern."

"I don't mean to say that we would have any special animus against Panagra certainly, and we would not have any against anyone else, but I don't think we could, in the interests of proper competition, or should do anything more."

If they say they are in competition between B.A., Monti-

—112—

[fol. 3797] video and the United States, then why isn't Mr. Friendly's statement equally true today? To make that statement to be true today then, they must agree that they are not in competition by agreement.

You can't have one without the other.

Chairman Landis: I don't suppose the contention is that they are not part of the system today?

Mr. Schneider: I may have to go to the other record made last week to answer that one, sir. I asked Mr. Roig last week on cross examination in the Domestic Route Case, "Do you consider Panagra to be a truly independent corporation" and he said "I do."

He has always contended that. He contends it most vigorously. No one fights even harder for Panagra and its welfare than Mr. Roig does and no one is more appreciative of the obstacles that he has had to face than Mr. Roig is.

Chairman Landis: Then to go back to my other question: If you assumed that they are not in competition, and that they can't be put in competition, why isn't that a good agreement anyway?

Mr. Schneider: I can't concede, sir, that they can't be put in competition.

Chairman Landis: I would appreciate advice on that point.

Mr. Schneider: Well, perhaps we might try to follow the course laid out as well as we can interpret it by Justice Frank.

Chairman Landis: Well, yes. I mean, even if you assume Judge Frank is right, and that eventually the Supreme

[fol. 3798] will uphold Judge Frank and allow Panagra to apply in its own name or permit the Board somehow to force that extension, the wheels of Justice grind pretty slowly and the scene may have completely changed as of that time.

That is what I asked Mr. Gesell this morning. I pointed out to him that it may be a question you are up against at this time and this time is your last shot at it.

Mr. Schneider: Maybe it is a question for the other Department down the street. If this were not an industry regulated by the CAB, I think the Antitrust Division of the Department of Justice would long since have done something about this, if these were two aluminum corporations or something like that, and if what we are saying here is true, and that that record is brought out in the Department of Justice we know well we will have a remedy then. Of

course the record would have to be made that was made in 779.

Chairman Landis: If anything really operates slowly, I think the wheels of justice under the Antitrust Law operate even more slowly than even this Board.

Mr. Schneider: Then you must weigh that, sir, against the immediate emergency and expediency of getting this fellow on to the same plane at Balboa.

Now, if that is so vital, so emergent, then I can't answer your question, sir, because you just pose a situation that makes it impossible for me to put up something on the other side.

Chairman Landis: To take your other illustration, your other point, approval of this agreement, would that, in your judgment, mean that the Department of Justice, be estopped

—114—

[fol. 3799] from moving somehow or other under the Sherman Act?

Mr. Schneider: Section 412 of the Act gives a great deal of immunity to the contract.

Chairman Landis: To the contract?

Mr. Schneider: Yes, sir.

Chairman Landis: But approval of the contract would not necessarily carry approval of the organization.

Mr. Schneider: No, not the organization, but it is not so much the organization as the things that they are doing under the organization that would be in violation.

Chairman Landis: It seems to me your contention is that the real evil results in the organization.

Mr. Schneider: No. I think that is what starts the wheel rolling. The fact that there is a 50-50 split here just makes an impossible situation, and then each of them has a negative control.

Chairman Landis: Well, we will admit—I mean I start from the base that you lay and I try to get further and I try to find out the viciousness that inheres in this contract itself. You pointed to two things, the 99-year term which you say is too long, and the Section 13 which you say is a mandatory obligation, although it is a general permissive idea, and it does read in a mandatory language.

You say that is bad. Well, those can be knocked out if there is something good left.

Mr. Schneider: I think we would have to stay here and go through each single paragraph and spell out the bad provisions. I skipped over most of those detailed things

—115

[fol. 3800] having read Public Counsel's brief and in my time not being able to get to it. I mean we didn't all want to repeat the same things.

I was trying to lay a background. Perhaps Mr. Gambrell will go into that, or Public Counsel.

I think on your examination after listening to other counsel, you will find out something. I am disturbed by Section 13. That is the one that bothers me more than anything else.

Not because you won't have control, but it just seems to me to indicate the type of parties we have here. I can't conceive of any domestic air carrier even suggesting such a thing and for the life of me, I don't know why they include it in the agreement.

Chairman Landis: They may have been influenced by the Scandinavians.

Mr. Schneider: I asked the question at the hearing and I didn't get a satisfactory answer to it myself.

Mr. Ryan: Mr. Schneider, I have a question.

Mr. Schneider: Yes?

Mr. Ryan: As I understand it, your statement was that Mr. Roig and the management of Panagra are very vigorously pursuing the interests of Panagra, and that at the same time you make the point that in the working of this agreement Panagra will suffer because its traffic potentialities will be limited, by virtue of the Pan American interests.

Mr. Schneider: That is right.

Mr. Ryan: Is that true?

Mr. Schneider: Well, I can only say what Mr. Roig is doing for Panagra.

—116—

[fol. 3801] I can't say what the rest of Panagra is doing, but I will say categorically that Mr. Roig is always working for the best interests of Panagra.

Mr. Ryan: What I am wondering is how do you explain the fact that Pan American has been able to fool the Grace people and other people here into a contract like this that is going to be so hurtful to them because they are more deeply interested than even you are?

Mr. Schneider: All I can give you is the excerpt I gave you. It bothered me. I asked the question. Mr. Hickey of the Department of Justice asked the question and Mr. Roig stated just as I read to you, "I have been beating my head against a stone wall and wearing my bones bare trying to get what I should get and I can't get it." Why should I compare that with this contract? I want this contract because it is what I have now. I have got that in my hand and the litigation in the Supreme Court and everything else with nobody helping me. That is too remote. You can't compare those with each other. I have got a contract and I think it is a good contract."

And he did his best to sell it. He never hedged a word on it. He thinks it is a good contract, but I say: Realize or think for a minute why he thinks it is a good contract in the light of that background.

He has no alternative.

Mr. Ryan: You think he has no alternative?

Mr. Schneider: He thinks he hasn't.

Mr. Lee: Mr. Schneider, you put considerable emphasis on there being no competition under this contract. Do you think the situation is the same that would put as much

—117—

[fol. 3802] importance on that as it would have before the Board certificated Braniff to these points in South America?

Mr. Schneider: Would I put as much significance to it?

Mr. Lee: Yes. Do you think the competitive argument which you made, that they are not competitive, is as important as it was before the Board certificated Braniff to South America?

Mr. Schneider: I would say it was less important. I would say before you certificated Braniff to South America you had only one possibility of providing competition between these air carriers, and that was between Panagra and Pan American. You waited for that situation to jell in 779 in the Supreme Court and it didn't, and Braniff was ex-

tended to South America. Now you have at least the assurance that Braniff on the one side will compete with this Panagra-Pan American combination so I would say the argument about having competition between Pan American and Panagra is perhaps not as strong today as it was then because you are going to have American-flag competition now whether you like it or not.

Mr. Lee: How important is it now—since, you see, United States is assured of two United States Flag carriers, to certain important points in South America—how important is that argument in the light of this agreement?

Mr. Schneider: We aren't going to be able to compete too effectively for New York traffic if Pan American is already in New York with one-carrier service and Panagra is, too.

Mr. Lee: Does that make any difference to you?

— 118 —

[fol. 3803] Mr. Schneider: Yes. The only way we can compete for New York traffic is in combination with National.

Mr. Lee: I mean this agreement,—how does that make any difference to you?

Mr. Schneider: Any difference to Braniff?

Mr. Lee: Yes.

Mr. Schneider: That goes to the basic question as to whether Braniff has any status to argue here today at all because I am not arguing that this should be turned down as any protection to Braniff. I say that this is adverse to the public interest.

Mr. Lee: You made two legal points. One was that this was a case under 401. Do you think a decent legal argument could be made on the other side, from the way you argued?

Mr. Schneider: Oh, yes.

Mr. Lee: Or is that a question that could—

Mr. Schneider: Many of these questions are black and white. I made the black one and Mr. Gesell made the white one this morning.

As to whether he made a decent legal argument is perhaps—

Mr. Lee: I mean you don't think that is a foregone conclusion, or that legally there is just no other side to it? It could be decided either way?

Mr. Schneider: Yes, sir.

Mr. Lee: What about your application of 408? You make the legal argument that this question should come under 408. Is that in the same category?

Mr. Schneider: The first one is gray, but the 408 question I would say is distinctly more on my side.

—119—

[fol. 3804] Call it a very light gray. I don't see how you can get away from it—if you say there is no 401 problem, how can you get away from the fact that this is a less of a substantial part of Panagra's property.

Public Counsel in his brief goes to some length to point out the percentages involved of equipment and so forth.

Chairman Landis: Why shouldn't that issue be decided in this proceeding?

Mr. Schneider: We all contended that it should have been at the very opening of the hearing, sir.

Chairman Landis: Is it simply because of the lack of some technical rule?

Mr. Schneider: There has been no application filed under 408 asking for approval of that specific point.

Mr. Friendly: Oh, Mr. Schneider. That can't be left unchallenged. The application specifically says, Mr. Chairman—this is the application of Pan American Airways:

"Wherefore, Petitioner respectfully prays that the Board make and enter an order approving the aforesaid agreement between PAA and Panagra dated July 30, 1946, under Section 412 of the Civil Aeronautics Act, and such other sections of the Act, if any, as may be applicable thereto, and that the Board shall grant such other, further and different relief as to it may seem just and proper."

Certainly, we aren't back in the barren park stage where failure to make specific reference to a section is fatal.

The 408 problem that I dealt with relates to a new contention made just within the last couple of weeks, that an application should have been filed not only by Pan

—120—

[fol. 3805] American Airways, Incorporated but also by Pan American Airways Corp. We say that is wrong. If we are wrong about that, it is a technicality which can be easily remedied.

Mr. Schneider: Well, we had this battle out at the pre-hearing conference.

Mr. Friendly: Not this one.

Mr. Schneider: And the 408 question has been fought through most of this case. I don't like to rely upon a catch-all phrase like that for an application that the Act says is mandatory under 408.

Chairman Landis: What is the substance of the issue that was presented under 408 and 412?

Mr. Schneider: You have got the Section 408(b) provisions. You have got to make a determination there whether there is a monopoly involved and if there is a monopoly, whether it jeopardizes other air carriers.

There are a lot of considerations that are mandatory under Section 408 that are not under 412.

Chairman Landis: Do you then contend that somehow or other this approval would make a monopoly?

Mr. Schneider: No, sir. I think you have got a 408 problem here that you have got to face and I am suggesting that you look at the contract in the light of 408.

Chairman Landis: Can't you help us look at it? You say there is no problem. You are not making the contention

Mr. Schneider: I will say this: That if you look at this contract from the standpoint of 408 and the public interest attached there, you will come out with the same answer as

121—

[fol. 3806] you would under 412 if you adopt my reasoning but what I would like to see is an opinion come out that you don't have to go to court afterwards.

Let's cover all the sections of the Act that are applicable and I think that is what Public Counsel has tried to do, so that there will be no reversible error here.

Mr. Ryan: Section 408 is practically the same as 412, is it not?

Mr. Schneider: That is right, except the mandatory provision about monopoly under 408; that isn't in 412.

If you find there is a monopoly, then you must disapprove. There is no such provision under 412. Public interest determines the direct competition, as in 411.

Mr. Lee: I have trouble getting the weight of the argument as you see it. You argue that it is against the public

interest to approve this agreement. Suppose the Board just assumes that everything you say is correct. Let us just assume that the whole system, Panagra and Pan American, is one air system.

Just assume that it is one system. Wherein is the public interest damaged as against the situation as it is now?

Mr. Schneider: Well, it isn't one system legally and to make it one system you would have to have a merger and many of the arguments that Mr. Gesell raised this morning to the public interest of a merger.

Now, either let's put these companies together and make them one, or let's pull them apart.

Mr. Ryan: You are going to the legal argument. What about the substance of it and the effect upon public in-

—122—

[fol. 3807] terest?

Mr. Schneider: Well the substance is this: One day we face a situation where they say we are one. And the next day in another type of situation they say we are independent. Now, let's find out what they are.

Mr. Ryan: That might satisfy you legally to find it out but the man with the suitcase, where is that going to affect him?

Mr. Schneider: I think the man in the suitcase who reads the one thinks they are one today.

Mr Ryan: What difference does it make if he gets the rides?

Mr. Schneider: Maybe he would get a better ride.

Mr. Ryan: We assume that Braniff is going to get down there sometime.

Mr. Schneider: Not from New York. That is where the great majority of the traffic comes from.

Chairman Landis: I don't see where you have eliminated competition in the first place. The assumption competition doesn't exist, then, you say you have eliminated competition?

Mr. Schneider: You have eliminated the chance of making it competitive. This competition that we have now should be made effective under this Act, I think.

The parties have chosen to make it ineffective and they have chosen to make it ineffective now for 99 years.

Mr. Branch: Mr. Schneider, didn't the Civil Aeronautics Board, in the Latin American decision which presumably was approved by the President of the United States, because the law says we can't issue these decisions unless the

123

[fol. 3808] President approves them—didn't the Board in that decision indicate that it was concerned about the public interest in this matter when it said that these people ought to get together and make it possible for Panagra to come to the United States in its own name?

Mr. Schneider: That is right. I think so, and Mr. Ross thought so.

Mr. Branch: The Board said that in its opinion?

Mr. Schneider: That is right.

Mr. Branch: And the President didn't disapprove it as far as you know, did he?

Mr. Schneider: No, sir.

Mr. Branch: So presumably that was the country, wasn't it?

Mr. Schneider: That is the way I interpreted it.

Mr. Branch: And in that same decision, in which the Board said that, it also granted the certificate to Braniff and to Chicago and Southern, didn't it?

Mr. Schneider: That is right.

Mr. Branch: But it still kept that in the decision, didn't it?

Mr. Schneider: That is right.

Mr. Branch: That is all.

Mr. Ryan: Therefore by implication, the Latin American decision as approved finally, and finally issued, contemplated two additional services to Latin America—one, Panagra to the United States; the other Braniff Airways to the South?

Mr. Schneider: Braniff Airways so read the opinion. He

124

[fol. 3809] fully assumed that Pan American and Panagra would get together and file an application in Panagra's name to the United States; Mr. Dean, the Pan American director on Panagra, said he didn't so construe it.

Mr. Ryan: So that would be your answer, then, to the contention made earlier in the day by, I think, Pan Ameri-

can, that the situation had radically changed since the Latin American decision had been announced, namely that there was now—I think it was Panagra's representative—namely, that now there had already been competition put into South America and it was unnecessary therefore—that is the way I interpreted it—unnecessary therefore to consider that there was a great need for any additional competition between these two parts of the Pan American system.

Mr. Schneider: Well, I think that they have not met the language in your decision by this contract.

Mr. Branch: Mr. Schneider, just following up the questions I asked you a moment ago, which were predicated on the assumption that the Board must have thought it was in the public interest to make such a suggestion in its public decision which was approved by the President, then I want to ask you if, now that Panagra, which has made its very diligent fight for years to try to get in, has gone into this agreement, it would seem that Panagra has given up, and that there probably would be no more chances for Panagra to get into United States under its own steam. Isn't that right?

Mr. Schneider: Yes. We asked those questions of vari-

[fol. 3810] ous witnesses, and although there is nothing specific in the agreement on the point it was conceded by the witnesses for the applicants to whom the question was addressed that presumably during the period of this agreement, Panagra would not apply for access to the United States.

Chairman Landis: Supposing Panagra was a completely independent company without any Pan American ownership in it, and it had made this agreement with Pan American, would you still oppose it?

Mr. Schneider: I would have to look at that again. I would be worried still about the 401 problem, as to where that leads us in trackage rights in this whole industry. This is not an interchange, you see. Interchange is one thing. This is trackage rights where one carrier goes up over the other fellow's. There is no reciprocal part to it.

Chairman Landis: It is not uncommon in other fields of transportation, though, is it?

Mr. Schneider: As was pointed out here this morning, there is the question of the cars hooked on to the locomotive, and here it is all one and the same thing. I don't say that we can't work this problem out. We probably have expanded this map to such an extent, or will soon have, that we are going to have to be hard headed about some of these problems as Mr. Warner said several years ago in one of his opinions.

Chairman Landis: Yes, a very interesting dissent, Mr. Warner's, in that Northwestern case.

Mr. Schneider: That is right.

Chairman Landis: Which doesn't seem to be picked up by the industry at all.

—126—

[fol. 3811] Mr. Schneider: As long as there is a chance to get a new route, sir, we are not going to solve these problems.

Chairman Landis: That is exactly it. Maybe the Board ought to be a little tough about the new route situation and get the industry to think along different lines.

Mr. Branch: Maybe the time is nearer than it seems.

Chairman Landis: We might clear our docket that way.

Mr. Ryan: Could it be possible, Mr. Schneider, that Pan American may have read the Latin American decision, and seeing that there had been no majority for any competition into South America, may have concluded, that there having been competition put into South America by action of the President, the majority of the Board probably would not look with great favor, when the time came, upon putting a third competition into Latin America?

Mr. Schneider: I can't answer that question, Mr. Ryan. All I know what Pan American thinks about is contained in their minutes where they said "We don't think it is in our best interests to let Panagra apply."

What went on beyond that, I can't answer that honestly.

Mr. Ryan: If it should be decided that the better way to go is to turn down this arrangement presently presented to us and to seek by one way or another, to get Panagra extended as an independent carrier in one way or the other

to the United States, we will then be voting in favor of a three-fold competition to South America, the same number of carriers that we authorized to operate across the Atlantic, where the traffic, I understand, is 1/23rd, or 1/27th of what it is to South America.

—127—

[fol. 3812] Mr. Schneider: Well, by coincidence, it would be three.

Mr. Ryan: I think I misstated that. I think it is just the opposite. Traffic across the Atlantic is 23 or 27 times—

Mr. Schneider: May I say that my answer is still the same? It is a coincidence, perhaps.

Mr. Ryan: We don't want to discourage Braniff.

—128—

[fol. 3813] Chairman Landis: Eastern Airlines.

ARGUMENT OF E. SMYTHE GAMBRELL

EASTERN AIR LINES

Mr. Gambrell: We prepared that easel map and I have duplicates.

(Handing to the Board)

I would like to be called at the end of twenty minutes. I believe I have thirty.

As we see it, there are two principal issues in this proceeding. The first is whether the public interest requires through one-plane service as proposed by Pan American and Panagra between the west coast of South America and Miami. The applicants talk about service to New Orleans, New York and so forth, but under the contracts involved in this case and Pan American's present certificates, it is clear that Miami is the only city in the United States which could be served as proposed.

The second issue is whether Pan American, the dominant air carrier in Latin America, and Grace which operates the dominant steamship line between the United States and the west coast of South America, should be permitted to increase their present degree of management and control over Panagra so as to make Panagra even more completely their instrument for retraining trade and competition and for effectuating their policies in Latin American.

I will not have time to do more than outline Eastern's position on each of these issues. I may say that Eastern, as has been said before me, filed more than one document in this case. We filed a motion to dismiss for procedurely and

—129—

[fol. 3814] substantive reasons on November 5th, and you have a copy of that, and we filed our brief to the Board on November 11th, and we filed a reply to papers filed by the applicant's on November 27th.

What I will say will be a mere high-lighting of a few of the points. This case, it seems to me, does have more legal and factual meat in it than most cases, and I believe that it has sufficient importance in itself and as a precedent for other situations, to come, that will justify the Board's carefully considering all legalities and all the facts.

Our brief of November 11th, together with the documents which we filed seeking dismissal of this proceeding, sufficiently, we think, discusses all of the major points. Pan American and Panagra have sought to give the impression that this case involves only the question of whether through plane service is better than connecting service. As a part of that effort they have insisted on calling the agreement in this case a through flight agreement, as if through service were the only thing involved.

Of course, no one could contend that connection service between any two points is more desirable than through plane service but the Board must in this case decide far more important questions than that.

Consider for a moment the tremendous scope of the proposal in this proceeding. Pan American and Panagra have repeatedly stated that the contract in question were prepared in response to a mandate of the Board in the Latin American case, and that the proposed service will fill the gap in the Latin American air transportation system which

—130—

[fol. 3815] the Board admitted it left as a result of the Latin American Decision. The Board will recall that in the Latin American Case the Board stated that joint control of Panagra by Pan American and Grace represented an inherently bad situation and urged the parents of Panagra to cooperate to permit Panagra to file application for access to the United States.

That is the mandate to which Pan American and Panagra refer. Now, I might say there that I am not here urging that Panagra be admitted to the United States. That is easy for me to state. I am not here to say that that is the answer. I am here to say that the proposal in today's proceeding is not the answer. We take the position that Panagra, as conceived, was wrong, that Panagra, to use an old fashioned expression that Senator Lee perhaps has heard, "was conceived in sin" 20 years ago.

Now, why do I say that? Well, the Board decided the same thing regarding another proposal of Pan American over in the Mattson situation over in Hawaii. The only difference was that the Board didn't get a chance to pass upon the legitimacy of the conception of Panagra because it was conceived before the Board was conceived.

Now, I think we may as well just adopt that as a major premise in this case, that Panagra ought not to have been. Now, the question is what to do with something that came that ought not to have come. I admit that in this country we don't usually shoot those who are illegitimate. We try to do something with them. I don't think though in this case where public interest is so much at stake and the Board didn't spare any words at all when it talked about the

—131—

[fol. 3816] Mattson combine over in the Pacific when Pan American wanted to get together with Mattson just as they did with Grace down in Latin America. The Board didn't lose any time in saying what they thought of that. Now, if that was inherently wrong in the Pacific, we have to say that that was inherently wrong down there but the timing of it was unfortunate for the Board's attention. What are we to do about it? Are we just to vendor to it? Are we to multiply it? It all adds up to the question of whether the Pan American system shall be dominant on the east coast of South America and on the west coast of South America.

As it is, we all know that they have the advantage and that the situation is unhealthy or rotten or whatever one might call it. Now, is it going to do any good to duplicate the monopoly that Pan American now has from Miami to Balboa? I don't think it is going to do any good to duplicate it there. It only reinforces and makes permanent, or

almost permanent, Pan American's right to use Panagra as a instrumentality.

It seems to me almost laughable that we have wasted a good deal of time today talking about whether Pan American and Panagra ever were or ever will be competitive. I thought the Supreme Court of the United States and most of the courts and commissions had long since held that anybody who has 50 per cent of somebody else's controls it, and I thought that when one controlled another, there wouldn't be competition between them. To my way of thinking there never has been competition and never will be competition.

Now, the Chairman has asked two or three times: Well, what are you going to do about it? I remember when I

—132

[fol. 3817] was in a certain law school about 25 years or so ago, they said,

"What are you going to do about a fellow who blocks in Georgia and he is misbehaving in Alabama about something the Georgia Court is interest in?"

It seems to me I heard a rather distinguished old equity professor say, "You can provide an arduous alternative".

Now, maybe there can be an arduous alternative provided here. Maybe this Board can do something to make these people behave or make these people disgorge this thing. I think as we intimated a minute ago in regard to this northwest decision, this discussion between the Chairman and Mr. Schneider, as long as people think they are going to get what they want they are going to be pretty stiff and obdurate.

If these two people who did something which I think was unwholesome to start with even if the Board wasn't in existence, if they feel that if they just hold on long enough, the Board will just shell out with whatever they want, I think they will stand out for it.

Now, it seems to me that once these two carriers know—and I think the Board told them—they claimed that they answered the Board's mandate in bringing this in but I don't think they did. As I understand it; the Board in effect said—they didn't say so in so many words—but they said, "Why don't you turn this thing loose and let it be a free

carrier?" There isn't anything in the world preventing those two people right now from forming a syndicate and turning this carrier over to the world, I mean to the public. The only difference is that they are using this as a spring board to multiply their strength down there.

—133—

[fol. 3818] Chairman Landis: I don't quite get that idea clearly in my head. Supposing Panagra were a subsidiary of Pan American, would that be a conception in sin?

Mr. Gambrell: Which is that?

Chairman Landis: If Panagra had been organized as a subsidiary of Pan American, would that have been a conception in sin, as you used the term?

Mr. Gambrell: I think on such a sweeping scale, hemispherically—that is, the east coast and west coast of South America—it would be, but when you add to that the dominant position of the other part, that is the Grace steamship interests, it seems to me that it is if the Mattson deal is that way. In fact, I think this is a worse deal than the Mattson deal which the Board, I think, approved because here you have so much more scope it seems to me—a bigger situation.

Chairman Landis: Then your objection is not so much on the ground that the conception in sin is the lack of competition, but it is rather the existence of the steam-ship interests in this picture?

Mr. Gambrell: Well, both. We say you aggrandize the Pan American air monopoly irrespective of the steamship and then you bring the steamship in and that just multiplies the poison of the situation.

Chairman Landis: Is it bad, is it somehow against the public policy or against the law, that that aggregation of lines shown on that map, should be owned by one company?

Mr. Gambrell: It is my belief that it is, yes, sir.

Chairman Landis: You think it is just too big?

—134—

[fol. 3819] Mr. Gambrell: That is right. And the record will show that they said they had 50,000 route miles in Latin America on their system and I think you haven't got any American flag effective competitor down there. You have got Braniff coming in here (indicating), and I hate to be gloomy but I don't—

Chairman Landis: That interests me because you are sort of intimating that the Board didn't have the solution to this problem of creating effective competition in South America. I suppose we could beat the bush and find some people who would be willing to apply for certificates to run anywhere in South America, especially with a government subsidy.

Isn't that the answer to it? Just certificate more carriers down into South America, if you really think the situation needs the type of competition that you are speaking about?

Mr. Gambrell: Well, I think that this arrangement really reinforces the monopoly which I think is objectionable now.

Chairman Landis: What is objectionable about it? Is it too big?

Mr. Gambrell: Yes, sir. And the main route in Latin America is between Miami and Canal Zone. I mean that is the thickest of all the routes, that is the heart of the watermelon and there is only one carrier running and that is Pan American today.

Chairman Landis: Yes, but that can be cured by this Board at any time. You are an applicant there. National is an applicant. Colonial is an applicant. A series of other applicants can be—we can cure that very easily by simply

—135

[fol. 3820] certifying some of them.

Mr. Gambrell: These applicants have stated that this is the answer to that and that that clears the whole thing, and as I see it, it doesn't. It only touches Miami and the whole territory is open. I think approving this contract certainly makes all the more necessary an independent force going through there—an independent carrier.

I think one is needed now. I think to reinforce this monopoly makes one all the more needed.

Chairman Landis: Then if we approve this contract, then Eastern would have a better chance to get its application through, wouldn't it?

Mr. Gambrell: I suppose that is one way to look at it. I suppose it is. Well, anyway, I got away from my script, Mr. Chairman. What have these people done to comply with the mandate? No application has been filed by Panagra. On the contract, the contracts in this case represent

an agreement that no such application shall ever be filed. I don't want the chairman or anybody to understand that I am recommending that Panagra come up.

I think they ought to be freed and treated as an independent carrier. The applicants have come forward with a one-way equipment interchange agreement which would amount to an illegal extention of Panagra's operation to the United States, without a certificate. Not satisfied with such a novel proposition, the applicants have added many terms and conditions so that the net effect of their contracts would be to turn over to Pan American and Grace every detail of Panagra's operations and management. Thus, you

—136

[fol. 3821] will see that the applicants have taken greatest pains not to comply with what they call the Board's mandate in the Latin American decision. Instead of an application they have presented a contract that no application should be filed. Instead of improving the inherently bad situation in Panagra's management control, they have aggravated that situation. The contracts are far more than through flight agreements. They represent an attempt by the largest air and sea interests in Latin America to divide up the control of Panagra and Latin American transportation for the next 99 years.'

Certainly such contracts could not be approved by the Board simply by finding that one plane service is better than connecting service. We are not here trying the Latin American case but I have here page 17 of the Crozier studies. If it is a question of convenience and they did shed big tears this morning about making people get up at Balboa to change over going north or south.

You will note in the pictography here (indicating), Mr. Crozier shows that more people, many more times, move through Miami than through Balboa. The line gets thinner there and when they talk about it is like getting a man out at Richmond, why didn't they say something about the situation at Miami that we have been talking about in the Latin American case for a long time and they have consistently objected to: there are many times as many people inconvenienced by Eastern's Miami transfer as there are down here.

I am not arguing the Eastern case. I am showing the inconsistency of these gentlemen. You know, the line gets thinner the farther south you go and there is much less

137

[fol. 3822] inconvenience in a transfer at Balboa than there is a transfer at Miami. At Miami more people are inconvenienced by through service at Miami than by through service at the middle point, Balboa.

I think it is of greatest importance to the Board to consider what would be the effect of certificates of public convenience and necessity if the Board here would approve the scheme presented by Pan American and Panagra. The record shows that many years ago the parties to these contracts considered equipment interchange proposal.

The record shows that Grace never would agree to less than actual extension of Panagra's operations to the United States and without granting any operating concession to Pan American over Panagra's routes. They can't use an interchange agreement as a precedent for this case because they emphasize that this is not an interchange, it is a one-way affair. On this point, Grace has finally won and it seems clear that the proposed contracts contemplates extension of Panagra's own operations to the United States using the certificate of Pan American. Our brief of November 11, at pages 12 through 18, shows the many respects in which Panagra would have absolute control over the proposed operations between the Canal Zone and the United States. Panagra would fix the number, nature and times of all schedules. Remember that. Panagra would fix the number, nature and times of all schedules, provide the planes and crews, have control over all space on such planes, approve or disapprove Pan American personnel charged with handling Panagra matters to the United States, and assume all risk of loss of aircraft or other property on the Canal Zone-United States flights. Panagra's name and

138

[fol. 3823] insignia would be on all the planes and on all the uniforms and the service would be advertised as being operated with Panagra's aircraft and over Panagra's routes—I mean Pan American's routes—both of them. Panagra would have the right to prevent abandonment of Pan American's United States-Canal Zone routes.

I say what right has Panagra got to be telling Pan American when it can abandon a route. It seems to me that is a matter for the Board to decide, or to take such routes over for itself.

Without discussing these points in detail—and we have discussed them all in detail in the briefs, it is apparent that for all practical purposes the operation between the United States and the Canal Zone as proposed would be a Panagra operation.

Now, they do provide a very fine-spun formula whereby the revenues come to Pan American and the salaries are paid by Panagra and they get together on accounting.

—139—

[fol. 3824] Mr. Lee: Is it your point that the steamshipping company has increased its control in this case?

Mr. Gambrell: Yes, sir. I will come to that in a minute.

Mr. Lee: I understood you at first to say Pan American had increased its dominance?

Mr. Gambrell: Both of them have. They have virtually reduced to a shell this Panagra. They have taken away its autonomy. They have made a piece of blunder out of it. It was already virtually so, and they finished the job here.

Since Panagra had no certificate for such operation and is seeking no such certificate it is obvious that such an operation would be illegal.

Pan American and Panagra have cited certain I.C.C. decisions which are alleged to prove similar contracts. It is sufficient to say that not one of those cases even remotely resembles the instant case. Most of the cases cited involved a leasing by one carrier of the entire franchise of another.

We assumed that the applicants do not contend that this is such an arrangement.

Now, Mr. LaRoe this morning said something about Bekins van lines equipment being here. I think we are all familiar with that. It is not in the record but I think we can talk about it since he did.

We know that there are roving commissions and franchises and Bekins can come here and Mayflower here can go to the West Coast. That has nothing to do with franchise operations.

Eastern Air Lines can carry a football team to Seattle,

140

[fol. 3825] I suppose if it wanted to but that has nothing to do with regular operations.

I submit that the Board ought to be most cautious in approving any operation by one carrier over the route of another. Whatever may be the case in other forms of transportation, the flexibility of air transportation, and the many possible repercussions from a single such operation would make such a precedent seem to be inadvisable.

Pan American and Panagra contend in their brief that the proposed through service will fill the acknowledged gap in the Latin American route pattern established by the Board in Docket 525.

And that, of course, concerns me, that they should say that this is the answer to all the trouble in Latin America. That is their attitude here.

Mr. Lee: It is your position that it would would it result in maybe more traffic from Panama to Miami?

Mr. Gambrell: I don't think it would. I think it would freeze up that track that our passengers have to go on at present. We are subject to a monopoly now, and this thing reinforces that monopoly and provides, for instance, in Section 9, a preference for the long haul traffic of those two carriers, and we can't get one of our passengers on that track Pan American's track, between Miami and Balboa, until these people have satisfied their mutual obligations to each other under the terms of this contract.

I went into great detail and into cross examination of the witnesses there and they promised that they will

141

[fol. 3826] mutually prefer each other on their long haul.

For instance, from New York to B.A., if, say, National or somebody else, or maybe Pan American pulls it around here in some way into Miami, would get there those people have priority on this segment (indicating on map) and Eastern then has to wait.

Suppose Eastern is trying to do business with Braniff on a three-carrier haul. Eastern changes at Miami and turns it over to Pan American and goes to Ballast and goes on to Braniff.

We have got to stand by until these people fulfill their mutual obligations under the contract before we can get through. Why? Because our participation in that is a short haul participation, and they say their own long-haul passengers should have first call and even though ours is a long-haul to us, it is a short haul to them and it stands by and I say that is one of the iniquities of the whole situation. There are many of them.

Mr. Lee: I don't get that.

Mr. Gambrell: Suppose Eastern had got a passenger going from Washington or New York to Lima, and we get down to Miami, that is as far as we go. We hit the present monopoly there. There is no contract that has been blessed by the Board so we do our best to get through which is not good now.

So, when this contract is approved under Section 9 there is a provision that Pan American will allocate seats preferentially to Panagra down here and it was testified on my cross examination that if some other person seeks to get

142

[fol. 3827] the local haul—I mean for Eastern, shall we say, and Braniff between Miami and Balboa, we are not a part of that long haul priority beneficiaries. We are only a local hauler on this line, although we are a long hauler as between ourselves, Eastern and Braniff.

Mr. Lee: If you sold the passenger the ticket at New York to Lima you would control the line that goes over, wouldn't you, from Miami?

Mr. Gambrell: We would control it to Miami but we are at the mercy of the monopoly now and it would be redoubled monopoly if this thing goes through and we would have to take what they would give us and they would say, "Wait if we have got anything left after we get through with what Panagra and Braniff wants we will take care of you then.

Mr. Lee: I want to know what would they do and what does Panagra do that makes you unhappy about this?

Mr. Gambrell: Say he goes through to Miami and wants to go to Lima.

Chairman Landis: Can you sell him a ticket to Lima?

Mr. Gambrell: I am not a ticket expert but I think we can. I think we can sell him a ticket all the way. All respectable carriers interline their ticket sales. The question is what kind of reservation can you get. We say, "Well, we find we can get you to Miami but we can't get you out of Miami maybe. Why? Well, they don't admit it but it just happens they are holding up the seats here to see who flies Panagra wants them down here because they are under a treaty with each other that we are not a party to and if Panagra doesn't want them we haul them on down

143

fol. 3sgs and turn them over to Braniff.

Mr. Lee: It would be the same plane, wouldn't it, that would go from Miami on down to Lima it would be the same plane, wouldn't it?

Mr. Gambrell: We are working with Braniff. I mean, let's assume that we are working with Braniff. That those other people are conspiring against us and we have got to work with Braniff. We are trying to turn the passenger over to Braniff here and we haven't got an independent bridge, we have got to take the bridge of the one-way between Miami and Balboa.

Chairman Landis: That is simply a problem in short haul, isn't it, of which all the carriers are so guilty? They don't want to short haul themselves. They hold up intermediate points until the plane leaves before you can book an intermediate point?

Mr. Gambrell: If new service is put in here it ought to be independent new service, service that would lend itself to competitors with this system.

Mr. Lee: Well, independent or not, wouldn't the monopolies—wouldn't they be just as eager to get that passenger and make connection with him and get an agreement with you so they would have a chance to get that passenger, knowing that you would have an opportunity to sell that passenger to maybe get him over to Havana to Braniff and going down that way?

Mr. Gambrell: As I have just said, sir, the contract says that they will prefer the long haul of their own people and Pan American and Panagra are working together, and

[fol. 3829] if they had anything left over they would give it to us after that, but we would have to wait until they saw whether they could sell it or not.

Chairman Landis: Your stops are what, from Miami up to New York? Miami, Palm Beach?

Mr. Gambrell: Vero Beach, and 8 or 10 stops to Washington.

Chairman Landis: How many seats do you hold on flights from Miami to New York, say for passengers who want to go from Miami to Daytona Beach? Do you hold enough to satisfy traffic if traffic were really offered to you?

Mr. Gambrell: We allocate according to experience and we work out a chart and revise it every month.

Chairman Landis: You don't give priority to long haul as against a short haul.

Isn't that customary?

Mr. Gambrell: Not often. At any rate the point I am making is not only that but we have got here the very people we are competing with all the way to New York and as one might say they wouldn't give us air in a jug because we are in a death struggle with them in competition and if we have got to depend on them and you bless the treaty saying that they shall give it to Panagra, and themselves in preference to anybody elsewhere do we come in, which is what their contract says?

Chairman Landis: I still don't get the point.

Mr. Gambrell: Well, let me try it one more time. Our man is in Washington and wants to go to Lima. Maybe we are working pretty well with Braniff from Balboa down,

[fol. 3830] and so we can get Braniff from Balboa down and we can get ourselves down to Miami but we keep calling on Pan American at Miami to let us through and it is a week ahead, you ought to sell those things ahead.

They have every inclination to favor their own transportation and as long as they think there is any possibility of getting a through haul on the Panagra-Pan American combination they fail to honor our request for a reservation. There we are, can't sell, and our reputation in Washington becomes: "Well, don't try to get Eastern because

they can't get you through. Ride somebody else and go through the other system.

Mr. Lee: I see your point now, Mr. Gambrell.

Now, do you think it would be any different in that respect than it is now since Pan American owns half of Panagra?

Don't you think they are going to, under the present situation? It means more profits to Pan American if Panagra does well, isn't that true? And wouldn't it be the same incentive now?

Mr. Gambrell: I think the Board was correct when it said it is a fundamentally bad situation now but when they get together and say they are going to prefer each other in the future in a written contract and you approve that it is pretty rough on us outsiders, when we have got nobody else to go to but them.

Chairman Landis: Suppose you extended Panagra up to Miami. Would that—

Mr. Gambrell: They are still under the domination of those people. I haven't recommended extending Panagra.

[fol. 3831] I think that is bad.

—146—

Chairman Landis: Suppose they are an independent carrier. Won't they favor themselves as against favoring a competitor? I don't see this as other than a simple problem in short-hauling.

Mr. Gambrell: You are overlooking this overall competitive situation in which Pan American is diametrically in opposition to us in their whole competitive picture.

Chairman Landis: I am not overlooking that at all. I am not overlooking that from Buenos Aires and to Rio as I see it Panagra just hasn't got the breaks, and Panagra and Eastern isn't as good a combination as the one carrier system that is being offered on the other side.

Now, this would improve it a little bit, give Panagra a better break but at the present time I think your real quarrel is with the New York-Puerto Rico extension.

Mr. Gambrell: Of course that was a great blow. The Board said on Page 11 the Latin American decision strengthened Pan American.

Chairman Landis: That is over the dam.

Mr. Gambrell: That is right but it is a background for what we are talking about.

Mr. Lee: If you sold a passenger a ticket over this combination you wouldn't have any trouble getting connections, would you? I mean it is only in the case of your wanting to do business with Braniff that you would have the short-haul problem of getting through from Miami?

Mr. Gambrell: Well, even if we did it the other way; Pan American and Panagra would favor each other, even

—147—

[fol. 3832] if we were giving it to Panagra below. If it would be to their advantage to postpone us they would favor themselves. They could work with National or somebody else. I don't know who. If you will read this brief carefully you will see that Pan American is dead set against us all the way through, and have been in all these proceedings, and we are without our backs to the wall on the whole proposition, and it is of deep concern to us not to have this Board approve a contract that will freeze us out.

Mr. Lee: Has Pan American ever made a proposal to Eastern for an interchange at Miami?

Mr. Gambrell: I haven't heard of it. I don't believe so.

Mr. Lee: Has Eastern ever made a proposal like that to Pan American?

Mr. Gambrell: I don't believe so. We are highly competitive. We could hardly be in a battle on this New York-Pureto Rick-Latin American situation here and then be advertising joint service and working out our engineering problems together on interchange via Miami.

Those things are sort of incompatible. I am speaking now of interchange, not interline—interchange of passengers—I am speaking of interchange of equipment. Interchange of equipment involves joint engineering and endeavors and joint planning together and we couldn't very well do that through the Miami gate and have Pan American all the while undertake to syphon off business, Miami to New York in the first instance.

Chairman Landis: I still don't see how this would hurt Eastern, except insofar as it may threaten Eastern's pos-

—148—

[fol. 3833] sibilities of being extended from Miami to Balboa.

Mr. Gambrell: Well, as you said a while ago, if there is a monopoly now, and it is monopoly piled on monopoly, with the steamship company added, it would make all the more desirable Eastern's getting down there, as I see it, which may be an advantage if one wants to be philosophical about it. The Board's press release announcing the opening of the Latin American case said that "Although the Latin American decision granted extensive new routes in the Caribbean and in Latin America it did not provide one carrier service from the greater portion of the Eastern United States to the Canal Zone nor did it establish one carrier service from that area into certain other Caribbean points."

Now, they say that this is the answer to that, which of course it is not because this service only goes as far as Miami. It touches one American city. The Board's conclusion that the service needed is between the greater portion of the United States and the Canal Zone and Caribbean points is fully supported by the evidence in this case. Such evidence is summarized in our brief at pages 43 through 46.

The Board found in the Latin American case that 38 per cent of the United States-Latin American traffic is to and from the Caribbean and 80 per cent of such traffic is of United States origin.

The record shows that excluding Mexico, 95 per cent of all United States-Latin American traffic was to the West Indies and the Canal Zone whereas only 5 per cent was to all of South America.

Now, mind you, 95 per cent of all the United States-Latin American traffic was to the West Indies and the Canal

[fol. 3834] Zone—that is excluding Mexico; whereas only 5 per cent was to all of South America, showing how much more important it is to maintain unbroken lines at Miami such as Eastern has proposed rather than to merely take care of the 5 per cent who go south of the Canal Zone in the way of convenience at transfers.

The part of the United States served directly by Eastern produces two-thirds of all United States-Latin American traffic. If you will note the map on page 44 of our brief you will see that Eastern can logically and directly serve all of such traffic to and from the Canal Zone and important Caribbean points.

The extension of Panagra's service to Miami would provide one carrier transportation for less than one-half of one per cent of the one carrier, United States-Latin American traffic given such service by Eastern's proposed Canal Zone extension.

This proposal of the applicants in this case would give one carrier transportation for less than one-half of 1 per cent of that which is proposed by Eastern.

The relatively inconsequential traffic benefit which the applicants propose in this proceeding certainly does not justify the great harm which would result from this proposal.

As I have previously pointed out, Panagra and Pan American were not satisfied to present a simple equipment interchange contract which would provide some benefits to the traveling public but they added many provisions which would aid Pan American and Grace in their program to re-

—150—

[fol. 3835] strain trade and competition in Latin America.

The applicants seemed to contend that Pan American and Grace have not acquired any new control over Panagra as a result of the contracts involved in this proceeding.

I shall not have time to discuss this issue fully. I refer you to our brief and to our memorandum in which this issue is discussed at length.

For present purposes, I shall simply list some of the new forms of control acquired by Pan American and Grace. Grace is given in the contract a right to designate the President of Panagra, and such President is given responsible charge of the management of the company.

Grace is given control over Panagra's traffic and sales in virtually all of Latin America including the Panagra countries and Panama City but I believe excluding Buenos Aires.

Pan American is given the right to designate the Vice President in Charge of Operation of Panagra who presumably would be in control of the technical aspects of the business. Pan American is given control of Panagra's traffic and sales in the United States, and in all parts of the world except Panama City and Panagra's countries in South America and Buenos Aires.

Pan American—not excepting Buenos Aires—Pan American is given control over Panagra's principal maintenance and overhaul for the next 99 years.

Pan American is given control over the training of the personnel in the United States.

Now, I might say there, while I am on the point, I cannot

151

[fol. 3836] follow their suggestion that they might lose $3500 per pilot in the training program, if the pilot turned out not to be a good man. They say that if they had to train him down in Latin America they would have to ship him back after wasting $3500 on him.

Well, they say they hire him in this country and, their chief executive offices in New York, there is nothing to prevent these people from hiring these new pilots and sending them to the Pan American School in Miami and if he turns out all right they move him on down, if he doesn't they don't move him down, that is the end of it.

I mean that is utterly fallacious. They talk about saving money on maintenance. Well, Mr. Friendly this morning said that only three or four per cent of the ships were involved, he was trying to discuss the application of the law to so small a part of the property.

Then this afternoon or a little bit later, Mr. Gesell comes in and says those ships have to go up to Miami anyway on this arrangement and it wouldn't cost anything to rotate them in and out.

Now I say they have either got to adopt one theory or the other. If only three or four per cent of their property is involved in this utilization up to Miami then it seems to me that should you have very little effect upon what you call the ferrying factor of bringing up ships to Miami for repair, it would cost the same in either case and they say in the contract "ships of all types," whether the types used or whether types that are never used on that particular segment there.

152

[fol. 3837] The new acquisition of control over Panagra gained by Pan American Grace we think ought to be disapproved: Grace as the 100 per cent owner of Grace Line, the steamship company, is for all practical purposes a

steamship operator, particularly since it admittedly formulates policies which are followed by Grace line and many of its directs reinterlocking with Grace line.

Under Section 408 it is plain that the Board must disapprove Grace's acquisition of control over Panagra since one attempt has been made to show that Grace can use aircraft to public advantage in its steamship operations.

On the contrary, it is clear that Grace and Panagra will continue to be directly competitive. In the Latin American case and in other cases the Board has made very plain that steamship control over competing air carriers is contrary to the public interest.

It would be particularly so in this case in view of the past record of Panagra's operations and its future prospects.

Chairman Landis: Your time is about up.

Mr. Gambrell: Yes, sir. I think I lost a good deal of that in the discussions we had.

Chairman Landis: No. I think I saved it for you.

Mr. Gambrell: Well, all right. We will assume that they contributed to my argument anyway.

I hope they did and if you will promise to read my briefs I think I will stop right here.

Chairman Landis: We always read the briefs.

Mr. Gambrell: Thank you.

Chairman Landis: Orleans Airport Commission?

—165—

[fol. 3858] Mr. Cross: That is exactly my suggestion. That is, I do not even ask that the Board decide that adversely at this time. I simply ask that that not be decided favorably now, that that be reserved for decision.

Chairman Landis: Of course, we can't quite guess what the effect of that blanket rule will be.

Mr. Cross: And particularly with respect to the other case. That is our position. Thank you.

Chairman Landis: Public counsel.

ARGUMENT OF L. L. HIGHSAW, Jr.
PUBLIC COUNSEL

Mr. Highsaw: Mr. Chairman, could I have a warning in about thirty minutes? This proceeding brings before us one transaction involving four companies.

On one side of the transaction is Pan American Airways, Inc., the operating air carrier, and its holding company, Pan American Corporation. On the other side of the transaction is Pan American Grace Airways Incorporated, an operating air carrier known as Panagra, and W. R. Grace and Company, a holding enterprise which owns 50 per cent of Panagra and 100 per cent of the Grace Lines, a steamship operator.

The transaction involving these four corporations has evidenced itself in two separate contracts executed on July 31, 1946.

One of these contracts, which for the purposes of the record, is called contract A, was executed between Pan American and Panagra and provides for through plane operation between the United States and various points on Panagra's route in South America.

166

[fol. 3839] The other contract which is an integral part of the signing transaction, was executed between Pan American Corporation and W. R. Grace and Company, and provides for the management of Panagra. The discussion of public counsel will be devoted to the merits of contract A, as it is the heart of the transaction before us.

If contract A is disapproved, contract B should fall with it as a part of the whole plan under the doctrine of the Catalina Air Transport Case. Public Counsel does not pretend that the transaction presents an open and shut case, either for or against Board approval. It raises difficult questions of law and policy to decide.

My purpose is to make clear to the Board the reasons why I believe that these issues should be decided against approval of the transaction. So far, Counsel have argued that the contract is either all good or all bad. I would prefer to recognize that like all transactions, it has some good points and some bad ones. I do not dispute the fact that it

will produce certain public benefits as outlined by the parties.

However, as the Board pointed out in the recent Mid-Continent Opinion, the determination of the public interest is a balancing process.

The good points of a transaction are to be weighed against the bad points and a balance struck. Here, I believe that balance is against the public interest, in such a decision I may be wrong, but at least my opinion is not open to the suggest of private interest. I have wrestled with the problems of this case for some weeks and this was the only conclusion that in good faith, as a public servant,

[fol. 3840] I could reach. I also believe it is fair to say that the parties have somewhat over-stated the benefits to flow from the contract.

The two most important are the economy of joint maintenance and overhaul and the elimination of the connecting service at Balboa.

As to the first, the record could indicate that there would be some saving but it certainly does not prove that the saving would amount to $560,000 or to any other particular amount. This figure is based on Pan American estimates as to the cost of its maintenance of the four-engine equipment and their has not been enough experience in such maintenance to justify any particular estimate.

As to the elimination of the connection service at Balboa, no one could argue that there is not now an undesirable situation.

However, actually, not many people will be benefited. Under existing facts at 1946 levels of air transportation, only about 23 people a day would use the through service as far South as Guayaquil and that number would dwindle rapidly to three and 1/2 between Lima and Buenos Aires.

Those figures are based on the exhibits put in by Pan American for air travel during the first six months of 1946.

Mr. Lee: Does that mean that 20 would stop at Quayaquil?

Mr. Highsaw: That means that 20 would stop at Quayaquil and get off at Quayaquil or Lima.

Disapproval of the contract on the basis of the objection I will raise would not prevent the parties from entering into an interchange agreement free of those objections.

I shall now turn to a brief discussion of each of my rea-

—168—

[fol. 3841] sons for disapproving contract A.

My first reason for disapproval of contract A is that it is in violation of the Civil Aeronautics Act because it provides Panagra with an operation between Miami and Balboa for which it is not certificated.

Throughout this proceeding, there has been a considerable amount of reference to through-operations which will relieve the difficulties created by connecting service at Balboa.

The import of these references is to create a picture of two connecting air carriers bargaining at arms length to supply a public need by providing a through service.

If this picture of contract A is accepted it would be impossible to clearly evaluate the intent and effect of the agreement. The only way in which that intent and effect can be evaluated is by recognizing that the contract is merely a vehicle for compromising the direct conflict between the aspirations of the two co-owners of Panagra, Grace and Pan-American, as to the ultimate destiny of that carrier. Counsel for Pan American yesterday stated about the same thing when he said that the agreement met the fundamental views of the parties.

This could only be the views of Pan American and Grace, the owners of Panagra. What then are those views? On the part of W. R. Grace and Company, those objectives have been the extension of Panagra to the United States under its own name. On the part of Pan American, they have been the keeping of Panagra as a connecting carrier at Balboa to which Pan American could feed traffic for the west coast of South America, and which would not compete

—169—

[fol. 3842] with Pan American as a independent air carrier, either between Balboa or Miami, or effectively with the east coast of South America. The attempt of each corporation to achieve its aspirations has carried all the way to the United States Supreme Court in docket No. 779.

The record shows that they were impelled to try and

reach some agreement here only because of the Board's action in placing Braniff into South America as a competitor in its decision in docket No. 525.

On the basis of past history, it was not likely that either Grace or Pan American would agree to anything which failed to preserve the essence of its position. Grace had already made that plain when in 1941, the Grace designated president of Panagra refused an offer of an interchange agreement by Pan American and stated that Panagra was not interested in any plan which did not provide TWA operations to the United States.

Grace had made its position even plainer by filing its petition to the Board in docket 707 and the complaint in docket No. 744, and in fighting the issues in docket 779, to the Supreme Court. Likewise Pan American has always consistently made clear its intent and purpose.

When the negotiations for contract A started in June 1946, inflexible purposes of Grace and Pan American were still clear. Grace wanted first a certificate for Panagra in its own name to the United States, and second, an agreement whereby Panagra would operate over Pan American's route between Miami and Balboa, and the two would share the revenues.

Negotiations which included discussion as to Pan American buying out Grace interests in Panagra, proceeded and

[fol. 3843] contract A was executed, which read in the context of its creation, "preserve the essence of both Grace and Pan American aspirations". The parties claim that there is no violation of the Civil Aeronautics Act because the operation north of Balboa is entirely a Pan American one. They have variously referred to the agreement as a through plane operation and a charter operation, and would ask the Board to regard each flight between Balboa and the United States as an operation in a plane chartered from Panagra by Pan American.

They have even gone so far as to contemplate that in the future this charter may occur while the Panagra plane is flying over Balboa in a non-stop flight. They would have the Board reach this result through two paths.

On one hand they would have the Board look at the contract nomenclature and take at face value the language of paragraph six which purports to give Pan American full control and responsibility north of Balboa and on the other hand apply a broad holding-out test.

I believe that the history of railroad and motor carrier regulation shows that the Board must determine whether Pan American has full control and responsibility in the light of the factual situation and all of the surrounding circumstances of this contract, and not by the words of the contract alone.

Moreover, I believe that the application of this test shows that Pan American does not have such full control and responsibility. A reference to the history of interchange operations in the railroad field and the motor carrier field do not bear out the contentions of Pan American and Grace.

Yesterday, some reference was made to railroad experi-

[fol. 3844] ence, and the impression was left that trains run just with any old place over the tracks of many roads without any requirements of obtaining ICC operating rights or even permission. That is not so. In the field of passenger operations, the Commission for some time vacillated on the issue of whether a railroad which required trackage rights by agreement, to operate a train over the tracks of another carrier, was required to obtain a certificate of convenience and necessity under the Interstate Commerce Act.

By around 1920, it decided that such a requirement was necessary and was upheld by the United States Supreme Court.

In 1940, agreements for trackage rights were put under section 2 of the Interstate Commerce Act and required Commission approval after hearing on a finding that they were in the public interest. I have found no case in the railroad field involving the situation now before us.

However, it is clear from the history of that form of transportation that a rail carrier had and was expected to keep full control of its tracks and that an agreement which relinquished a part of that control to another rail

carrier required approval under the certificate provisions of the Interstate Commerce Act.

Chairman Landis: Isn't that just what is happening here?

Mr. Highsaw: That is my view of the situation, Mr. Chairman.

Chairman Landis: Isn't that what 412 was created for?

Mr. Highsaw: You mean the application is similar to the 5 (2) of the Interstate Commerce Act?

—172—

[fol. 3845] Chairman Landis: Yes.

Mr. Highsaw: I think that the situation as of today is the same with this difference. Under the Interstate Commerce Act, the Commission is required to find that it is in the public interest, and all that the Board is required here to find is that it is unable to find that it is adverse to the public interest.

Chairman Landis: That is the only difference?

Mr. Highsaw: That is the only difference. I have cited this early history simply to show that previous to legislative determination of how this question should be handled, which was made in 1940, that under a situation similar to this one, the ICC might well have held that they had to get a certificate of convenience and necessity for trackage rights.

I don't contend that that is clear because I have found no case which involves exactly this situation. I just wanted to point that out to refute the impression that was left yesterday from some of the argument, that trains run just about any place they please.

Chairman Landis: Cars, not trains.

Mr. Highsaw: I had the impression from the argument that it might have been trains, but that is the purpose of why I brought it out. A reference to the decision of the Commission and the U. S. Supreme Court under the motor carrier act, which is similar to the Civil Aeronautics Act before us, points out the legal test to be applied to claims of Pan American and Panagra. These decisions which public counsel has gone into more extensively on brief, show clearly that the test is primarily whether Pan Ameri-

—173—

[fol. 3846] can has full and exclusive control of the opera-

tion. Panagra has pointed to the cases in the Supreme Court as setting up an additional test of whether Panagra is holding itself out to the public as a carrier. However, the Commission—that is the Interstate Commerce Commission—has interpreted those decisions—and rightly—as applying to a situation where the control and responsibility tests would show two operations instead of one but where history of the two operations showed only a single integrated service. This would not help Panagra at all here since there is no single integrated operation here by Pan American.

The only single integrated operation that you could find in this case would be by Panagra. The decisions of the Commission and the Supreme Court have also shown that in looking for control and responsibility, an examination can not be confined to contract nomenclature, which may be self serving, but that all of the surrounding circumstances and conditions of the operation must be scanned.

Do we find full control and responsibility in Pan American on the basis of such an examination here? If this were a straight interchange agreement each carrier would have complete physical control of the operation of the aircraft over its own segment through operation by its own crews and cabin attendants. Also each carrier would have complete control of the number of schedules to be run over its routes by aircraft of another company, and would have complete control of the timing of those schedules. A through operation would result when each carrier, exercising this complete control over its own segment, brought the aircraft

—174—

[fol. 3847] up to and away from the exchanging point. Each carrier would be completely responsible to its own crews and for the care of the aircraft in its possession. Such was the type of agreement that the Board had before it in the United and Western Interchange Case. What are the differences from that situation here?

Only one carrier can and does have physical control of the air craft at all times, through operation by its employees who must look to it for pay and must look to it for compensation in case of injury. That carrier is not Pan

American, it is Panagra. Only one carrier has the real power to determine the number of flights that will be operated at all times over all segments of this operation, between the United States and Buenos Aires. That carrier is Panagra.

Only one carrier has the power to enforce its will as to what the schedules shall be of the aircraft it has determined will operate in this service. That carrier is Panagra.

Only one carrier is liable for the crews and cabin attendants of the planes at every stage of the operation. That carrier is Panagra.

Only one carrier is primarily liable for loss or damage to the aircraft at all times between the United States and Buenos Aires. That carrier is Panagra.

What other actual controls Panagra would exercise over the operation if it were certificated in its own name would be small in comparison.

Furthermore, paragraph 6, upon which Pan American heavily relies, does not itself purport to give Pan American full control and responsibility. It is qualified by the phrase "as provided in this agreement". That qualification was

—175—

[fol. 3848] necessary as Pan American did not in fact have full control and responsibility. If it is not a reasonable inference from these contract terms, that the agreement in essence provides for a Panagra operation north of Balboa, I believe that such an inference does arise when the terms are realistically read in the light of the circumstances previously outlined.

In the words of Panagra's president, it always wanted at a minimum "something under which Panagra was operating under Pan American's franchise".

If Panagra were just receiving a promise by Pan American to operate Panagra planes there is no real consideration, for the price paid by Panagra, in barring itself from a route to the United States in its own name for a period of 99 years.

Chairman Landis: There are two things in there, I would like to get the force of your argument. There is nothing that is against the public interest in all these things you cite, but Panagra being in control and so on. So your argu-

ment there is directed purely to the point that the issue should have come up under 401 rather than 412?

Mr. Highsaw: That is correct, Mr. Chairman.

Chairman Landis: And yet, as I view this proceeding, especially in the light of triple or quadruple examination of the traffic situation of the Caribbean by this Board, aren't we in substance considering exactly the same question we would consider in a technical 401 proceeding?

Mr. Highsaw: Yes, Mr. Chairman to a great extent we are. When I get around to discussing the point of this as a precedent for route pattern, I intend to bring out that point, and that is one of the question which has bothered

—176—

[fol. 3849] me considerably in the consideration of this contract—that under a 412 proceeding we can in effect consider a contract which may grant all of the essence of a certificate operation to a carrier, and yet it doesn't have a certificate.

Now, there are some differences, as I intended to point out later, in a 412 proceeding and in a section 401 proceeding and in the former proceeding—

Chairman Landis: If you are going to come to that later on—

Mr. Highsaw: Yes, I intend to come to that.

Chairman Landis: The other point I wanted to ask you is this:

Is there anything in this contract which forecloses Panagra's opportunity to apply to the Board for an extension to the United States?

Mr. Highsaw: I intended to take that point up later on, Mr. Chairman.

Chairman Landis: I am sorry.

Mr. Highsaw: I believe that it does as a matter of fact.

Chairman Landis: Go ahead.

Mr. Highsaw: Further, the real intent of this contract appeared in counsel's statement yesterday morning to the effect, "If we get into New York", referring to Panagra's counsel's statement. There has been some suggestion by Panagra that if the Board should find contract A to be in violation of the Act, the petition filed in this case is broad

enough to cover a request for an exemption order under section 410 B of the Act.

This request alone constitutes some indication that the

—177—

[fol. 3850] that the parties are not quite so sure that the operation would not violate the Act as would be indicated from the arguments made by their counsel. Moreover, the petition was filed by Pan American and Panagra concurred therein, only to the extent of the request for approval under section 412, in spite of warnings from practically all counsel in the proceeding, so that there is not now on file with the Board any request for action under any other section of the Act except by Pan American and the only operation that would call for an exemption order would be a Panagra operation.

Finally, although Public Counsel raised the legality of the proposed operation at the prehearing conference in this proceeding, Panagra never mentioned anything about an exemption order until its brief to the Board, and the record does not contain one scintilla of evidence in support of such an order unless such can be implied from evidence of Pan American's refusal to permit Panagra to apply for a certificate in its own name. The use of such evidence to support an exemption order would be doing the greatest violence to section 412.

At this point, I would like to take up the question I raised in my brief with respect to the precedents set in this case for approving this as a pattern for interchange agreements. This question was discussed at some length in the brief and I do not intend to go into it fully here for the reason that after a full consideration of this issue in the time which followed after the brief time in which we had to prepare briefs, some very serious questions have arisen in my mind along the lines that the Chairman has previously indicated,

—178—

[fol. 3851] as to the logic of the position which was taken in the brief. In the brief, I pointed out the difference between the interchange agreement of the type that we had in the United Western case and the proposed type of agreement here, and I indicated that the sole proper purpose of an interchange agreement was to achieve through

plane operation between two connecting carriers, that this agreement had a considerably larger purpose in mind, and that I thought that there was some danger that approving this type of agreement would set a precedent so that when a similar type of agreement came up between any two connecting air carriers in the United States, there would be a grave danger that the route structure would be undermined, by such agreements.

After very careful consideration of this question following the writing of the brief, I arrived at the logical difficulty which the Chairman has just stated, namely, that in a 412 proceeding, we have to consider, under the public interest, apparently all of the question which were involved in a consideration under section 401 of the Act.

Consequently, it would logically appear that the Board in considering a contract such as this under section 412, would have ample opportunity to consider all those issues, and logically there would be no question about undermining the route structure.

However, I am still troubled by one fact, and I think that without going into this question at great length, I shall leave that to the Board.

I have no answer to it frankly, but it still troubles me and I think that it should be considered, and that is that

—179—

[fol. 3852] in a case involving four applications for a certificate, hearing is mandatory; interested parties automatically have notice, and presumably a Board decision would be based upon a majority of the members of the Board that sat upon the case.

In a proceeding under section 412, although the public interest may be considered, the situation is not quite the same. The Board could approve the agreement the day after it was filed, without filing any notice to any interested parties at all. It is not even clear that if it intended to disapprove the agreement that a hearing is required under the constitution. It certainly is not required under any statutory provision.

Also, there is a very serious question under section 412 and the Board may be confronted with it in this very case. Where there are only four members of the Board sitting,

and the Board should possibly split two and two on a matter of this kind, what the effect of that would be. All that section 412 states is that you have to find that it is adverse to the public interest in order to disapprove. All of those questions have troubled me at great length on that matter, and I have no answer for them.

I am just quite frankly raising them here this morning and hoping that the Board can find a better answer than I have been able to find.

Chairman Landis: Well, maybe the Board ought to look at a statute of this nature. Most statutes are rather imperfect when they are granted, and in their conception, look at this statute as a dynamic thing and relate its procedure accordingly and to use the phrase Mr. Friendly used

—180—

[fol. 3853] the other day, that we don't fall into an attitude in these cases, before us with the technique of Barron Parke. There is a great deal of legalism that is creeping into the administrative machinery.

Mr. Highsaw: I agree, Mr. Chairman that that might well be the approach to the question. I don't know that that is the answer to it though and I just wanted to raise the problem here. As I said I wanted to be quite frank with the Board. I made that argument on my brief and after having considerable time to look into it, the logical difficulties which you raised, Mr. Chairman, presented themselves to me.

Chairman Landis: We appreciate your consideration of it.

Mr. Ryan: As I understand it, all of the issues of public interest that could be raised under a 401 case could be raised in the present case?

Mr. Highsaw: That would seem to me so and the point that troubles me, Mr. Ryan, is that in a 412 proceeding which may be entirely different than a 401, proceeding, you can effect or grant to a party the essence of all the rights which the section 401 provides for.

Chairman Landis: In this particular case, we might take judicious notice of the fact that it has been fought less violently and less severely than a new route case.

Mr. Highsaw: I think that is true. My next reason for disapproval of the contract A is that it bars Panagra from

seeking a new route to the United States in its own name and destroys the possibility of competing with Pan American as an independent air carrier. In view of yesterdays discussion, it should be made clear that this point does not

—181—

[fol. 3854] raise the question of the destruction of existing competition between Pan American and Panagra. There now is no such competition between the United States and Balboa and is limited to competitive points in South America by reason of the connection service in Balboa. This point relates solely to Panagra's future status in the air transport picture in relation to Pan American.

The record is clear that this agreement does destroy all future possibility of competition between the carriers, although there is no specific provision in the contract to prevent Panagra from applying for a certificate to the United States, in its own name, the record is clear that it intended to and will operate to bar Panagra from seeking such a route.

Moreover, the existence of the provisions of paragraph six of contract B between Pan American Corporation and Grace for staying the proceedings in docket 779 plus the record in contract A destroy all possibility of ultimate conclusion to docket No. 779 which would enable the Board to grant Panagra such a route. In addition to the intent of the contract with respect to the United States-Balboa segment the contract is intended to eliminate competition between the United States and the competitive points in Montevideo and Buenos Aires by providing the pooling and division of revenues to those points.

Although the terms of the pooling agreement had not been formulated the contract binds the parties to negotiate such an agreement. If they fail to do so, then the terms will be decided by arbitration. Counsel for Panagra says that there is no certainty that a pooling arrangement will

—182—

[fol. 3855] ever be entered into. Under the contract, the parties are committed and it as certain as anything in the agreement.

The reason for the decision by Grace and Panagra to execute this agreement instead of continuing to seek a certificate and establish Panagra as an independent air carrier is clearly shown in the words of Mr. Roig, Panagra's president. I believe these words were read yesterday as part of a larger quotation, but I would like to repeat a part of them now as I believe they are important. When asked whether or not he was sacrificing a competitive opportunity in making this agreement, Mr. Roig, at page 476 of the transcript replied:

"That is not correct * * * and I really don't feel that it is a fair question. I don't consider that I am sacrificing something that I have never had, that I have worn my hair gray and my bones bare trying to get, a great deal of the effort being not only with the Pan American Airways and the Civil Aeronautics Board in the United States Courts, and have been at every stage of the game refused."

Here is the picture of a man who was literally bludgeoned into giving up the hope that Panagra could operate in relation to Pan American as a completely independent air carrier in its own name. This result, and the status for Panagra pictured here, are clearly contrary to the Board's expressed opinion as to the public interest as set forth in docket No. 525, only seven months ago. In that opinion the Board outlined the Grace Pan American controversy and concluded as follows:

"IN addition, we have long recognized the desirability of application to the Board which would permit a determination of the question of extending Pan American Grace

—183—

[fol. 3856] Airways from its present terminal at Balboa to a point in the United States."

"In view of the facts above outlined, we feel that the joint owners"—i.e. Panagra—"should in the public interest cooperatively enable Panagra to apply for access to the east coast of the United States."

It would appear to public counsel that in this opinion, the Board concluded that even with Braniff certificated to

South America, it was in the public interest to have the Board consider in a certificate case the issue of letting Panagra operate to the United States in its own name as a competitor of Pan American. Everyone in this proceeding has so interpreted the decision, even Mr. Roig—and Mr. Friendly concurred in Mr. Roig's statement on this point—conceded that a literal reading of the decision meant that Panagra should have its own certificate.

His own action at the time the decision was issued would refute any other claim. Even now, the parties do no more than assert that the agreement before us complies with the spirit of the decision. I believe that the Board's decision in docket No. 525 and the reading of contract A in the light of such decision poses the fundamental problem in this case other than the legal issue which I have already raised. The transaction before us is squarely contrary to the Board's declared position on the possible future status of Panagra. Indeed, the agreement is an open flouting of that decision and the challenge of the Board to make it good.

The Board must now face the fact of whether it desires to reverse its declared position of seven months ago on the public interest and approve this agreement, or stick to its

[fol. 3857] then held concept of the public interest and disapprove the agreement. That is not an easy dilemma but it is one that I believe must be faced.

Public Counsel, in the absence of any facts of record which would show a change of circumstance in the last seven months as to indicate the basis of that decision no longer stands, does not see how he can conclude otherwise than that the opinion of the Board as there expressed still does stand and he must examine the contract in that light.

If the public interest requires that Panagra apply to come to the United States as a carrier in its own name as indicated by the Board seven months ago, this contract is bad. It is not only bad, but represents an open defiance of the Board no different in content from any other defiance of the Federal government. In the light of such circumstances, I believe that the Board should disapprove this

contract and do all that it can to permit Panagra to apply for a certificate in its own name. The Board should not take any position which would interfere with the prosecution of docket 779 or anti-trust proceedings against either Pan American or Grace or both.

I believe that approval of this contract would destroy all hope of continuing docket No. 779, and would seriously hamper any anti-trust action. It would give complete immunity from the anti-trust laws for any act taken pursuant to the agreement.

Since this contract grew out of the controversies in both docket 744 and docket 779, I believe that the approval would also interfere as a practical matter with the prosecution of a suit based on facts there shown or alleged. On the points raised yesterday by you, Mr. Chairman, as to

—185—

[fol. 3858] whether or not it is now a question of do or die for Panagra, I would like to say that I don't believe that that alternative is presented. The parties to this contract have had it in their power from the beginning and to me they could execute a straight interchange agreement free of the objections to this agreement.

Moreover, it is within the power of one of those parties to let Panagra apply for a certificate in its own name. The refusal to do so constitutes no reason why an agreement otherwise not in the public interest should be approved. The responsibility for killing Panagra, if that should result from disapproval should rest where it lies, not on the Board, but squarely on Pan American.

Chairman Landis: I don't think you quite got my point on that. You draw a picture of Panagra being bludgeoned by Pan American into this contract, don't you?

Mr. Highsaw: That is correct.

Chairman Landis: I wonder who is doing the bludgeoning, whether it is Pan American or whether it is the Board.

Mr. Highsaw: Pan American or the Board?

Chairman Landis: Yes.

Mr. Highsaw: Well, I think the Board's—

Chairman Landis: Mr. Roig's head was bloody but unbowed until the Latin American decision comes along and then the Latin American decision comes along and accord-

ing to your picture of it, he then decides his bones are too bare and makes the agreement, and what is the additional thing that is coming there but the bludgeoning factor of the Board, so the picture can be looked at differently it seems to me, than saying bludgeoning. It had bludgeoned and as

—186—

[fol. 3859] I say, Mr. Roig's good and firm until the Latin American decision came down, and furthermore, on the problem of do or die for Panagra, I wonder as to the effect of the re-opening of the Latin American case, with regard to segment to Balboa. That perhaps has a bludgeoning effect even in excess of the Latin American decision.

Mr. Highsaw: Mr. Chairman, I agree with you that the decision of the Board in docket 525 was a bludgeon to compel Pan American to recede even a little bit from its previous position. However, I think it is a question of the size of the bludgeon. Apparently, it wasn't quite big enough to Pan American to force it to recede completely from its position and letting Panagra apply for a route as Panagra wanted to.

It was sufficient for Pan American to recede to the extent of trying to get this agreement through the Board first, which it would prefer rather than a route, and I think that Panagra, as Mr. Roig indicated, pretty well worn out by the whole business, did take this, although I think they bargained strongly to get as much as they could, but they did take this as an alternative.

Chairman Landis: If the situation had remained stable so far as the South American situation was concerned, Mr. Roig might have stood firm, but here, with the actual threat to Braniff which occurred as a result of 525 and to which the record has reference, and the potential threat of moving the point of communication with the United States from Miami to Balboa, as a result of the reopening of the Latin American case, doesn't that change and alter the entire picture drawn by those remarks in 525?

Mr. Highsaw: No. You mean you are referring to the

—187—

[fol. 3860] two things—the opening of the Latin American case and the foreign competition situation, is that the two things?

Chairman Landis: Well, I am not referring so much to the foreign competition, but suppose—take this as an illustration—suppose an independent American carrier is extended to Balboa. Doesn't that do just about the same thing as extending Pan American up to Miami?

Mr. Highsaw: Panagra up to Miami?

Chairman Landis: I mean Panagra up to Miami.

Mr. Highsaw: If an independent American carrier is extended to Balboa?

Chairman Landis: Yes.

Mr. Highsaw: I don't think that it does the same thing that the Board had in mind when it issued the decision in 525 which was namely providing a one-carrier service from the United States down the west coast of South America. I think that to the extent that it would provide a competitive carrier in between the United States and Balboa it would do the same thing.

Chairman Landis: Well, of course, it doesn't exactly do the same thing but the necessity for getting Panagra an access to the United States, not through Pan American would be solved by the extension of an independent carrier to Balboa, if that is the problem, because you certainly can't put Panagra into every city in the United States.

Mr. Highsaw: I would like to call attention to one other fact, Mr. Chairman.

I don't remember the exact date on which the Pan American case was re-opened, but it is my impression that the

—188—

[fol. 3861] negotiations for this contract were begun immediately after the Latin American decision and not after the Latin American case was re-opened, and that they had probably progressed almost to the point where this contract was agreed upon before that case was opened.

Chairman Landis: Well, of course, it is pretty hard to draw those facts, because briefs urging reconsideration of that phase of the Latin American case were filed long before the Board issued its order to re-open the case, but how much that may have swayed—what does the record show on that—anything?

Mr. Highsaw: The contract was authorized to be signed on July 31, 1946, but it is my impression from the record—

I may be wrong on that—I am willing to stand corrected if Mr. Friendly or Mr. Gesell say I am wrong—that the basic outline of the plan had been agreed upon relatively around the first of July, but I could be wrong.

Chairman Landis: Maybe so, but whether there may be a relationship of fact there, you can readily see that after the decision in 525 the opportunity that had been there just lying in front of Panagra for years—the desirability of extending it up to the United States—that would seem to me to be radically changed after 525. Then the issue becomes as to whether we ever want Panagra in the United States. I mean you have had a long experience with this controversy, this Pan American Panagra controversy—even some proceeding which would release Panagra, still not perhaps make it an independent carrier. The history of the anti-trust laws, of course, is full of that, of decrees being issued, companies being reorganized and yet like

—189—

[fol. 3862] Ropards not being able to change their spots, and that being the case, doesn't 525 indicate a new approach to the whole South American situation by the Board?

—190—

[fol. 3863] Mr. Highsaw: Mr. Chairman, I don't think I know the answer to that because I really don't know what influenced the Board in reopening 525. That, of course, would be within the Board.

It is possible, I agree with you that that interpretation is possible that the Board reexamined 525 and did not think it was in the public interest possibly for Panagra to be extended and it was going to look into the situation further in this reopening and therefore its language in the opinion is no longer of any effect, but I don't know whether that is what the Board really thought or not.

But, I certainly think that if the Board approved this agreement it is going to have to find some grounds to get around its decision in 525 that makes sense, and would have to explain that fact.

Chairman Landis: Wait a minute.

The decision in 525 doesn't say this, does it: it doesn't say, "Despite the fact that we have put competitive service into South America by the extension of Braniff, by

the extension of Chicago and Southern, despite all that we still think that the answer to the South American situation is to extend Panagra to the United States."

Does it say that or does it say, rather:

"A nice solution to this thing would have been, instead of taking an inexperienced carrier in the international field, such as Braniff—a nice answer would have been to extend Panagra."

Mr. Highsaw: The language of the opinion indicates to me that it is not referring to something which might have

—191—

[fol. 3864] been, but rather to something for—

Chairman Landis: The future.

Mr. Highsaw: —in which it looks to the future.

These words "in view of the facts above outlined we feel that the joint owners should in the public interest cooperatively enable Panagra to apply for access to the East Coast of the United States" seems to me to indicate that the Board was looking to the future.

Again, I can't read the Board's mind. I am just interpreting the words on paper.

Chairman Landis: Of course it is not a question of reading the Board's mind. It is trying to see what those words mean. If those words mean—you will recall that after 525 there was still open an important link from Balboa to the United States. Panagra made no application.

I imagine this interchange business was going on.

Then the Board reopened that.

Now, the reopening of that case also has a bearing on this situation, doesn't it?

Mr. Highsaw: I would agree with you, Mr. Chairman.

Chairman Landis: Perhaps the answer is: "Oh, we have fooled around with Panagra long enough. Let's not bother with that any more. Let's see if there is not a better solution.

Mr. Highsaw: I agree with you, Mr. Chairman, that the Board may well have changed its mind.

Chairman Landis: It isn't a matter of changing its mind. Here it had been giving this opportunity to Panagra, and in fact freezing onto a situation in the hope that something

—192—

[fol. 3865] would happen to this Panagra-Pan American mess. Nothing did happen. Therefore you think of other ways to skin the cat.

Mr. Highsaw: I am not quite sure I follow you there. You mean nothing happened between the time the 525 decision was issued and the determination to reopen?

Chairman Landis: Nothing happened. At least, I am not sure that the record shows. Certainly no application was filed by Panagra.

Mr. Highsaw: That is right. That was a space of six weeks or so and I agree with you that it may have influenced the Board in that matter.

Mr. Branch: That is just speculative though, isn't it?

Mr. Highsaw: It seems speculative to me.

Chairman Landis: Anybody could have their own interpretation about it. There is nothing that is conclusive in the 525 proceeding on this point.

Mr. Highsaw: There is nothing that is conclusive. It is just a question of reading the words and drawing a reasonable interpretation and that is the reasonable interpretation which I drew of them, Mr. Branch.

Mr. Branch: Tell me your interpretation.

Mr. Highsaw: My reasonable interpretation that I drew of them was that the Board indicated there that it had not finally settled this South American situation that it thought in addition to the fact that it put Braniff down there that it should still have Panagra come up to the United States if there was some way of letting it apply for a certificate, and I think that certainly the record indicates that is cer-

—193—

[fol. 3866] tainly the interpretation that Panagra and Mr. Roig put on it because it had no sooner come off the press than he jumped to that conclusion and made an effort to so apply and was refused by Pan American and there is no indication in the record that any of the parties to this proceeding interpreted it any other way and all they have ever said in regard to this matter of complying with the Board's mandate is that they think they "substantial" have complied, to quote Mr. Friendly.

—194—

[fol. 3867] Mr. Branch: I think your interpretation is good. Your interpretation coincides with my interpretation and I participated in the case. I think it is a good interpretation.

The Board has for two or three years indicated quite an interest in this matter, hasn't it, in more than one case and it has spoken very plainly about it, hasn't it?

Mr. Highsaw: It runs back several years, the Board's interest in this, and my interpretation all along is that the Board's interest has flown in the direction of getting Panagra to the United States.

Mr. Branch: And several months ago, in May I think it was, in the Latin American case, it stated, in very plain words, that it was its opinion that the joint owners of this Panagra enterprise should get together and, in the public interest, permit that carrier to apply for an extension to the United States.

Nothing the Board has said since then indicates that the Board has changed its mind about it, does it?

Mr. Highsaw: I didn't think so, Mr. Branch, or I wouldn't have taken the position I have in this proceedings. I felt as Public Counsel, I was bound—

Mr. Branch: The fact that the Board granted a petition for reconsideration in the Latin American case, or in certain phases of it, namely, the question of whether there should be another carrier from the United States to the Canal Zone—and I believe whether Pan American should go into Curacao or Caracas, didn't indicate that the Board had changed its mind about the desirability in the public interest of Panagra to apply for an extension, did it?

—195—

[fol. 3868] Mr. Highsaw: I don't believe that it did, Mr. Branch.

Mr. Branch: We were confronted with a situation. Nothing had been done, and we had very insistent application or applications here for reconsideration on that one point.

The Board had not had anything over the years that it had anything to encourage it that was going to get anything to result from the Latin American opinion so it reopened it so it could take another view of the situation.

Now, the decision to reopen the case didn't say aaything, nor as far as I can see even intimate that because Braniff had been put in, Chicago and Southern had been put in, that the Board had abandoned any further interest in Panagra coming to the United States. I don't know of anything, do you?

Mr. Highsaw: I don't know of anything, Mr. Branch.

Mr. Branch: Now, if an independent carrier is extended to Balboa, it would be a little different sort of a situation than if Panagra, a company at least 50 per cent controlled, and negatively controlled, by another air carrier, should be allowed to come into the United States, wouldn't it?

Mr. Highsaw: It would be different in several respects. It would be different as between Balboa and the United States, that operation, because, as you say, Panagra would still be controlled 50 per cent by Pan American.

Mr. Branch: It would not be a completely independent carrier.

Mr. Highsaw: It would be different to the extent that you would still have a connecting service at Balboa between Pan American and Panagra and whatever that third carrier was.

—196—

[fol. 3869] Mr. Branch: Panagra does have some advantage in that it operates all the way down the West Coast from the Canal Zone and then cuts over down at the southern extremity of South America to B.A. in Argentina, so that if it is extended there would be some public advantage there over what it has now, what it can provide now by reason of the fact that it dead ends at the Canal Zone, is that right?

Mr. Highsaw: That is correct.

Mr. Branch: And if it were extended into the United States, the public who traveled on the West Coast there, even though Pan American had some sort of veto power on it, it nevertheless could provide a better public service than it can now.

Mr. Highsaw: That is right.

Mr. Branch: But that doesn't mean the same sort of situation if an independent carrier went down, does it, so far as the public interest is concerned?

Mr. Highsaw: That is right.

Mr. Branch: I was just a little worried about the interpretations that are being placed here. The Board's decision in the Latin American case renewed in stronger terms the suggestion that it made in previous cases, about that matter, the desirability?

Mr. Highsaw: It seems to me—

Mr. Branch: Now, that could be called a bludgeon if you want to, but it wasn't a very effective bludgeon, because the Board didn't say anything about a charter arrangement.

The Board had in mind from the beginning an arrangement whereby Panagra would operate here on its own rights.

—197—

[fol. 3870] Mr. Highsaw: That is my interpretation.

Mr. Branch: And this does not do that.

Mr. Highsaw: It does not.

Mr. Branch: So that if it was a bludgeon it was not a very effective bludgeon.

Mr. Highsaw: I didn't believe it was.

Mr. Branch: So what resulted, what it had in mind, was the proposal—was that not what it had in mind?

Mr. Highsaw: That is my position and I think it is the very point that is going to have to be faced up to in this proceeding.

The Board may very well decide that its opinion in Docket 525 should be changed, that it isn't in the public interest under the present circumstances to extend Panagra to the United States, but I think it is going to have to face up to that issue because I think it has a direct relation on this contract.

Chairman Landis: I believe I didn't make myself clear, Mr. Highsaw. Your argument rests upon the statement of the Board in the 525 case that Panagra should be extended to the United States. That is basically your argument, isn't it?

Mr. Highsaw: That is correct.

Chairman Landis: Is there any statement by the Board at any time to the effect that Panagra should be extended to the United States even though an independent carrier is put into Balboa.

Mr. Highsaw: I know of no such statement, Mr. Landis.

Chairman Landis: Is that issue pending before the Board now?

Mr. Highsaw: That issue is now pending in reopened 525

—198—

[fol. 3871] I believe.

Chairman Landis: Therefore, in order to support your position you must insist that an independent carrier should not be put into Balboa?

Mr. Highsaw: No, I don't believe that necessarily.

Chairman Landis: Or else you have to rely upon a statement by the Board to the effect that it is desirable to extend Panagra to the United States even though an independent carrier is put into Balboa. I can see no other basis upon which you can rest.

Mr. Highsaw: I don't believe that that necessarily follows, Mr. Landis. The reopened 525, as I understand, can't put any carrier beyond Balboa. It can't have a service from Buenos Aires all the way up the West Coast of South America to the United States and it seems to me that the Board's decision in 525 was directed to that point and the most that can happen in the reopened 525 is to establish an additional connecting service and it may well be that the Board perhaps thinks that that offsets or changes its views in 525. I don't know the answer to that, but I don't believe that it is the same thing as if the circumstances had been such that the Board could have completely reopened the Latin American route case and considered applications running all the way up the West Coast of South America to the United States.

Chairman Landis: That isn't the issue. Let me go through that reasoning that I went through before. You start from the statement in 525: It is desirable to extend Panagra to the United States. Let's assume that that state-

—199—

[fol. 3872] ment correctly represents the situation. My point is that there is no statement by the Board at any time that it is desirable to extend Panagra to the United States even though the independent carrier is put into Balboa.

There is pending before the Board an issue as to whether an independent carrier should be put into Balboa?

Mr. Highsaw: Yes.

Chairman Landis: If the Board concludes that it shouldn't be then I suppose you fall back on the statement which justifies your argument, to-wit: that Panagra should be extended to the United States.

Mr. Highsaw: That is correct.

Chairman Landis: But if the Board concludes that it shouldn't put an independent carrier into Balboa, then the validity of that statement—I mean the statement in 525—would have to be completely reconsidered and you would have to consider the point that it would be desirable to extend Panagra to the United States despite the fact that an independent carrier has been extended.

Mr. Highsaw: I think that is dependent, Mr. Landis, strictly on what the Board had in mind when it did these various things.

Chairman Landis: The Board had in mind a situation which was governed by—as far as I can see—it was governed by its conclusion of not putting an independent carrier into Balboa and I fail to read the Latin American case to say that despite the fact of putting an independent carrier into Balboa it is still desirable to extend Panagra to the United States.

—200—

[fol. 3873] Mr. Highsaw: That is a possible interpretation, Mr. Landis, and I wouldn't dispute that fact. It is not the way I read the opinion, but I think it is a possible interpretation.

Chairman Landis: Wait a minute. I don't think you could question that. Do you argue that the statement in 525 is to the effect that despite whatever is done, whatever may in the future be done with reference to extending an independent carrier to Balboa, nevertheless it is desirable to extend Panagra to the United States.

Mr. Highsaw: I think it is open to that interpretation. I don't know that that is conclusive but I think it is open to that interpretation.

Chairman Landis: You have to argue that interpretation in order to support your argument?

Mr. Highsaw: Well, I think the Board, when it said that in 525 in regard to Panagra, was not thinking just of the

Balboa-Miami segment, that it was thinking of the whole South American picture and the through operation from Buenos Aires in contrast to the through operation of Pan American down the East Coast.

That is what I would base my views on in the matter, and it was not thinking just of that one local service.

Chairman Landis: Well, the Board had denied that service, it had left that gap in its pattern, when it makes this statement?

Mr. Highsaw: That is true.

Chairman Landis: Now, I just want to find a statement by the Board, if I am to follow your argument, to the

—201—

[fol. 3874] effect that whether or not an independent carrier is extended to Balboa, nevertheless it is desirable to extend Panagra to the United States.

Mr. Highsaw: I don't think you can find that statement.

Chairman Landis: I can't find it.

Mr. Highsaw: That is correct.

Mr. Ryan: Let me ask you a question that also goes into history. I will go a little bit further.

Has the Board ever made a finding that the public interest, public convenience and necessity, required the extension of Panagra to the United States, independent carrier or no independent carrier being in the picture?

Mr. Highsaw: No, Mr. Ryan. This statement in 525 that I read goes strictly to the point of Panagra applying for the certificate.

Mr. Ryan: Applying, that is right.

Mr. Highsaw: So the Board could consider the issue.

Mr. Ryan: Now go to the main history behind that, as recited in there. That was the history and the main point of that history was that the Board instituted an investigation to determine whether or not the public interest would require the compulsory extension of Panagra to the United States.

Did the Board, at any time in that proceeding make a finding that the public convenience and necessity required the extension of Panagra to the United States. That is the early history.

Mr. Highsaw: I don't remember all of the facts of that decision but I would say that it did not.

—202—

[fol. 3875] Mr. Ryan: Now, remember the history in the background. There was a complaint made by Panagra that Pan American, its 50 per cent stockholder, was restraining its management from filing an application for an extension of Panagra to the United States.

The Board had just handed down a decision in the Matson contract case, in which it had disapproved the Matson contract because its contract with Pan American contemplated the creation of an air carrier in the Pacific which would be limited under the terms of the contract in its ability to apply for new routes.

The Board disapproved that on the ground that that was a restraint upon the freedom of carriers in the public interest to make applications and to permit the Board to pass upon the question of whether their route system should be extended.

There then followed—by the way, that was an insistence by the Board of the right of that carrier, which would be created according to the terms of the Matson contract, to apply for routes before this Board.

The Board has never, in its subsequent action, in which it has denied Hawaiian, for example, the opportunity to go to Japan and China and to the United States, has never apparently given any indication that when it disapproved that Matson contract it was making, in effect, a finding that there was the public convenience and necessity for extending that supposed airline, expected to be created, to the United States or anywhere else.

I am just wondering whether, upon the history here,

—203—

[fol. 3876] whether it is proper for us to interpret the action of the Board in the investigation of Panagra, the investigation of the question of whether it should apply for a certificate to come to the United States, and whether we should construe this statement in the Latin American, which also speaks of the ability of Panagra to apply for a certificate to the United States—whether we should construe that as an implied finding by the Board upon the

merits of the issue, as to whether it should be brought to the United States.

It seems to me that you have to stretch language considerably, in the light of the history, in order to work out a finding there that Panagra should be extended to the United States.

Isn't it also reasonable to construe it as we did in the Matson contract case, namely: we want Panagra, because it has filed a complaint with us and said it was not free—we want Panagra to have the same ability to file an application that we wanted that carrier created by the Matson contract to have—a freedom to file an application, giving this Board the opportunity to determine the public interest, rather than any implied finding that the public interest demands that Panagra be brought to the United States.

Isn't that as reasonable a construction as the one which you place upon it?

Mr. Highsaw: Let me say first, Mr. Ryan, I don't believe the Board could legally, and it certainly would have been an unwise policy to have stated in Docket No. 525, or any other case for that matter, without a proper certificate proceeding, that Panagra should be extended to the

—204—

[fol. 3877] United States, because it would almost have foreclosed itself when a 401 proceeding did come along, if it did.

So, consequently, I think it had to adopt the language that it did adopt here.

Mr. Ryan: That is to say that that language, the right to apply for a certificate to the United States, must be construed as an intention—as a statement—by the Board, that it should be brought to the United States, is that right?

Mr. Highsaw: That it should be brought to the United States.

Mr. Ryan: Yes.

Mr. Highsaw: I don't think that the Board could have stated that in so many words for the reason I have just stated. However, I do think that the whole history of the terminal investigation and the statement here in Docket 525, indicates that the Board was perhaps going further than in the Matson case.

It wasn't interested just simply in the right of Panagra to apply. It was also interested in the possibility of getting Panagra into the United States.

Mr. Ryan: If the public interest upon the record of the case justified.

Mr. Highsaw: That is right. It had to hold back that qualification. It couldn't legally do anything else.

But now that, remember, was in a period before the Latin American decision. That was at a time when we had no competition at all into Latin America, and the Board apparently was of the opinion that there wasn't traffic enough

—205—

[fol. 3878] —not sufficient traffic potential—to have put an additional carrier into South America, and it dangled with the possibility, if the public interest should be revealed upon the record that way, that maybe we could accomplish the competition purpose, by breaking up a system which was under control here, one branch of which was under the control of the other—at least negative control —and establishing two independent competitive air carriers, and so, even then, it only was exploring the possibility —first the legal question, whether it had the right to compel the extension, and second, whether, if having the right to compel the extension, it would be in the public interest to order the extension.

Mr. Ryan: It seems to me that the Latin American decision changed the picture, so that now you have the competition in South America that you didn't have at the time of the institution of the Panagra investigation.

Mr. Highsaw: I agree with you, Mr. Ryan, that the circumstances are different now than they were from the time of the Pan American terminal investigation, which dates back a few years.

However, the language which I have been referring to here was in the Docket 525, which was at the same time that the Board created the present competitive situation in South America, and following along with it, and its language looking, in in futuro toward the possibility of extending Panagra to the United States in a proper proceeding.

Mr. Ryan: But even there the Board in that decision might say "We think that since Braniff is the independent

—206—

[fol. 3879] air carrier now competing in South America and since the only point here is to fill up a gap in a pattern, that perhaps Braniff should be given a route from the Canal Zone to Miami thereby providing the single independent carrier competition in South America." There was no foreclosing of that possibility.

Mr. Highsaw: If the Board had held a 401 proceeding on application for Panagra, I think it could have explored that possibility.

Mr. Ryan: That possibility all emphasizes the fact, doesn't it, that you must not put any unnatural or excessive meaning upon the suggestion in that Latin American decision that Panagra ought to be allowed to apply for a route to the United States.

Mr. Highsaw: My position simply is that the parties have not carried out the Board's suggestion there and Panagra has not had an opportunity to apply for a route.

Mr. Ryan: And even if the Board had specifically said we think that from all the circumstances and all the facts before us now that Panagra should be extended to the United States, it still would not prevent this Board—should not prevent this Board—from taking a look at that problem at this stage, entirely free from any shackles that the Board might have put upon its own action in that respect.

Administrative bodies frequently say a thing by way of dictum—I take it that this was a dictum because it was unnecessary to the decision in the Latin American case—the Board frequently takes back—I wouldn't say frequently—but an administrative body frequently takes back dicta which it has written into the decisions, isn't that true?

—207—

[fol. 3880] Mr. Highsaw: Legally your position is sound, Mr. Ryan. If the interpretation that you have just suggested were possible on the language in 525, that the Board would have to find some sort of change in the factual situation in order to justify itself.

I mean you have just suggested the possibility of a change in the factual situation in a period of seven months. I don't think the record in this case shows any change in the factual situation.

I think it is a problem that the Board has to face up to though and it has to explain away its language there in some way.

Maybe you can do it in the manner you have suggested, but somehow I think an opinion is going to have to be written by the Board explaining that away if it approves this agreement and I think that is the dilemma that this Board is in.

Mr. Ryan: Yes, but it isn't a dilemma that disturbs me because I am arguing for freedom to act in the public interest upon all the facts and upon the entire record in this case instead of regarding myself as hamstrung by what may have been—but what may have been a mistake in the dictum put in the Latin American opinion. I don't think that we are so infallible that we ought to perpetuate our own mistakes.

Mr. Highsaw: I agree with you, Mr. Ryan.

Chairman Landis: Are you suggesting that stare decisis applies to administrative tribunals?

Mr. Highsaw: No, I am not suggesting anything like that.

—208—

[fol. 3881] This opinion was rendered a few short months ago and it is standing on the books and I think, as a matter of fact, when the public comes along and reads an opinion they are going to want some sort of explanation and I believe the Board is going to have to explain it.

I don't think it could approve this contract and write an opinion in which it ignored this language here. I agree that you may be able to find some explanation of it and to arrive at a different conclusion.

You can frankly say you are reversing yourselves. You can arrange that the factual situation has changed. I might argue along the lines suggested by Mr. Ryan but I think you are going to have to find some explanation.

Chairman Landis: I am a little worried by your approach, because your approach, looking at it as a whole would bring a sort of creeping paralysis over administra-

tive tribunals, saying that their policy judgments that they make one time, must remain whatever the scene is, whatever the change in personnel.

I can hardly see stare decisis applying to certain decisions in the policy field. These tribunals are supposed to be alive not dead.

Mr. Highsaw: I agree with you but in view of the very short time which has elapsed since this decision was rendered I don't think it is quite the same thing. There is nothing to keep the Board factually or legally or any other reason from completely reversing itself. I have two things I would like to bring out.

Chairman Landis: My only question was this, whether it

—209—

[fol. 3882] it advisable to have a recess now or whether you can complete in about 15 minutes.

Mr. Branch: I will be through in about a minute. I have just one or two points I want to go at him now.

Mr. Schneider: Mr. Chairman, since I made the same argument yesterday, I wonder if I could be given the opportunity to reply to them.

Chairman Landis: I think not, Mr. Schneider.

Mr. Branch: Don't we want all the light we can get on it.

Chairman Landis: We have a certain amount of time.

Mr. Schneider: I wish I had the opportunity yesterday to answer that question because it is an interesting one.

Mr. Branch: I would like to know, Mr. Highsaw, what has happened since the Board's decision in the Latin American case providing for certain certificates down in that area, in making this suggestion, except that granting of the motion to reconsider certain points—what has happened that would probably change what the Board had in mind when it made its suggestion to the joint owners of Panagra?

Mr. Highsaw: Well, in addition to the suggestion that the chairman made about the reopening of 525, I think there have also been some facts that have occurred with respect to foreign competition there. I am not sure of my dates on it there. I know that the Peruvian National Airways have applied for a route from here to New York. There has been a route granted to TACA de Colombia.

Mr. Branch: All that was things that the Board could anticipate at the time. These things were going on with regard to the foreign permits and the Board knew they

—210—

[fol. 3883] were going to grant some of them.

Mr. Highsaw: So far as the record goes, I know of nothing other than the reopening of 525.

Mr. Branch: I have forgotten just what the Board said now but my recollection is, as Mr. Ryan's is, up to a point, that when we examined the situation down South of the Canal Zone in South America, we came to the conclusion that perhaps competition down there wasn't justified at that time.

My recollection is that we were not so sure about the desirability of competition between the Canal Zone and the United States, and that this suggestion was made because, if competition wasn't needed all the way down at that time, if the potential traffic didn't seem to justify it, you might improve that through service, which was then dead ending at the Canal Zone and still not be destructive in the competition.

I don't know how far we outlined that in the decision, I will say, but I wonder, and this is my question:

What reason would the Board have under the circumstances for making this suggestion in the language in the way it did. Was there anything pending in that case about the general abstract thing of letting people make applications in their own name?

Mr. Highsaw: I don't think so.

Mr. Branch: Isn't all the indication there that the Board had in mind that this might be a very desirable thing to do and wanted this carrier to apply so it could pass on it?

Mr. Highsaw: That is my interpretation of it, Mr.

—211—

[fol. 3884] Branch, they were thinking of the possibility of extending Panagra. That seems to me a reasonable interpretation of the language.

Chairman Landis: Let's have a recess for a few minutes.

(Recess taken.)

Chairman Landis: Go ahead, Mr. Highsaw.

Mr. Highsaw: I believe that I made myself clear previously on this matter of stare decisis, but I would like to say just one other thing, to be sure that it is clear on that point.

I am not urging any rule of stare decisis here. I simply as counsel had to examine this contract to find out whether or not it was in the public interest and in so doing I found the words of the Board to be the most persuasive statements and other matters that had a bearing on that issue.

The other matters I want to take up is this contract being too indefinite and speculative. I don't urge this reason alone to be a reason for disapproval of this contract but I do think it should be considered along with the other points which I have raised.

I didn't intend in raising this question in my brief to cast any aspersions on the draftsmanship of Mr. Friendly. However, the fact is that only about two months elapsed from the date of the 525 opinion to the dates of execution of the agreement and because of such facts or otherwise, the Board is presented with a contract here which contains many broad general areas of agreement which are not precisely tied down, and others are the purest speculation.

Thus, in paragraph 2 the Board is asked to approve

—212—

[fol. 3885] extensions to certain points without knowing whether any such services can or ever will exist.

In paragraph 10, there is a request for approval of sales agency arrangements with no specific agreement of any kind before the Board. The same observation is applicable to paragraph 8, the training program, paragraph 13, the pooling agreement and paragraph 14, dealing with advertising and publicity agreements.

I do not believe it is in the public interest to approve loosely drawn arrangements of this nature, the importance and the effect of which will depend on how they are implemented by specific agreements entered into at some subsequent date.

This is especially true of paragraphs 8, 10, and 14 all of which are integral parts of the contract as claimed by

counsel and which will involve allocation of expenses between the parties in a manner now unknown to the Board.

It is clear from the record that there was no intent at the time the contract was drafted to submit many of these specific arrangements, when and if agreed upon, to the Board for approval. The theory advanced by the parties is that all such matters can be ironed out in mail rate proceedings.

I do not believe that this is an adequate protection of the public interest. The practical difficulties in the way of tracking down from an accounting standpoint all of the expenditures, especially in the face of numerous allocations based on judgment, and of disallowing large amounts, presents an undesirable situation.

I believe that it is better to have a clear understanding

—213—

[fol. 3886] now of all that is involved rather than to attempt later to unravel a maze of intercompany accounting.

My last point with respect to contract "A" deals with the financial provisions. There, I wish to urge two things: first, that Pan American has no real control over the costs here, because it has no real control over the number of flights flown.

The number of flights that are flown may exceed what it would have put in between Miami and Balboa on its own account, and it has to reimburse Panagra for the expenses of those flights, both direct expenses and some indirect expenses.

Consequently, I believe that in that respect the contract is loose. Also the provisions of paragraph 17 and its annexes which deal with the financial provisions of the contract set up a procedure whereby Pan American has reimbursed Panagra for all direct costs incurred by Panagra in the operation north of Balboa and a reasonable proportion of such indirect costs as are fairly attributable to the operation.

These costs are to be allocated on the basis of provisions which take up some four printed pages of the contract. I would like to call the Board's attention to the second paragraph of paragraph No. 1 on page 21, which provides for allocation of flight costs, paragraph numbered "C" on page

22 which provides for allocation of training flight crews and other similar expenses and pages 23 and 24 of the contract which provide for the allocation of indirect expenses.

—214

[fol. 3887]. Chairman Landis: Your objection there is that they are too loosely drawn.

Mr. Highsaw: I have several objections to that which I am going to point out, Mr. Chairman,

Public Counsel believes it is adverse to the public interest that this agreement contain financial provisions based on a series of complicated cost allocations.

The proper supervisions of such allocations by the Board's staff for mail rate purposes is made exceedingly difficult.

The identification of costs of a carrier which are subject to prorating may become a mere matter of guess. This is especially true in this particular case because the fact that cost allocations here are based on vague terminology, such as major items properly allocable, New York expense, maintenance and communication departments, financial and accounting departments, personnel departments, all of which have meaning only with reference to the Panagra organization.

The difficulties involved in the allocations of costs are further multiplied in the case before us by the fact that Pan American has other contracts calling for allocations and Panagra has one other with Pan American.

As these allocation contracts pile up, less and less of the costs of the carrier are clearly distinguishable. The costs left over after all of the allocations represent a residue which has no real meaning as a reflection of costs of actual operations.

Moreover, allocations in this contract are based in large

—215

[fol. 3888] part on such variable elements that it is impossible for the Board to know at this time what the financial effect of the contract might be. What is the cost of the accounting department today, may be a cost of some other department tomorrow and a third department, the day after.

This fact was admitted by Pan American. Thus insofar as such cost allocations are concerned, the Board would be giving the parties a blank check.

Finally, Pan American's accounting is already seriously delayed at the close of the year in part by reason of these inter-company allocation contracts. "As of" accounting should not be further encouraged by more allocation contracts.

The difficulty with the financial provisions of this contract may be traced to the same source as all of the other objectionable features.

This simply is not an interchange agreement to provide through service. It is merely a peg on which to hang a compromise between Pan American and Grace, and every part of it must contribute to that compromise.

With respect to the conditions of approval—

Chairman Landis: Before you go to that point, is it your position here that approval of this agreement means the approval of these cost allocations for rate purposes?

Mr. Highsaw: I think that it certainly would, Mr. Landis.

Chairman Landis: I should doubt that.

Mr. Highsaw: I believe that if the Board approves them under Section 412, that all the Board can look at is to determine whether or not the cost allocations have been accu-

—216—

[fol. 3889] rately made under the contract, when it comes up in a mail rate proceeding, and my point here is the difficulty in making that determination, when and if it does come up in the mail rate proceeding.

Chairman Landis: I don't quite see that, that we would necessarily be estopped in a mail rate proceeding by having approved this contract. You say the formula used, to be approved in the contract, and employed for cost allocation there, would bind us in a mail rate proceeding.

Mr. Highsaw: I believe, Mr. Chairman, that the finding that these cost allocations are in the public interest, in the operations of these carriers would have that effect.

Chairman Landis: There must be some type of cost allocation if you are going to approve a contract of this type.

Mr. Highsaw: That is one of my objections to this contract. This kind and type of contract which is drawn here, I agree with you that it does result in such cost allocations and that raises the difficulty which I—

Chairman Landis: Then if I get your point correctly, it is this: that contracts of this nature, so complicate corporate allocations that they are undesirable for that reason.

Mr. Highsaw: That is correct. I think these two companies here are treating themselves as one company for the purposes of accounting here, when actually they are two companies.

Mr. Ryan: Why couldn't we follow our customary plan there and put a condition there approving, if we should

—217—

[fol. 3890] approve the contract—approving it and explaining that this is not to be interpreted as an approval of any particular cost allocation which may be involved in a future rate case.

Mr. Highsaw: Yes, I was going to suggest that Mr. Ryan and the conditions if the Board decides to approve the contract. I think that is subject to some difficulty, however, in that when you do get a mail rate proceedings you still have to check through the allocations that were made and see if they have been properly made on any basis either under the contract or some other basis which certainly raises tremendous supervisory problems when you get enough of these kinds of contracts.

Mr. Ryan: We are familiar with difficulties in the allocations process.

Mr. Highsaw: That is correct. That is the reason I thought it was quite important.

Chairman Landis: There are so many difficulties now that to complicate them a little further wouldn't hurt.

Mr. Highsaw: This might be the straw that breaks the camel's back. If the Board should decide that this contract should be approved Public Counsel believes that such approval should be conditioned upon the number of amendments to the contract.

In brief, to the Board, Public Counsel listed and discussed 14 such changes. The most important relates to

knocking from the contract those provisions where the parties have failed to present anything to the Board other than a general agreement.

—218—

[fol. 3891] A precedent of approving such loosely drawn contracts should not be started. In addition, paragraph 9 which limits the passengers to be carried on Panagra flights to through traffic would appear to be in violation of the prohibitions against discrimination in Section 404(b) of the Act.

Finally, the financial provisions of the contract should be tightened, the terms of the contract should be cut to not more than seven years, the parties should be required to file with the Board revisions in the method of payment under the contract which the record shows they did not intend to file, and finally, the condition along the lines suggested by Mr. Ryan that the approval of this contract does not constitute approval of the formula for allocation therein should be inserted in the order of approval.

There is one other point I would like to bring up.

On page 39 of my brief, there were some figures relating to traffic and it was there stated that that traffic was between Miami and Balboa. Those figures which I gave should reflect from all three Pan American gateways to Balboa and I would like the record to be corrected to show that.

Chairman Landis: I think most of the intervenors have absorbed them there.

Do you want to take two minutes?

Mr. Schneider: I just wondered if I could.

Chairman Landis: Two minutes.

Mr. Schneider: That is right. I think I can do it.

REBUTTAL ARGUMENT OF HUBERT SCHNEIDER, BRANIFF AIRWAYS.

Mr. Schneider: I want to address myself solely to the

• • • • • • •

[fol. 3892]

REBUTTAL ARGUMENT OF GERHARD A. GESELL

PANAGRA.

Mr. Gesell: Mr. Friendly and I are going to divide the rebuttal time so I guess I have about ten minutes.

Chairman Landis: That is right.

Mr. Gesell: I am not going to try to tell the Board what it meant in the Latin American decision, but I think I can tell the Board, and Mr. Branch particularly, what the Latin American decision and subsequent events meant to Panagra.

I think perhaps the best way of doing that is to review more or less chronologically what happened.

When the Latin American decision was decided—came down—Mr. Roig did the very natural thing. He called a meeting of the Panagra Board and said, "I want authority to file an application."

That matter was not handled by the Panagra Board as a routine renewal of the old problem. There was a considerable interval of consideration. During that time Mr. Roig and other representatives of Grace called upon the various Pan American officials, the directors of Pan Corp as well as the Pan American, discussed the matter pro and con in great detail.

When the Panagra meeting was finally reconvened there was a flat refusal on the part of Pan American to approve the filing of an application. The Board had said that it wanted an application filed, everything possible had been done to bring that about, and it was clear that on the determination of every one in Pan American acting as a corporation, and these various people concerned with it

[fol. 3893] acting individually, that that was impossible. There was then a counter proposal made by Pan American, and I was brought into the picture at that time.

I say brought into it—I have been working with Panagra and the Grace people on Panagra problems I guess for six years, constantly. I don't suppose a week has gone by that I haven't talked intimately about this matter with Mr. Roig and Mr. Garni and Mr. Patterson and the other Grace people.

I was very familiar with the background, very familiar with what Grace thought was best in the interests of Panagra and what Grace thought was best in the interests of the public. We started on this negotiation of the contract, Mr. Friendly and I, with absolutely no authority to conclude any kind of agreement.

Mr. Roig and his associates said, "I am not going to agree in principle to anything. I have had experience discussing various kinds of arrangements with Pan American. I am not going to do that. I am going to see what can be worked out and when it is worked out I will look at it, not before.

"I have no instructions as to what Grace was willing to do under this heading or that heading, and what Panagra was willing to do under this heading or that heading."

So, we went into these conferences and while it is true they took only two months, they were two of the most strenuous months that I have ever spent and I am sure two of the most strenuous months that any of us concerned with it have ever spent.

—228—

[fol. 3894] The Constitution, itself, was written in four months and while I don't say this is as important as the constitution, we worked on it and worked on it hard.

Chairman Landis: Perhaps they had better talent.

Mr. Gesell: Quite likely.

In the course of those negotiations and discussions, we recognized that the Board, itself, was opposing any extension of Panagra to the States through Docket 779.

Mr. Highsaw, who now points to that as a solution, had colleagues on the brief opposing it as a solution at the time.

We were confronted with another fact which occurred in the middle of the negotiations and which had a very vital effect on the negotiations, in my opinion, and that was the reopening of the Latin American case. We saw in the reopening of the Latin American case further evidence that the Board was not going to wait patiently again for something to happen in this Panagra situation.

We saw in it a very real possibility that Eastern Air Lines would be brought to the Canal.

We saw in it that if Eastern Air Lines was brought to the Canal there would be a totally different possibility for Panagra and Panagra's future.

The time factors were very acute.

The realistic and practical problem was to solve this matter at the time or we couldn't see the solution ahead. We saw it remotely, as a matter of litigation, over many years.

Competition was rising. It was a matter of doing something now, and doing it however on a basis which did not

—224—

[fol. 3895] depart from what we thought the Board had in mind in terms of the public interest and what Grace and Panagra had thought were desirable in terms of the pattern.

You have heard arguments here that Grace succeeded in what it was trying to do. I don't think Grace succeeded. I don't think Pan American succeeded. I think what happened was that under the impetus of the Board's firm and forthright position we were able to work out an agreement that had never occurred to anyone before, an agreement that was totally different than we had ever discussed in our previous negotiations, something which I am sure those of us on the Panagra-Grace side could never conceive would have been possible.

The reason for that, as Mr. Roig testified: Panagra was in a strong bargaining position, a bargaining position strengthened by the action of this Board and by the events I have just related—the decision, itself, and the reopening of it.

We worked out an arrangement which Mr. Roig testified in this proceeding, that as best he would now be able to say had never been suggested to him in the past during this long and tortuous controversy, would have been acceptable to Panagra. It was acceptable because while it may not have been an ideal solution in terms of an application, it was a solution which worked out for the public the advantages of the through service, which Mr. Roig and his associates in Panagra have been most concerned with, and it was a solution which was practical from a business point of view in terms of financial provisions, in terms of

—225—

[fol. 3896] financial provisions, in terms of operating questions.

That was why the contract was entered into. It represented no departure from the position that Panagra and Grace had taken in this proceeding from the outset as far as ultimate objectives for the public interest are concerned.

Now, I am sure that when the Board referred to the filing of an application, it couldn't have given consideration to alternative methods.

No more than I at the time would have thought that an agreement like this was possible, could the Board have been saying in Docket 779 "We say you must file an application. We don't want to look or consider anything else."

This was something brought about by that decision and by the events, and something wholly outside anything any of us could have anticipated.

We want to submit it to you on the merits. We think your obligation is to determine whether or not this agreement is in the public interest, whether it meets the standards of the Act, and we present that problem for your consideration rather than the question of whether or not this meets or doesn't meet a particular mandate or a particular sentence of a particular opinion, written under other conditions than prevail at the present time.

We feel that the events have strengthened our position in urging an approval of the contract.

Now, I want to turn briefly to one other phase of the arguments that we have heard.

I am not going to try to discuss some of the questions of whether or not Panagra was conceived in sin, and some of

—226—

[fol. 3897] the other arguments which I find it difficult to understand.

You know Panagra's history. You know that its organization and the manner in which it was organized was carefully reviewed at the time we undertook the pioneering job. Its performance we reviewed at page 11 of our reply brief.

We believe it is a good performance. I don't think the fact that we have settled a controversy here mitigated what we have done. I think it assisted it. Certainly public policy looks with favor on the discontinuance of controversies. I want to look at this problem of traffic because I don't think we have a clear understanding as between us and the

Board as to what Panagra's traffic situation is at the present time.

I want to first mention briefly the problem in South America. That has not been changed by this agreement. Panagra has its separate sales offices, it generates its traffic, the Buenos Aires office remains the same. Panagra has something better to sell under this agreement, but the traffic arrangements are essentially the same.

It is not a Pan American office at Buenos Aires, as Braniff would lead you to believe. It is a joint sales office. Panagra has its own personnel and sells its own tickets, an office as a matter of fact, which is run by a former Panagra employee.

In the United States the situation is changed and it is changed very favorably to Panagra. Panagra gets a far better and fairer break on this traffic matter than it had before. There has a lot of water gone over the dam since 779 and in that process advertising and publicity arrangements and schedule arrangements have been substantially

—227—

[fol. 3898] improved and the connecting service problem greatly minimized since the days of that controversy.

Panagra was given its own advertising and publicity department, and much of that had already been accomplished by the time of this agreement, but this agreement goes further. It was worked out with recognition for the many problems which had arisen concerning Panagra's relations to Pan American as sales agent, what Pan American's responsibilities were, and what Pan American's obligations were.

We went painstakingly through all phases of that problem—advertising, publicity, and the generation of traffic—and worked out concrete specific provisions by which Pan American is bound and which we think clearly plays the whole arrangement on a much better basis—in fact on a basis with which we can't find any grounds for criticism.

We looked further ahead, even, and felt that we should put into the contract provisions which would enable us to discontinue the sales agent if it didn't work out, and those provisions are here. If it isn't satisfactory to Panagra in terms of its needs, if Pan American doesn't fulfill its obli-

gations, Pan American loses its sales agency under provisions of this contract. That gives Panagra the great leverage. It also gives it an opportunity to discontinue it entirely if our belief as to what is going to happen over the period of years doesn't work out.

Mr. Schneider has been kind enough to say that he would permit me to make a correction of the statement he made yesterday concerning Panagra's independent advertising, for example. I think I told you that Panagra had an inde-

—228—

[fol. 3899] pendent advertising program and I think you, Mr. Branch, said you hadn't seen it.

The official Steamship and Airway Guide, for example, which I have here presents the thing in pretty clear shape and I would like to hand it up to you if I may.

You will see on the front side a system advertisement of Pan American Airways System, which mentions incidentally, Panagra points and gives Panagra traffic benefit but turn it over on the back and you will see a Panagra advertisement, resulting from the Panagra publicity, financed by Panagra funds, devoted exclusively to a development, and holding out of Panagra's traffic.

And you will find advertisements in Fortune such as this one in the current issue, a full page, wholly Panagra advertisement, and you will find advertisements in the New Yorker, and in Time, and in News Week and there is a big program going on in the New York papers. That is independent advertising undertaken by Panagra in the generation of its own traffic.

Mr. Lee: He gave you a good opportunity with that question, didn't he?

Mr. Gesell: Well, I cite it not to prove that Mr. Schneider was wrong, Mr. Lee.

Mr. Schneider: I was.

Mr. Gesell: But to give you concrete evidence that Panagra is in a position to generate and develop traffic in the United States, and it is not at the beck and whim of Pan American.

We call upon their agents, of whom they have a great many, over 250, we are in direct contact with them, with

[fol. 3900] sales literature and we feel we are going to get a fair and good break in developing our traffic.

Mr. Branch: May I interrupt just to make this observation: that I have seen some of these advertisements and the thing that I realize now threw me off is the little note at the bottom which talks about "For full information and reservations apply to Pan American World Airways office," which are your agents, I suppose?

Mr. Gesell: That is right, they are our agents: Under that arrangement we have offices at 300 places throughout the country. 11 of those are Pan American offices but the rest of those are agency setups. They are not Pan American controlled. They are traffic people all around, in the hotel lobbies and everywhere. We are in direct contact with them through our own staff.

Mr. Branch: You have direct arrangements?

Mr. Gesell: Direct contact with them. Our people call on them. We present our literature to them, we haul them into conventions and show them motion pictures and give them speeches. We do all the activity in generating traffic with those agents as Braniff does with its agents or Eastern does with its agents or anyone else does. We have our own facilities for doing that, they are independent of Pan American, and that is perpetuated and preserved and broadened in this contract, and made in our opinion more effective.

Mr. Lee: I would like to ask a question on another point: Does this contract include the route to New Orleans?

Mr. Gesell: It does in this way: the contract provides

[fol. 3901] that in the event Pan American obtains non-stop rights between Balboa and New Orleans, which it does not have at the present time due to the route situation requiring a stop at Guatemala City, that Panagra may operate its aircraft to Balboa and tender them to Pan American for Pan American operation over its route to New Orleans in the event that traffic conditions justify such an operation.

Mr. Lee: Any other access points in the United States included in this agreement?

Mr. Gesell: Yes. In the event Pan American gets certain additional route rights, then the agreement becomes

operative as to those route rights, principally—and of course most important to us—is the Miami-New York route which is involved in the domestic route case.

Mr. Lee: Is that automatic or is that operation on the part of Pan American?

Mr. Gesell: It is automatic.

Mr. Lee: When they get, for example, non-stop routes from New Orleans to Balboa then it is automatic?

Mr. Gesell: The contract is automatic on the East Coast to New York. It depends upon traffic considerations when we talk about operations up through New Orleans to Chicago. In other words, it is automatic in the place where Panagra's traffic requires the service most.

The other is dependent upon traffic conditions, and we didn't want it automatic so far as Panagra is concerned, because we don't want our operation so fanned out here (indicating) that we don't carry through on the aircraft that Panagra tenders to Pan American, the traffic to its

—231—

[fol. 3902] principal destination point, but it is automatic where it counts.

Mr. Ryan: And where it counts is on the East Coast, is that correct?

Mr. Gesell: Yes. I say where it counts in terms of where that is the most important place.

Chairman Landis: Before you leave, Mr. Gesell, I would like to ask you one general question on this agreement.

Has there ever been any suggestion made that this agreement would be a violation of the Sherman Act except for approval by the Board? Do you get my point on that?

Mr. Gesell: You are talking about the through flight agreement.

Chairman Landis: Yes, I am talking about the through flight agreement.

Let's assume, for example, that there was no approval required by the Civil Aeronautics Board of that agreement. Would you then violate the Sherman Act?

Mr. Gesell: I don't know the answer to that. That suggestion has not appeared in this proceeding.

Chairman Landis: It has not appeared?

Mr. Gesell: As far as I can recall. I don't think it has been suggested by anyone.

Chairman Landis: Of course our approval of the agreement gives you immunity from the Sherman Act.

Mr. Gesell: I think that the problem is difficult to resolve in terms of the Act, because of Panagra's peculiar relationships to Pan American.

Chairman Landis: I am not talking about the other

—232—

[fol. 3903] phases of it but I am just talking about this agreement.

Mr. Gesell: So far as I know that has not been suggested in the proceeding at all.

Chairman Landis: And the Department of Justice representatives were at the hearing and have had the opportunity to raise any objections?

Mr. Gesell: I think they made no statement, however, as to their view either way, as to the legality or illegality of that contract under the Sherman Act apart from approval here.

I will ask Mr. Friendly to check me on that.

Mr. Friendly: There was no such thing.

Mr. Gesell: I think that is the situation.

REBUTTAL ARGUMENT OF HENRY J. FRIENDLY, PAN AMERICAN AIRWAYS, INC.

Mr. Friendly: I would like, if I may, to begin by adding two points to Mr. Gesell's remarks in connection with Docket 525, with which I fully associate myself.

The first of these is that you have an opportunity in this case to bring Panagra's traffic, Panagra's planes, Panagra's crews, to the United States, and to do it now.

There is nothing to show that you ever had that opportunity, or would have had it, if an application by Panagra for a certificate had been made.

You have never heard argument, much less made a finding, that the traffic warrants the certification of Panagra on that route.

You have never heard argument on some of the legal questions—or let me put it, rather—questions specifically

—233—

[fol. 3904] related to the identity of Panagra, which would be brought up against its certification by some of the very

persons who now appear so enthusiastic about it, such as the argument that it would involve Pan American competing with itself, or the argument related to the half-ownership of Panagra by a steamship company.

You very properly, in 525, talked about an application by Panagra, though with no certainty as to what such an application would result in or would ever have resulted in on the merits.

Now, I think also that we ought not simply to take those words that you gentlemen used, but to try to get behind them to the reasoning behind them. Why was it that you were interested in an application being filed by Panagra.

Mr. Lee: Before you leave, you may have it, but comment, Mr. Friendly, on the legal point raised by Public Counsel that approval of an agreement like this might involve replacing a 401 case, at your most convenient point.

Mr. Friendly: I would be very glad to do it now, Mr. Lee.

We think there is simply no merit in that contention of public counsel. The motor carrier cases we believe are perfectly clear that one certificated carrier can make an arrangement whereby operations over its routes are conducted by the equipment and crews of another carrier without any problem of new certification being raised.

As we see it, the Board, in the Catalina case, went way beyond anything that is remotely suggested here.

There, United had made an agreement with Catalina, whereby not only the operations were to be conducted with

—234—

[fol. 3905] United's planes and crews, but United was to establish the rates, collect the revenues, and the entire operation was to be for United's account.

That was approved under 412, with no suggestion that any 401 problem is raised. I don't think unless you want me to, that it is necessary for me to retrace the steps that were gone over by Mr. Gesell yesterday, showing how completely control of that operation north of the Canal is vested in Pan American and not in Panagra, except that I would like to comment on two points raised by Public Counsel, which I think may warrant a little comment.

First of all, he says that whereas in the ordinary interchange agreement the fixing of schedules is left completely with each party, here it is not.

Well, that seems to me a perfectly academic approach to the whole purpose of a through operation of equipment agreement, is that the equipment should go through and obviously there has to be some meeting of the minds as to the schedule.

No purpose would be served take the United Western case. If a Western airplane had gotten into Denver at 12 in the morning and United had chosen not to run it out until 4 a.m., the whole purpose of the thing is that the plane shall go through, and this agreement provides that the parties shall adjust their schedules so that that shall be done.

That isn't giving Panagra any control over Pan American's schedules. The other point that was raised was that some control of the number of these flights was vested in Panagra.

Well, the answer to that is that it is vested only initially, and that the agreement contains provisions whereby

235

(fol. 3909) if the load factors on these flights drop to a level that Pan American considers uneconomical, the matter has to be taken up and proper adjustment made.

Therefore, those, to my mind, are the only features of the agreement which raise even remotely a question of who is the carrier, or any 401 question.

I think they are completely without merit.

Chairman Landis: Isn't there a situation in Canada that is not unlike that Catalina case? Isn't a subsidiary of the Canadian Pacific operating across on one of those border routes under a permit issued to Trans Canada?

Mr. Friendly: I am just not familiar with that, Mr. Chairman. I think that there is no 401 problem whatever, that this agreement falls clearly within the I.C.C.'s action in the motor carrier cases, action which has behind it the sanction of the Supreme Court in the Thomson case, the Rosenbloom case, and is a far smaller thing than you, yourselves have approved in the Catalina case, which I would think disposed of the matter completely.

I wonder if I may get back to the language in 525. I think we must see what you gentlemen had in mind—try to speculate about it. I think that one thing that you had in mind was the very thing that this agreement does: getting through service between the Eastern United States and the West Coast of South America.

So, on that basis, Mr. Branch, when you inquire, quite properly, whether anything is changed, I think the answer is that this agreement is the change, and I think that we are entitled to inquire, as Mr. Gesell suggested, whether if this

—236—

[fol. 3907] agreement, which nobody thought of, and it is very unfortunate that it hadn't been thought of, and we all can sensor ourselves—I mean we, on this side of the table—that it hasn't been thought of before.

If that agreement had been on file on May 1 instead of on August 1, would that language have been as it was, and unless it would have been, I don't see that it is of any importance, unless the language was addressed not simply to the provision of through service, but to the provision of additional competition between Miami and Balboa, and between Pan American and Panagra, and if that is such an overmastering need that everything else is subordinate to it, why then of course as we said yesterday, this agreement falls, but we don't think that that is the case.

Mr. Lee: If this is approved, what other services, if any, does Pan American propose as between the Panama Canal Zone and Miami?

Mr. Friendly: This agreement, Mr. Lee, will only cover through flights operated from Lima or points south on Panagra's routes and Miami.

In addition to those flights we have the obligation, under our certificate, which we fully intend to discharge, to operate such flights between Miami and Balboa, terminating there as the needs of the traffic justify and require.

Some via Camaguey and Kingston, some non stop, depending on what the traffic warrants.

Now, it seems to me that to say that because this agreement must fail, either on account of that statement in 525 or otherwise, competition between Pan American and Pan-

—237—

[fol. 3908] agra on this Miami-Balboa sector is so vital forgets a great number of things.

In the first place it forgets the fact, as I mentioned yesterday, that 2(d) is only one part of Section 2. Section 2 puts other mandates on the Board, fosters sound economic conditions in air transportation, to improve the relations between air carriers, to coordinate transportation by air carriers, to promote adequate and economical and efficient service at reasonable charges.

All of those objectives at which this agreement is very definitely aimed.

In the second place, the arguments would seem to insist that these two companies compete with each other on that sector regardless of how much other competition there was, and in that connection, I would like to say a word about the idea that there is now no competition between Miami and Balboa, or between the Eastern United States and Balboa, which seems to be prevalent.

There already is competition between the Eastern United States and Balboa,—or there will be as soon as Braniff commences its operation.

Take the situation from New York, for example—the most important single source of traffic, although not the only one, as sometimes seems to be assumed.

From New York to Balboa there is going to be a service by National to Havana and thence by Braniff, which should be fully competitive with the service of Eastern and Pan American, or National and Pan American, through Miami.

There is already competition there. We are not all by

—238—

[fol. 3909] ourselves.

Furthermore, I would like to come back to a point which I made before in other cases, that there is no evidence of traffic potential between Miami and Balboa justifying additional competition, whether by Panagra or anybody else.

You were shown some charts yesterday, pictographs, of the volume of traffic between Miami and the Canal, which is greater than the amount South of the Canal, but it is greater by comparison only.

Mr. Crozier's figures, which you cite in your opinion, were 36 outbound passengers a day to Balboa from all United States gateways, or less than 22 from Miami, and

to serve that traffic you already have the service of Pan American, the service of Braniff, and about six foreign carriers either authorized or about to be authorized, and what the need is for a 9th carrier in that—

Chairman Landis: But those foreign carriers can't take some of that traffic, can they?

Mr. Friendly: They cannot take traffic from the United States destined to this one little section here (indicating on map). They can take traffic from the United States to Panama, and they can take traffic from the United States to every other country there, and the idea that anything hinges on the Canal Zone versus Panama in the light of what are likely to be the changes in airport rules down there, does not seem to me in any way important.

Discount them if you will. Let's say that the six foreign carriers are only equal to three or two, because of fifth freedom or other limitations, where is the need for a fifth

—239—

[fol. 3910] carrier, say, between the United States and Balboa when the other day you said that the question of having four unrestricted carriers between Chicago and Washington was a very speculative matter and you refused to approve it.

I do think that we must beware of this double standard—one for domestic and another for international, particularly now that you have established competition abroad.

When it comes to a question of additional competition there certainly is no reason for applying any different test.

Just a word on the arguments of Braniff and Eastern. Braniff very candidly did not make any claim that this agreement should be disapproved because of any injury to it. Its whole case is based on some claim that it was wrong of W. R. Grace and Company to seek this practical solution to the problem instead of pursuing litigation to the end, as if Braniff, forsooth, would heartily approve of an application by Panagra for a Balboa-Miami-New York route.

Well, we have simply been doing what Braniff told us to do. When they were seeking this route of theirs in South America, they said this: this is from page 46 of their brief to the Examiners:

"Such competition" that is, by Braniff "would also compel Pan American and W. R. Grace and Company, out

of motives of self interest, to cease their quarrelling and cooperate in the improvement of service between the United States and South America."

So, we followed the Braniff trail, and we regret that

—240—

[fol. 3911] they now think they gave us poor advice.

Mr. Lee: At least that prediction came true, didn't it?

Mr. Friendly: Yes. That is, it did as far as we are concerned, Mr. Lee. There is only one thing lacking to make it complete.

Now, as to Eastern, the first thing that is clear is that so far as Eastern's present routes are concerned, the effect of this agreement can only be beneficial to it. Anything that puts traffic into Miami benefits Eastern, and this agreement will.

The claim that Eastern is prejudiced by the provision of this agreement relating to space assignments is a poor sham. Those are nothing more than the automjes which each airline assigns to its own stations, and which airlines assign to each other.

Panagra has precisely that kind of an arrangement today, not only with Pan American but also with Eastern.

Reference was made to this Washington-Lima passenger whom Eastern gets.

Well, that is precisely the passenger we want, as you have pointed out, I think, Mr. Lee. That is the passenger for whom this kind of arrangement exists.

Now, if Eastern chooses instead to route him over Braniff South of Balboa, we will handle him too—handle him on these through flights, on space other than the assigned space, or we will handle him on local flights.

In any event the situation would be exactly as it will be if this agreement doesn't exist.

Now, Eastern's motive isn't anything related to its ex-

—241—

[fol. 3912] isting routes. It thought, as Mr. Gesell said, that it was about to profit from this disagreement between Pan American and Grace, and it is moving heaven and earth to prevent us from settling that disagreement. It is as disconfitted as a hawk that started to swallow a chicken and then found that the chicken was running off.

It doesn't pretend as Braniff does that it might like to help Panagra or see Panagra extended to the United States. It wants to keep Panagra just where it is, it wants to get to the Canal, itself, and then with its control of the preponderance of the United States originated traffic, not only from New York but from all of these other cities, reaching far into the territory which Braniff would have access to, it wants to be in a position to control the destiny of both Braniff and Panagra, and to do that until it felt the time had come for an advance from the beachhead, as Mr. Gambrell called the Canal Zone when he argued the Latin American case, unless, in the meanwhile, to use the phrase that he did yesterday, Panagra's owners had seen fit to disgorge.

Eastern isn't here to help Panagra or to help Braniff. It is trying to drive a wedge between Braniff and National, and it is trying to drive a wedge between Pan American and Panagra.

I am not going to follow Mr. Gambrell in further rearguing the Latin American argument, except to say two things: First, to refer back to these traffic figures which I think show that a second operation—or another operation—between Miami and the Canal, in addition to all that have

—242—

[fol. 3913] been now authorized, is simply not supportable, and in that connection, I would like to refer you gentlemen to the opinion which you wrote just the other day on reconsideration in the Pacific case, and to suggest that the course which you followed there is the course of statesmanship on the Miami-Balboa route also.

We share Eastern's views as to the desirability of giving the convenience of one carrier service to Latin American travelers proceeding through the Miami gateway, but we have a different method of providing that solution, one which will come before you in due course.

Now, if I could have another moment—I am sure I have already overrun my time and this will take about one minute—I would like to talk just a bit about the idea which has been generated by some of the intervenors that Pan American has some generally adverse interest to Panagra, and

that we are not sincere in wanting to see this agreement approved and to see Panagra flourish.

The fact is that those two companies, in spite of this controversy about the extension matter, have worked in the closest cooperation as a glance at the map will show that they necessarily have to do. There seems to me to be two mirages about Panagra's traffic. The first is that all of it goes to Buenos Aires. The fact of the matter is that as this record shows, of the United States originated or destined traffic, 82 per cent of the passengers are to and from points in South America other than Buenos Aires, points such as Quito, Lima, Santiago, where of course Pan

243

[fol. 3914] American is 100 per cent interested.

Now, what about the other 18 per cent? Are they all from points for which Pan American's New York route or Miami route is competitive to Buenos Aires? Why, not at all. Take the fellow in Los Angeles, of whom there are quite a number. Is Pan American's salesman in Los Angeles interested in selling Panagra to Buenos Aires?

Well, of course, he is. Is the travel agent in Denver or New Orleans, whom we are working with—are they interested in selling Panagra's route? Well, of course they are.

And take even the part of this 18 per cent of the passengers who could go to Buenos Aires by one route as well as another? Do we regard them as completely lost to us if they travel over Panagra?

Well, of course not. We have the haul to the Canal. When they go over Panagra's route they are not going over the route of a stranger, they are going over one of our own companies. We have entered into a perfectly clear and definite contract to sell that traffic over those two routings—this traffic that is competitive, which is a small part of it—fairly and without discrimination, and we wouldn't have made that contract, and I wouldn't be presenting it here, if we didn't intend to live up to that promise fully. And apart from our sincerity and good faith in that, I suggest that our interest in getting an extra half share out of a portion of the haul on those few passengers, is not such that we are going to imperil a relationship that is as valuable as Pan American's with Panagra.

[fol. 3915]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 420

Kahn/mh

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Docket No. 2423

In the Matter of an Agreement filed under section 412(a), and any other applicable provision of the Act, by and between

PAN AMERICAN AIRWAYS, INC.

and

PAN AMERICAN-GRACE AIRWAYS INC.

relating to interchange at Balboa

Room A, Departmental Auditorium
Washington, D. C.
Monday, October 7, 1946.

The above-entitled matter came on for hearing at 10 o'clock a.m., pursuant to notice.

BEFORE:

THOMAS L. WRENN, and
WARREN E. BAKER, Examiners.

APPEARANCES:

GERHARD A. GESELL, and
CHAS. M. DAVISON, 701 Union Trust Building, appearing on behalf of Pan American Grace Airways, Inc.
Chrysler Bldg., New York, New York.

FOWLER HAMILTON, Southern Building, Washington, D. C., appearing on behalf of Pan American Airways, Inc., 135 East 42nd Street, New York, New York.

HUBERT A. SCHNEIDER, 815 15th Street, Washington, D. C., appearing on behalf of Braniff Airways, Dallas, Texas.

EDWARD J. HICKEY, JR., Special Asst. to Atty. General, U. S. Department of Justice, 10th and Constitution Avenue, Washington, D. C.

JAMES L. HIGHSAW, JR., Public Counsel.

EDW. D. RAPIER, 315 Camp Street, New Orleans 12, La., Orleans Airport Commission, New Orleans, La.

—2—

[fol. 3916]

RICHARD A. FITZGERALD, 1518 K. Street, N.W., Washington, D. C., appearing for National Airlines, Inc., 3240 N.W. 27th Avenue, Miami, Florida.

WILBUR LA ROE,
JOHN MOORE, and
WM. BLUM, JR., 743 Investment Building, Washington, D. C., appearing on behalf of Port of New York Authority, 111 Eighth Avenue, New York City, New York.

JOSEPH McDOWELL, Department of Justice Building, U. S. Department of Justice, Washington, D. C.

R. S. MAURER,
J. M. VERNER, and
T. M. MILLER, Municipal Airport, Memphis, Tennessee, appearing on behalf of Chicago & Southern Air Lines, Inc., Memphis, Tennessee.

E. SMYTHE GAMBRELL, and
W. GLENN HARLAN, 825 C & S Bank Building, Atlanta, Georgia, appearing on behalf of Eastern Air Lines.

ROGER J. WHITEFORD, appearing on behalf of Braniff Airways, Dallas, Texas.

ALEXANDER C. DICK, Appearing on behalf of Colonial Air Lines, Inc., 630 Fifth Avenue, New York City.

—3—

[fol. 3917] PROCEEDINGS

Exam. Wrenn: Come to order please, gentlemen.

The Civil Aeronautics Board has assigned this time and place for hearing in the matter of an agreement between Pan American Airways, Inc. and Pan American-Grace Airways, Inc., dated July 30, 1946, being Docket No. 2423.

Will you please enter your appearances?

Pan American?

Mr. Hamilton: Fowler Hamilton.

Exam. Wrenn: Panagra?

Mr. Gesell: Gerhard A. Gesell and Charles M. Davison.

Exam. Wrenn: For Braniff?

Mr. Schneider: Hubert A. Schneider and Roger J. Whiteford.

Exam. Wrenn: Colonial?

Mr. Dick: Alexander C. Dick.

Exam. Wrenn: For Eastern?

Mr. Gambrell: E. Smythe Gambrell and W. Glen Harlan.

Exam. Wrenn: For National?

Mr. Fitzgerald: Richard A. Fitzgerald.

Exam. Wrenn: For Chicago and Southern?

(No response)

Exam. Wrenn: Department of Justice?

Mr. Hickey: Edward J. Hickey, Jr. and Joseph McDowell.

Exam. Wrenn: Public Counsel?

Mr. Highsaw: James L. Highsaw, Jr., Elison D. Smith, Jr.

Exam. Wrenn: Are there further appearances?

Mr. LaRoe: John W. Moore and Wilbur La Roe, Jr., for

—4—

[fol. 3918] Port of New York Authority.

Exam. Wrenn: Appearing pursuant to a petition to intervene.

Are there further appearances?

Mr. Gesell: There was a gentleman from the New Orleans Authority who asked to have his name entered. He said he had spoken to you.

Exam. Wrenn: He had another hearing.

He intended to enter an appearance at the Waterman. I suppose that is where he is at this time.

COLLOQUY BETWEEN EXAMINERS AND COUNSEL

Before proceeding with the case of the applicants, are there any matters that should be considered at this time?

Mr. Hickey: Mr. Examiner?

Exam. Wrenn: Mr. Hickey?

Mr. Hickey: On behalf of the intervenor, Department of Justice, I would like to make a motion at this time that Pan American Corporation and W. R. Grace Lines be made parties to this proceeding. The Department is particularly interested in the control features exercised in the Panagra arrangements and it feels that these two parties are necessary to the proceeding.

We feel that that position is consistent with the position already taken by Public Counsel that both contracts are necessary to the proceeding.

We would like to urge at this time that an order be entered making them parties. It is my understanding that such an arrangement would not meet with serious resistance on the part of petitioning parties in view of the letter which has been written and made a part of this proceeding with

5

[fol. 3919] respect to both contracts.

If desired by the Board the second contract can be made part of this proceeding and I presume it necessarily follows parties to that contract would also be.

Exam. Wrenn: I had a question I wanted to address to you but in view of your statement about the willingness of the parties I would like to hear from them first.

Mr. Hamilton: Speaking for Pan American, Mr. Examiner, I don't think that Mr. Hickey's statement is correct. We do take the position that Pan American is not a necessary party to this proceeding—Pan American Corporation.

The letter to which Mr. Hickey referred is the letter of August 27, and the third paragraph of that letter which

was evidently the one that he had in mind states that the contract was not formally filed under Section 412 or any other provision of the Act for the reason that we are of the opinion that there is not any provision requiring its filing, and that is still our position.

The letter proceeds, however, to say: "As stated at the pre-hearing conference, however, we considered that the Board in connection with its approval of the contract may attach such terms and conditions to it"—I am not reading the precise language, I am summarizing—"and that the conditions will relate not alone to that contract but to any undertakings involved in the contract between Grace and Co. and Pan American Airways."

As I say, that is still our position. It is our position that while the Board may quite properly consider in connection with the PAA Panagra contract, the contract be-

[fol. 3920] tween Pan American Corporation and Grace, that contract has not been submitted to the Board for its approval.

We concede that it is closely related to the contract between Panagra and PAA. As to the question as to whether the Board should exercise jurisdiction, our position on that is as stated in the August 27 letter in which we said, "without waiving our position with regard to the statute not requiring the filing of the Pan American-Grace contract, we are authorized by the parties to state that if the Board should be of the opinion that the contract between them should be passed upon by reason of its relationship to the contract filed, the parties will not contest the Board's jurisdiction under the circumstances."

That is to say the Board's power to assert jurisdiction over the contract.

Exam. Wrenn: What would be the position if, after consideration of the evidence, the Board should determine that W. R. Grace and Pan American Corporation should be parties to the proceeding?

Mr. Hamilton: As far as Pan American is concerned I think it is our position that while the statute does not require them to seek approval of their contract with the Grace Corporation, that as stated in this letter it would not op-

pose the assertion by the Board of jurisdiction over the contract and over it as a party to the contract.

Exam. Wrenn: The point I am driving at is this: if the Board should determine that W. R. Grace and Pan American Corporation should be parties to this proceeding, would the fact that they are not parties be fatal—that is,

—7—

[fol. 3921] to the agreement.

Mr. Hamilton: You mean, would the Board be deprived of jurisdiction to approve the Panagra PAA contract?

Exam. Wrenn: Yes.

Mr. Hamilton: If the Board should determine as a matter of law that they were necessary parties later on?

Exam. Wrenn: My point is this: If after considering all the evidence, the Board should reach the conclusion that W. R. Grace and Pan American Corporation should be parties to this proceeding, what would be the status of the proceeding?

Mr. Hamilton: I think under this letter it could make that determination, that they should be parties to the proceeding.

Mr. Hickey: Mr. Examiner?

Exam. Wrenn: Yes, Mr. Hickey.

Mr. Hickey: It is our position that the very receipt of evidence is dependent largely upon Pan American Corporation and W. R. Grace being parties to this proceeding.

We don't feel that it would be proper to make them parties after the receipt of evidence and we would like to urge that this matter be decided by the Board immediately.

It would be my suggestion that petitioning parties might be agreeable to having them designated as parties, with a view to speeding up the proceeding.

If that is not agreeable to them we would amend our motion to the effect that the hearing be deferred until they are made parties.

Exam. Wrenn: Would you determine that they are

—8—

[fol. 3922] proper parties until you have heard the evidence in this proceeding?

Mr. Hickey: We feel that the very receipt of evidence is dependent on their being made parties.

Exam. Wrenn: I am not convinced from what I have heard this far. Mr. Gesell, are you empowered to speak for W. R. Grace or not?

Mr. Gesell: I think I can state our position without talking for W. R. Grace at this moment. It seems to us that there are two separate issues here: One, whether or not the contract can be considered in this proceeding.

Now, everyone has said, including Grace and Pan American, that the contract can be considered if the Board determines by reason of its relationship to the contract filed, that it must be treated as all one ball of wax. That is a different question from whether or not Grace and Pan American have agreed to be here at this proceeding.

They have both agreed that the contract be considered and I should think the question of whether Grace or Pan American Corporation appear here is a matter purely up to them.

They are not necessary parties in the sense that they are parties subject to the jurisdiction of the Board. They are not air carriers. They are not for the Board here in that sense and since they have agreed that the contract can be considered on the basis indicated in the letter they naturally would be bound by any letter which the Board issues in respect of the contract. Isn't that about where we stand?

Exam. Wrenn: I think so.

—9—

[fol. 3923] Any other parties have anything to say on this?

Mr. Schneider: I would like to ask Mr. Gesell whether Mr. Roig and Mr. Friendly are going to be limited in cross examination to their representation of Panagra and Pan American Airways, Inc., and whether questions can be directed to them in their capacity as representatives of Grace and Pan American Corporation?

Mr. Gesell: I think it is perfectly clear that questions can be directed to them in any capacity as long as the questions are concerned with relevant issues. Certainly Mr. Roig isn't going to refuse to answer questions as to W. R. Grace and Co. which are relevant to this case, nor Mr. Friendly as to Pan American Corporation.

Mr. Gambrell. Mr. Examiner, I wish to concur in the request made by the Department of Justice for the reasons given by Mr. Hickey and for other reasons, and throwing light on the applicability of the law, Section 408 and 412, to W. R. Grace and Company and Pan American Corporation, I wish to quote what someone I sometimes regard as good authority, and that is Mr. Friendly in his memorandum, November 16, 1942 in Docket 779, page 11 of the memo where he said:

"It is of course immaterial that Grace's 50 per cent stock ownership of Pan American-Grace antedated the Civil Aeronautics Act. An air carrier controlled by a surface carrier before enactment of the Act can stand on no better ground than the surface carrier itself. Yet that is the very case as to which the Board stated in the American Export decision that it would apply the

10

[fol. 3924] test laid down in Section 408(b).

"Moreover, as previously pointed out, the inevitable result of the extension of Pan American-Grace's certificate to the United States would be an increase in the control exercised by Grace. Actually since the enactment of the Civil Aeronautics Act, Grace has already increased the degree of control exercised by it over Pan American-Grace without obtaining the approval of the Board, and on a state of facts in which such approval could not have been granted under the terms of Section 408(b)."

I have some other quotes from the opposite side, but there it is made plain that Grace is to be treated as an air carrier in relation to 408, and if Grace hadn't been regarded as an air carrier under the law, it seems to me that point wouldn't have been made in the memorandum.

Certainly W. R. Grace and Company is subject to 408 as an air carrier, or something substantially an air carrier under the law.

Now just a very short three-line quote from W. R. Grace and Company in its memo of November 16, 1942 in Docket No. 7. I quote from page 4 of the memo of Grace:

"If Section 408 were relevant, it would be necessary to determine whether Grace is a person comprehended by Section 408(a). The terms of Section 408(a) do not include Grace, (although they do include Pan American) and we cannot follow the argument that the last proviso of Section 408(b) modifies the clear language of 408(a) so as to include Grace within its

—11—

[fol. 3925] terms."

There Grace is saying that this applies to Pan American Corporation, which I assume Mr. Gesell today would not deny in view of previous commitments of Grace in that connection.

Now, if Pan American Corporation says it applies to Grace and Grace says it applies to Pan American Corporation, in a proceeding which we might call ante litem motam, then I say that should have weight here.

Now, one other short quote from Public Counsel in its memo of the same date—in their memo of November 16, 1942, in the same case, page 7:

"Mr. Warner: It must be recognized, of course, that the present case goes beyond the actual statement of the Board in the American Export case. That case involved the entry of a new company into the field whereas W. R. Grace and Company now have negative control of an established air carrier and will continue to have it regardless of the outcome of this proceeding. That case involved an application for a new route whereas the present case involves the extension of an existing route. The former case also involved an application, whereas the present proceeding involves a proceeding instituted by the Board on its own motion."

Exam. Wrenn: You are quoting there?

Mr. Gambrell: Yes. I am st quoting:

"It is submitted, however, at none of these elements constitute a reason for distinguishing the two cases.

—12—

[fol. 3926] It remains true in both cases that unless the principles and tests of 408 are applied, it will be pos-

sible for a common carrier (or its parent) to obtain control over an airline operation which it did not previously control. Inasmuch as the Board has stated that it does not wish to approve any such acquisition without considering the tests of Section 408, these tests must be applied in the present case."

That is all the quoting I want to make just here but it seems plain to me that Pan American and Grace and Public Counsel have previously taken positions indicating that this hearing would be sadly incomplete as to facts

Exam. Wrenn: What hearing?

Mr. Gambrell: I mean the present hearing. —by a knowledge without having those people who were regarded as so essential in the previous hearing, and the both documents, A and B in this particular case.

Exam. Wrenn: Suppose the things you have been quoting and tossing back and forth at each other were true. What is the situation now? How does it bear on this case?

Mr. Gambrell: It seems to me they did not regard these holdings as within the purview of 408 and it seems to me they each have taken contrary positions previously.

Exam. Wrenn: Are you addressing yourself exclusively to the question of jurisdiction now?

Mr. Gambrell: It is hard to separate it all. It seems to me that if these parties are probably essential it is fairer to them and to all concerned that they should be in now rather than later at which time they might claim that they

—13—

[fol. 3927] have not had an opportunity to be confronted with evidence and to be bound by it.

Exam. Wrenn: On the strength of what I have heard here yet, speaking for myself I am unwilling to direct that these parties be brought in here when first they are contesting the jurisdiction and second they have said it has no bearing on it and have made a statement that if the Board determines it here they will consent to the jurisdiction.

Mr. Gambrell: Both of the parties and of the contracts, is that their position?

Exam. Wrenn: They speak for themselves. I don't put words in their mouth. I want to clear up your point.

Mr. Gesell: Our position is made clear in the letter of August 27, 1946 wherein Mr. Friendly and I spoke both for Pan American and Panagra and for Pan American Corporation and Grace, and in that stated that if the Board considered it had jurisdiction over this contract by reason of the relation of the Grace-Pan American Corporation contract to the one that has been filed no objection would be raised to the Board asserting that jurisdiction.

Mr. Gambrell: Could we go beyond that and inquire whether or not they would regard it as unseasonable making of them parties if it was felt that they ought to be parties, that this has been an injustice by waiting so long to bring them in.

I would like to know if they would make that point.

Mr. Gesell: I think it is perfectly clear from the letter that they have no basis for raising any objection to any order which the Board issues with respect to the contracts.

—14—

[fol. 3928] Mr. Gambrell: Or making them parties either,

Mr. Gesell: That is clear.

Mr. Hamilton: I thought I had stated that position before, Mr. Examiner.

Mr. Hickey: Mr. Examiner, the bases on which the Department of Justice intervened in this proceeding were alleged restraints of trade and competition.

Now, I didn't labor this discussion purposely this morning for the reason that I felt it was perfectly obvious that with such an issue of public interest involved in the proceeding, it was obvious to all that the parties who exercise control of Panagra would have to be parties to the proceeding since it is only through such parties that any restraints of competition if they exist could be exercised and it is on that basis principally that we urge that Pan American Corporation and Grace Lines be made parties to this proceeding.

Mr. Gesell: Certainly Mr. Hickey doesn't mean Grace Lines. He has twice referred to Grace Lines.

Mr. Hickey: Grace and Company.

Mr. Gesell: W. R. Grace and Co.

Exam. Wrenn: Let me ask this question: In view of what has been said about Mr. Friendly and Mr. Roig being

here to answer questions, will that take care of your situation?

Mr. Hickey: I do not think it will.

Exam. Wrenn: Who can you get down here if you have W. R. Grace and Company? What information do you want that isn't available now?

—15—

[fol. 3929] Mr. Hickey: Mr. Examiner, we feel that —

Exam. Wrenn: I am taking an undue amount of time to hear this but I want to get a full statement of the parties grounds here.

Mr. Hickey: Our full statement is that the parties who control this corporation, Panagra, necessarily are parties to this proceeding when the issue of restraint of competition is before the Board.

We have raised that issue by our petition for intervention, and that petition has been granted. We don't feel that the subsidiary corporation should bind the other corporation speaking at this hearing, even if it were conceded by petitioning parties that they could make certain statements regarding Grace and Company or Pan American Corporation.

Exam. Wrenn: I haven't heard from Public Counsel. Do you have any statement on it, Mr. Highsaw or not?

Mr. Highsaw: Mr. Examiner, as Mr. Gesell has said, there are two points involved here: one is the question of jurisdiction over the parties and the other is the question of jurisdiction over the contract.

With respect to the question of the Board's jurisdiction over the parties, Public Counsel wants to reserve the right to urge before the Board that the Board does have jurisdiction over the parties here, and that Grace is a carrier and that Pan American Corporation is an air carrier.

With respect to the contract that is involved, I believe that public counsel's position was pretty well summed up at the pre-hearing conference and in the letter of Septem-

—16—

[fol. 3930] ber 3, 1946, in answer to Pan American and Panagra's letter of August 27.

There is just one point that I would like to try to get clear now and that is this question: Pan American and

Panagra have said that if the Board wants to take jurisdiction over the contract they are willing for the contract to be before the Board. However, the Board has no authority to issue an order saying that Grace and Pan American Corporation are parties before the Board unless they have filed an application for this contract to be considered, and it is Public Counsel's understanding of the letter of Pan American, set out on August 27, that if the Board should decide to take jurisdiction over this contract, that Pan American and Panagra and Grace and Pan American Corporation will all be considered as having applied under Section 412 of the Act and any other section that is applicable thereto.

I would like to get it clear that that is their position now.

Mr. Gesell: It must sound to some ear, Mr. Examiner, as though we are dancing a lot of angels on a pinpoint but we are not. There are two distinct questions:

Grace and Pan American Corporation, as I understand it, have no desire that the Board not fully consider the Grace-Pan American Corporation contract, and all the implications which that contract in relation to the other contract involves.

On the other hand to say that Grace and Pan American Corporation should come in and say, just because Mr. Gambrell would like us to say so that they are air carriers

[fol. 3931] or that we are common carriers or that we are engaged in the phase of aeronautics, and we don't think we are, it seems to me to be putting the burden pretty heavy.

We have said that if the Board wishes to issue an order which involves that contract in any respect, it can, and naturally the parties will be affected by that Board and it will determine their relationship to this situation just as much as anything else but the idea of their coming in here as parties seems to us to be pretty beyond that, much beyond that, particularly when they have had notice of this hearing after all, officers of both companies are here, and I don't see why we have to labor time on the question of whether or not they are formal parties.

Exam. Wrenn: Does that answer your question, Mr. Highsaw?

Mr. Highsaw: No, it doesn't. I don't think that Mr. Gesell has yet stated what I understand to be the position stated in his letter of August 27 and as stated in my letter of September 3. There is some sort of twilight zone here or something where Grace and Pan American Corporation are.

If the Board takes jurisdiction over the contract it seems to me that the Pan American and Panagra and Grace and Corp. all have to agree that under those circumstances they will have applied to the Board.

Otherwise there is no way for that contract to get before the Board because under Section 412 of the Act you have to have an application by the air carrier, one air carrier that is involved, and a concurrence by all of the other air carrier parties thereto, so that I don't see how the contract

[fol. 3932] could get before the Board unless it would take the position that the Board, believing the contract is under the jurisdiction of the Board, that they would consider this application in this case to emanate from all the parties.

Exam. Wrenn: And if the contract couldn't get before the Board who would be damaged.

Mr. Highsaw: I believe it would be Pan American, Panagra, W. R. Grace and Pan American Corporation.

Exam. Wrenn: In other words, it couldn't be approved?

Mr. Highsaw: That is my present understanding.

Exam. Wrenn: Any further statement on that, Mr. Gesell?

Mr. Gesell: How would this be: if we stated that in that event we will have been deemed to have applied for purposes of this proceeding, because of the relationship of the contract to the contract filed, but that we are not waiving in any way our position that neither Grace nor Panagra Corporation are air carriers subject to the jurisdiction of the Act.

Exam. Wrenn: That is the way I understood your letter.

Mr. Gesell: I am trying to state it succinctly and I think that is what the letter says.

Mr. Schneider: The difficulty is: if at that time the Board says we have jurisdiction over the contract between Grace and Panagra Corporation obviously you can't pass

upon the contract unless the people who executed the contract are parties to a proceeding.

If the Board says you, at this time, become parties you have actually no record in which those parties participated.

—19—

[fol. 3933] You have no record on which to pass upon the contract. I don't see what the objection is on the part of counsel for Grace and Pan American Corporation to being considered as parties now. They have already stated Mr. Roig and Mr. Friendly are available to testify for the two companies.

It seems to me they ought to cover the procedural defect that may take place months from now.

I would like to get this case decided and not go to court.

Exam. Wrenn: Mr. Highsaw is Mr. Gesell's additional statement clear in answer to your question?

Mr. Highsaw: That is one view that can be taken of it, Mr. Examiner, but in the event that the Board should decide that Pan American Corporation and W. R. Grace are an air carrier and a carrier respectively, it does clear up the situation.

Exam. Wrenn: Very well. Insofar as the motion, as addressed to me is concerned, it will be overruled.

Mr. Hickey: Do we have leave to file this motion with the Board, Mr. Examiner?

Exam. Wrenn: If you so desire.

Mr. Hickey: We so desire.

Exam. Wrenn: Then you better act fast on it.

Are there any other matters to be cleared up?

Mr. Dick: Mr. Examiner, I would like to make a statement at this time on behalf of Colonial Airlines and retire from the proceeding.

Exam. Wrenn: All right, sir. Go ahead.

Mr. Dick: The Colonial Airlines intervened in this pro-

—20—

[fol. 3934] ceeding by reason of an interest which we thought no one else would protect, that interest arising from certain applications now pending before the Board, particularly on reconsideration by the Board of the decision in Docket 525.

Though the interest is real, it is to a certain extent contingent. I may say it is very much contingent. For that reason, we do not wish to participate in the proceeding and indulge the right of cross examination.

Also we are offering no evidence in the proceeding.

We do appear here, however, to protect our rights as intervenor, if that is necessary, to be allowed to file briefs, argue before the Board, and take any other part in the proceedings which we have a right to do.

We do not operate into Miami at this time. Pan American does not operate from Miami to interior domestic points. It seems to us that all exhibits and evidence offered to support any merged operations of Pan American's routes from Miami to points into the interior is irrelevant and immaterial, depending for its validity entirely on the supposition that Pan American's domestic routes case, hearing on which commences on October 30, will result in an award to Pan American of such domestic points as Washington, New York and Boston.

We would like to express at this time an objection to such evidence, but my understanding of the procedure is that if evidence is taken which is immaterial, the rights of the parties are protected without exception thereto.

Exam. Wrenn: That is right.

Mr. Dick: If, prior to the decision in this case, Colonial is awarded the Southern route to Balboa or to Barranquilla,

—21—

[fol. 3935] we reserve, insofar as we can reserve by this notice, the right to demand that the proceeding be reopened if necessary for introduction of evidence bearing on the adverse effect which approval of this agreement would have on Colonial's route.

May I further call attention to the fact that Colonial has been a pioneer in offering to enter into equipment exchange agreements, and particularly to Exhibit A in Docket 525 in which the President of Colonial offered of record to enter into equipment exchange agreements with other carriers where the same would be practical, particularly the carriers of South American countries at any point of entry on the North coast.

Exam. Wrenn: Thank you, Mr. Dick.

—22—

[fol. 3936] Mr. Gambrell: May I ask him a question?

Examiner Wrenn: All right.

Mr. Gambrell: Not to labor the point, but to be sure I know where we are now in the parliamentary situation, may I inquire whether we are considering only Exhibit A or Exhibit A and B filed?

As I understand, we are considering only Exhibit A filed in the case at this time.

Examiner Wrenn: In what case?

Mr. Gambrell: The instant case. The application shows two contracts; A and B.

Examiner Wrenn: Are you referring to the statement Mr. Dick made?

Mr. Gambrell: Not at all.

Examiner Wrenn: That was the reason for my question. I thought you were referring to Mr. Dick's statement.

Mr. Gambrell: Is it correct to understand that only Exhibit A, Contract A, is being offered for approval at this time?

Examiner Wrenn: I will let the applicant speak on that.

Mr. Gambrell: He can say "yes" or "no".

Mr. Gesell: I would prefer to say something a little more than that, Mr. Gambrell. My answer to that is: We are considering both contracts. We said that at the present hearing conference. We said it in the letter of August 27. Our position is absolutely clear, that the Board can go into all of the issues raised by both contracts to the extent it feels necessary to approve the contract filed.

Examiner Wrenn: Do you mean, Mr. Gambrell, whether

—23—

[fol. 3937] or not the Examiner will restrict you from asking questions on the contract as filed between Grace and Pan American Corporation? If so, no.

Mr. Gambrell: We will treat them both alike in dealing with them here.

Examiner Wrenn: I will permit you to cross examine and consider both of them before the witnesses if that is what you mean.

Mr. Gambrell: I want to know which one they want to approve. I want to know if they want contract B approved in this proceeding. I think that is a fair question.

Examiner Wrenn: Doesn't the application state for itself? I don't want to argue with you, Mr. Gambrell. I don't think that is the Examiner's business.

Mr. Gambrell: They can say "yes" or "no" whether they want Contract B approved.

Mr. Gesell: We want the contract B approved if it is necessary for the approval of the contract filed.

Mr. Gambrell: May I ask who are parties to this proceeding, parties applicant or offering contracts? I know that Pan American, Inc. is.

Is Pan-American-Grace Airways, Inc. a party to this proceeding, and I would like for Mr. Gesell, if the Examiner will permit, the answer on that.

Mr. Gesell: I can't.

Examiner Wrenn: Isn't that shown by the order?

Mr. Gesell: We filed a letter and asked to be made a party, and I assume we are a party.

Mr. Gambrell: That is an easy answer.

[fol. 3938] Mr. Gesell: The Examiner will have to answer the question.

Examiner Wrenn: For the purposes of this proceeding, the Examiner rules they are considered a party, if that will clear it up for you.

Mr. Gambrell: Is Pan American Airways Corporation now a party to this proceeding?

Mr. Hamilton: If the Examiner please, I will be glad to restate the position that has been stated several times before, that Pan American Airways Corporation's position in that respect is stated in the letter of August 27, 1946.

Mr. Gambrell: A great deal has been said since. You can just state whether or not Pan American Airways Corporation is a party or whether—

Examiner Wrenn: Do you mean whether or not W. R. Grace and Pan American Corporation are parties to this proceeding?

Mr. Gambrell: I was asking each one separately, yes, sir.

Examiner Wrenn: Is that what you mean?

Mr. Gambrell: Yes.

Examiner Wrenn: I think we have had that argued here before, that they aren't.

Mr. Gambrell: Is that Mr. Gesell's understanding, of W. R. Grace and Company, that they are not now parties?

Mr. Gesell: I understand that Grace is not a party, whatever good that is.

Examiner Wrenn: Haven't we gone just about far enough into this matter now?

Mr. Hickey: Not quite. In order that the record may be

—25—

[fol. 3939] perfectly clear, I would like to also make a motion that this hearing be suspended until the Board can make a ruling on my motion for making Pan American Corporation and W. R. Grace and Company parties to this proceeding.

Examiner Wrenn: The motion is overruled. Let's proceed. Mr. LaRoe?

Mr. Gambrell: Could I ask another question?

Examiner Wrenn: All right, Mr. Gambrell.

Mr. Gambrell: Are we to understand that counsel for the applicants and other counsel are agreed to the stipulation as to facts offered by Public Counsel?

Eastern is willing that that stipulation should be considered approved, and I would like to know if counsel for the applicants approve of that stipulation as to facts.

Examiner Wrenn: Mr. Highsaw, do you have anything to say about it?

Mr. Gambrell: Could I ask the counsel for the applicants whether they approve it or not?

Examiner Wrenn: I haven't seen the stipulation myself. I would like to know something further about it.

Mr. Highsaw: Mr. Examiner, I think it is important here to understand just what stipulation we are talking about.

Examiner Wrenn: I would think so.

Mr. Highsaw: In accordance with your instructions at the present hearing conference under date of September 5, I circulated a stipulation which contained nothing but the suggestions as to documents from Docket 779 that were to be included by stipulation, as they had been suggested to Public Counsel by the parties.

—26—

[fol. 3940] On September 27, Public Counsel circulated to all of the parties a second stipulation which included all of the material that was circulated in the first stipulation plus material which Public Counsel was including from Docket 525 and other material that ordinarily goes into stipulations in Board proceedings.

The Pan American and Panagra has informed Public Counsel that the inclusion of any documents from Docket 779 in the stipulation is not agreeable to those two parties.

They have also informed Public Counsel that the inclusion of some of the documents from Docket 525, which were circulated in the stipulation sent out on September 27, were not acceptable to those two parties.

They also made certain suggestions for additions to the stipulation. In accordance with those suggestions, Public Counsel has prepared a third stipulation which he has circulated to the attorneys here this morning, which includes all material that has been brought up in these various discussions, and excludes the material in Docket 779 and Docket 525 to which Pan American and Panagra would not agree.

Examiner Wrenn: I would like to request that counsel give consideration to this stipulation sometime during the morning.

Mr. Gambrell: May I note in passing, Mr. Examiner, that Eastern, on October 1, addressed a letter to Public Counsel suggesting further stipulation, and that we are willing to consolidate all that has been suggested by Public Counsel as a general stipulation?

• • • • • • •

—61—

[fol. 3941] Harold J. Roig, called as a witness, having been first duly sworn, examined and testified as follows:

Direct examination.

By Mr. Gesell:

Q. Mr. Roig, you have been President of Panagra since 1939, have you not?

A. Yes.

Q. And you are Vice Chairman of the Board of W. R. Grace and Co.?

A. Yes.

Q. Will you make a brief statement of the events leading to the signing of the contract which was before us in this proceeding from the date of the Board's decision in the Latin American route case?

A. The Board's decision in 525, the Latin American route case, was made public the latter part of May—I think May 24. It had a very direct and important impact on the problem which Panagra had been wrestling with for a number of years in that it not only authorized another American line, Braniff, to practically parallel our international route in South America, with the exception of Chile, but it also contained a very direct mandate that the owners of Panagra should take prompt steps to make it possible for Panagra to provide through service.

I immediately called a special meeting of the directors of Panagra to consider the proposal that Panagra apply to extend its route to the United States.

The meeting was called for within a few days after the

[fol. 3942] notice and I think within a week of the publication of the decision in 525.

Pan American requested a slight adjournment of the meeting in order to make it possible to bring the matter before a meeting of their board of directors which was—I think it was a regular meeting, it was scheduled to come along within the next week or ten days.

I agreed to that adjournment and during the interval, in order that our situation, and what I considered the very important implications of 525, might be fully presented to

Pan American

the directors of ~~Panagra~~, I arranged a series of meetings

i

between Mr. Grace, Mr. Garney and myself, with Mr. Trippe and Mr. Dean, and with the outside directors of Pan American who were available.

i

I don't mean by that that Mr. Grace, Mr. Garney and I were present at all of those interviews, but that between us we saw these gentlemen to whom I have referred.

Mr. Grace and I, as I recall, personally, saw Mr. Charles Francis Adams in Boston. We went there especially for the purpose. I saw Admiral McDonald. I think Mr. Garney and Mr. Grace saw Mr. Sherman Fairchild. They also discussed the matter with Mr. Trippe and Mr. Dean.

I have forgotten the others whom I saw, but we have pretty well covered those who were available at the time.

Partly perhaps as a result of that, but undoubtedly the matter presented it self to Pan American also as an important decision to make, the matter when it came before the Pan American Board of Directors, I am told, received very full and complete consideration.

—63—

[fol. 3943] Our directors meeting was held a day or two after the Pan American meeting. At that time Mr. Dean and Mr. Friendly reported that the matter had very full consideration by Pan American's Board, and that they had reached the conclusion that they could still not support an application by Panagra.

They accordingly voted against a resolution which was offered at that meeting, and voted for by the Grace directors that Panagra extend to the United States.

On the other hand, Mr. Dean and Mr. Friendly explained to the meeting that their directors had indicated a strong desire to work out this matter in some other form if it were possible, and they suggested that they felt that something in the way of an alternate arrangement which would still comply with the sense of the Board's mandate in 525, could be worked out.

The Grace directors were not inclined to accept that just at face value, although we were impressed by the general manner in which the thing was presented as an indication of a disposition on Pan American's part, we felt to go a great deal further than they had ever been willing to go before.

I stated at the meeting that while ordinarily in a case of this kind, one would accept an idea in principle and then work out the details; I felt that in view of the experience that we had had in that matter, that we would

have to reverse that usual order of procedure, and that we could not accept the proposal in principle until we saw what it looked like in detail.

Accordingly, Mr. Friendly and Mr. Gesell were delegated to endeavor to work out some sort of an implementation of Pan American's proposal, which would be satisfactory

—64—

[fol. 3944] to Panagra and which would be in compliance with the Board's mandate.

They spent the next two months in a really intensive effort to work out such agreements.

During that process of course Mr. Gesell was in contact with me and Mr. Friendly, I assume, with his clients, and there was no agreement in principle that we were going to execute anything—no such agreement on either side, until we were both satisfied.

As a result of the very arduous efforts that had been made by Mr. Friendly and Mr. Gesell, to effect the essential purposes which Panagra sought in this service—I will say there was no agreement until we saw what that actually looked like in black and white.

When that point was reached we held our Panagra meeting on the 30th of July and approved the contract and signed it.

Q. Did you state what the proposal of Pan American was at the meeting at which it was decided that Panagra would not file an application?

A. Do you mean the meeting when the resolution was offered and did not pass?

Q. Right.

A. Pan American's proposal at that time was that we endeavor to work out some plan. It was expressly stated that that plan was to be something totally different from the plan that we had discussed several years ago, and which I had found so unacceptable, but it was to be some plan which would make it possible in the first instance for the public to receive the benefit of through service, with one

—65—

[fol. 3945] plane and without change, to destination in the United States, as the primary objective, and along with that would take care of the various points in which Panagra

was interested, and which had been the subject of some previous discussion.

Now, that was very very far at that moment from being spelled out in any such detail as it appears in these contracts. It was just a general concept of what might be done.

Q. You referred to the important implications of Docket 525. What do you have in mind in that connection?

A. Well, several things. It seemed to us that the award of a certificate to Braniff immediately changed the whole picture so far as American aviation in South America was concerned, because it meant that the character of Panagra's position was going to be somewhat changed in that we were going to have a direct American competitor in addition to all the local and foreign competition which was growing very rapidly, and that time was a matter of the greatest importance in accomplishing our idea of, in some manner or form, reaching a United States terminal.

Grace had won an important victory in the circuit court of appeals which had been taken to the Supreme Court. That proceeding might have worked out a satisfactory result over a period of almost endless years, but 525, the injection of Braniff into the picture, meant that prompt action was necessary unless we were going to have a fruitless result.

Q. Will you state what the considerations were which led you as President of Panagra and the Grace directors of Panagra, to be willing to enter into this agreement, in lieu of continuing efforts to have Panagra come to the

—66—

[fol. 3946] United States on its own route?

A. Well, as I have just stated, the time factor was a very important consideration.

As I have also just stated, the fact that under this contract the public would have the benefit of through plane service was a dominant consideration, because that would put us in a position where we could compete with Braniff and the foreign competitors who were having through services to the United States and would enable us to offer the public at least as good a service as they could offer.

In addition to that, and from the, in a sense, Panagra angle, but also in a sense the public angle too, because a

great many of these things involved large questions of aviation economics, which I think have more than just party to party significance, but the contract gave us several advantages, some immediate and others prospective, which we would not have had on our own certificate, and which we had to weigh against any loss from not having our own certificate.

In the first place, we attached a great deal of importance to the maintenance and training provisions which this contract provides.

Under the contract there are provisions by which we can maintain our equipment with Pan American in the United States—that is, they maintain it for us,—and we can do our pilot training in the United States.

With DC-4 equipment and even with other equipment,—particularly with DC-4 and other four-engine equipment—that is a matter of very great importance in reducing the cost not only the capital cost but the day to day expense

—67—

[fol. 3947] account, and we believe improving the efficiency.

The item of training alone where we have to send boys down south before we know how they are going to pan out, and then bring them back—the expense of that was a very very important item.

In addition to the maintenance and training provisions there was a plan worked out under which we could avail ourselves of the Pan American sales organization in the United States and all over the United States, in a far more efficient manner than we ever had been able to before.

Ample provisions for Panagra publicity, the right to use the Panagra name, provision for special employees charged with the responsibility of furthering Panagra sales, and representation advertising provisions insuring a good ~~reputation~~ in the advertising.

Q. Did you feel that the agreement gave any greater assurance that Panagra's planes would be able to fly through to appropriate points in the United States?

A. Well, of course, that—I was coming to the points that were not immediately at hand.

The agreement contains provisions which enabled Panagra's planes to be operated by Pan American through to various points other than Miami in the United States if Pan American is awarded domestic routes, and we certainly felt that that was a facility to our traffic, of very great importance and the prospect of our securing it in this form was substantially greater than on our own.

Of course, also, implicit in some of the other points I have mentioned on the way by, there are provisions here

68

[fol. 3948] under which we felt that machinery was provided for disposal of such questions as had on some previous occasions led to misunderstandings and difficulty.

Q. Are you referring to provisions with respect to the powers of the President?

A. Yes, and I think not only the powers of the President but the general provisions about deadlocking, on all matters related to the contract and appropriate action related to seeing that Panagra is receiving what it is entitled to under the contract, the President without any voice of the Board is authorized to act, and that is a very important prerogative.

Q. You refer to savings under the heading of P and L in terms of maintenance and training. Was any consideration given to the effect of those provisions on the capital account?

A. Well, of course, if Panagra had gone through on our own certificate we would have had to provide all the capital necessary to provide the ground facilities, radio, and all that goes with setting up an air route which would have been a very substantial item.

It would even have included, I am afraid, shops because I think we would have had to provide shops to maintain four engine equipment in this country in any case.

Q. In discussing this matter you referred to the competitive situation and the need of speed in the face of competitive developments.

I wonder if you would turn to the exhibits, particularly Exhibit 4, and describe, perhaps illustrate, the nature of the competition which Panagra is now confronting or will

[fol. 3949] confront in the near future, with particular reference to the ability of the competitive carrier to operate a through flight between the United States and points on the West Coast of South America.

A. Well, of course, this exhibit speaks for itself as far as it goes.

I say as far as it goes, because it only shows the carriers who are presently in operation or authorized, but it doesn't show the ones that are just ready to be placed in that position, nor does it show all of the local competition.

It doesn't really emphasize the problem which confronts Panagra in maintaining an adequate traffic volume, and which I am afraid is not generally understood or appreciated.

The total population of all the cities served by Panagra in South America is about six million and a half, and of those three million and a half are in the single city of Buenos Aires.

There is no other city on our route with a population of a million and only two cities with a population of over 500,000.

Only three with a population of over a hundred thousand. The remaining 23 points which we serve have populations of under one hundred thousand and 20 of the 23 a population of under 50,000 each. To serve this total population of six million and a half Panagra must provide first class modern air service over a route 8800 miles long, as long or longer than the domestic routes of American, Eastern, United, or TWA.

Panagra must maintain its position over this long line through a thinly populated area in competition not only with another American Airline, Braniff, which has been

[fol. 3950] authorized to parallel practically our entire international route except in Chile but also in competition lines on with 9 South American and European ~~countries and~~ various sections of our route.

Virtually every important city served by Panagra already has local or foreign competition.

Thus in Colombia we have competition of Avianca with recently authorized extension to the United States.

Between Balboa and Peru, Ecuador and Colombia, with extension to the United States, we have TACA, which also provides local competition in Colombia, Ecuador and Peru.

Locally in addition to TACA we have Andosa in Ecuador and Faucett in Peru. In Bolivia we have LAB, in Chile, LAN, and between Chile and Argentine the British line already running, and LAN and FAMA just about to start.

All this competition exists today.

In near prospect we have in addition to Braniff a British line paralleling our whole international route with extension to New York.

Peruvian International Airlines and Tampa New Orleans and Tampico projected between Peru and New York.

FAMA the national Argentine Company paralleling our entire Argentine route and competing for Buenos Aires traffic with extensions to the United States at New York via the East Coast and Los Angeles via the West Coast.

On no airline in the United States serving anything remotely approaching a comparable population and comparable route mileage has competitive service been deemed justified.

Between Washington and Boston, for example, a distance

—71—

[fol. 3951] of less than 500 miles there is a population within easy reach of the airlines in the area of about 25 to 30 million.

Boston, New York, Philadelphia alone account for almost 18 million. Yet only one line, American Airlines, is authorized for unrestricted operation in this 500 mile sector.

A second line, Eastern, is restricted in its operation to Boston by the requirement it can only carry traffic to Boston on flights originating south of Richmond or West of Charleston, West Virginia.

A number of other lines enter the sector from other territory and carry traffic between some intermediate points. National between Philadelphia and New York, TWA between New York and Philadelphia, Penn Central between Baltimore and Washington, Northeast between

New York and Boston, and Colonial between Baltimore and Washington.

But only one line, American Airlines, is authorized for completely unrestricted service between these points, and a second line, Eastern, for restricted service.

On the basis of two American lines in Panagra's territory, there should be 8 to 10 lines with unrestricted operation between Washington and Boston.

Based on two American lines in Panagra's territory, plus eight foreign lines with extensions to the United States, all competing for through United States traffic between all or part of Panagras territory and the United States there should, absurd as it may seem, be 30 to 40 unrestricted lines between Washington and Boston.

That is the difference between the standards under which Panagra is working and the standards which are recognized

—72—

[fol. 3952] in this country.

By Mr. Gesell:

Q. I wonder if you could explain what effect that situation had on the need of Panagra operating the through flights as contemplated under this agreement?

A. Well, making any corrections or adjustments in these figures or in comparison, you please, the comparison can leave no doubt in any one's mind of the seriousness of the traffic problem confronting Panagra. It makes clear beyond any possibility of doubt two vital facts, first that Panagra must be put in position to obtain and develop its through traffic with the United States by through plane service as provided by these contracts.

With our local way to way traffic beset by constantly increasing competition from both local and international lines, our through United States traffic should not be imperiled by our being left in a position inferior to that of our American and foreign competitors.

In other words, we should be placed in position to at least compete on equal terms with our United States and foreign competitors for United States traffic by through plane service under these contracts.

The second implication, equally important, and a part of the same problem is that no other American Airline should be granted an extension to Balboa.

An extension of Eastern to Balboa, for example, would mean that it would make Balboa and not Miami the transfer point for Southbound South American traffic.

As the original carrier Eastern would have first contact

—73—

[fol. 3593] with this traffic, thereby being able in large measure to influence the routing of the traffic from Balboa South.

If it divided this routing equally between all of the lines including Panagra, as it might be expected to do in order to receive reciprocal consideration northbound, it would mean it would automatically divert a large amount of Panagra's United States traffic, present and potential between Balboa and Buenos Aires, even after Panagra is enabled to offer through plane service to the United States under these contracts.

Through sale of round trip tickets Eastern would also be in a position to control the routing on much of the northbound traffic to Panagra's loss. Local traffic between Balboa and Miami already thin by reason of the services already operating between these points, is particularly necessary to supplement load factors on Panagra's planes between these points, to offset the fact that a substantial amount of the traffic Panagra brings to Balboa, forks off at that point to Central America, New Orleans, Brownsville, and Los Angeles, and the same of course applies in reverse on traffic in the opposite direction.

In other words, extension of another American line to Balboa would seriously impair the benefits Panagra would derive from through plane service under those contracts by diverting to competitive lines a large part of the United States traffic between Balboa and Buenos Aires which should normally and properly move over Panagra's route and by diverting from Panagra's planes local traffic necessary to fill the places vacated at Balboa by Panagra traffic

—74—

[fol. 3594] originating south of Balboa, and transferring there to Central America and to middle and western United States destinations.

Q. It is contemplated under the agreement, is it not, Mr. Roig, that Panagra planes operated by PAA north of Balboa, will carry local traffic between Balboa and Miami as well as the through international traffic?

A. It is definitely so provided in the contract and it provides that they will be given the same treatment as Pan American's own planes. The whole thing is just our plane, our physical plane, ~~fits~~ fitted into their operation, that is all there is to it. It is their operation. They ~~have~~ have more of an interest in a sense than we have, because they are paying the expenses and benefiting from the receipts of the line.

Mr. Gesell: I think, Mr. Examiner, this would be a good place to adjourn. I don't think we will finish before the lunch hour. I have a number of specific questions concerning the contract which Public Counsel was anxious to straighten out. I think perhaps a breathing spell before that—

Exam. Wrenn: All right. We will adjourn until 2 o'clock p.m.

(Whereupon, at 12:30 o'clock p.m. the hearing was adjourned to 2 o'clock p.m. the same day.)

* * * * * * *

—76—

[fol. 3955] Q. Now, I would like to take up with you a number of specific contract provisions in question which were raised by public counsel, in order to clarify the agreement under various headings.

The first relates to provision 2 (e) of the contract which states that Panagra aircraft chartered to the PAA are not to be operated over any of PAA's routes other than those described above, except by mutual consent.

Public counsel has referred to that provision as a blank check provision, permitting Panagra and PAA to proceed over—to put this agreement in operation over any of PAA's routes on a regularly scheduled basis without approval of the Board.

A. I can see that possible question, but actually it was intended for just the opposite purpose. The intention was that Panagra should not be in a position to ask that our planes be used on any other route, and Pan American should not be in a position to, and there is no intention of their

~~there~~ being operated on any except the routes referred to in the contract.

Q. If any regular operation over any other routes is undertaken, and it is thought to make this agreement applicable, the approval of the Board would first be sought. Is that correct?

A. Oh, yes.

Q. Now, I want to direct your attention to paragraph 2 (b) and (c) of the agreement which contain various provisions for Panagra planes proceeding over routes of PAA under various circumstances, but those routes are not as

—77—

[fol. 3956] yet authorized by the Board.

Public counsel has asked—has raised the question as to the importance of those provisions in the agreement, and as to whether or not they should not be postponed for consideration until it appears whether or not Pan American is going to have the various routes.

Would you comment on that problem, please?

A. Well, of course, I think it is very important to the extent possible they should be covered in this proceeding, because they were an important inducement in the making of the contracts. They were an important element in the service, the public service which Panagra will be able to provide to its traffic if Pan American gets these routes.

Now, of course, the basic question, namely, whether there is any public convenience and necessity, which warrants the granting to Pan American of domestic routes, that is necessarily the subject of a separate proceeding.

But once that has been determined, why then whether it is contrary to the public interest for Pan American in performance of those services to use the physical aircraft of

~~at~~ Panagra, which carries with it the very great, although quite incidental, I should think, from the legal angle, bene-

fit, of being able to give the traffic on Panagra's route through service, without change.

That is a question which I should think could be covered by this proceeding, and by this contract.

Q. Were these provisions of significance in the working out of the agreement?

A. Oh, very definitely.

—78—

[fol. 3957] Q. The next question has to do with paragraph 8 of the contract which is the provision concerned with training.

Public counsel have raised the question as to whether detailed arrangements, worked out by the parties to implement that provision, will be submitted to the Board for prior approval.

A. Well, if there is any legal reason for it, or any consideration that makes it desirable, there is certainly no objection to filing it.

Q. With respect to paragraph 14 concerned with advertising and publicity, public counsel has inquired as to whether any arrangements made under that provision will involve the filing of contracts with the Board.

He apparently has in mind particularly the last sentence which says: "In this connection PAA and Panagra will work out from time to time appropriate programs for advertising the through service," and so forth, "and will establish the relative contributions to such advertising to be made by Panagra and PAA."

How did you contemplate that that would be handled, as a practical matter?

A. So far as the first part of that is concerned, the programs, I should think would be a routine business matter. It would not ordinarily come before the Board.

The question of division of expense is a matter in which the Board would be interested in connection with rate making in the mail rate determination, if for no other, and while that would be ordinarily worked out between the parties, I assume in the first instance it would automatically

—79—

[fol. 3958] come before the Board, the first rate case that comes afterwards.

And if the matter were handled in a matter not satisfactory to the Board, it would be readjusted in determining the rate.

Q. With respect to paragraph 17, concerning the financial provisions, public counsel has directed attention to the provisions for arbitrating any question that arises between the parties concerning payment to be made in pursuance of the contract, and inquired as to whether or not the decision of the arbitrator, should that be necessary, would be considered by the parties as binding upon the Board.

What is your comment on that?

A. I think the same comment I made on the other point would be applicable here. We don't assume in any way to usurp any jurisdiction of the Board in this contract. Matters of that character would be within their jurisdiction, obviously.

Q. Your answer, then, would be the same as to any agreement reached by arbitration under paragraph 13, concerning further agreements.

If the arbitrator decided what the terms to such agreement would be, the agreement would still have to be filed with the Board for its approval before it became effective.

A. You would know the answer to that as a legal matter better than I would. But I should think so.

Q. There was no thought there that the arbitrator could determine independently the Board's requirements what the agreement should be under paragraph 13?

A. No.

80

[fol. 39569] Q. Public counsel has raised the question, which seems to me is answered by the wording of the paragraph, and I will try to cover it, in connection with paragraph 18 as to whether or not Pan American is prohibited for a period of 99 years, under the agreement, from seeking any modification of its certificate.

A. That section applies to modifications which would affect their ability to carry out their obligations under this contract; not to anything else.

Q. In other words, they are otherwise free to change their certificate any way they wish.

A. Oh, certainly.

Q. Now, the question has also been raised concerning paragraph 21, by public counsel, as to what the effect of the provisions concerning the term of the agreement are in the event of a future disapproval of the contract by the Board.

I take it the question is: Do these provisions prevent the Board from subsequently disapproving the contract?

A. As I understand it, the contract is legally subject to the present and continuing approval of the Board. And if it is not approved now, or at any time later, the ~~Board~~ approval is withdrawn; the contract is finished.

Q. Public counsel also raised the question whether the cancellation of the 1939 Pan American-Grace agreement has in any way affected the continued performance by Pan American and Grace of managerial and administrative services for Panagra.

What is the situation as to that?

[fol. 3960] A. Well, those provisions of the 1939 agreement have been continued and will continue until the 1939 agreement is, by the approval of this contract, automatically come to an end.

Q. Is it contemplated that thereafter there will be any managerial agency services performed by the parent companies for Panagra?

A. Yes, on the basis to be arranged.

Q. Mr. Roig, when will Panagra be in a position to tender aircraft to Pan American for operation north of the Canal, assuming the agreement is approved?

A. The moment the Board approves it. We have the DC-4 aircraft now. We can put them into service at once.

Q. Are you prepared to do so?

A. Absolutely; anxious to.

Mr. Gesell: I guess those are all the questions I have.

Examiner Wrenn: Do you have any questions, Mr. Hamilton?

Mr. Hamilton: No, sir.

Examiner Wrenn: Mr. Schneider, you may cross-examine.

Cross examination.

By Mr. Schneider:

Q. Mr. Roig, I believe you stated that this agreement arises out of the Latin American decision. Is that correct?

A. I said the Latin American decision was the matter that brought that was the occasion to bring this thing for prompt determination.

Q. Prior to the decision of the Board in the Latin Amer-

[fol. 3961] ican case, you were not, were you, negotiating with Pan American with respect to any agreement such as this?

A. No. We were proceeding along the lines that you are familiar with.

Q. That is, the litigation now pending in the Supreme Court?

A. Yes. We had had a similar negotiation to this quite a number of years ago, back about 1941, or 1942, I think.

Q. But you were unable to arrive at a satisfactory solution.

A. That was the occasion when this so-called "interchange agreement" was submitted, which we did not find acceptable.

Q. You testified that after the Latin American decision, a meeting of the Board of Directors of Panagra was called which was subsequently adjourned at the request of Pan American directors, who later returned to the meeting of the Panagra Board and advised that Pan American could not go along with respect to the Panagra applying itself, as suggested in the Latin American decision.

A. That is right.

Q. What were the reasons for the Pan American's position?

A. There are several reasons. They felt and stated that they did not consider it in the interest of either Panagra or of Pan American. There were reasons under the former heading, the only ones that I was interested in, and they were that it would set up a violently and destructively

[fol. 3962] competitive situation in this area between Panagra and Pan American; that it would greatly weaken Panagra's ability to maintain itself in the face of the Braniff and foreign competition which was entering the picture; that it would require an extended investment in capital and operating expenses; it would require the setting up of a sales organization in the United States, and that it would in those ways and others generally deprive Panagra of the benefits which it had been originally contemplated, had always contemplated, should arise from the association of these two companies in certain respects.

Q. Those reasons break themselves down into two classifications, do they not, one set of reasons for the protection of Pan American and one set for the protection of Panagra?

A. Yes.

Q. Now, the reasons advanced for the protection of Pan American, were they any different from the reasons they have consistently advanced?

A. I don't recall any new argument.

Q. As far as the reasons assigned for the connection of Panagra, were those reasons any different from the ones previously advanced?

A. Well, they were necessarily different in the context in which they presented themselves.

Q. What I mean is, the reason they advanced for Panagra not applying its own name, were they not substantially the same reasons they had consistently advanced?

But

A. No. ~~Because~~ you cannot tear the reasons apart from

[fol. 3963] the context, and the context on this occasion included the machinery under which we could bring our traffic through to the United States, and the context also included the fact that a new American competitor had been authorized in this area.

A reason that may mean one thing today may mean a totally different thing under another situation tomorrow.

Q. You assigned as one of the reasons given by the Pan American directors for not permitting Panagra to apply,

that it would cost a lot of money for Panagra to extend itself to the United States, if successful.

A. Yes.

Q. That reason has been advanced many times by Pan American.

A. Not in this context. I am not going to agree that this is a mathematical thing that you can slice like baloney. The fact of the matter is that on that very point it was quite one thing to incur that expense when you did not have Braniff in the field and when you did not have any other way of getting to the United States.

That was a totally different thing than when you had Braniff in the field and you had machinery under which you could bring your traffic to the United States.

in

Now, literally, and the letters of the alphabet, it was the same, but the substance was entirely different.

Q. Did you agree with the reasons they assigned, the Panagra reasons? Did you think they had any validity?

A. I think that coupled with the alternative proposal, and with the change in the situation with Braniff in the

—85—

[fol. 3964] picture, and the rise in foreign competition, the had validity which they are in a different kind although you may say I did not think they had validity five years ago.

Q. But you wouldn't undertake to state today, would you, Mr. Roig, that you would prefer this kind of an arrangement to an arrangement which would permit Panagra to apply in its own name?

A. I would find very great difficulty in answering that question categorically because I went through that problem, that mental process, in great detail in deciding whether to come along with this contract.

Now, there are some provisions here that obviously— I mean, there are some advantages obviously in connection

certificate

with out own ~~contract~~. But there are also definite advan-

certificate

tages here which do not exist with our own ~~contract~~.

I

And if this— myself, back in 1941 and 1942, as I said a moment ago, proposed some form of a contract settlement

of this problem. And if—it is always very difficult to say what you might have done in the past, but to the best of my lights
~~likes~~ today, if we could have worked out anything like this at that time, I would have accepted it.

Q. Eliminating the time factor, that is, the length of time it might take to decide the pending litigation in the Supreme Court, the filing of an application before the Board, and satisfactory disposition, wouldn't you—I am asking you now as a representative of W. R. Grace—prefer to have Panagra instead of ing extended to the United States, ~~and so named~~, enter into this 99-year contract?

A. *I can't answer* that yes or no. All I can say is that

[fol. 3965] I weighed, and we all weighed all of the considerations on one side, and the other, and we decided on this course in preference to the other.

Q. Well, is it fair for me to say that you agreed to accept this as the next best substitute to that?

A. No. I wouldn't even agree to that. You can characterize it that way if you like, but it is—it was more than a substitute, because it had provisions in this that we would not have had under our own setup.

Q. Now, in your direct testimony you spent some time pointing out the competition to which Panagra is subjected in Latin America.

Isn't it a fact that all of this competition, except for the Braniff competition, existed before the Latin American decision?

A. No. That definitely is not the fact.

Q. How much new competition has come along since the Latin American decision?

A. I don't recall the exact dates when the Avianca and Taca, U. S. extensions were authorized. I don't recall the dates when Taca extended its operations to all points on the route. Some were before, and some after.

I do know that the British service between Santiago and Buenos Aires has just begun within the last few days. I line know that the FAMA, the Argentine ~~thing~~, which is a very

serious competitor, that that is just taking shape in these days. It was in a quite confused state in the spring. I could, perhaps, if you like, go through all of them.

Q. No.

—87—

[fol. 3966] A. That is a sample.

Q. Do you think that Panagra, W. R. Grace interests in Panagra, would have entered into this agreement with Pan American Airways, had Braniff Airways not been extended into South America over the Latin American routes in the Latin American decision?

Mr. Gesell: Isn't that an "iffy" question? I don't object to questions about the alternative difference between this and the route because I felt that the Board would be interested in that.

But the question of what they would have done if something had happened, or not happened, and trying to slice this so thin, taking so many different alternatives, which are not the facts, purely suppositions. The fact is they had been authorized to get the route.

Mr. Schneider: In answer to Mr. Gesell, I am saying it arises directly out of direct testimony which, as I recall, is that the Latin American decision which put Braniff Airways over Panagra's routes in Latin America, brought these two parties together.

Now, what I want to know is would they have been forced together a a result of this FAMA business, BOAC, and so

for forth, or is it all because of Braniff?

Examiner Wrenn: Let the witness answer. Go ahead, Mr. Roig.

The Witness: I think considerable light on that question exists in the fact I mentioned a moment ago, in another question, that as long as in the early '40's, we were trying to work out some sort of a contract settlement of this

—88—

[fol. 3967] problem, and my feelings so far as I can recall it, with accuracy, is that had we been able to make this contract then, we would have taken it, and Braniff at that

time was not, as far as I know, even considering South American routes.

By Mr. Schneider:

Q. What I am getting at, Mr. Roig, is that, when all of us know, from previous records that you made many times to work out some arrangements something like this, but you were unsuccessful and it was not until the Latin American decision extending Braniff into South America?

Now, was it because Braniff went to South America that show the two parties got together, or was it because of other things?

A. I think, as I said, the fact that Braniff got the route, and the fact that the Board had, in their opinion, virtually mandated Panagra to clear up the situation, combined to bring the thing to a head.

Q. Do you construe this agreement as meeting the desire of the Board, expressed in the Latin American case?

A. I do in substance, yes.

Q. Now, you referred several times to negotiations for an interchange of agreement with Pan American in years past. May I ask why this agreement is not a simple interchange agreement rather than a complicated character with many other rights beyond a simple interchange agreement?

A. You mean in comparison with the agreement we considered on the previous occasion?

Why

Q. ~~What~~ wasn't a simple interchange agreement entered

[fol. 3968] into? Wouldn't that have solved this through service problem?

A. No, it would not, because a simple interchange agreement in the first place involves, as I understand it, involves reciprocal mileage. We would have operated our planes, or they would have been operated a thousand miles,

to Miami

let us say, 1200 miles over Pan American's route ~~to Lima~~, and Pan American planes would have been operated an equal distance, let us say, to Lima, over our route.

We never liked that kind of a setup, or thought it was a sound kind of a setup.

This contains no—this lacks the essentials, as I understand it, of what is usually called "interchange agreement" in that respect. It is not an interchange agreement.

Q. The reciprocal point that you bring out merely arises from the desires of particular parties. There is nothing inherent in the interchange that calls for each party operating only the same mileage.

A. Unless I have forgotten my Latin, it is inherent in the word itself.

Q. Is there anything to prevent, by agreement, Pan American planes being flown by Panagra south of the Canal Zone over Panagra's entire system, and Panagra's planes being flown by Pan American north of the Canal Zone on their system?

A. There is absolutely nothing in the agreement on the subject, but it would be contrary, so far as I am concerned; to the position I have taken in the last ten years, and it would never be done except over my dead body.

—90—

[fol. 3969] Q. But that would provide through service.

A. But it would not provide the kind of through service we are talking about, and moreover, a simple interchange agreement would not have contained any of these other provisions on which have no relation to that thing, no matter what you call it.

Q. You are talking about pilot training maintenance and so forth. They could be covered by other arrangements.

A. They could be, if the parties would agree.

Q. That is right, certainly.

A. But I have no reason to believe that Pan American would agree to those things, with respect to parts of total agreements, any more than we would agree to those things except as parts of total agreements.

Q. Would you refer to paragraph 1 of the agreement, Exhibit A? I see no reference in paragraph 2 (b) to Houston. Is that deliberate, the omission of Houston?

A. Well, I should say it was.

Q. And you do not include Houston, do you, in the description of points on the east coast of the United States?

A. No.

Mr. Gesell: You don't include Houston on the east coast of the United States?

Mr. Schneider: Paragraph 2 (b) has the clause: "Any other points on the east coast of the United States," and I asked him if he contemplates Houston as falling within that definition.

The Witness: No, I contemplate points from Florida north; not the Gulf.

—91—

[fol. 3970] By Mr. Schneider:

Q. You said this paragraph 2 was an important inducement to you to enter into the contract. Is that correct?

A. That is correct.

Q. How would you feel about this contract if Pan American were unsuccessful in its domestic route case?

A. Well, I would feel that we had lost an important inducement, but not one which we made a basis of determination if they did fail.

Q. Well, if Pan American is not successful in its domestic route case being extended north of Miami to New York, and this contract were in existence, you still would not have through plane service to the West Coast from South American to New York, would you?

A. No, but we would to the United States. Miami is a port of entry, after all.

Q. You mean it all links on terminating on a point in the United States, or does it hinge upon the number of connections that ar .nvolved?

Mr. Gesell: What hinges? I don't understand that question.

Mr. Schneider: The import of this contract. I will put it another way.

Is the important thing from your standpoint about this agreement the fact that you can get access to a point in the continental limits of the United States, or that it provides the least number of connections in service between South America and the United States?

The Witness: The basic point is that we get to a base

—92—

[fol. 3971] in the United States.

Now, the secondary point is that the more we can fan out in the United States, obviously the better. But getting to the United States in itself is the first thing.

By Mr. Schneider:

Q. Now, throughout this agreement I see the phrase: "operated by Pan American," or "Pan American operations," and yet I notice throughout that they are to be Panagra's planes flown by Panagra crews, and manned by Panagra cabin attendents.

What do you mean by "operated by Pan American," except, perhaps, that it flies over Pan American certificated routes?

A. Well, and for their account, which is a very important thing. After all, it is the difference between, you might say, a time charter, or bare boat charter, to use a steamship comparison, or the lease of an apartment house with janitor service, or without it.

There are many situations where you can lease a unit with certain human operating facilities that go with it.

can

You lease a farm that way.

Q. But in the normal sense of the word as we use it in this business, Pan American will do no operating of the aircraft.

A. Oh, they do all the operating of the aircraft as a commercial unit. The engineer on the locomotive doesn't operate the train. He gets his instructions from the people who are operating the line.

Panagra

Q. I take it then that the ~~Pan American~~ pilots flying

—93—

[fol. 3972] Panagra ships north of the Canal Zone are subject to the direction by Pan American.

A. Certainly.

Q. Panagra pilots?

Mr. Gesell: The contract so provides, expressly.

The Witness: Yes.

By Mr. Schneider:

Q. Now, turn to paragraph 10 (b). I notice in the last few lines of paragraph 10 (b) the words "Panagra shall cooperate with Pan American." I notice no agreement on the part of Pan American to cooperate with Panagra.

Is that because of the previous history of the cooperation with Pan American?

A. No, it is not. That is not ~~the reason of a~~ a reasonable question based on the statement of the contract, either.

Q. Why does it read that Panagra shall cooperate with Pan American—

A. Read the whole paragraph.

Q. Let me ask the question, please.

Why is it that if Pan American fails to do something, Panagra agrees to cooperate to straighten it out? Why doesn't Pan American agree to straighten it out?

A. I think in most cases they do. I want to read this paragraph a moment.

Well, it would seem to me, it may not be too aptly worded, but it would seem to me that the import of that language was that Pan American would establish adequate disciplinary machinery for preventing any further conduct of the type indicated, and that Panagra would cooperate

—94—

[fol. 3973] in the form of suggestions to what that might be, or going along with what might be worked out.

Q. It is the only last thing that is spelled out, that Panagra would cooperate.

A. No, the last thing spelled out is the "establishment by the latter," which is Pan American, "of adequate disciplinary machinery."

Q. Is there any agreement there on the part of Pan American to either cooperate, or to establish adequate disciplinary machinery? Is there anything more in 10 (b) than an agreement on the part of Panagra to cooperate in helping Pan American establish disciplinary procedures?

A. Well, you can—the words are there. You can argue one way or another. It is perfectly true, however, that in other provisions of the contract there are general provisions that on this whole question of the kind of sales service which Pan American gives to Panagra, if Panagra is not satisfied with it, there are very adequate provisions under which they can make their desires felt, resulting finally in arbitration and ultimately, if it does not come

sales agency

through, in termination of the ~~contract~~.

So, I would not consider any quibble over that language of any significance.

Q. We have a 1939 agreement before us now, Exhibit 29, and that had in paragraph 4 thereof quite detailed provisions to resolve disputes between the two parties, ending up in arbitration.

Now, was arbitration ever used on the 1939 agreement to settle your difficulties?

—95—

[fol. 3974] A. No.

Q. Do you contemplate that it would be used under this agreement if you had differences?

A. Yes.

Q. Why?

A. Well, because the differences which are—for which arbitration is provided under this agreement are, I think, pretty generally—there might be one or two exceptions arbitration of matters of administration, matters of operations, matters of sales administration, matters which are pretty readily susceptible of arbitration.

The only question that ever arose here where there was any question about arbitration—

Mr. Gesell: When you say "here"—

The Witness: Under the 1939 agreement—was a question of quite a different character, which we did not think was a proper subject of arbitration under that contract, there was a difference of opinion on it.

But we did not think it was intended to be included in this arbitration clause, and it certainly was a question of doubt how you are going to arbitrate, because it in-

volved all kinds of questions of policy of extending an air line.

By Mr. Schneider:

Q. Now, turn to paragraph 13, please.

With which party did this provision originate? Grace? Pan American?

Mr. Gesell: Which part of 13 are you talking about, Mr. Schneider, please?

Mr. Schneider: 13 (a). Sorry.

—96—

[fol. 3975] The Witness: What was the question?

(Question was read by the reporter.)

The Witness: I think it originated with Grace. It has been discussed at various times over a good many years, but in connection with this particular contract, I think we brought it up.

By Mr. Schneider:

Q. Assuming this agreement is approved, why wouldn't you be willing to compete with Pan American for traffic from the United States to Buenos Aires on an open competitive basis?

The Witness: Will you read the question?

(Question was read by the reporter.)

The Witness: Why wouldn't we be willing?

By Mr. Schneider:

Q. Yes.

A. Well, obviously from Balboa north, the approval of this agreement would make any competition impossible. From Balboa south and for the Buenos Aires traffic, and I suppose your question is related to the pool, we would certainly spare no effort to get all the traffic that we possibly could on our planes.

Pooling agreement, contrary to what is sometimes thought, do not have by any means a complete strangling effect on competition.

Q. Do you mean, Mr. Roig, that if this agreement is approved, that you would be—

Mr. Gesell: What agreement?

Mr. Schneider: Exhibit A.

97.

[fol. 3976] Mr. Gesell: We have two agreements. I am not trying to interrupt. I thought Mr. Roig thought you were talking about the pooling agreement, and you were talking about the other.

Mr. Schneider: Yes. An agreement is an agreement.

By Mr. Schneider:

Q. If the agreement in Exhibit A is approved, do I understand your testimony to be that you would then be at a competitive disadvantage with Pan American for traffic between the United States and Buenos Aires, and that that competitive disadvantage could only be cured by entering into the agreement contemplated in 13 (a)?

A. No. That would not be the purpose of the agreement on 13 (a).

Mr. Schneider: Off the record.

(Discussion off the record.)

Mr. Schneider: I would like to have the last answer read.

(Answer was read by the reporter.)

By Mr. Schneider:

Q. You say the approval of this agreement, Exhibit A, would make competition impossible between Ralboa and the United States.

A. No.

Q. Were you talking about Exhibit A when you answered that question?

A. Yes. That was Exhibit A.

Mr. Schneider: I am not talking about competition between Balboa and the United States. I am talking about

98

[fol. 3977] competition in traffic between Buenos Aires and the United States.

The Witness: I thought you were talking about my answer, which expressly was limited from Balboa to Miami. I was taking it in sectors.

By Mr. Schneider:

Q. All of 13 (a) relates to the United States to Buenos Aires traffic.

A. Yes.

Q. It is not broken down. So we are only talking about traffic from the United States to Buenos Aires.

A. Yes.

Q. Now, to what extent will the approval of Exhibit A, the overall agreement, improve your competitive situation; that is, the Pan American for traffic between the United States and Buenos Aires?

A. I think the approval of Exhibit A would put us in an equality with Pan American on traffic between the United States and Buenos Aires with the exception that while Pan American is coming to New York, and we are in Miami, Pan American will have some definite advantages—

Q. We will then—

A. —which will not be obviated unless and until we can—

Q. The competitive advantage being that they are first in New York.

A. Yes.

Q. Is there any competitive advantage in the mileage basis, they being in New York?

[fol. 3978] A. No. I think that would be in our favor, probably.

Q. Well, then, whereas they have the New York entry on their side, you have the mileage perhaps on your side; is that correct?

A. But not a great amount of mileage.

Q. Why aren't you willing to compete with Pan American on an even basis for all traffic from the United States to Buenos Aires?

A. I would rather compete with Braniff, and some of these outsiders.

Q. Why?

A. Because we have to maintain our position, and we can cooperate with somebody. When you have about ten other competitors on your back, you certainly improve your position to someone, and the fellow you can cooperate with the best is the fellow who can give you the most in the way of reciprocal facilities.

Q. I still don't understand why you have to add 13 (a) —superimpose an agreement pursuant to 13 (a) on top of this agreement, to protect yourself competitively with Pan American, for Buenos Aires traffic.

A. I don't know that we have to do it. We haven't yet done it, and if we do, the agreement has to come before the Board for approval, and I suppose all of those points will be relevant at that time.

Q. That leads to my next question.

Is an agreement under Section 13 (a) a "must" under Exhibit A? I mean, is it the heart of Exhibit A?

A. Well, it can't be the heart of it, because all it says is

—100—

[fol. 3979] that they will negotiate with the objective of entering into an agreement. There is no—

Q. And if they don't agree, they don't agree.

A. If they don't agree, they don't agree. Or if they do agree and the Board doesn't approve, it doesn't count.

Q. Now, under paragraph 17 (c), page 15—17 (c) on page 15. Do you have it?

A. I have it.

Mr. Gesell: That is an accounting question, Mr. Schneider. I don't want to suggest that you not question Mr. Roig. We will have accounting witnesses here for details of that sort.

Mr. Schneider: That is all right. I will withdraw any questions I have. I would rather have an accountant answer it.

I have no further questions.

Examiner Wrenn: Mr. Gambrell? Mr. Gambrell, you may examine the witness.

By Mr. Gambrell:

Q. Let us look at the beginning of the petition, if you have it.

A. I have it.

Q. Paragraph 3. You say: "A substantial amount of the business between the continental United States and Canal Zone originates at or is destined to points on Panagra's routes in South America.

Do you know, off hand, what percentage it is, dollar-wise?

A. I think the exhibits show that, and I think it is about

—101—

[fol. 3980] 51 per cent, isn't it?

Mr. Gesell: Exhibit 7 covers that, Mr. Gambrell.

By Mr. Gambrell:

Q. Paragraph 4, you speak of various foreign flag and other American flag carriers that are about to begin operations between continental United States and countries in South America where Panagra is certificated.

You use the plural on "American flag carriers." Will you tell what American flag carriers are being certificated in what we may call Panagra territory, or have been?

A. Well, Braniff, of course, is definitely.

Q. What other?

A. The other American lines which have been certificated to South America are not physically in Panagra's territory, but some of them may come to points which would have a bearing on Panagra business.

Q. Are you willing to modify that language and say that there is one carrier, one American flag carrier, only, and that is Braniff, that is threatening to operate in your territory?

Mr. Gesell: You asked a moment ago—

The Witness: Eastern is anxious to go to Balboa.

By Mr. Gambrell:

Q. Eastern is anxious to go to Balboa? I move that that question be stricken. There is no application of Eastern pending.

Examiner Wrenn: You move that the question be stricken. All right, I will strike the question.

Mr. Gambrell: I said the answer.

—102—

[fol. 3981] Examiner Wrenn: I understood you to say the question.

Mr. Gambrell: I move that the answer be stricken because he has no authority to make any such statement as that.

Mr. Gesell: We are glad to hear that the application is withdrawn.

The Witness: The application ~~was~~ must have been withdrawn very recently.

Mr. Gambrell: I asked a simple question, Mr. Examiner. We can make time if we can get a simple answer out of this, without wisecracking.

Examiner Wrenn: The answer may stand. Proceed.

Mr. Gambrell: Does the Examiner overrule my objection to Mr. Roig's answering that Eastern has tried to get Balboa?

Examiner Wrenn: I understood you to move that the answer be stricken, and I overruled the objection, Mr. Gambrell.

By Mr. Gambrell:

Q. Do you know of any company that is at this time about to begin operations in the Panagra territory outside of Braniff Airlines; any American flag company?

The Witness: Will you repeat the question?

(The question was read by the reporter.)

The Witness: Well, I am not sure that I quite understand the question, Mr. Gambrell, because that is not what we were talking about in "4". That is, not what "4" says. "4" says between the continental United States and countries of South America," which Panagra serves.

Now, that is a different thing from operation within the

—103—

[fol. 3982] territory which Panagra serves.

By Mr. Gambrell:

Q. Well, I am asking you if you know of any besides Braniff that is about to begin operations in the territory that you directly serve.

A. If by "in" you mean between two points on our route, the answer is no. I do not.

Q. Do you know of any American flag carrier at all which is about to begin operations between the eastern half of the United States, that is, east of the Mississippi, and the Braniff—the Panagra territory?

Examiner Wrenn: Isn't that a repetition of the previous question, Mr. Gambrell?

Mr. Gambrell: No, sir.

Mr. Gesell: I suppose he wants us to say that Braniff isn't applying for a route to New York, yet.

Mr. Gambrell: I think the witness is capable.

Examiner Wrenn: You may answer the question, Mr. Roig.

The Witness: Well, the only certificated route to Balboa, up to now, is, I think, the Braniff route.

By Mr. Gambrell:

Q. I asked a simple question.

The Witness: Just read the question.

Examiner Wrenn: I would like to know what the argument is.

The Witness: I am asked to recall from memory a very complicated situation. I have to feel my way a little bit.

Mr. Gambrell: Certain statements are made here. I want to narrow the presentation of them.

—104—

[fol. 3983] Examiner Wrenn: The point I have to make is you have to have the Board's decision to say whether they are or not.

Mr. Gambrell: We have to lay some premises, Mr. Examiner, to ask some other questions.

Examiner Wrenn: Go ahead.

The Witness: What is the question?

By Mr. Gambrell:

Q. Do you know of any other flag carrier that is about to commence operations between the eastern half of the United States, that is, east of the Mississippi, and Balboa, or points south on Panagra's route, American flag carrier?

A. I would consider the hookup between National and Braniff such an application.

Q. One company, I say; any single company going through. Do you know of any such carrier?

A. Braniff.

Q. That is west of the Mississippi.

A. Yes.

Q. I am asking east of the Mississippi.

A. Except through the National connection, no.

Q. Do you agree with the Board's statement in Docket 779 in its original order to the effect that the bulk of the traffic in relation to the Panagra territory originates or is destined to that portion of the United States east of the Mississippi?

A. Yes.

Q. If that be so, is it your contention in this proceeding that Panagra and Pan American need some strengthening in order to compete with the presently authorized service

[fol. 3984] between this country and Latin America?

A. I think Panagra does, very definitely. I am not speaking for Pan American.

Q. You feel that the Braniff authorization which is the only direct authorization into your territory, and which swings west to Texas and points north, is a serious menace to your system: Is that right?

Mr. Gesell: Mr. Examiner, it isn't the only authorization. Mr. Gambrell has jumped from pinning Mr. Roig down about U. S. carriers to saying now it is the only authorization. He knows it is not the only authorization. There are other authorizations which are foreign authorizations, and I don't like that kind of tricky question.

By Mr. Gambrell:

Q. The only American flag authorization. You spoke a while ago that Braniff coming in had changed the picture very seriously.

A. Yes.

Q. I would like for you to analyze the economic seriousness of Braniff's threat on your system, considering how it is carrying into the United States west of the Mississippi.

A. I refuse to look at it in that narrow way. I look at it in conjunction with the hookup with National.

Q. Is it your thought that it is easier for National to make a hookup in Havana than it is for you and Pan American to make a hookup in Balboa?

A. It is easier?

Q. Yes.

—106—

{fol. 3985} Is it an easier thing to accomplish, hookup between National and Braniff in Havana than it is between Pan American and Panagra in Balboa?

A. Well, of course the Pan American hookup in Balboa up to now is only to Miami.

Q. Is there anything—

A. There are certain difficulties. Of course they both have involved the difficulty of a connecting service. No question about that.

Q. Is there anything inherently different between the two transfers that we are speaking of now, as far as facility is concerned?

A. I should say that Havana was an easier place for a hookup than Balboa for a great many reasons. In the first place, Balboa is in the Canal Zone, and in recent times, during the war, it has had very many complications connected with the transfer at Balboa.

Also, it is further from destination. By "destination" I mean the United States, and that presents some difficulties.

I think the hotel problem is easier, much easier than it is in Balboa. I haven't considered the thing.

Q. Would you say that a transfer between American carriers can be better handled in a foreign country than

it would be between American carriers in an American territory like the Canal Zone?

A. No, I don't say that. Whether it is foreign, or domestic presents another series of questions.

Q. You were speaking a while ago about not having any

—107—

[fol. 3986] Pan American service north of Florida, as perhaps a factor in the economic situation.

I show you a press release of Pan American Airways, dated June 27, 1946, regarding the New York-San Juan service starting July 1, 1946.

I call your attention to the second paragraph as well as the others, reading as follows:

> "Connecting at San Juan with established Pan American routes to all parts of Latin America. The link will afford direct air service from New York to all the 37 countries and Colonies of South and Central America and the West Indies served by Pan American's 50,000 mile network of Latin American trade routes."

You can look at it all, if you like.

Do you accept the representation of that press release that Pan American now does have direct air service from New York to San Juan to all the 37 countries and Colonies of South and Central America and the West Indies, served by Pan American's 50,000 mile network?

A. Well, they do in the sense it is described here, with a connection at San Juan.

Q. It says: "Direct air service from New York to all 37."

A. That means direct carrier.

Q. It says direct service from New York to all of them.

A. It is direct carrier. It is the same carrier.

Q. Wouldn't that mean direct service—

A. I don't know. I didn't write it.

Q. —all the way from New York to Panama and the

—108—

[fol. 3987] west coast of South America?

A. I don't know what it was intended to mean. It speaks for itself. It is the English language.

Q. Are you familiar with the nonstop procedures that have been adopted by Pan American in the last two or three months in relation to Puerto Rico and other Caribbean points?

A. I am not familiar with it.

Q. How did you happen upon the 99-year term as a proper term on this contract?

A. Well, there was no magic in it. It is a figure that is sometimes used to ~~men~~ mean a long term, virtually perpetual contract.

Q. In other words, that may well be regarded as a permanent arrangement between Pan American and its subsidiary, and by the two holding companies. Is that right?

A. That is correct. Subject to any subsequent action by the Board.

Q. Is it your thought that if the Board approves this the Board is not bound by any approval?

A. Oh, no. I consider the Board bound by their approval, but I also consider that under various sections of the Act the Board can always move into these situations anew in the light of new circumstances and new facts.

Q. If there are no new facts, would you consider that the Board if it had approved this would bind itself for the 99 years?

A. Well, I don't understand the use of the word "bind" as related to a Governmental agency which is not entering into a contract. It is not bound in that sense. It is not bound in the sense that the parties are bound.

--109

[fol. 3988]

Q. If no new fact enters into a situation, would you—is it your thought that the Board should not be in position, say a year from now, to revoke its approval?

A. I don't know what the law on that is, Mr. Gambrell. Whatever it is, that is what the power of the Board will be.

Examiner Wrenn: How do your questions tie up with Section 412 (b), Mr. Gambrell?

By Mr. Gambrell:

Q. On top of page 2 of the application that is, paragraph 6, you speak of—

Mr. Gesell: I would like to have an answer to the Examiner's question. Didn't you ask a question? I was interested in the same question.

Mr. Gambrell: Pardon me. I did not hear the question. I beg your pardon.

Examiner Wrenn: I assume it will be developed on brief. Go ahead.

By Mr. Gambrell:

Q. Looking at paragraph 6 of the application, which speaks of long term arrangement through plane service between points on Panagra's system and points on Pan American's routes in the United States, I would like to ask if it is your position that Panagra's United States routes are peculiarly—

Mr. Gesell: Are what?

By Mr. Gambrell:

Q. —are peculiarly appropriate for interchange, or char-

—110—

[fol. 3989] ter arrangements as distinguished from the routes of other U. S. carriers in relation to this country.

I meant Pan American's route, Pan American's domestic—Pan American's United States' routes.

Maybe I should ask it over.

Do you regard Pan American's United States certificates as peculiarly suited to Panagra interline arrangements; that is, interchange of equipment, as distinguished from other routes of other carriers?

A. Well, as related to this particular kind of contract, which you call interchange—I don't call it that—I would say yes, because at the present time Pan American is the only route certified between Balboa and Miami.

Braniff is certified for a different route and we could hardly be expected to make such agreement with Braniff

anyhow in view of the fact that they are out competitor on every inch of the international route.

Q. Do you regard Pan American in South America as a competitor of Panagra?

A. In a certain very definite sense, yes, but in other senses, like Braniff, no. I mean, they are not competing with us for every point along our route the way Braniff is. The competition is from Buenos Aires.

Q. If some other U. S. flag carrier should be certificated south from Florida to the Canal Zone, would you regard the possibility of Eastern or National asyñudeal with Pan American for such an interchange arrangement as you have?

A. I think I would cross that bridge when I came to it. It depends on a great many things. There are a great

—111—

[fol. 3990] many things that Eastern or National would be—would not be in a position to provide that are provided by this contract.

Q. Is it your thought that Panagra, being a subsidiary of the Pan American system, is a reason in favor of interchange, or is it one objection to interchange?

A. Pan American Grace is not a subsidiary of Pan American. It is an affiliated company. It is not a subsidiary.

Q. You mean the 50 per cent—

A. Yes. But I consider that the stock relationship is a reason for cooperation, yes. I do.

Q. In other words, if Pan American were a stranger to Panagra, you would think there was less reason for this than there is where Pan American owns 50 per cent of Panagra.

A. I think so.

Q. Will you explain why?

A. Well—

Examiner Wrenn: What are you getting at?

Mr. Gambrell: I am getting at whether or not it is a wholesome arrangement.

Mr. Gesell: That is not a Pure Food and Drug hearing.

Examiner Wrenn: Do you want the question, Mr. Roig?

The Witness: Yes.

(The question was read by the reporter.)

The Witness: Well, for one reason, there is some community of interest Pan American has in Panagra that an outsider would not have.

Another reason which covers a lot of territory—I don't want to seem frivolous, but after all we have worked with Pan American for a great many years, and while the going

112

[fol. 3991] has not always been satisfactory, we have gone along, built up a big business. We know each other. Sometimes, the devil you know is better than the one you don't.

By Mr. Gambrell:

Q. If Eastern were in the Canal Zone, if it should be granted its Latin American application to the Canal Zone, would Panagra be willing to enter into an interchange with Eastern?

Examiner Wrenn: That, does it have any bearing on this, Mr. Gambrell?

Mr. Schneider: I am interested to have him answer that question, Mr. Examiner, to find out whether the agreement is in the public interest; whether it is for the public, or whether it is an accommodation of two parties here combined to do something which they wouldn't do with anyone else.

By Mr. Gambrell:

Q. If Eastern should get to the Canal Zone, would Panagra in your opinion be willing to join up with them on an interchange arrangement?

Mr. Gesell: What do you feel about that, Mr. Examiner? Is that a proper question in this proceeding?

Examiner Wrenn: I don't know. I am waiting to hear the answer to see.

The Witness: Wouldn't that divide itself into two situations, if Eastern got to Balboa and this agreement were approved, so that Panagra was getting to Miami in this

in

form, or at least our traffic were getting there ~~in~~ this form?

Examiner Wrenn: Let him answer. Go ahead.

—113—

[fol. 3992] The Witness: If you assume that, why then, of course, there would be an element of competition which would have to be considered before entering into an agreement with Eastern.

And I have also felt and testified in 525 that I felt Eastern's going to Balboa might be the first step toward coming on further south, and that would have to be weighed, but if this contract were not approved, and we had no arrangement with Pan American, and it were possible to make such an arrangement with Eastern, mind you, I say, if it were possible, if Eastern were disposed to agree to all things that Pan American has agreed to, I wouldn't say I wouldn't look at it. I would have to consider it in the light of the circumstances at that moment.

I have been very much preoccupied in the last two or three months in trying to make an arrangement with Pan American. I haven't had much time to think what I might do in various eventualities.

But I am determined that Panagra shall get to the United States, or its traffic rather shall get to the United States in some form or another. I hope it will be in this form.

By Mr. Gambrell:

Q. If this route through the Canal Zone should be approved as proposed here, into the New York area, would it not be that there would be two Pan American system routes dominating the entire eastern half of the United States in relation to Latin America all the way to Buenos Aires?

Examiner Wrenn: Let us confine the situation, if we can, to the existing situation we have before us. You are

—114—

[fol. 3993] conditioning that on another case.

Mr. Gambrell: That was brought up this morning. It is put into their maps. If they will be ruled out, then I won't go further.

Examiner Wrenn: I think we will deal better with the situation as we have it here, Mr. Gambrell.

Mr. Gesell: Mr. Examiner, I am inclined to side with Mr. Gambrell in this instance. We are seeking permission of the Board to operate over routes which we trust will be awarded to the Pan American in the near future, and I should think it would be an appropriate question on what the situation is, that will develop in the event Panagra can proceed over those routes.

Examiner Wrenn: I have no question of going into the eventualities, but I do wish you would stick with the situation.

If this case ties up with the Pan American domestic route case, maybe we are in the wrong hearing.

Mr. Schneider: Mr. Examiner, if you will recall the statement I made at the prehearing conference, if you go through these exhibits of Pan American, it is hard to find one that stops at Miami and doesn't go through to New York.

Mr. Gambrell: Exhibit 1, Mr. Examiner.

Examiner Wrenn: Go ahead.

By Mr. Gambrell:

Q. Isn't the layout of Pan American's Exhibit 1 in contemplation of the establishment of new single plane service between New York and Buenos Aires via Miami and Balboa on the part of Panagra and Pan American running virtu-

115

[fol. 3994] ally parallel to the existing through service now operated by Pan American between New York and Puerto Rico, Buenos Aires? Isn't it in effect a proposed parallel, all within the Pan American system?

A. I don't see that it is, Mr. Gambrell, because the Puerto Rico New York service has no connection with any point on the West Coast of South America except Buenos Aires.

Q. You don't take any stock in that press release of Pan American of recent date where they said that it went direct from New York to every one of the 37 Latin American countries, through Puerto Rico?

A. Oh, I don't think it makes any difference whether I do or not. That is their way of stating it. The facts are clear from the statement.

Mr. Gesell: Let him answer the question, please. He is in the middle of an answer.

Mr. Gambrell: Very well.

The Witness: The statement is clear what it says. You can quarrel over the inference.

By Mr. Gambrell:

Q. Is it your thought in saying that the fact that you are half owned by Pan American is a reason why you should have this arrangement with Pan American rather than another American carrier? Is that because you think that the two main routes from New York to Buenos Aires and intermediate points should both be in the same system?

A. No, I should think that was just incidental, even if true. I don't consider it true in view of the fact that

—116—

[fol. 3905] I have just mentioned that the West Coast is in no way benefitted by this—or served by this route from Puerto Rico.

Q. Would there be any competition between this projected charter operation on the Balboa-Miami segment and what you could call the normal Pan American operations on the Balboa-Miami segment?

Would there be any competition between those two operations if you could distinguish them from each other?

A. There is no competition between Balboa and Miami because the Panagra plane merely fits into the Pan American schedules as one of the units on their operation.

Q. You recognize that as far as one company's service goes now, American flag service, Pan American Airways has a monopoly between Miami and Balboa, do you not?

A. No. That is not true.

Q. What other single company, American flag operator, operates all the way?

A. There are none that run at this moment straight between Miami and Balboa, but there are plenty of connections between Miami and Havana. You can get Braniff.

Q. I was not asking for that.

A. No, but I was making it clear because that is part of the picture.

Q. I asked for a single carrier—

Examiner Wrenn: Do you mean that you have a monopoly if you have single carrier service?

Mr. Gambrell: I didn't catch the observation.

Examiner Wrenn: In view of your first question that it was a monopoly, and the second that it was single carrier

—117—

[fol. 3996] service, are you talking about the same thing?

Mr. Gambrell: Yes, sir. It is the only single carrier operator there.

Examiner Wrenn: Then if you are agreed on it, proceed.

The Witness: There is Avianca, and other lines. Any talk of monopoly in this area is obsolete.

By Mr. Gambrell:

Q. Isn't one of the main purposes of your application here to get around a transfer at Balboa, Mr. Roig?

A. Yes, sir.

Q. If it is then, you are not going to belittle a transfer between National and Braniff at Havana, are you? You are not going to say in one case that it is inconsequential, and in the other that it is not.

A. No, that wasn't the question. I am not saying it is inconsequential.

Q. Is it your position in this case that if there is to be expedited and improved service between the eastern half of the United States and Buenos Aires, via Balboa, that it should be provided for not by carriers entirely independent of the Pan American system, but by carriers within the Pan American family?

Do you argue that—do you take the position that it is in the public interest to establish this expedited service which you claim is needed on that route via merely enlarging the Pan American picture, or wouldn't it be better to establish it via giving greater strength to independent carriers who might get together on it?

Mr. Gesell: I think I must object to that.

—118—

[fol. 3997] Examiner Wrenn: I think you are going to argue with the witness the rest of the afternoon on that point.

The Witness: Shall I answer the question?

Examiner Wrenn: If you like. Go ahead.

The Witness: There is only one carrier in this area that I am interested in, and that is Panagra.

There is only one way that Panagra can adequately serve its traffic, and that is by making it possible for the traffic which boards its planes south of Balboa to go through to a terminal in the United States.

Now, it happens that it is the only way of working that out at the moment—is with Pan American.

By Mr. Gambrell:

Q. Following that, have you considered the position of Eastern and the extension of Eastern to Balboa as a possible solution for that?

A. I have considered that very seriously, but not as a solution, but as a menace.

Q. Don't you realize that in respect to the traffic flowing between this country and the area now served by Panagra that there is a greater volume passing through Miami than through the Canal Zone gate, of that traffic? The stream of traffic is larger in Miami than it is in the Canal Zone. Is that right?

A. I don't understand the question. You mean the stream of traffic to all points?

Q. On your system, on the one hand, and points Miami and north on the other. Don't you know that the stream of—

A. I don't understand the question.

[fol. 3998] Q. Don't you know that the stream of traffic in relation to this country gets thinner and thinner the further south you go?

A. You mean in South America, or in United States?

Q. Well, Miami, Balboa and points south. It gets thinner the further down you go. Isn't that right?

thicker.

A. Not on Panagra, no. It gets ~~thinner~~.

Q. I am talking about U. S. traffic.

A. Oh, yes, U. S. traffic, that is correct.

Examiner Wrenn: We will take a five minute recess at this time.

(A short recess was taken.)

—120—

[fol. 3999] By Mr. Gambrell:

Q. You said that in relation to traffic between this country and points on your system and South America, the traffic gets thinner the further down you go. I am not counting the local traffic, just counting the traffic that goes through this country.

A. Well, yes, but the point is where it begins of course to get thin, whether people who are going to Ecuador get off at Barranquilla or Peru get off there. By the time you get to Chile it is still further less but that doesn't necessarily mean that it is less at Balboa than at Miami because there is a good deal of pick up at Balboa from other routes, Central America and Pan American and central routes.

Q. That would be transferred traffic at Balboa anyway, wouldn't it?

A. Yes.

Q. It wouldn't be through traffic?

A. It would not be through plane traffic.

Q. That is what I am getting at. The through plane traffic gets thinner the further south you go from Miami, doesn't it?

Mr. Gesell: May I inquire whether Mr. Gambrell means through traffic to Miami or through traffic to all the United States gateways.

Mr. Gambrell: I am speaking of the traffic that passes through Miami in relation to Balboa and points beyond. It gets thinner the further down it goes.

By Mr. Gambrell:

Q. Doesn't it?

—121—

[fol. 4000] A. Well, if you start a plane from Miami and run it to Buenos Aires there will be fewer United States

travelers who got on at Miami on that plane at Santiago, we will say, than there were at Lima, assuming somebody got off at Lima and they usually do.

Q. If there has got to be a transfer somewhere the transfer will involve fewer people at Canal Zone than it will at Miami. There has got to be a break at Miami or break at Canal Zone—would say the break at Canal Zone would involve fewer transfers of through passengers, is that right?

A. Of course that is only one factor in the case but I don't see how that would be true except to the extent that traffic got off at Balboa or on at Balboa.

Q. You took pains in your direct examination to emphasize that you people didn't want Eastern to come to Canal Zone didn't you?

A. Yes.

Q. That has been your stand all along?

A. Yes.

Q. And you stated that you didn't want to cooperate with Braniff, that you wanted to cooperate with your parent company, Pan American, isn't that right?

A. Well, for the reasons which I have indicated, yes.

Q. Doesn't your proposal in this case then boil down to seeking a mechanical and economic arrangement whereby the Pan American system which now dominates the eastern route hemispherically, you are trying to achieve an arrangement whereby the Pan American system can lock out the efforts of Eastern, National and Braniff on the western

[fol. 4001] route of the hemisphere. Isn't that the objective?

Mr. Hamilton: If the Examiner please, I don't think there is anything in the record that supports a lot of the assumptions in that question.

By Mr. Gambrell:

Q. Isn't that a fair interpretation? You don't want Eastern there. You don't want to cooperate with Braniff. You want to cooperate with the Pan American system. Doesn't that mean then that you are trying to freeze out any effective what you might call hemispheric competition of ex-

peditng service from North America to South America involving the eastern half of the United States?

A. It doesn't mean that to me.

Q. You speak in paragraph 6 of settling the controversy. You have referred in paragraph 5 to four proceedings.

Exam. Wrenn: Now, you are talking about the petition itself, are you, Mr. Gambrell?

Mr. Gambrell: That is right. Still on the petition.

By Mr. Gambrell:

Q. Can you state in a word or two what the controversy is so that we may know what we are settling or trying to settle in this case?

A. Well, the controversy has been the difference of opinion regarding extension of Panagra's route to a terminal in United States.

Q. It is a controversy between whom?

A. It is a controversy between Panagra and Pan American and between Grace and Pan American.

Q. And the Pan American Corp. too or not?

A. I think they were parties to 779. I am not sure.

[fol. 4002] Q. You mean both Pan Americans?

A. I think so.

Q. Pan American and subsidiary?

A. I think they were both parties in 779.

Q. Does that controversy exist right now?

A. No.

Q. Is this agreement the only thing that has happened to dissipate it?

A. Well, this agreement is the settlement of the controversy.

Q. While that controversy was on was there competition between Panagra and Pan American Airways?

A. Well, about to the same extent that there will be after the agreement with the exception of the pooling agreement if that is adopted.

Q. You think there may be less competition after the agreement than before?

A. I think if the pooling agreements is adopted it would be somewhat less but apart from that I think it is about the same. It might be a little more or less.

Q. Is it your thought that it is in the public interest to reduce competition if there be any between Panagra and Pan American?

A. Well, I think that is a philosophical question and I will have to give you a philosophical answer. I think in an area such as this where we have got 10 or 15 companies in existence and in prospect, most of them foreign companies, it is in the interest of the American companies to put up a reasonable front against that foreign situation

[fol. 4003] even at the cost of eliminating a certain amount of destructive and ruinous competition between themselves.

Q. It is the desire, is it not, of Pan American and Panagra in this proceeding to establish an arrangement which will permit just as few passengers as possible to be hauled by and between Eastern and Braniff hemispherically, isn't that right?

Mr. Gesell: I don't understand that question, Mr. Examiner.

A. That involves an assumption that Eastern is in this picture in getting to Balboa. They are not out there yet.

Exam. Wrenn: Clarify your question, Mr. Gambrell. You are talking about an arrangement between Eastern and Braniff where?

Mr. Gambrell: In North America and South America and Central America.

Exam. Wrenn: I understand but under the present conditions as they are now.

Mr. Gambrell: Well they have to get a bridge between them to get there.

Exam Wrenn: Then it isn't possible yet. I am trying to clarify it so the witness can answer your question.

By Mr. Gambrell:

Q. Mr. Roig, you will assume, will you not, that Eastern, which has been virtually the 100 per cent carrier north

of Miami is struggling to maintain its position in relation to Latin American traffic. You will assume that, won't you?

—125—

[fol. 4064] A. Well, I assume that they have had until National came into the picture a monopoly on the carriage of that traffic and I assume when the Pan American domestic route case comes up they will struggle to maintain it.

I didn't know there was any struggle going on at the moment. The only struggle is to chisel in on somebody else. It isn't to maintain what you have got.

Q. Is it the position of Panagra and Pan American as depicted on Pan American-Panagra Exhibit No. 1 in this case, is it their purpose to provide a service which will minimize as far as possible the hauling of passengers by and between Eastern and Braniff and any other carriers between North America and South America. Is it your desire to minimize their participation as far as you can?

Mr. Gesell: I don't understand that question, Mr. Examiner. It is the same question we tried to get clarified before. Mr. Roig has testified several times as to what the purpose of the agreement is.

Mr. Gambrell: He is on cross examination.

Exam. Wrenn: Do you understand the question, Mr. Roig?

A. Well, it is Panagra's purpose to get all of the traffic in the area that we can just as I assume it is Braniff's and Eastern's and everybody else's.

By Mr. Gambrell:

Q. So, when you wanted to keep Eastern, as you said a while ago, out of Canal Zone; it was with the thought of preventing Eastern from having a substantial share of the Western Hemispheric business, wasn't it?

Mr. Gesell: What is the Western Hemispheric business?

—126—

[fol. 4065] A. At one moment you are asking me a question that seems to imply that it is wrong to compete and the next minute that it is wrong to compete if that competi-

tion what you call minimizes Eastern's position.

I understand competition. I don't understand minimizing. It is our object to get all the traffic we can.

By Mr. Gambrell:

Q. And to prevent Eastern from getting all that you can prevent Eastern getting, isn't that right?

Exam. Wrenn: Where?

Mr. Gambrell: On the route between the West Coast of South America and Balboa and Miami and points north.

Mr. Gesell: Eastern isn't in that route until we get to Miami.

Mr. Gambrell: Just let the witness answer.

Mr. Gesell: No, I won't, Mr. Gambrell.

Mr. Gambrell: Then, let Mr. Gesell take the stand.

Mr. Gesell: I think my remarks were addressed to you and not Mr. Gambrell.

I say Eastern isn't in that route and therefore the question isn't appropriate.

He talked about the western hemisphere a moment ago which is equally vague and indefinite.

Mr. Gambrell: I tried to—

Exam. Wrenn: Just a minute. I want to know whether you are talking about preventing the extension of Eastern from Miami to the Canal Zone or are you talking about the situation there with Eastern as it now exists at Miami?

Mr. Gambrell: I asked it in general terms. It would be applicable either way. I asked if his efforts in this case

—127—

[fol. 4006] are to provide a service which would—

Exam. Wrenn: If that is the purpose, why don't you ask the question if the intent of this agreement is to prevent Eastern from getting to the Canal Zone.

Mr. Gambrell: I didn't want that. I didn't ask that question. That isn't my question.

Exam. Wrenn: Then I am confused as to what you did ask.

Mr. Gesell: So am I.

Mr. Gambrell: If Mr. Gesell will rest—

Exam. Wrenn: Let's let Mr. Gesell alone. I want to know what this is.

Mr. Gambrell: I will ask the question again.

Exam. Wrenn: Go ahead.

By Mr Gambrell:

Q. Is the purpose of this agreement, Exhibit A and B, or either, to capture, control, and haul or preserve to Pan American just as much of the business between South America and North America via the Miami gate as possible?

A. Speaking for Panagra the object is undoubtedly to preserve as much of our traffic as we now have and hope to get and are reasonably entitled to between Balboa and Buenos Aires by offering that traffic the same kind of service through to destination in the United States that our competitors are offering.

Q. Which competitor?

A. Braniff at the moment, FAMA.

Q. Just a minute.

A. You asked for them. I will give them to you.

Exam. Wrenn: Let him answer the question.

12s

fol 4007 A. Aviaman, TACA, British Overseas, Peruvian International, Tampa New Orleans and Tampico and Tampico and FAMA, in addition to Braniff.

By Mr. Gambrell:

Q. Will you explain how you are trying to give the same sort of service to the same traffic as Braniff is giving?

A. By making it possible for a passenger on our plane in that respect we are aiming to give better than Braniff take gives because we want to ~~take~~ our passengers straight through to a terminal in the United States.

Q. You are not seeking to give the passengers at Houston and Kansas City any service, are you?

A. We can't attempt to serve every port of entry.

Q. Braniff isn't threatening your business in relation to the eastern half of the United States, is it?

A. Very definitely with this national hookup.

Q. I mean by direct service.

A. But that is a question of degree. Of course it isn't as good as a direct service but of course it is a very definite threat to our business.

Q. Let's look at agreement A. I notice in paragraph 1 you speak in the third line of aircraft operated by Panagra into the Canal Zone from Lima or any point south. Why was that limited to that?

A. Well, it was thought that through flights with Panagra planes ought to have a reasonable relation to through traffic from Panagra's territory, and they shouldn't, for instance, to take the other extreme case, just put on planes at Balboa which would have no particular significance in

—129—

[fol. 4008] connection with the through traffic. Lima was picked out as a convenient and reasonable point.

Q. Is it contemplated that this agreement will have relationship to all of Panagra's planes or only a certain selected few?

A. At the present time the exhibits show that we contemplate one schedule through with DC-4 and an additional one with DC-6 when that plane comes into service. That would mean that our interior service which we are now operating and expect to continue to operate, into Balboa, would not proceed through and if we added additional services it would be a matter of our indicating additional schedules. The interior service is a local service.

Q. What I was getting at is: Will all of your DC-4 airplanes be impressed into this operation, or will there be some that will never be involved in it?

A. Well, the physical planes, I take it, there will be some operating for instance between Santiago and Buenos Aires on local runs that might not get up here at all except when they were put on an international run but the idea is that the through international services which we run from Buenos Aires to Balboa would, with those planes, be carried on through.

Q. I get that point. I was just wondering about the separation of your fleet into two parts, one part that is rotated into Miami and another part that isn't?

A. Well, the only part that wouldn't be rotated in would be a plane that might be in the south running locally between Buenos Aires and Santiago or some other spot on the

—130—

[fol. 4009] line. It would only be rotated in there when it happened to suit to put it into international service.

Q. At the bottom of paragraph 1 it says "If Panagra shall deem it impractical for the particular aircraft operated by Panagra into the Canal Zone to continue the flight to the Continental United States Panagra may substitute another aircraft."

Why is it that Pan American has no option to reject a plane and only Panagra can make the switch.

A. Well, Pan American have the option to reject planes which they don't consider properly equipped or properly qualified and so on. This particular thing, the sentence you read was to cover a particular situation of a plane arriving at Balboa and owing to some schedule exigency or some necessity of maintenance or something, it wasn't prepared to go right on through. We then have the right to transfer our traffic in that emergency to another plane which has not been south of Lima.

In the absence of such a provision we might lose that through carriage on the ground that the plane had not been south of Lima. It is purely an emergency provision.

Q. In paragraph 2 you have selected Canal Zone Miami. Why did you select Canal Zone-Miami rather than some other direction?

A. Well, because that is the most direct route available at the moment. Pan American's other routes through central America are not as ~~correct~~ direct as this for our purposes.

Q. Is it also because that is the heaviest traffic route?

A. It is the heaviest in international traffic, yes.

—131—

[fol. 4010] Q. You speak of operating non-stop unless experience demonstrates the desirability of making stops. How would that be determined?

A. Well, if the loads were running excessively heavy you might say and we wanted to stop in order to lighten fuel load or conversely the loads were running light and we wanted to pick up some local traffic, any number of conditions of that kind which related to volume of traffic quite largely.

Q. In 2(b) you speak of going to other routes which Pan American may get.

Is it your thought that this agreement would permit such operation without further negotiation with CAB; in other words, that CAB now bind its hands for 99 years--

Exam. Wrenn: Mr. Gambrell, I think you are covering matters that were brought out on direct. It may have been before you came in. I will let the witness answer the question though.

A. My understanding is that the Board has to decide in the first instance the question of public convenience and necessity justifying Pan American's routes in the United States.

Now that being decided they pick out the equipment and decide what equipment they are going to use.

I would assume that this language would authorize them to use the Panagra equipment on some of their schedules.

By Mr. Gambrell:

Q. In other words it would authorize the interchange provided a certificate is granted, it would authorize it without an interchange proceeding?

A. Not an interchange. It would authorize Pan American to use on some of its schedules Panagra planes under

{fol. 4011} this agreement. As a legal matter I can't tell you. Perhaps that question would be opened and could be thrashed out in that Pan American proceeding. I don't know.

Q. You use the words here "shall proceed over such routes."

A. That is between the parties.

Q. If the Board approves that wouldn't you assume that the Board would be prejudging an interchange at the time of the granting of the certificate?

A. Well, I would assume so unless the Board made certain reservations. I presume this matter would be discussed in that proceeding and if the Board didn't want their decision to be that extensive I suppose they would say so.

Q. In that connection, may I ask whether or not these two agreements, in your view, are interdependent? That is, contract A and contract B can either stand alone, practically.

A. Well, it wouldn't be exactly the same if they were separated.

Q. Would Grace—

Exam. Wrenn: Let him finish. Did you have something more?

The Witness: I was just going to look to see a little bit.

Exam. Wrenn: All right. I am sorry, Mr. Gambrell, go ahead.

By Mr. Gambrell:

Q. Would Grace or Panagra be willing to go through on one if the other were denied?

A. Well, I will tell you, Mr. Gambrell, in the preparation

—133—

[fol. 4012] of these agreements, as I recall it, there was some question of which provisions properly belonged in one and which in another, and I think there are some legal considerations involved in that and I think Mr. Friendly can answer that question better than I can.

I think some of the provisions in B might have been incorporated in A. I am thinking now, for instance, of things like the termination clause.

Q. I am not asking for the Pan American or Pan American Corporation but for Grace or Panagra. Would Grace or Panagra be willing to have either of these contracts if the other would disapprove?

repeat I

A. I ~~think he~~ can't answer that question without studying the thing at length. I have never thought of it.

Q. You spoke a moment ago of the Board's possible modification of the contract. Could you throw a little light on the record as to where and to what extent Grace or Panagra would be willing to yield on any of the paragraphs or parts of these contracts?

Mr. Gesell: I don't think that is a proper question.

A. I don't think that is appropriate.

Mr. Gesell: We are submitting this agreement for approval.

By Mr. Gambrell:

Q. The point is that Mr. Roig says he is in a great hurry. I thought if he could point out the ones that are not essential it would help things along a little bit?

A. I am not in such a hurry that we haven't got time to have a good agreement and I think this is a good agreement.

—134—

[fol. 4013] Exam. Wrenn: All right. Go ahead, Mr. Gambrell.

By Mr. Gambrell:

Q. At the bottom of page 1, paragraph 2, you speak of "Traffic experience demonstrates the desirability" of certain arrangements; to whom would that demonstration be?

A. It says to the satisfaction of both parties.

Q. In subparagraph C of 2 you speak of "If Panagra shall so request Pan American will file for non-stop between Canal Zone and New Orleans."

Is it contemplated that if Pan American wanted to do the non-step and Panagra didn't ask for it, it couldn't be done?

A. Oh, no. It says in so many words that Pan American can go ahead irrespective of our request. I mean it is all right here.

Q. Subparagraph D in the middle of page 3: "Pan American Airways agrees to use its best efforts to obtain from the Civil Aeronautics Board authority to operate the various routes and non-stop services referred to in this paragraph, and Panagra agrees to support Pan American Airways to this end."

What do you mean by "The best efforts" there, Mr. Roig?

A. Well, it means that they would seriously press their application and present their case in the best possible form the same way you would present a case.

Q. Do you conceive of new route proceedings as being in the nature of legislative proceedings?

Mr. Gesell: Is that relevant?

Exam. Wrenn: I am willing to hear the relevancy of it.

Mr. Gambrell: I am leading to a point.

—135—

[fol. 4014] By Mr. Gambrell:

Q. Isn't it true that constitutionally speaking the Supreme Court has often said that granting franchises is a matter of legislation or sublegislation?

Mr. Gesell: Is that within the witness' qualifications?

Exam. Wrenn: How does that tie in?

Mr. Gambrell: I am leading up to the question of the propriety of a great system like Pan American and the great system getting together and conspiring to procure what constitutional decisions have held to be legislation.

Mr. Gesell: That characterizes this in an unfriendly and unfair manner. I don't think it is appropriate on the record and I move it be stricken.

Mr. Hamilton: I associate myself with that motion.

Exam. Wrenn: Any reason why it should remain, Mr. Gambrell?

Mr. Gambrell: I merely want to ask him: does he realize that that is an agreement between these groups to obtain legislation?

Exam. Wrenn: All right. Strike the previous sentence about which the motion was made.

Do you have the question?

The Witness: I don't consider myself qualified to answer this question. As far as my opinion goes I certainly do not consider this legislation in the sense that you have referred to it.

By Mr. Gambrell:

Q. You have also undertaken, I believe, to put forth your best efforts to have this agreement approved. What

—136—

[fol. 4015] have you done to have it approved? What efforts have you made?

A. Well, we are here today. We have prepared the exhibits and have prepared all of the necessary supporting testimony and we are here placing it on the record.

Q. In a preparatory way in your direct you spoke of following the mandate of the CAB decision. Did anyone undertake to explain to you what the CAB decision meant —any official of any kind?

Exam. Wrenn: What do you mean? Official of Panagra or Pan American or what?

Mr. Gambrell: Any public official. He was acting under public—

Exam Wrenn: You said public official. That is all I wanted to know. Go ahead.

By Mr. Gambrell:

Q. You said you were acting under public mandate?

A. What I meant by that was the language of the decision itself which I did feel personally quite competent to interpret. It seemed very clear to me.

Q. Has any public official stated to you or your company that this arrangement that you have brought here is in compliance with what you call the mandate of the Commission?

A. No.

Q. Have you discussed it with any public official?

Mr. Gesell: Do you see any relevance to this, Mr. Examiner? The Witness has stated that no witness has said that it is consistent with the mandate? Isn't that sufficient for Mr. Gambrell's purposes?

—137—

[fol. 4016] Exam. Wrenn: I am inclined to think it is.

Mr. Gesell: The witness has given his own opinion that it is consistent with the mandate of the Board. Isn't that sufficient?

Exam. Wrenn: You have a question pending. Let him answer it.

A. I don't recall having discussed this mandate question or this contract with any official.

Q. You haven't discussed it with any official of the government as to whether this is the answer that was contemplated in the CAB decision?

A. No, I don't recall.

Q. You haven't had any conference with any public officials about it?

Mr. Gesell: That is too broad a question. What does he mean—conference with government officials about the agreement.

Exam. Wrenn: Do you have reference specifically to CAB?

Mr. Gambrell: Not necessarily.

Exam. Wrenn: What would any other have to do with it?

Mr. Gambrell: My question was inspired by his statement that he had come in with this document because—

Exam. Wrenn: Just tell him what you are talking about.

The Witness: I think I have answered the only question.

Exam. Wrenn: I am not trying to curtail your questions but I want you to make it specific so the witness knows what you are answering about and let's get the answer.

Mr. Schneider: The witness understands the ques'on

—138—

[fol. 4017] I am sure. If anybody is confused it isn't the witness.

Mr. Gambrell: I just wanted the benefit of his views as to how responsive this is to the mandate and whether or not any public official had told him it was.

By Mr. Gambrell:

Q. Has anyone indicated it was?

A. No.

Exam. Wrenn: Any public official?

By Mr. Gambrell:

Q. You haven't asked any public official whether it was responsive?

A. No.

Q. In paragraph 3: "At least 30 days prior to the first schedule through flight, Panagra shall give notice to PAA about the number and nature of flights."

Why is it that only Panagra is given this privilege and not Pan American as to designating the number and nature of the flights?

A. Well, you see Pan American has the right to designate the total number of flights that they are going to operate, but we have the right to designate the number that are to be operated with our through planes.

Q. Well, if this is a Pan American operation as I thought you one time said—

A. It is.

Q. —then why shouldn't Pan American have some say in the nature and number of these flights?

A. Well, this was a very important concession to us and to our traffic and it was felt that we should be in a posi-

—139—

[fol. 4018] tion to decide the number of schedules that were necessary to accommodate our traffic, and Pan American agreed to that proposition. They might have refused it. If they had the contract would have been much less attractive and much less in the public interest.

Q. Why did you use the Panagra crews all the way? Why did you provide for that?

A. Well, you see, one of our problems over a good many years has been the fact that we have been operating wholly outside of the United States—we have been the only American airline in that position—and one of the things that we were very anxious to accomplish was to make it possible to bring crews to the United States so that men could alternate on the possibility of coming to their home country.

Also it isn't altogether sentimental. There are certain very definite advantages in having crews come to this country and be stationed in this country from time to time where there was a greater body of aviation knowledge being passed about all the time. That was one reason.

The other reason is the desirability, we thought, of having the crew of the company whose plane it is flying the plane, to always have the question, when one company is flying the plane of another, a question of division of responsibility, difference of opinion perhaps as to the condition of the plane and all that kind of thing, and as a

practical operating matter I think it is more efficient operation to have the same crew that has flown the plane uply it right through.

Q. Do you think that it is preferable to have a familiar

—140—

[fol. 4019] plane and a familiar flight crew rather than to have a familiar flight crew with a familiar ground crew?

A. Well, I think you have to make some choice under that headings You might argue, and perhaps in the old days would have, that it was desirable to have all three the same, but actually in the present development of aviation, and with all the war experience, the ground crew, I think any operating man would agree, was the lesser choice between two people who operate airplanes over all kinds of routes without controlling the ground crew.

Q. Paragraph 4. You say that the two parties will consult with a view to fixing the schedules. Who will decide?

A. Well, if you read on you will see there that there is a complete provision of what happens in the event of disagreement. The first sentence contemplates that they will be able to agree but then it goes on and specifies in detail what happens if they do not agree.

Q. What will be the relationship of the schedules through the Canal Zone route and the schedules through the Puerto Rico route?

A. It has never occurred to me that there would be any relationship between them.

Q. They will all be going from the eastern half of the United States to Buenos Aires?

A. There might be some relation at the other end that is true, or either end.

Q. Why is it that Panagra shall fix the hours of arrival northbound and departure southbound at the Canal Zone?

—141—

[fol. 4020] Why does Panagra have that right as distinguished from Pan American?

A. That again was another important concession like the one we were speaking of a moment ago. It is very important to us to be able to do that because that is the control on our whole schedule South of Balboa, and it means that

we can control our schedules South of Balboa and still be assured of a connection through to United States.

Q. At the top of page 5 you have the expression "respective personnel." Whose personnel are in the plane while it is flying from Balboa to Miami?

A. Panagra's.

Q. So Panagra has to instruct its personnel regarding operations north of the Canal Zone, is that right?

A. Well, that particular clause wasn't intended to relate to that situation. It may be a little blind. It might have that implication. What it had to do with, as appears later on, was the question of late arrivals.

For instance, if we have a plane that is due at Balboa from the South, let's say at 9 o'clock in the morning, and is to fly right on to Miami after the usual just short stop at Balboa but suppose the plane is three or four or five hours late, and it suits us, in order that it remain on its next schedule, to turn it around, not take it on to Miami.

and ~~been~~

That happens ~~every day~~ on Eastern ^ ~~I have put off quite frequently~~ on every line in the United States to meet that

in the United States.

situation. It is common operating practice^. Or you might have a plane arrive with a delay let's say and meanwhile there would be another Pan American plane ready to take

—142—

[fol. 4021] right off that didn't have a load and it might be simpler to transfer the traffic. It is to cover all kinds of operating problems of that sort.

Q. But you state that when you refer to respective personnel there, and that the parties will instruct their personnel, that Panagra in that connection would be instructing the flight crew and not Pan American?

A. No. I am not thinking of our flight crew at this time. I am thinking of the respective personnel. What we had in mind was the personnel of Panagra and Pan American at Balboa.

Q. Don't you think, Mr. Roig, that this contract, as you have given exposition of it would provide a great deal of foggy no man's land of responsibility in respect to personnel here? That is, where the personnel wouldn't know

whether they were following Panagra's instructions or Pan American's instructions?

A. As a matter of fact, a great deal of effort was made to avoid just that sort of thing, and I think it is successful to a remarkable degree. I think just the opposite of what you said.

Q. Isn't it your view that a cleancut lease where everything is turned over to Pan American on a rental basis north of Canal Zone, would constitute a much sounder and more responsible organization than this commingling of flight personnel and ground personnel all the way up to Miami?

A. In my opinion just the opposite is the case.

Q. In subparagraph C, page 5, you say: "Pan American Airways shall have a right to inspect any aircraft which is

[fol. 4022] not satisfactory in the light of regulations." Shouldn't that be "shall" and not "may?"

A. Well, I assume they would.

Q. Let's turn to page 6. You speak of having control over the operation of Panagra's aircraft, Pan American having control. Would Pan American have control of the crew too? The crew wasn't mentioned as such.

A. Yes. Well, on their sector.

Q. Who pays the crew?

A. Well, in the first instance I have forgotten the detailed provision but I think in the first instance perhaps Panagra would pay them but all of the expenses of the operation are for Pan American's account.

Q. Who trains the crew?

A. We have a special provision here for training by Pan American of our crews. As a matter of fact the initial crews we would use are already trained. They are crews that were trained by Panagra when we were operating the Army Transport Service out of Miami. They have flown the route many times.

Q. Isn't one company training the crew of another in itself a dilusion of morale and responsibility?

A. Well, that is a matter of opinion. I think that until the airlines develop the idea of working a lot of things together that they have thought, that they had to work

road

separately, they have got a long ~~row~~ ahead in getting out of the red. There is more nonsense talked under that heading than almost any other in practical airline operations.

Q. You spoke in your direct of the advantage of training

—144—

[fol.4023] in this country. Do you know of any reason why that training in this country by Pan American or Panagra's personnel couldn't be accomplished without this interchange arrangement that you are speaking of?

A. I have no reason as I said this morning to believe that it could be arranged separately.

Q. I mean physically it could be, couldn't it?

A. Physically?

Q. Yes.

A. Yes, it could be except that it wouldn't be as expeditious if we were training crews isolated up here (indicating) instead of, say, people who were in co-pilot positions or taking check training and so on as they went along, and who were normally moving in and out of here.

The expense of moving people up and down is something terrific. I am going to answer that question because it has to deal with the practical side of it. We estimate that when we send a man down to the Coast to Lima for training and put him through the course and he doesn't pan out and we have to bring him back it costs us $2500 or $3500.

Only in the month of August in closing the account for the month of August, we set up a reserve on our books of $12,000 a month to cover traveling expenses of people who just have to move back and forth,—not all co-pilots—and in the month of August we had to pick up $34,000 extra for that reserve because it was overdrawn by that amount.

The expense of moving people down there and having them not stick, or having them not check out, and then hav-

—145—

[fol. 4024] ing to bring them back and send somebody else down is a very enormous item and a saving of that expense is one of the great advantages we hope to get from this contract.

By Mr. Gambrell:

Q. Let's consider the application of what you said to your situation?

A. Yes.

Q. Let's assume you don't have any interchange, and let's assume that you and Pan American are willing to have the training done anyway by Pan American. It would be done we will say in Miami in either case. Will that be a reasonable assumption?

A. No. It is an assumption out of whole cloth. How can you assume that I can go out and make contracts with Pan American on a basis which I have never discussed and have no reason in the world to believe they would agree to.

Q. You misunderstand me.

A. I don't think so.

Q. I am speaking of the Miami location, the Miami school. Is that where the school is?

A. Yes.

Q. All right. If you don't have an interchange contract, the pilot you hire to spend a week or a month or whatever time in Miami studying in the Pan American flight school?

A. Yes.

Q. And when he gets good enough, if they check him out he goes on down to Balboa and starts to work for you.

Mr. Gesell: What is this?

—146—

[fol. 4025] Mr. Gambrell: Just a minute, let me finish.

By Mr. Gambrell:

Q. Now, let's assume that this is approved and it is done the other way by Pan American under this contract, you still have that pilot landing in Miami there from Wichita or wherever he comes from, and spending time at Miami and getting checked out as a good pilot and then he goes on down and starts operating for you, so it is the same from a physical and rotational standpoint either way you go, isn't it?

Mr. Gesell: Mr. Examiner, I object to that long question because it is based on an assumption which the witness

says is not present here. He says he has no basis to feel that there would be any such agreement possible.

Now, why go in and discuss something that we haven't got before us, which isn't agreed before the parties, and which the witness has said he doesn't think is possible.

Mr. Gambrell: I don't think we want to put a premium here on obstinacy and refusal to contract, and say that this thing shall be approved because—

Exam. Wrenn: All right. I think your argument is more in the form of your question there. I think you can get what you want in a different form.

As I take it what you are trying to find out is whether the advantages claimed for this pilot training can be disassociated from this contract.

Mr. Gambrell: Right.

Exam. Wrenn: I am perfectly willing for the witness to answer that.

—147—

[fol. 4026] By Mr. Gambrell:

Q. Let's assume that the parties are willing to do business regarding training even though this contract doesn't go through. You say they wouldn't but let's assume for the sake of discussion they would.

Do you know any reason why that couldn't be physically carried out?

A. By physically, you mean the location in Miami.

Q. It is the same geography in either case.

A. Miami is the same in either case.

Q. That is right.

A. I do think however that there are considerations which make it more advisable under this contract and with our pilots coming through, than otherwise, but the detail of that I would rather let Mr. Kirkland, who is our operating man here go into it. I am not qualified to go into the details.

Q. You are not arging that training feature then as a very powerful factor in this case, are you?

A. Yes.

Q. And you are saying that—

The Witness: Now, that is where the fallacy of this assumption, Mr. Wrenn, comes in.

Exam. Wrenn: All right. Go ahead.

The Witness: The question is now asked based on the theory that we could make this contract and I have no reason to believe that we could.

By Mr. Gambrell:

Q. Would you make it if Pan American were willing?

Mr. Gesell: Isn't that increasingly iffy?

—148—

[fol. 4027] The Witness: Sure. It is an iffy hypothetical question. We are getting nowhere.

Exam. Wrenn: I don't see where we are going. I think I see the point you are driving at here but we don't seem to be reaching it.

Mr. Gambrell: We could if he were a willing witness.

Exam. Wrenn: I don't know about that. That is open to argument.

Mr. Gambrell: He says it can't be done. I want to know if it is because Panagra objects or because Pan American objects.

Mr. Gesell: It has never been broached and never discussed. How can it be determined?

Mr. Gambrell: Then how can he say it is utterly absurd to conceive of it?

Exam. Wrenn: If you are trying to tie this in as to how much of the benefits arising out of this particular provision—let's put it this way: If you are trying to find out how much of the contract depends upon the benefit arising out of this particular provision, I am perfectly willing to have you get it and I think the witness is perfectly willing to give you his opinion on it.

Mr. Gambrell: The witness stated a while ago that it was out of the question to consider this thing because it couldn't be done. I understood that Mr. Gesell, his counsel, agreed with him, and yet Mr. Gesell says a minute ago it has never been considered.

The Witness: I did not say it could not be done and that I had is just where your question goes over the falls. I said no

—149—

[fol. 4028] reason to assume or believe that it could be. How can I assume, without ever having discussed the thing with you, that I can make a certain contract with you.

Exam. Wrenn: I think we have argued this enough.

Mr. Gambrell: May I ask if Panagra is willing to enter into such a disassociated training agreement?

The Witness: I will not answer that question. I can't answer it this minute. I will have to consider the thing as a realistic proposition.

By Mr. Gambrell:

Q. Do you know any reason why it couldn't be handled as a disassociated project? I am asking this for the benefit of the five members of the Board and these two examiners.

A. You mean from Panagra's angle assuming Pan-American were willing?

Q. And from Panagra's and Grace's angle?

A. From that angle if Pan American were willing it would be perfectly possible to make an agreement to cover training at Miami but I do not think it would be the same agreement or have the same effect as this one.

Q. May I ask if you know of anything to indicate that Pan American or Pan American Corp. wouldn't be willing to make such agreement? Have you heard that they wouldn't?

A. I don't know anything one way or the other. They can answer that themselves.

Q. Now, as to the maintenance, you spoke of that as a large factor and the avoidance of moving equipment back and forth for maintenance in Miami. Do you undertake to state that the fact that a certain number of these airplanes

—150—

[fol. 4029] are brought into Miami will solve the problem of bringing those in that aren't brought in on service there?

Mr. Gesell: What is that question again please?

Exam. Wrenn: Read the question please.

(Question read)

Exam. Wrenn: What are you talking about, Mr. Gambrell?

The Witness: I think I know. I think I can answer the question.

Exam. Wrenn: All right. Go ahead.

The Witness: As a matter of fact, so far as four-engine equipment is concerned all of our planes would come to Miami in regular course under this contract except possibly on the run one that might be stationed in the south ~~of a line~~ between Santiago and Buenos Aires. Two, if you like. I don't think there would be two but suppose there were, as to those planes they would be absolutely uniform with the ones on the through run and the practice which would be followed by every airline under similar circumstances would be followed. When those planes were due to come to the shop they would be put on the line and brought through. That would leave our two engine ships which would not be coming through, and at the present time we have no plan for maintaining those ships at Miami.

We plan to continue to maintain those in Lima.

By Mr. Gambrell:

Q. It would mean then that you would have to maintain a base of your own and then hire somebody else to do base work for you too?

A. So long as we have that set up, yes, that is true.

—151—

[fol. 4030] Q. And you don't expect to dispense with two-engine ships, do you?

A. Not at the moment, no.

Q. Now, a question about the stimulation of competition, and engineering and other procedural developments referred to in Section 2 of the Act. Is it your belief that your company can render its greatest contribution to air transportation in respect to maintenance efficiency and maintenance cost by delegating your maintenance to another company?

A. To the extent that we have in mind delegating it I think it is sound aviation economics, yes.

Q. Do you consider the extent of your contemplated delegation as substantial or only inconsequential?

A. I think it is quite substantial.

Q. Then you feel that an airlin as great as you regard yours can very well abdicate on maintenance and turn it over to somebody else in working out its destiny.

Mr. Gesell: I have no objection to the question.

Mr. Gambrell: All right.

A. Well, we don't intend to abdicate on maintenance. I do think very strongly, Mr. Gambrell, as I said before—and there is quite a tendency in that direction—that it is sound aviation economics for people to get together on a good many things. There have been a lot of newspaper articles and magazine articles written on it and all that kind of thing.

So far as I know this is the only realistic step that has been taken in that direction and I think it is a sound step.

—152—

[fol. 4031] By Mr. Gambrell:

Q. Where do you draw the line on what they should do together and where they should get into different camps and compete with each other?

Exam. Wrenn: Aren't we getting a little far afield?

Mr. Gambrell: I don't think so.

Exam. Wrenn: It seems to me you are. It isn't clear to me.

By Mr. Gambrell:

Q. Would you say the same thing about your personnel training that you should abdicate there and have that done by somebody else?

A. A certain part of the technical training, that would be possible but a certain part of the other training would not be possible because that relates directly to your direct situation but there is a great deal of training—there is a lot of talk and it should have been done if it hasn't been done already.

There is the question of training stewardesses, that is one of the questions brought up by Mr. Smith in his article in the Post that everybody had to train their stewardesses. It is just nonsense.

Q. Isn't it true that there are peculiarities regarding your route as distinguished from domestic operations which makes it all the more desirable that your personnel should be trained in Latin America?

A. That is certainly true of certain personnel but even that personnel to some extent could be trained up to a point—up, say, to a common denominator.

[fol. 4032] Q. How would you control your training costs if they are in the hands of Pan American?

A. Training course of whom?

Q. Costs. C-o-s-t-s. How would Panagra control the cost of its training program if it is in the hands of Pan American?

A. I think that is a matter that has to be arranged. I think the contract says the details of that training program are to be arranged and we would have to decide on the basis of our past experience and what it was costing others whether the charges we were paying were reasonable.

Q. What I am getting at is reducing the cost of air transportation by economy and efficiency of operation including training of personnel and including maintenance. Don't you when you abdicate, open the door wide to loss of control and the loss of keeping down your costs in the public interest?

A. I don't think so. I am not opening it that wide. I am not giving anybody a blank check.

Q. If the training is 1200 miles away from your operations, isn't it too far away for you to manage that training?

A. But we propose to have supervision of the training and maintenance even though it is 1200 miles away. We have always had an office in New York.

Q. If you are going to supervise the training and maintenance, isn't it better, after all, just to have it in that United States territory and Canal Zone in the first place?

A. That is a matter of opinion but our experience of the Canal Zone—when you speak of the Canal Zone as being

—154—

[fol. 4033] United States territory, if you intend to create
is the same *under*
the impression that it ~~has any heading~~ except ^ some tech-
as
nical legal heading ~~to~~ the United States you are creating a totally erroneous impression because it isn't so.

Q. Are you attempting to say that Pan American's flight training and Pan American's maintenance has been efficient and economical, more so than your own?

A. I think the costs of Pan American's maintenance have been less than ours because of certain reasons based on—perhaps they are better than we are, I don't know, but I mean quite apart from arguing over that subject, there are certain factors based on the difference between maintenance in this country and abroad.

To begin with, you have the factor of spare parts, the volume of spare parts that is necessary to carry, when you are operating at a distance from the factories, and where the transportation, especially as it has been in the last few years is uncertain, is a big item, and the obsolesence of those parts is a big item.

It is also true that in the places where we operate mechan-
for
ics are not ~~to~~ be had by just advertising ~~to~~ them, or sending to an agency and getting them. You have to train your mechanics from the ground up. That involves a great deal of expense in itself. The expense of supervision is an important item, and the overall unit costs, although the hourly wage may be less, seem to work out higher than up here.

Now, Mr. Kirkland will go into that in great detail. It is quite an interesting study.

—155—

[fol. 4034] By Mr. Gambrell:

d

Q. You are not conten^ing that Pan American's costs for maintenance have been comparable to the costs of Braniff or Eastern or National, are you?

A. I have never made the comparison.

Q. Would you say it would follow from your previous statements here that Braniff ought also to have its maintenance done in the Pan American shops at Miami?

Exam. Wrenn: I don't get the reference to that.

A. I know nothing about Braniff's problems. They have maintenance shops of their own in the United States. They have that advantage to start with that we haven't got. They have got a great big operation. I don't know whether that is applicable to their situation or not.

Q. Going further to the question of joint efforts you, I believe, have provided in here that Pan American shall have exclusive sales representation for Panagra in the United States, isn't that right?

A. That is correct. Not quite exclusive. They have the general agency but there is a provision also that they will designate certain Grace offices as subagents and of course their exclusiveness doesn't mean that they don't use all the travel agencies and all the usual distribution means. They are the general sales agents.

Q. Am I correct in understanding your thesis to be that pooling this personnel training and pooling this maintenance and pooling this sales in the United States, and thereby cutting down any rivalry that might exist between Panagra as such and Pan American as such, is good for the

—156—

[fol. 4035] industry in South America?

A. In our particular case, and our particular facts and circumstances, my answer is yes. I am not generalizing in that question. I am dealing with a specific problem.

Q. Would you not recognize, Mr. Roig, that pooling training and pooling maintenance and pooling sales, all tend inevitably to a complacency on the part of these two members of Pan American system—that is Panagra on the one hand and Pan American Airways on the other.

A. Not so long as W. R. Grace and Company owns 50 per cent of Panagra and I draw the breath of life. No complacency at all.

Q. Is there any joint effort on the part of W. R. Grace and Company and Panagra in the way of operations or joint effort or joint expenses in South America, comparable to what we were talking about in relation to Pan American a minute ago?

The Witness: Read the question.

(Question read.)

Mr. Gambrell: If you don't understand it—
The Witness: I understand the question.
Mr. Gambrell: All right.

A. There is a relationship between Panagra and W. R. Grace and Company, yes.

By Mr. Gambrell:

Q. What do they do together?

Exam. Wrenn: Let him finish.

A. Well, it isn't a case so much of doing something together as it is Panagra availing itself of services of W. R.

—157—

[fol. 4036] Grace and Company in connection with quite a variety of matters—traffic, governmental relations, a good deal in the way of legal matters, local customs, and all that sort of thing.

W. R. Grace and Company provides office space in our building. They supply financial and cashiers service, and a great variety of matters of that kind, but I say it is a case where Grace is rendering certain services to Panagra.

* * * * * * *

—174—

[fol. 4037] "DOCKET 2423"

"Pan American Airways Corporation, a Delaware corporation, and W.R. Grace & Co., a Connecticut corporation, owners respectively of 50 per cent of the stock of Pan American-Grace Airways, Inc., and parties to a certain agreement dated July 30, 1946, annexed as Exhibit b to the petition of Pan American Airways, Inc., herein dated August 1, 1946, hereby stipulate and agree as follows:

"1. That they understand and agree that the Board may consider the said agreement in determining any and all issues of this proceeding;

"2. That if the Civil Aeronautics Board shall be of the opinion that either or both of them are necessary

parties to this proceeding, the Board may direct that they may be made parties as from the beginning of this proceeding:

"3. That if the Civil Aeronautics Board shall be of the opinion that the said agreement requires formal approval under the Civil Aeronautics Act, said agreement shall be deemed filed for such approval by Pan American Airways Corporation, and such filing shall be deemed concurred in by W. R. Grace & Co., in the same manner as the agreement between Pan American Airways, Inc., and Pan American-Grace Airways, Inc.;

"4. The foregoing is without prejudice to the right of the parties to argue before the Board that the said agreement does not require formal approval under the Civil Aeronautics Act and that accordingly they ought not be made parties to this proceeding."

* * * * * * *

—197—

[fol. 4038] A. I don't think there is intended to be any very violent distinction. It is the legal way of saying a thing twice.

Q. Paragraph 10: do you regard this provision for Pan American's being a general sales agent for Panagra as an essential part of this so-called interchange agreement?

Mr. Gesell: It isn't an so-called interchange agreement.

Examiner Wrenn: All right. Strike interchange and call it agreement.

A. I consider paragraph 10 to be an essential part of this agreement, Exhibit A, yes.

By Mr. Gambrell:

Q. Do you feel that paragraph 10 could not be in a separate paragraph regardless of this operating agreement?

Mr. Gesell: It is in a separate paragraph, isn't it?

Mr. Gambrell: Separate contract.

A. You mean assuming that there was or was not an agreement for through flight service in another paper.

Mr. Gambrell: Yes.

By Mr. Gambrell:

Q. Suppose there is no through flight service contemplated at all. Is there any reason, if this is desirable, this paragraph 10 provision, is there any reason why it couldn't be done in a separate contract?

A. I suppose there are lots of reasons why it couldn't be done and lots of reasons why it could. I suppose it is conceivable that you might work out such an agreement. I don't know. I never tried.

Q. Wouldn't you say that having such an agreement, I

—198—

[fol. 4039] believe covers all the territory in the United States and maybe some places outside, that that tends to restrain any conceivable competition between the service on the East Coast of South America and the service on the West Coast?

A. Well, there are various provisions intended to prevent that. I think it is conceivable, but we were confronted with a practical problem that isn't practical for Panagra to maintain in the United States a sales organization which is in any way comparable with the one that Pan American can obtain.

From a financial standpoint it would be utterly impossible. We felt that the benefits derived from the extent and size of this organization as against what we might otherwise have, were a reasonable offset against that risk, but we weren't content with that, and we therefore put in various provisions to insure adequate Panagra representation and adequate sales offices and *ade*quate Panagra publicity and adequate cooperation and sales methods and sales techniques and all that sort of thing, and all of that is primarily related to Buenos Aires traffic and on that point we also have this possibility of considering a pool.

Q. Wouldn't this arrangement have the effect of reducing the prospects of Eastern Air Lines for developing a large volume of interline business between North and South America in connection with Pan American Airways system?

A. Well, I can't see how, so long as this extends to Miami. As far as it is concerned now going to Miami, a very large part of it moves over Eastern and National anyway, and would continue to do it, I suppose.

—199—

[fol. 4040] Q. Isn't it your view that the preference contained in 9 and the general sales agency contained in 10 would influence wherever possible a movement via some carrier to the New York or Miami gate and then over this route from Miami to South America, the route in question in this case, to the detriment of Eastern, which might be trying to assemble that business and haul it down and turn it over to National conceivably to Havana and then to Braniff for South American points?

Mr. Gesell: Could we have that question read, Mr. Examiner? I don't think I understood it.

(Question read.)

Mr. Gambrell: I will simplify it.

By Mr. Gambrell:

Q. Aren't paragraphs 9 and 10 designed to make more difficult Eastern and other carriers independence of the Pan American system—to make more difficult their developing and hauling business between North and South America?

A. I don't see, Mr. Examiner, that I should concern myself about lines which are not yet in that area. Eastern is not in that area between North and South America at the present time.

Examiner Wrenn: Mr. Boig, let's take the situation enumerated there: A passenger from New York to South America going by Eastern to Miami and then National and Braniff. Take that routing in mind. Can you answer his question?

The Witness: I will say this: It is the object of our sales organization as it is that of Eastern or Braniff or National

—200—

[fol. 4041] or anybody else, I assume, to sell all the traffic

we can over our own routes. It isn't our object to sell it over other people's routes if we have a competitive one.

By Mr. Gambrell:

Q. And this contract constitutes a compact between you and the largest of all of them to get together and work for each other to the exclusion of others, isn't that right?

A. I wouldn't so characterize it. You can characterize it that way if you like. I wouldn't.

Q. Didn't you state yesterday on your direct before I questioned you at all, that one thing you wanted sure was that Eastern shouldn't go to the Canal Zone, isn't that right?

A. Yes.

Q. And didn't you say that the reason you didn't want Eastern to go to the Canal Zone was that if Eastern got there, that a part of the business south of the Canal Zone would be diverted to Braniff?

A. Well, I say diverted to—

Mr. Gesell: Let's have the page of his testimony. I don't recall his saying that. I recall his saying that the traffic would be diverted to a number of carriers at that point.

A. That is what I said.

By Mr. Gambrell:

Q. Do you deem it in the public interest under 412 or 408 that the Board should sanction this contract with the thought that it would create and maintain a situation that would deny Eastern the right to do business with Braniff?

—201—

[fol. 4042] Examiner Wrenn: You are arguing with the witness. I have no objection to you asking factual questions and bringing such things out but do you have to argue with him and make such characterizations?

Mr. Gambrell: He made that statement yesterday.

Examiner Wrenn: I have no objection to your bringing out the facts but you are arguing with the witness.

Can't you bring out the facts without introducing your own argument there? You are not going to get the witness to agree with your characterization of that.

Mr. Gambrell: I think this is a matter of economic philosophy and traffic science.

Examiner Wrenn: I don't object to your getting all the facts in there but do you have to argue with the witness and use your own characterization of things to get the facts?

By Mr. Gambrell:

Q. Paragraph 10(b) provides that if passenger presents evidence to Pan American that a Pan American employee has diverted or attempted to divert any traffic intended for transportation over Panagra's routes, certain things would be done about it.

What do you mean by the word "intended" there? Intended by whom?

A. Well, it might mean intended by the passenger. That would be the most obvious meaning.

Q. Could it be intended by anybody else?

A. It could be, yes.

Q. In other words, it might be intended by Pan Ameri-

[fol. 4043] can or Panagra?

Mr. Gesell: No. That isn't what he said.

A. It couldn't be that, could it?

By Mr. Gambrell:

Q. Who else could it be besides a passenger?

A. Well, I think that you have gradations of expression by the passenger. You might have in the clearest case a passenger who came in and definitely stated he wanted to go by the West Coast, and this case might cover a situation where he had been sold out of that idea, to go down the East Coast.

On the other hand, there are a great many shadings of that. A person might be uncertain which way he wanted to go, but there might be some reasons in the situation where he would more advantageously go by the West Coast, but those advantages weren't pointed out.

The intent is to be very broad, to see to it that nothing is done to result in just the situation that you were concerned about a moment ago under this other clause.

The intention is to be very broad to see that Panagra's legitimate and reasonable traffic moves over Panagra's route and is not interfered.

Q. Suppose that there is a situation where it is obvious that the passenger, to his own advantage, should ride by Braniff or Eastern and National, and this Pan American agent of Panagra makes bold enough to say: "I think you ought to ride that way." Would that be a ground for complaint here?

A. That wouldn't have anything to do with this, no. This

[fol. 4044] is just between Pan American and Panagra.

Q. Isn't this in effect a provision to police the restraint provided in 10 above? That is to keep all these passengers—

Mr. Gesell: That is an argumentative question, Mr. Examiner. What restraint? There is no testimony about any restraint provided.

By Mr. Gambrell:

Q. If this is an ideal arrangement why do you have to put this policing provision in there?

A. Most ideal states require a certain amount of supervision.

Q. Let's go to 10(c). Is it your understanding that provision means that Panagra can set up any plan of getting business, and Pan American is expected to put it into effect without Board approval?

A. Well, if it were the sort of thing which required Board approval, of course not. It certainly was never my intention that this clause never related even remotely to anything requiring Board approval. It is just ordinary sales practices.

Q. It is between two companies, isn't it?

A. Well, it is between two companies in the sense that

al

one is the principle and the other is the agent. When an airline is dealing with a travel agent or with a railroad, or even a steamship line—because after all steamship lines sell a great many air tickets—the airline will prescribe

methods of how they want their business handled. It never occurred to me that that was a thing you had to take up

—204—

[fol. 4045] with the CAB. I thought they were busy on more important matters.

Q. 10(d). Why was Grace W. R. Grace and Company designated?

A. Well, W. R. Grace and Company has an office or the Grace Line as a matter of fact have an office in Radio City, and W. R. Grace and Co. itself has a transportation office in our building on 7 Hanover Square, where we sell a very substantial amount of air traffic.

Q. You sell steamship traffic there also?

A. Yes and we sell air traffic over Eastern Air Lines and a good deal of it. We have very pleasant relations with them. Braniff too, for that matter.

Q. What are the affiliated companies referred to there?

A. I have never found any objection on their part.

Mr. Schneider: Nor will you.

The Witness: Braniff solicited the business only quite recently.

By Mr. Gambrell:

Q. Who are the affiliated companies mentioned in sub paragraph (d)?

A. In the case of the Radio City office it would be the Grace Line because that happens to be their office. There might at any time be another. I don't recall another at the moment.

Q. Paragraph 11: What is the purpose of contracting to have the Panagra name displayed at the various Pan American stations in this country?

—205—

[fol. 4046] A. Well, that is a bit of history. There has been some question between Pan American and Panagra as to the advisability of using that name "Panagra" instead of Pan American Grace Airways, and it was thought advisable to clear up that question by agreeing that we could use the word "Panagra."

Q. Either Pan American Grace Airways or Panagra—why is it essential that that should be displaced at the Pan American office in this country?

A. Well, because in South America Pan American Grace Airways—as a matter of fact, Pan American Airways in many places—is generally commonly referred to as Panagra.

On the West Coast Pan American Grace is always referred to as Panagra, and after all, the people who come into the Pacific office in the United States are in large part South Americans to whom that name is immediately familiar.

Q. I think you misunderstand me. I am not speaking of the condensed name. I am speaking of why should your organization have its name around in the Pan American Airways offices in this country, whether it be Panagra or Pan American Grace?

A. Well, to emphasize the fact that that is the place where you can buy tickets on the Panagra route from Balboa to Buenos Aires or any point in between, the same as we run ads in the magazines to advertise our existence.

Q. You spoke of having business with Braniff. Do you insist upon that in the Braniff offices in this country?

Mr. Gesell: He talked about Braniff having business with him.

—206—

[fol. 4047] By Mr. Gambrell:

Q. You have an interline arrangement.

A. No. Nothing of the kind. All I said about Braniff was that W. R. Grace and Company's transportation department sells Braniff tickets. They sell Eastern tickets. I suppose Braniff and Eastern and all the airlines sell Panagra tickets on an interline basis the same as we sell all the other tickets but that is a different proposition.

Q. Is this provision in other parts of this agreement for putting your name in the Pan American offices, is it with the thought of emphasizing a sort of general identity with the Pan American system?

A. On the contrary it is with the object of pointing out the identity of Panagra as a separate entity.

Q. Is it then to give the impression to the passenger that Panagra is in Miami or Panagra is in New York or at Chicago as the case may be? Are you trying to teach the public that you extend all the way into this country?

A. We are trying to sell the public tickets on Panagra *in* and to make plane the fact that they can get through service on the Panagra plane over the Pan American system to Balboa and our own system from there on, but the through flight, the through service, the one plane thing, we are *meet* trying to emphasize. We have to emphasize it to ~~meet~~ the competition which is using it against us.

Q. You would feel that it is wrong to give the impression that Panagra comes into this country unless it does?

A. Well, I don't see that we are giving that impression, except by plane. The contract contains numerous provi-

—207—

[fol. 4048] sions that that should not be done.

Q. 11(a)—

A. The ticket will show it.

Q. In 11(a) you have provision that Panagra personnel may come and stay in these Pan American stations?

A. Pardon me. What paragraph?

Q. 11(a). You provide that Panagra personnel may come and work in the Pan American stations to assist in the handling of traffic.

A. Yes.

Q. If Pan American's agency is an efficient and competent agency why do you need to have your personnel at considerable expense detatched—

Mr. Gesell: There is no testimony about considerable expense.

Mr. Gambrell: Do they work for nothing, Mr. Roig?

Examiner Wrenn: We have had enough of that. Go ahead with the question.

A. This, Mr. Gambrell, is something quite different from what we have been talking about. This personnel is not

in the sales offices. This personnel is in the ports of arrival—let's say, Miami.

Now, the reason that we have that provision is because we have had *personnel* for sometime in Miami already, although we have not had any planes coming through, and we have found that it served a very useful purpose. We have passengers that we bring from let's say Buenos Aires, Santiago or Lima, and they transfer at Balboa and arrive at Miami.

Many of them speak no English, are wholly unfamiliar

—208—

[fol. 4049] with the habits and customs in this country. They require a special attention which it cannot be expected that any general traffic organization will give them, but which we consider it good business to give from a goodwill angle, and it has been abundantly demonstrated that it pays handsome dividends.

Examiner Wrenn: And that is the purpose?

The Witness: That is the purpose of this: To have these special representatives to give special extra attention to passengers arriving primarily to take care of these passengers arriving from South America, but we also find it is a very satisfactory thing going southbound, and with American passengers too, they have the question of transferring at Miami to Eastern and National or the railroad and it is a great convenience to have a little personal service and we believe in personal service.

We have built up our business on personal service. Our whole concept of an airline operation is totally different from anything that exists in the United States under that heading.

Examiner Wrenn: I wanted to be sure that I understood you, Mr. Roig. Is it my understanding that this was contemplated only at ports of entry, is that right?

The Witness: Yes, that is right.

By Mr. Gambrell:

Q. It is not in any sense to give the impression to the traveler that Pan American's operations extend into this country—I mean Pan American Grace?

A. No more so than the man we have had in Miami for

—209—

[fol. 4050] the last five or ten years was to give that impression.

Q. Was he to give that impression?

A. No. He was to look after these people.

Examiner Wrenn: Why is it so important anyway, Mr. Gambrell?

Mr. Gambrell: Well, if they are asking the Board to approve it for 99 years, it seems to me we ought to find out what is its purpose. It costs money although Mr. Gesell says it doesn't.

Examiner Wrenn: I don't see why it is so important when as a matter of fact the record shows they do not extend in the United States.

Mr. Gesell: Isn't it time also, Mr. Examiner, that Mr. Gambrell took cognizance of the testimony on the record and the provisions of the statute which make it clear that the Board can disapprove this agreement at any time.

Examiner Wrenn: I don't know. I addressed that question to him yesterday.

Mr. Gambrell: If the approval is not of any effect it seems to me we ought not to spend time getting the approval. There must be some advantage.

Examiner Wrenn: Are you clear on paragraph 11(a)? If so, proceed.

By Mr. Gambrell:

Q. There is no reason, no practical reason, why this arrangement could not be set up as a disassociated arrangement apart from the matter of operating your planes all the way through, is there, Mr. Roig?

A. You mean this matter of a representative?

—210—

[fol. 4051] Q. Yes.

A. Oh, no. As I said, we are doing it now and have for a number of years without this contract.

Examiner Wrenn: Does Eastern Airlines advance the contention that this particular paragraph should be disapproved or there should be a condition attached?

Mr. Gambrell: I am trying to find out what it means, sir, and to find out, of the Board wanted it in, whether it could be handled without the extended service.

Examiner Wrenn: You were talking about paragraph 12.

Mr. Gambrell: Yes, sir.

By Mr. Gambrell:

Q. Without going into the details there, you have provided that the tickets, if possible, shall show that this service is conducted under the particular arrangements made. If this is a clear responsibility of Pan American Airways north of Canal Zone, why it is necessary to explain to the passenger that this plane is rented from Panagra?

A. Well, that isn't quite what this says. I am not quite up to date on this question, but my recollection is that it has been decided that it isn't practical to have that on the tickets anyway.

Mr. Gesell: Mr. *DeGroot* is the witness on that. He will testify that we are going to continue to use the same tickets precisely as are used at the present time.

Mr. Gambrell: I am not undertaking to say they are right or wrong. I wanted to know why the passenger must be told this.

Examiner Wrenn: All right. Proceed. You have had an

[fol. 4052] answer.

Mr. Gambrell: I am answering Mr. Gesell now.

Examiner Wrenn: I don't think we need any more answers one way or the other on that. We will proceed.

A. (Continuing) The thought was that if practical, as it now turns out not to be, the ticket should indicate that the plane trip was being made on Panagra aircraft in order to emphasize the fact of through flight service, which is the whole object of the contract.

By Mr. Gambrell:

Q. Look at 12(e). What is the advantage of having Pan American act as tariff and schedule publishing agent for Panagra?

A. Well, we have always done it that way and it has worked out satisfactorily. They have a larger organization than we have to handle that sort of routine work.

Q. Is it because you regard your service as a part of the Pan American Airways system?

A. Well, if you imply anything sinister from that, no. Obviously it is because we are associated that they are willing to do it. I suppose if we asked Eastern or Braniff to do it they would say, "Why should we bother?"

Q. Is it because there is a special effort to coordinate and synchronize your schedules—yours and Pan American's?

A. The filing officers and the filing employees are not the people who decide those questions. That is another question. Whether or not we coordinate schedules depends on traffic policy considerations in which traffic people are consulted, and others also, but this particular thing relates

—212—

[fol. 4053] entirely to a mechanical process of filing schedules and tariffs.

Q. Then you would say that it has no relationship to the fact that Pan American Corporation owns 50 per cent of Panagra?

A. You can draw any inference you like from that. I have explained as best I can.

Q. Paragraph 13: Would you indicate what sort of an agreement is contemplated here—I mean the framework of such an agreement?

A. You are speaking now of "A," the Buenos Aires pool?

Q. Yes.

A. Well, it would relate as indicated to Buenos Aires and Montevideo assuming they were the two common points. I assume it would follow the usual form of a pooling agreement which generally provides for each of the parties to the arrangement carrying a certain percentage of the trade, and if they don't carry it, adjusting the differences.

Now, the percentages of the trade are usually determined by the actual situation as it exists at the time, and the settlement for differences, and this is why pooling agreements do not restrict competition in the sense that it is commonly supposed, because these adjustment provisions

in practice, always work out that unless a line is carrying its percentage of the trade, it doesn't just get a free ride.

When the pooling agreement is renewed the percentage is reduced so that under a pooling agreement there is a definite incentive to maintain at least your percentage in

. . . . . .

—221—

[fol. 4054] The Witness: ~~We~~ *They* have one.

By Mr. Gambrell:

Q. What?

A. National through Havana.

Q. You think that is adequate?

A. I think it is an outlet. I don't know whether it is adequate or not. Time will tell. It has certain weaknesses.

Q. You spoke yesterday about wanting Eastern to come in because it would divert traffic to Braniff or give Braniff more traffic.

Mr. Gesell: Mr. Examiner, he did not say that. That is the third time we have had that up. Mr. Roig's testimony is clear. He said when Eastern got to the Canal it could divert the traffic to all the carriers, not to Braniff. He is misrepresenting the statement on the record.

By Mr. Gambrell:

Q. Is it your position that Braniff is not entitled to any traffic moving to and from the eastern half of the United States?

A. I think Braniff is entitled to all the traffic they can get.

Q. But you feel that your company is entitled to a pool that locks it up from Braniff?

A. We don't lock up the traffic from Braniff. We just divide it between the two of us already in the business and who pioneered it. But anybody is welcome if CAB authorizes them to come in.

You seem to have the idea, Mr. Gambrell, some how, that

—222—

[fol. 4055] the whole stage should be set to benefit the people who have never been in the business, never pioneered it at all, who are walking in to skim the cream after somebody else has raised the cow, and that all that should be done at the expense of the people who have been there all this time, and that the people who were there, have been there all this time do anything to protect themselves and to put themselves on a parity with these newcomers that there is something wrong about it.

I don't understand the psychology.

Q. Didn't you state this morning that Eastern had had until recently 100 per cent of the Latin American haul, all of that South American business, north of Miami?

A. I said a few moments ago, that until National came into the field Eastern had such business from that area as moved over Eastern, or moved over air. There was no other airline, but I did not say they had 100 per cent of it.

A great deal of it came by railroad. A lot of it was moving before Eastern was in existence. Pan American and Panagra were moving this service before Eastern went to Miami. It came by railroad.

Mr. Gambrell: Let us check it.

Mr. Gesell: The what?

Chairman Wrenn: We can get the facts without so many characteristics.

By Mr. Gambrell:

Q. You spoke about the fellow pioneering being entitled to it, and that it was wrong for some person to come along and skim the cream. Is it not true that Eastern had 100 per

—223—

[fol. 4056] cent of the air carrier haul between Miami and New York up until a year or two ago, over a period of some 15 or 20 years? You can say yes or no on that.

A. By virtue of their being there, and nobody else being there.

Q. And you had virtually 100 per cent of the U. S. flag haul from the Canal Zone south, down the west coast.

Examiner Wrenn: Now you are arguing back and forth.

Mr. Gambrell: No. Isn't that right?

The Witness: Yes.

By Mr. Gambrell: Do you take the position that by reason of your position and Eastern's position you should be the one to provide a service with Pan American in addition to the present Pan American service between the Canal Zone and Florida, in contradistinction to Eastern?

A. All I am asking is that Panagra should be enabled to be in at least an equal position with newcomers, and should have such protection in its—as a result of its pioneering position, as the CAB in decided cases has held that a company in that position is entitled to. Nothing more.

Q. You are not claiming that Panagra is any more of a pioneer than Eastern, are you?

A. Oh, yes.

Examiner Wrenn: I don't care who is more of a pioneer. This has gone far enough. That is enough on that score. Let us have another line of questioning.

Mr. Gambrell: I would like to explore that.

Examiner Wrenn: Go ahead.

—224—

[fol. 4057] Mr. Gesell: You have in mind my continuing motion here to strike this, Mr. Examiner.

Mr. Gambrell: I am willing to strike his remark about Eastern not being a pioneer.

Examiner Wrenn: When we strike his remark we are going to strike the question.

Mr. Gambrell: It is stricken?

Examiner Wrenn: Not yet.

By Mr. Gambrell:

Q. You know that both services were originated about 1928, do you not?

Examiner Wrenn: Mr. Gambrell, what relation does that have to the matter here?

Mr. Gambrell: I want to know myself. He brought it up.

The Witness: You asked the question.

Examiner Wrenn: We will have no more questions on that matter of pioneers.

Mr. Gambrell: He brought out the pioneer subject. I did not bring it out. If you will confine him to the questions we will save a lot of time.

Examiner Wrenn: Will you address another question, please?

By Mr. Gambrell:

Q. Let us look at paragraph 14. Do you regard the provisions of that paragraph as essential to this contract?

A. Yes.

Q. Why?

A. Well, because under them, as I explained before, we

-225-

[fol. 4058] clear up the matter of the use of the name "Panagra" and we provide for, provide a plan under which Panagra may derive certain definite advantages from Pan American's advertising and publicity, which, is very extensive in the United States; far more so than Panagra could provide for its own account.

Q. Do you feel that that would be—that that arrangement of publicity is designed to get more business for the operations of Pan American and Panagra?

A. Why certainly.

Q. Is it your thought that it will be likely to divert from other carriers in the territory between the United States and South America business which they might get?

Mr. Gesell: That is too general. We will have to know what carriers he is talking about.

By Mr. Gambrell:

Q. Any carriers.

A. Well, I certainly hope that it will succeed in getting business for Panagra. Just as I dare say you and Braniff expect that your advertising will get business for your lines. Braniff has been advertising the route all

over the South American territory on the South American map for almost a year. They have only been certified for a few weeks and they are not yet running it. But it is perfectly legitimate for them to publicize for business. I suppose that is what we spend advertising money for.

Q. Paragraph 15. Why are the Panagra employees exempted in the second and third lines?

Mr. Gesell: Mr. Examiner, these liability and financial provisions of the contract are going to be covered by Mr. Ferguson and Vidal. I don't want to limit this examination in any way, but since they are going to be discussed in detail with those witnesses, I suggest they are the more appropriate witnesses.

—226—

[fol. 4059]

Mr. Gambrell: I am willing.

By Mr. Gambrell:

Q. If this is, in fact, a Pan American operation, north of the Canal Zone, why can't Pan American just assume to pay the crews and other expenses connected with the operation instead of having the bookkeeping routed through Panagra in respect to salaries and other expenses?

Mr. Gesell: Is that a financial question which I thought would be directed to the other witnesses?

Mr. Gambrell: I thought you said—yes; excuse me.

By Mr. Gambrell:

Q. Paragraph 18. Is it your understanding of that paragraph, sir, that if the occasion should arise wherein it might be in the public interest for Pan American to transfer a certificate, say, New Orleans, Merida, Canal Zone route, say to Chicago and Southern, that you want to have here the Board approve a contract whereby you could block such a development?

A. That is not the object of the clause. Again, somebody has to think of Panagra. Everybody else seems to be thinking of everybody else. I am not thinking about blocking somebody else, but I am thinking about seeing to it ~~that~~ *for*

that
Panagra, ~~the~~ Pan American, keeps itself in a position to render this service to Panagra.

227

[fol. 4060] Now, if the Board approves this contract that will be a determination of the public interest in respect to that matter which is the only one before us.

If a new question of public interest comes along, presumably the Board would have to withdraw its approval of this contract, or something of that sort. I don't know what.

Q. You are familiar with Section 401 (i) and Section 401 (k), having to do with the Board's jurisdiction on the transfers and abandonments, are you not?

A. I am not, I am sorry to say.

Mr. Gesell: That is a legal question.

By Mr. Gambrell:

Q. Isn't Panagra willing to leave to the Board's present jurisdiction and its present wisdom the matter of when and if Pan American shall transfer, or abandon a certificate without trying to tie the Board up by decision on that question now?

Mr. Gesell: He has testified, Mr. Examiner, that there was no effort here to tie the Board up; that the Board could disapprove or qualify the approval of this so that it would be free to act in any other case. Mr. Gambrell is putting words in the witness' mouth.

Examiner Wrenn: I think his testimony is clear on that point, Mr. Gambrell.

By Mr. Gambrell:

Q. Is this an essential provision in this contract?

A. Yes.

Q. Do you wish the Board to be bound by its decision on this matter?

228

[fol. 4061] A. Well, I expect the Board to be bound by the decision it takes and I expect them to take such decision as they deem wise and qualify it in such form as they deem necessary.

Examiner Wrenn: Let us get what the witness and counsel are talking about.

I may be wrong, but it seems to me like you are speaking at cross purposes.

Mr. Gesell: We thought there was a Section 412 (b) in the Act, which was applicable here.

Mr. Examiner, you asked yesterday about that, and brought no answer from Mr. Gambrell. It is perfectly clear that the Board can disapprove this contract at any time. We have testified to that effect, that we consider, despite the term provisions of the contract—Mr. Roig testified on direct—it was the understanding that the Board at any time could disapprove this arrangement.

Now, isn't it clear? What possible confusion is there on the record on that question? We come back to it and back to it.

Examiner Wrenn: The only point I want to clear up there, if there is any need for clearing, is Mr. Roig's idea of what that particular provision means from the Panagra standpoint.

The Witness: Our ideas, as I tried to state, were to bind Pan American to continue to retain the certificates without which we would be unable to provide the service which is the object of the contract to enable us to provide.

Examiner Wrenn: Thank you, sir.

By Mr. Gambrell:

—229—

[fol. 4062] Q. Let us look at paragraph 19. What right does Pan American Airways, Inc., have to say who shall represent or take the position for Panagra? That is, that should make this provision necessary. I note you have agreed here, in paragraph 19, rather, Pan American agreed, that any action taken by Panagra under this agreement may be taken on behalf of Panagra by its President. Has Pan American Airways, Inc., any control over Panagra, or any rights to designate who shall represent Panagra?

A. It has no control over Panagra, but as a party to a contract with Panagra, I should think it had the right to agree who in Panagra might take action with respect to the specific clauses of that contract, which is what this provides.

Q. I note that the latter part of paragraph 19 saves from that provision General Board action on policy questions, meaning, particularly, among others, purchase of equipment, the establishment of reserves, and the financing of depreciation rates.

Are we to understand that at present Pan American, or Pan American Airways Corporation has the veto power on the question of purchasing Panagra equipment?

A. No,-not as such, but the Pan American Airways Corporation owns half of the stock, and naturally is in a position to elect half of the directors.

The import of that provision is that the question of control of this company continues to rest, as it always has, dating back before the Civil Aeronautics Act was passed, and coming along under the grandfather clause, in these

-230-

[fol. 4063] stockholders and Board of Directors on this 50-50 basis, and the authority given the President - this is intended to make perfectly clear - is not in any way to effect that question of control.

Actually the authority given the President is merely to inaugurate processes for the determination of questions which might arise under the contract. The President is given no authority to settle these questions. He may inaugurate the processes without risk of deadlock, but the processes are in every case negotiation, or arbitration.

But even those processes are wholly unrelated to the question of control of this company which remains where it always has been.

Q. Parenthetically, reference was made in the paragraph to purchase of equipment. Are we to understand that purchase of equipment is solely a matter for the Board of Directors of Panagra, four of whom are on one side, and four on the other?

Mr. Gesell: There is nothing about sides here. There is nothing about sides in this record at all.

The Witness: Purchase of equipment. By that we mean substantial equipment. I buy small stuff all the time; but when it comes to buying airplanes, that matter always goes before the Directors of this company.

By Mr. Gambrell:

Q. As a practical matter in the operation of the corporation, is it correct that if the four directors coming from Pan American Corporation do not agree to the purchase of equipment, it can not be bought?

—231—

[fol. 4064] A. Theoretically that question would be true, but it has never arisen in our 18 years. We bought several types of equipment; we have had suggestions and discussions about that—I am talking about flying equipment now—we have had discussions about the type of equipment that was best suited. Pan American had ideas sometimes that differed from Grace. We have always decided on the type that was best for our peculiar problems on this operation without any difficulty of any kind.

Examiner Wrenn: Mr. Roig, does paragraph 19 eliminate any possible continuation of that; what you have described as a theoretical condition?

Mr. Gesell: Are you talking about equipment, or the matter in general?

Examiner Wrenn: Equipment.

The Witness: As to equipment, I don't consider that 19 changes the situation as it has previously been. In fact, it expressly perpetuates it. But as I say, it ha never been a problem.

Examiner Wrenn: What I was getting at was whether the intent of 19 was to meet a condition of that kind. Your answer is no.

By Mr. Gambrell:

Q. Paragraph 20—

The Witness: Perhaps I might say a little more, Mr. Examiner, in answer to your question.

Examiner Wrenn: Go ahead.

The Witness: While one of the directors of Grace has been designated as President of this company since 1939,

—232—

[fol. 4065] and it is intended to continue on that basis, the President's functions have always been strictly administrative.

He has never been put in a position of control of the company, and it is only through the President that Grace has ever been in any different position than Pan American; and that, as I say, has not been one of control, but merely one of taking on a very laborious job of administration.

This contract does not change that ~~an~~ in ~~a~~ any sense. If it changes it in any way, it reduces even the position of the President as it has presently existed, because, in the first place, it provides very clear and specific methods of getting rid of a President.

Up to now the President has been in the position that once in it might be quite difficult to get him out with a 50 50 situation. That difficulty has been removed.

Also, there is a provision which is now in this contract, that the operating Vice President must be subject to the approval of Pan American. So that, actually the powers of the President, which, as I say, are the only things that I can see that can be regarded as having any bearing on this control question, have been actually reduced.

Examiner Wrenn: Thank you, sir.

By Mr. Gambrell:

Q. Let us now go to paragraph 20.

Mr. Gesell: I don't object to questions to Mr. Roig on this, but this is the area concerning the actual court proceedings. I think Mr. Friendly would be a more appropriate witness of what is going to occur. We will leave that to the Examiner.

—233—

[fol. 4066] Mr. Friendly has had the discussions concerning the implementation of that paragraph with the various attorneys and court officials.

Examiner Wrenn: If that is agreeable, we will defer questions to Mr. Friendly; then, if you need Mr. Roig, I assume he will be available.

Mr. Gambrell: I won't ask but a question or two. I would like to ask him now if I may.

Mr. Gesell: It is all right with me.

By Mr. Gambrell:

Q. You helped to negotiate this contract, did you not?
A. Only indirectly, yes.
Q. You signed it?
A. Yes. There is not anything in it, I think, that I am unfamiliar with.

Mr. Gambrell: Off the record.

(Discussion off the record.)

Examiner Wrenn: Go ahead.

By Mr. Gambrell:

Q. I note that you state that the parties will use their best efforts to obtain such approval as expeditiously as possible, approval by the Civil Aeronautics Board.
Have you done anything along that line other than testify here?

Examiner Wrenn: Are you speaking about Mr. Roig, personally?
Mr. Gambrell: Yes, sir.
The Witness: It was simply preparation for the hearing.

By Mr. Gambrell:

—234—

[fol. 4067] Q. Have you discussed this contract with anybody, either in the making of it, or since? I mean, any public official.

Examiner Wrenn: Aren't you repeating testimony questions you asked yesterday afternoon?
Mr. Gambrell: I don't think so.
Mr. Schneider: The question yesterday—I think, if you check the record—was whether Mr. Roig had discussed the interpretation of the Latin American decision and the mandate of that, as to whether this contract met that mandate.
Examiner Wrenn: What is the difference between this?
Mr. Schneider: Quite a difference.
Mr. Gesell: What is the question? Did he discuss the contract with anyone? If so, it is yes. He talked with a

lot of people about that, to Mr. Friendly, and everybody else.

By Mr. Gambrell:

Q. Have you undertaken with any public official to discuss the makeup of the contract, or its being in the public interest, or not in the public interest?

Mr. Gesell: I object to that, Mr. Examiner. I can't see its relevancy to this proceeding at all, who Mr. Roig has talked to, or what he said. What possible bearing has it on this contract?

Mr. Gambrell: I would like to know what he has done to fulfill that obligation, to have it approved.

Mr. Gesell: That is a different question than the one you are asking. The question is what steps Mr. Roig has taken to have this contract approved.

Examiner Wrenn: I don't object to that.

—235—

[fol. 4068] Mr. Gesell: I think that question is pertinent.

By Mr. Gambrell:

Q. Have you discussed it with any public official?

Mr. Gesell: That is the question I object to. I do not see its relevancy here at all.

Mr. Hickey: I think that is relevant. It bears on public interest.

Mr. Gesell: If we are going to go into that, Mr. Examiner, I had not thought of it on the public interest, I think we should make it perfectly clear that there should be called here witnesses from Eastern Airlines and Braniff and the other airlines to discuss the activities of their officials in respect to this matter, and the discussions they have had.

And then, perhaps, I think we should have the various public officials in to bring out what they said about Panagra.

Mr. Hickey: We would be glad to. It all depends on with whom he spoke, Mr. Examiner. It could be quite relevant. It depends on the answer to the question.

Examiner Wrenn: I still don't see the materiality of it. Go ahead and ask him what steps he has taken toward getting this contract.

By Mr. Gambrell:

Q. What action have you taken with respect to this contract in relation to public officials?

Mr. Gesell: That is not the question. I thought the question, Mr. Examiner, indicated what steps had been taken to expedite the approval of this contract. I think that is

—236—

[fol. 4069] the proper question.

Mr. Schneider: And that includes the necessity of the narrow question which Mr. Gambrell asked.

Mr. Gesell: It does not.

Mr. Schneider: It is phrased in general; maybe not specific.

Mr. Gambrell: I asked the question, and Mr. Roig has not answered it. I am willing to ask another question without withdrawing my question.

Mr. Hickey: Before we pass this question I would like to suggest the clear relevance to it. I know this is an impossible situation, but to show the clear relevance: If Mr. Roig had discussed this matter with you, there would be no question about its relevance in this proceeding, would there?

Examiner Wrenn: If you are asking the question of me—

Mr. Hickey: Of course he hasn't, but I am trying to show how material the question is, and why it is relevant for Mr. Gambrell to ask him.

Examiner Wrenn: I can't agree with you on the illustration you used at all.

Mr. Hickey: I am trying to make the illustration as ridiculous as I can to show how clear its relevancy is.

Mr. Gambrell: I will go to another question, not having had an answer to the previous one.

By Mr. Gambrell:

Q. Looking to paragraph 20 (b), I note that you provide that except for paragraph a. of 20 (b), and paragraph 22, which became operative immediately, the agreement is sub-

—237—

[fol. 4070] ject to the approval of the Board.

Now, do you consider that paragraph 20 (a) is now in effect, Mr. Rolz?

under *Pan American was forthwith to*

A. Yes, because "(a)" ~~if under that was to forthwith~~ file application, and they have filed it.

Q. Are you familiar with the language of Section 412 (a) of the Act, which says that "Any agreement for co-operative working arrangement must be filed for approval, and it is subject to the Board's approval?"

A. Yes, that is why we filed it.

Q. Is paragraph 20 (a) a cooperative working arrangement, or is paragraph 22—a cooperative working arrangement?

A. We are in a complete circle now.

Mr. Gesell: Mr. Examiner, Mr. Gambrell knows very well that if all carriers waited for approval under 412, of all agreements filed, before they were acted on, we wouldn't have any airline industry today. People are constantly filing agreements under 412 and proceeding with them, and they do not wait for approval; and that is perfectly well understood.

The Witness: No, but this is just apparently according to Mr. Gambrell, we were supposed to have gotten the Board's approval before filing the application.

By Mr. Gambrell:

Q. You don't think you should have had the Board's approval before you agreed to do everything possible to have this contract approved?

A. No, I don't think so, because that really means the

—238—

[fol. 4071] two things there—the only things that are agreed to, to be effective immediately; one is that we agreed that

Pan American would file, and that we will carry the thing through.

Q. You agreed to work in concert to get this thing approved?

A. Yes.

Q. And you feel that that is binding?

A. I would have thought it was.

Mr. Gesell: The customary provision in all agreements of this kind.

The Witness: You have to break in the circle to get started.

Mr. Gesell: It has been proven again and again.

By Mr. Gambrell:

Q. Paragraph 21. Why do you use the expression "as between the parties" there? "This agreement shall be for a term of 99 years." Just the term, "as between the parties".

A. That is the point we had up so repeatedly that we did not assume it would preclude the Board from its right to terminate it any time they saw fit.

Q. I note that you have said in 21 (a) that if at any time subsequent to December 31, 1948, Panagra shall not be satisfied, certain things may happen.

Why did you limit them to action after the end of the year 1948?

A. Well, we thought there ought to be some reasonable trial period, that this involved certain adjustments and there was no point in making a contract that would just be torn up the next week.

—239—

[fol. 4072] Q. You would say the same thing as to the first line in subparagraph (b), I suppose.

A. Yes.

Q. I note at the end of subparagraph (a) you have a three month's notice provision and at the end of subparagraph (b) you have a one year provision. Why the distinction, giving Panagra a year in which to make amends and Pan American only three months?

A. Well, I must say I have forgotten the considerations that led to that. Perhaps I could recall if I could ~~remember~~ *read* the whole thing over again.

Q. Let us go to paragraph 22.

A. If I recall this afternoon, I will be glad to state.

Q. I note in paragraph 22, in effect, provides that this agreement and the things done in connection with it, and pursuant to it, are without prejudice to the parties if the agreement should be disapproved, or at any time after the agreement terminates. In general, that is the effect of it.

Why do you regard that as a desirable part of this agreement?

A. Well, if the Board should disapprove this agreement, and we had to go back to the legal proceedings, we certainly did not want the effort to arrive at a settlement to be considered prejudicial; efforts and negotiations for compromise and settlement are ordinarily not considered prejudicial, if they don't succeed.

Q. Would that go so far in your opinion as to inhibit Pan American from using the testimony you are delivering

—240—

[fol. 4073] here if it desired to use it in the uncompleted Docket 779, at a later time?

A. Well, that is a legal question. I don't know. But I have no objection except on legal considerations to the use of any testimony I give in any hearing, in any other hearing.

Q. As you understand it, there is no effort here to keep without reach of another proceeding any testimony that might be delivered in this hearing.

A. Well, I say as far as I am concerned, I am not taking *position* any ~~compromise~~ one way or another involving myself in the legal technicalities.

But when I make a statement, wherever I make it, I consider it good at all times.

Q. When you state the truth in this hearing it is the truth in any other hearing.

A. That is my endeavor.

Q. I notice in paragraph 23 (a) reference to the intention of the parties being to liberally construe this agreement to the end that through traffic will be handled with efficiency.

I suppose that through traffic you refer to as the same through traffic you referred to earlier this morning.

A. Yes.

Q. And it would not include the traffic moving between Eastern's system and Braniff's system via Miami and the Canal Zone gates, would it?

A. It would include such traffic moving through the Miami gate. Yes, precisely; because that—if the Eastern or Na-

[fol. 4074] tional delivered traffic to us at Miami—to Pan American at Miami for destination Lima, Santiago—that would be through traffic.

Q. Back on Braniff, the Canal Zone, Eastern's system in this country, through Miami, and Braniff's system in South America through the Canal Zone, that would be local in your view, wouldn't it?

A. Yes.

Q. Do you know whether Mr. Trippe, who signed this agreement, will be present?

A. It is not the intention.

Examiner Wrenn: Ask counsel for Pan American.

Mr. Gesell: He is not on the list of witnesses. He is in Europe, isn't he?

By Mr. Gambrell:

Q. Mr. Roig, do you know whether he would be available for questions, if called now?

A. I really know nothing about Mr. Trippe's movements.

Q. Looking now to Annex 1—

Mr. Gesell: That is accounting matters, again, Mr. Examiner. That is covered by the same thing.

Mr. Gambrell: Excuse me. I will pass that.

By Mr. Gambrell:

Q. Let us go to Exhibit B for a moment. You did not sign this document, did you?

A. No.

Q. Will Mr. Grace be within reach for questions? I note he signed it.

A. He would be available if necessary. I am thoroughly

—243

[fol. 4075] familiar with it; rather more so than he is.

Q. You stated yesterday that in the making up of these contracts there was a good deal of debating as to whether certain parts should go in one or the other.

Do you remember any particularly important paragraphs that are more or less in the interchangeable status?.

A. No. I think Mr. Friendly could tell you about that. I was not personally a party to those discussions. They were discussions rather than debates, I should say.

Q. Do you regard this contract as one of complete mutuality? I note that you say "Under the terms of the agreement it is the consideration of mutual companies."

Mr. Gesell: It couldn't be a contract if there was not mutuality.

By Mr. Gambrell:

Q. Is this a contract in which Grace gets something, and Pan American does not, or vice versa, or do they both acquire rights under this, as you understand it?

A. Well, they both undertake to—well, now, wait a minute. May I have that question again?

Examiner Wrenn: Read the question.

Mr. Gesell: Doesn't the contract speak for itself, as to what rights the parties get under it? It is perfectly explicit. It has paragraphs and says one party undertakes to do certain things and the other undertakes to do certain things. Isn't it perfectly clear when you read it that that is what happens. What does the question have to do with this proceeding?

Examiner Wrenn: I think it is perfectly clear. Let him

—243

[fol. 4076] answer.

(Question was read by the reporter.)

The Witness: I think that the clause which essentially falls within that question is the very first clause, under

which they each ratify the other contract, Exhibit A, and each acquire whatever rights and assume whatever obligations that may impose on them, or on their jointly owned company.

Then, going on to the other provisions, they are somewhat regulatory.

Under 3, Pan American undertakes to implement the provision that a Grace director shall be present by undertaking that its directors will so vote.

In No. 4, Grace has the right under certain circumstances to either require correction in the administration of Pan American's sales contract, or if it is not provided—if it is not corrected after arbitration, to secure termination.

There are a number of things. You see them as you go through. Those are the high spots.

By Mr. Gambrell:

Q. Do you regard ratification by Grace and Pan American Corporation of the Contract A as essential to its binding effect upon parties to Contract A?

A. Well, there are certain contracts that require approval of stockholders. ~~A contract~~ *There* used to be, as I remember, an old-fashioned rule that a contract which extended beyond the term of the directors then in office, it would be a good idea to get it ratified by the stockholders.

I don't suppose any of the present directors will live

—244—

[fol. 4077] 99 years. ~~There~~ *That* may have been the idea. I suppose there was *discussion* between the lawyers—they can answer for themselves—but on a contract of this importance, and of this duration, stockholders' ratification was certainly desirable.

Q. And you regard Grace and Pan American Corporation as being bound hereby to exercise their best efforts to see that Contract A is carried out if it is approved by the CAB.

A. Yes.

Q. I note that they inhibit themselves, at the bottom of paragraph 1, from exercising their rights as owner of voting shares in such a manner as to interfere, or impede the performance of Contract A.

Don't you feel that that tends to restrain what is a desirable freedom on the part of business enterprises to make decisions as they arise, and not to be tied up 99 years in such a manner?

A. Well, what I think—I think when a business decision has been taken, and embodied in a contract, such as this has, and the contract is approved by the Board, that the period for that consideration has ended, and thereafter the primary obligation of the parties is to see that the contract is carried out until, by mutual agreement, they decide to change it.

Q. Do you believe that it is reasonable in an industry that is moving as rapidly as air transportation that two independent, or two separate corporations can foresee so far as with business prudence to make a commitment for 99 years?

—245—

[fol. 4078] A. That is the reason that we put in the provision over in Section 23 of the "A" contract, that it was the intention of the parties that the contract should be broadly and liberally construed to contemplate technical, international and regulatory developments in the field of air transportation, to the end that through traffic be handled to the maximum efficiency, and in a manner to meet changing competitive conditions.

Q. Suppose it should be concluded in the minds of regulatory bodies having jurisdiction that the Pan American system ought not to operate on the west coast of South America, and the east coast, too. Would you regard this contract as in anywise being an obstacle to some proceeding, to make the west coast service of U. S. flag utterly independent of the Pan American system?

Examiner Wrigh: What statement—

The Witness: The contract has nothing to do with that situation at all.

Mr. Gesell: I can't follow that question.

Examiner Wrenn: What do you mean by an obstacle? Obstacle to whom?

Mr. Gambrell: Would it interfere with the Board initiating such a move, or any other public body?

Examiner Wrenn: Is this witness the one to ask what will interfere with the Board's power and on the Civil Aeronautics Act?

Mr. Gambrell: I am trying to find out what this contract means.

Examiner Wrenn: Do you content that a contract be-

[fol. 4079] tween these parties can restrict the action of the Board under that?

Mr. Gambrell: It seems to me that the Board's sanctioning a contract gives a pretty weighty moral sanction to it that might upset the Board later.

Mr. Gesell: Mr. Gambrell is not on the Board. It is perfectly clear that the Board has authority to disapprove it. We have gone through that.

Examiner Wrenn: I don't see what materiality your question has as to the power of the Board, Mr. Gambrell.

Mr. Gambrell: We will pass on to the next paragraph.

By Mr. Gambrell:

Q. Regarding the representation of Panagra in paragraph 2, your comments would be similar to what they were in respect to the comparable paragraph in the other contract, wouldn't they?

A. Yes. You mean the action by the President?

Q. Yes.

A. Yes.

Q. Paragraph 3. Does that mean, as you understand it, that if W. R. Grace and Company continues to nominate you as President, Pan American is expected to support that nomination?

A. Pan American always has the right to approve the Grace nomination with the proviso that the approval shall not be unreasonably withheld. If at any time Grace nominated me or anyone else, and Panagra did not approve, and the approval were—

Mr. Gesell: Pan American.

—247—

[fol. 4080] The Witness: —Pan American did not approve, and the failure to approve were found to be reasonable, they would be under no obligation to go ahead.

By Mr. Gambrell:

Q. Is the second sentence in paragraph 3 a fair definition of the duties and authority of the President? It says, "The president of Panagra shall be in responsible charge of its management." That is the second sentence.

Is there anything else in that contract, or any other contract that should be considered in connection with the President's power, or authority?

A. Yes. I think there must be considered in connection with that proviso in the other contract that policy and control rests in the Board of Directors and not in the President.

Q. Paragraph 4. Doesn't this paragraph, in effect, provide that the holding company, Grace, can, under certain conditions, require that a contract, Contract A, to which it is not a direct party, may be amended? Isn't that the effect of it, that Grace, under paragraph 4 here, and under certain conditions, require that contract A be changed?

A. That wouldn't be my interpretation.

My understanding of 4 is that Grace may demand performance by Pan American of certain obligations which it has undertaken under another contract, and failing such performance by Pan American, may take the matter to arbitration, and failing such performance by Pan American, if the arbitrators sustain the Grace position, terminate the other contract.

—248—

given

[fol. 4081] The reason for Grace being ~~vice~~ that being put in that position is obviously to have somebody who can act without any risk of deadlock.

Panagra might not be in a position to take that action itself because of the fact that Grace does not control Panagra.

Q. You note that reference is made in this paragraph 4 to Contract A, and that previous paragraphs in Contract B refer to Contract A.

Wouldn't you say that in paragraph 4, and other references to Contract A, make it essential that the two of them be considered as inseparable and more or less one ball of wax, as someone said yesterday?

A. I don't know what the legal implications are of that. I take them together. But actually this contract is a complete contract in itself.

Examiner Wrenn: Which contract?

The Witness: "A".

By Mr. Gambrell:

Q. In your opinion—

The Witness: The whole operation would not be quite the same. It ~~would~~ *could* be dropped out. But it would be workable.

By Mr. Gambrell:

Q. Is "B" essential to the practical approval and putting into effect of "A"?

A. To my mind, as a practical businessman, it is.

Q. Let us look at 5. I note there that if these Pan American routes, which may be thought of as tracks for

—249—

[fol. 4082] operation in this case, if any one of them should be canceled, or disposed of in violation of paragraph 18, Contract A, I note that there is a provision that Pan American Corporation will consent to Panagra's making application to amend Panagra's own certificate so as to include the route which formerly Pan American held, but which now, under the supposition is eliminated.

Why was that provision put in?

A. That was put in so that in the event that Panagra's through flight service, under Contract A, was unable to function, Panagra would then be in a position, without any risk of deadlock, or anything of the kind with its

Board of Directors, to apply to this Board for a route in its own name.

Q. In the preliminary paragraphs of the petition for approval of the contract A, I note reference to the fact that these contracts are designed to settle differences.

Are we to understand that paragraph 5 of Contract B settles the difference about locked Board of Directors in relation to new route applications?

A. No. Only in respect of this one situation referred to in that paragraph. It has no relation to any other situation that might arise.

Q. Does it purport to settle the so-called deadlock reflected in Docket 779?

A. Not in this particular agreement, but the whole thing definitely does settle.

Q. Contract A and Contract B, do they, if approved, do they settle the deadlock referred to in Docket 779?

—250—

[fol. 4083] A. They definitely do, because the issue in 779 was whether or not Panagra should be extended to the United States. That was the deadlock which led to that proceeding. That controversy has been settled by this arrangement under which through flight is provided under the terms of this contract.

Q. Let us explore that a minute. When you say "settled" what do you mean?

A. Well, I mean—

Q. In practical effect.

A. I mean that it is settled by mutual agreement in the terms of these contracts.

Q. Does it mean—do you mean that it is settled in that a different way out is provided?

A. This is a different way out, yes.

Q. Does that imply that the original extension is no longer contemplated, and is not to be sought?

A. Yes.

Q. By Grace management?

A. It implies that, yes. It doesn't so expressly provide, but obviously this is a substitute.

Q. That from here on out those who run the affairs of Panagra have an understanding that Panagra will not seek to come from the Canal Zone to the United States.

A. I did not so testify, and that is not the fact. The only agreement between us on that point is in these papers.

Q. You said it settled it.

A. No. I said it was a fair implication. After all, you

—251—

[fol. 4084] don't keep on running after the trolley after you got aboard, and we have accepted this, at least for the moment, and as far as I can see, for a good long time. I hope so.

Q. For 99 years.

A. I hope so, as a settlement of this controversy.

Q. Do you apprehend that if this contract is approved and put into effect, these two contracts, that W. R. Grace and Company will be agitating for the extension of Panagra to the United States?

apprehend.

A. No, I do not so ~~hope~~.

Q. Do you anticipate that the persons who manage Panagra, meaning Mr. Roig and his Vice Presidents, themselves, will cherish as they have in the past a feeling that Panagra ought to be extended to the United States?

A. No, because before I agreed, and the rest of us agreed to go into this contract, the matter was very fully ventilated with all of the chiefs of Panagra, some of whom will testify, to make sure that they felt that this was a reasonable compromise of that question.

Q. Paragraph 6 of Contract B.

Examiner Wrenn: Are you about finished, Mr. Gambrell?

Mr. Gambrell: Off the record.

(Discussion off the record.)

Examiner Wrenn: We will recess until 2 o'clock.

(Whereupon, at 12:35 p.m., a recess was taken, to reconvene at 2 o'clock p.m., same day.)

[fol. 4085]

AFTERNOON SESSION 2 p.m.

Examiner Wrenn: Please come to order.

Mr. Gambrell, you may continue your examination.

HAROLD J. ROBB, resumed the stand, was examined and testified further as follows:

Cross examination (Continued).

By Mr. Gambrell:

Q. Let's look at paragraph 6 of contract B.

A. Yes.

Q. Is it your understanding that if these contracts are approved and put into effect they will dispose of the pending cases therein referred to which I assume are the ones enumerated in paragraph 5 of the petition—that is, at least 707 and 744 and 779.

A. That is my understanding.

Q. I will not ask you about 7 and 8 because I assume your answers would be the same as to corresponding paragraphs in the other contract?

A. Yes.

Q. Paragraph 9, like paragraph 25 of the "A" contract has to do with arbitration. Is it your opinion that arbitration is a workable and practical provision for potential disputes such as contemplated here.

Mr. Gesell: Nothing about disputes being contemplated here, Mr. Examiner.

A. Well, as limited, to relate to disputes as to the construction or operation of this agreement, I think it is quite workable.

—253—

[fol. 4086] By Mr. Gambrell:

Q. Has your experience with arbitration in connection with the relationship between Panagra and Pan American Corp. been satisfactory?

A. We have never had one.

Q. Didn't you have an arbitration agreement in your 1939 contract?

A. Yes, but we never had an arbitration under it.

Q. Well, you have had a good deal of the dispute didn't you?

A. We did have a good deal of conversation about whether or not there should be one under it.

Q. You had a lot of disputes that needed settlement, didn't you?

A. No. Not of the character that—

Examiner Wrenn: Did the disputes relate to the subject matter covered by the arbitration agreement?

Mr. Gambrell: Well, as far as I can see the arbitration provision—

Examiner Wrenn: Let the witness answer that question. If they did all right, I am willing to have him elaborate on it. If they didn't I think that takes care of it.

hear

The Witness: Let's ~~here~~ the question again.

Mr. Gambrell: I thought the Examiner asked the question.

Examiner Wrenn: That is what I mean. I want to know if the disputes you referred to fell within the scope of the arbitration agreement in the 1939 agreement.

The Witness: Well, the discussions about arbitration

—254—

[fol. 4087] under the 1939 agreement related to whether or not we should arbitrate the question of whether or not Pan American's connecting service was adequate, and therefore whether or not Panagra should file an application for a route. That question, owing to a great variety of reasons, did not seem to me susceptible of arbitration. It was a very different kind of question than the questions involving controversy and interpretation of a specific contract like this.

By Mr. Gambrell:

Q. Didn't you have many other disputes not relating to the extension of Panagra which were within the purview of your 1939 arbitration provision where you didn't arbitrate?

A. Any disputes that we had of that kind we settled among ourselves. In one instance we did get to the point of endeavoring to draw an arbitration agreement and the appointment of an arbitrator was ~~point~~ agreed on and arbitrated and at that point we settled the matter ourselves. We settled all our problems except this one.

Q. Will you state whether in your opinion arbitration for the matters referred to in the 1939 contract was a successful means of adjustment?

A. No. I can state the facts. I can't draw the conclusion because we didn't, except in one instance, get anything up to the point of arbitration.

We settled them ourselves.

As a means of settling the question of Panagra coming through to the United States it was not a successful provision in my opinion.

Q. I will pass on and come back to that in prior testimony

—255—

[fol. 4088] that I want to bring to your attention.

Paragraph 10, contract B, the contract of February 14, 1939, is the one that has been attached as Exhibit 29 to the Pan American-Panagra exhibits, is that right—same one?

A. Yes. The one we had here yesterday morning.

Q. Will the taking effect of this contract B completely terminate that contract and have it no longer effective in any way?

A. No. There will still remain the question of determining what services Grace and Panagra are to render for this company and the basis of payment for those services. It was contemplated that that will necessarily be subject to revision in the light of provisions of this contract.

Q. But I am speaking of the 1939 contract. That goes completely out when contract B takes effect?

A. As a contract it is out, yes but I am stating that certain states of fact which exist and which came to light to some extent to existence in part under that contract must go on outside of the contract until they are reorganized.

Q. Is there any other working contract between Grace and Pan American Corp. or Panagra or Pan American having to do with the policy making and operation of Panagra?

A. I don't think of any.

Q. Wasn't there a contract of 1928?

A. Oh, that famous letter.

Q. Well, whatever you call it. Is that a dead letter or is that a live document now?

* * * * * * *

—342—

[fol. 4089]

PROCEEDINGS

Examiner Wrenn: Please come to order, gentlemen.

Mr. Gesell: Mr. Examiner, I have a stipulation to propose.

We have considered, over the evening recess, the problems which were discussed here yesterday, having in mind particularly the suggestion of the Examiner that some effort be made by way of stipulation to meet the problems presented by the efforts of the other parties to introduce portions of Docket 779.

We feel, as we expressed, yesterday, that material from that docket is irrelevant and immaterial, but we recognize that under the rulings of the Examiner and the procedure that has been adopted by the parties that in the long run most of this record is going to find its way, on some basis, into the record of this proceeding, and accordingly, we have a stipulation to propose which we think will accomplish that more expeditiously and at the same time assure a more complete record.

We hope also that the stipulation will serve to expedite this proceeding and facilitate consideration of the issues of public interest presented by the contract which has been filed.

I would like to read the stipulation for the record and I have copies here which we will distribute to counsel so that they can study the wording.

The stipulation will read as follows:

"It is hereby stipulated and agreed by the parties that for the purpose of this proceeding all exhibits and testi-

343

[fol. 4060] mony received in evidence in CAB proceeding known as Panagra Terminal Investigation, Docket No. 779, shall be deemed to be offered in evidence in this proceeding by all parties, except Pan American Airways, Inc. and Panagra, as part of their direct cases and received in evidence by the Examiner over the objections of Pan American Airways, Inc. and Panagra; provided that Pan American Airways, Inc. and Panagra shall each be entitled to renew their objections at any stage of this case to the introduction of any or all such exhibits and testimony upon any grounds (except authenticity) including materiality, relevancy or otherwise, and to contest the probative value and scope thereof in the same manner and to the same extent as if such testimony and exhibits were being offered originally in this proceeding, and provided further that Pan American Airways, Inc. and Panagra shall be granted the right to file reply briefs."

One further thing concerning the stipulation: Of course, if Pan American Corp. or Grace are found to be necessary parties to this proceeding, or ordered to be parties by the Board under the stipulation which is already on file, presumably the rights to object to this evidence at any stage in this proceeding would be rights which they would have as well as Pan American Airways and Panagra.

I would be glad to answer any questions concerning the stipulation which any counsel or the Examiner may have.

Mr. Schneider: Mr. Examiner?

Examiner Wrenn: Yes, Mr. Schneider.

—350—

[fol. 4091] questions that are raised by 779.

Mr. Gesell: That is right.

Mr. Schneider: Simultaneous filing of original briefs and simultaneous filing of reply briefs for all parties.

Mr. Gesell: That is right. That is what I mean.

Mr. Gambrell: Is there going to be any limit on the length of those briefs.

Examiner Wrenn: I presume the Board's Rules of Practice of 50 pages would apply.

Mr. Gambrell: 50 pages would apply to all of them.

Examiner Wrenn: That is the way the Rules of Practice provide.

Mr. Gambrell: If that be so, in view of what Mr. Gesell has said, I think that Eastern would be willing to go along on this.

Mr. Schneider: Let's amend the last two lines to cover your point and we are all set.

Mr. Gesell: Isn't it clear on the record that it is amended and that the agreement of the parties to the stipulation was on that condition.

Mr. Schneider: He has copied the other one. I would rather have it drafted correctly and put in.

"Provided further that all parties shall have the right to file simultaneous reply briefs."

Mr. Gesell: Limited to the issues raised by Docket No. 779.

Mr. Schneider: I accept that.

Mr. Gesell: And I think we ought to have the time period clear. We suggest ten days because I think if we

—351—

[fol. 4092] are going to have reply briefs we ought to understand what the time limit is. It is understood it is ten days, isn't it?

Examiner Wrenn: It is understood it is ten days.

Mr. Highsaw: Mr. Examiner, public counsel is raising no objection to the agreement between the parties that has been reached as amended. However, public counsel would like to pass somewhat of a different position from the other parties. I would like the record clearly to reflect the fact that Public Counsel does not raise any objection to the

stipulation as agreed upon, does not in any way reflect the fact that the Board was to be bound to receive and grant the reply briefs that are so stipulated.

Examiner Wrenn: I think that is understood.

Mr. Gossell: I think counsel for public counsel isn't going to oppose this motion to reply briefs. He has been one of the most articulate persons in getting it before us. He is not going to oppose reply briefs.

Mr. Hughes: That is correct, public counsel is not going to oppose it but public counsel doesn't want the fact that he has not made any objection to the stipulation to be used as an argument that the Board is thereby bound to grant the reply briefs.

Examiner Wrenn: We will consider the stipulation agreed to and I want to express my appreciation to counsel for Pan American and Panagra for their efforts in working out their cooperation in working out the solution to this problem which has been before us.

Mr. Gambrell: Is the stipulation going to be filed?

(fol. 4056) Examiner Wrenn: The stipulation was read in the record.

Mr. Gambrell: Amendments, I meant to say.

Examiner Wrenn: Amendments, yes, as proposed by Mr. Schneider and Mr. Gossell.

Mr. Gossell: Mr. Examiner, I want to raise one question, the Department of Justice isn't here.

Examiner Wrenn: Yes, Mr. McFarland.

(Discussion off the record)

Hayes J. Reiz, resumed the stand, was examined and testified further as follows:

Examiner Wrenn: Let's proceed with the examination of the witness, Mr. Gambrell.

Cross-examination (Continued).

By Mr. Gambrell:

Q. Mr. Reiz, as we closed yesterday, we were discussing Mr. Paulin's memo. It is now in and I won't burden you further with questions on that.

In your direct you mentioned a series of meetings and conferences leading up to the formulation of these contracts A and B. Were you in substantially all of those conferences?

A. Do you mean the conferences during which the agreement was being formulated?

Q. Yes. The framework was laid and the basic principles outlined.

A. No. I was not present at those conferences, with, I think, one exception. The conferences I think I testified were between Mr. Friendly and Mr. Gesell.

Q. Didn't the top executives of the company lay out

[fol. 4094] the framework and tell the lawyers to get busy and put it in form?

A. No. I testified quite fully on that, I think, the other day. It was quite the opposite. I stated at the outset that I could not accept the proposal in principle, that I could only look at it in detail after it had been worked out, and these other gentlemen worked it out. It was only then that it was accepted.

Q. And those negotiations did not commence until after the Board's decision in Docket 525 in the Latin American case?

A. That is correct.

Q. You started with a clean sheet after that.

Mr. Gesell. Clean or a dirty sheet, Mr. Examiner. *This is the*

Third time we have testimony that this started after the decision in 525.

Examiner Wrenn: I think that is clear from the record, Mr. Gambrell. I think you will find it on page 61 of the transcript.

Mr. Gambrell: Some statement but I submit that if Mr. Gesell had a direct examination on this I am entitled—

Examiner Wrenn: We have settled that question now. Let's don't get back to it in this question of arguing between counsel.

Mr. Gambrell: If Mr. Gesell will attend to his examination I will attend to mine.

Examiner Wrenn: I beg your pardon. I am sorry what was that remark?

Mr. Gambrell: I said if Mr. Gesell will attend to the

—354—

[fol. 4095] direct examination I will attend to the cross.

Examiner Wrenn: You attend to your cross examination and we will take care of Mr. Gesell.

By Mr. Gambrell:

Q. Did you have a carry over of anything from preceding negotiations or did you start without any nucleus after the Latin American decisions?

A. We had behind us the longstanding difficulty presented by 779 and it was that difficulty that we set out to settle. We didn't start with any—you mean did we start with any such abortive agreements, suggested agreements, as we were discussing yesterday—we didn't start with any of those.

Q. Would it be possible to supply for the record copies of all minutes of board meetings or committee meetings of Panagra and of Grace and of Pan American Corp. and of Pan American relating to the composition or formulation of these two agreements.

Examiner Wrenn: Now, that has in mind since the date of the decision in 525.

Mr. Gambrell: Yes. Now, I am asking for that.

Mr. Gesell: We will be glad to submit those as far as Panagra and Grace are concerned. I am sure that is what this witness has control over.

Mr. Gambrell: Would it simplify if I could ask the same question in respect to—

Examiner Wrenn: Go ahead. The same question in respect to Pan American.

Mr. Gambrell: That will apply to Pan American Corp.

—355—

[fol. 4096] and Pan American.

Mr. Hamilton: That is right.

Examiner Wrenn: We are clear on that. That is minutes and so forth relating to this particular contract, Exhibits A and B.

By Mr. Gambrell:

Q. Could that include memoranda in the files of those companies addressed to this subject and to correspondence in the files of those companies addressed to this subject?

A. There was no correspondence so far as I know anything about. So far as I am concerned there were no memoranda that I recall.

Q. Could we agree that if there is correspondence or if there are memoranda that will be included in this request?

A. I will not so agree.

Mr. Gambrell: Decide that?

Mr. Gesell: I will have to have a much better idea of what Mr. Gambrell wants.

Mr. Gambrell: Anything in writing in the books and records of those four corporations addressed to this subject.

Mr. Gesell: What subject?

Mr. Gambrell: The subject of making these two agreements.

Mr. Gesell: I am not clear what he is talking about.

Examiner Wrenn: Can you identify it a little further? I see no reluctance on the part of counsel to give what is necessary here but I do think they are entitled to have a specific identification for it.

—356—

[fol. 4097] Mr. Gambrell: We have agreed on certain things.

Examiner Wrenn: That is right. The minutes of the four companies.

Mr. Gambrell: Minutes as to Board meetings and directors meetings.

Examiner Wrenn: Yes, that is right.

Mr. Gambrell: Now, I would like all writings, including so-called memoranda, or correspondence in the files of any of the four companies, having relationship to the composition, formulation, or execution of these documents, these two contracts, and having to do with getting in motion and prosecuting their petition for approval of these two contracts.

Mr. Gesell: None of that material was requested, Mr. Examiner, at the pre-hearing conference, when things of this sort are supposed to be worked out between the parties.

I can't see the relevance of submitting here at this proceeding, if there are such documents—I don't know what there are—we would have to look—concerning various suggestions by different people as to how a particular clause should be written in this contract.

Matters of that sort seem to me to be washed out when you present an agreement. That is the agreement and understanding between the parties, and suggestions made in negotiation about how a contract should be formulated is certainly not relevant to any issue at all. I don't see its materiality.

Mr. Gambrell: It seems to me that a document of this sort is comparable in a way to an act of a legislature and that the history of the document and the memoranda and working notes and correspondence form a background that

—357—

[fol. 4098] is very essential to an understanding of the meaning of the contract and the objectives sought to be attained.

Examiner Wrenn: You don't have any testimony in the first place that there is anything of that kind.

Mr. Gambrell: No, we haven't. I have asked if it could be supplied if there is anything of that sort.

Examiner Wrenn: Are you addressing a request to me?

Mr. Gambrell: Well, maybe I should ask if counsel for the contracting parties decline to supply it. Do they?

Mr. Gesell: Certainly Panagra declines to supply it.

Mr. Hamilton: Pan American does too.

Mr. Gambrell: We would like to take under consideration filing a form of subpoena duces tecum for that material and would ask that it be not disturbed until such a document is filed, that everything be preserved.

Mr. Gesell: Mr. Gambrell can be assured that if there is any material it won't be disturbed.

By Mr. Gambrell:

Q. Did the same negotiators work on both contract A and B, or were there different negotiators?

A. The same.

Q. Did Mr. Trippe or Mr. Grace personally participate in any of the conferences or negotiations on this subject?

A. There was one meeting—I said a moment ago that I attended one meeting—and Mr. Trippe was present at that meeting.

Q. What meeting was that?

A. That was a meeting after the contract had advanced to a certain point at which several of the principals met

—358—

[fol. 4099] with the lawyers.

Q. It wasn't a board meeting?

A. No.

Q. It was just a conference of interested persons?

A. Oh, yes. It was some representatives of both sides. Mr. Trippe is not a member of our Board.

Q. Where was it held?

A. Held at the Cloud Club.

Q. That is on top of the Chrysler Building?

A. Yes.

Mr. Gesell: Just ~~above~~ *about* on top.

Mr. Gambrell: I will be glad to wait until Mr. Gesell finishes up.

Examiner Wrenn: Proceed.

Mr. Gambrell: I move to strike out Mr. Gesell's remark.

Mr. Gesell: I concur.

Examiner Wrenn: All right. It will be stricken.

By Mr. Gambrell:

Q. What considerations were advanced as to why the contracting parties or any of them should recede from former positions taken with respect to interchange?

A. There were no considerations advanced because it was never suggested as far as—I mean no consideration as far as Panagra was concerned, for any change because there had been no change on our part.

Q. Did Mr. Trippe or anyone else representing the other side indicate any reason why they were receding from any position they had previously taken?

A. At the meeting I referred to, the matter was not

—359—

[fol. 4100] discussed. The only expression I can recall at this moment being made to me by anyone connected with Pan American on that subject was the statement Mr. Friendly made at the meeting when the proposal to endeavor to work this thing out was made, and I replied at that time that I would not be interested in proceeding along any such line as we had discussed at the time that G-58, I think, was before us, and he stated at that time that was not their intention to proceed along that line, that he considered that the way that discussion had developed had been unfortunate, because he recognized that it had not, as I have testified repeatedly, developed along the lines which we had originally contemplated—at least he and I had contemplated.

Q. Do you, as a part of your functions as Vice President and Director of W. R. Grace and Company—Co-Vice Chairman of its Board—do you help to formulate the general policies of that company?

A. Yes.

Q. Do you likewise help to formulate the policies of Grace Lines, Inc., the shipping company, its wholly-owned subsidiary?

A. I am a director of that company, and to that extent, yes.

Q. Is it still the position of W. R. Grace and Company that the public interest would be served by Pan American's divesting itself of sufficient of its stock so that it could not exercise negative control over Panagra?

The Witness: Just repeat that question please.

Examiner Wrenn: Read the question.

—360—

[fol. 4101] (Question read)

A. No.

By Mr. Gambrell:

Q. You are not of the opinion that it is in the public interest, or would be, for Pan American Corp. to have its interest reduced below 50 per cent?

Examiner Wrenn: You are speaking to Mr. Roig's personal opinion now?

Mr. Gambrell: Yes, sir.

Examiner Wrenn: All right.

A. No, I don't.

By Mr. Gambrell:

Q. Didn't you at page 1014 of the Docket 779 transcript testify as follows:

A. Could I see it please if we are going into that record?

Examiner Wrenn: That record has all been stipulated in here.

Mr. Gambrell: I want him to reconcile his view.

Examiner Wrenn: You have got his view here. He has stated he doesn't any longer hold that opinion. Ask him why he doesn't if that is your point.

Mr. Gambrell: I have got a right to—

Examiner Wrenn: You have got it in there. Do we have to physically repeat all of that in this record now?

Mr. Gambrell: He contradicts himself.

The Witness: I am perfectly willing to admit that on previous occasions under different circumstances I have held a different view and I am perfectly willing to give my reasons for changing.

—361—

[fol. 4102] Examiner Wrenn: Go ahead.

By Mr. Gambrell:

Q. You stated previously that you thought it was desirable that Pan American should divest itself of negative control, didn't you?

Examiner Wrenn: He has just stated that he did.

Mr. Gambrell: He hasn't. He made some generalization, Mr. Examiner. I am trying to be specific.

Examiner Wrenn: I am going to rule he has answered the question. Go ahead.

Mr. Gambrell: I submit that the witness has not answered my question and the Examiner has not answered my

question and that I am not getting a fair trial here, Mr. Examiner.

Examiner Wrenn: Mr. Gambrell, those facts are not borne out by the record whatsoever.

Mr. Gambrell: He said I may have made a statement somewhere. He didn't say he had.

The Witness: I did not say I may have made a statement. I said that I had previously entertained the view that it would be in the public interest for Pan American to be divested of part of their stock, that I no longer entertained that view and that I was perfectly willing to explain my reasons why.

Anything that I said in 779 is in the record and I stand by it.

By Mr. Gambrell:

Q. Will you now explain why you have a different view?

A. Because the problem which led me to believe that that

-362-

[fol. 4163] would be desirable has been solved by these contracts.

Q. And what was it?

A. Back in the 60's we had a war between the states. The South wanted to withdraw. The matter was settled *has*
and it stayed settled for 80 years—not quite 99—and the *it was settled.*
fact that you had this agreement and ~~the settlement~~ naturally changes your viewpoint.

Q. Well, you have said that these contracts settled it. How do they make your view on that subject different? Why do they?

A. Because the one outstanding problem, and my testimony in 779 will show that I testified the same way then, between Pan American and Panagra has been the question of extending our route to a terminal in the United States. I say the one outstanding problem. I mean by that the one outstanding problem that hadn't been settled. We have had other problems. We are an active company. We have an active live board of directors. We are not a one-man show.

We have constant discussions in our board of directors as every healthy board should have, but every question that has come up, all the questions discussed in 779, except that one question, were resolved and determined, and these contracts have now settled that question.

Examiner Wrenn: And therefore you have changed your views?

The Witness: I see no occasion for continuing a battle after the war is won.

Examiner Wrenn: All right, sir. Do you have any further questions, Mr. Gambrell?

—363—

[fol. 4104] Mr. Gambrell: Yes, sir.

By Mr. Gambrell:

Q. I want to call your attention to Docket 779, Exhibit P-35, page 27, which is a letter from W. R. Grace and Company to Mr. Garni and Mr. Roig, dated June 17, 1941. I want to call your attention in particular to one paragraph:

"We furthermore feel that you should consider carefully the advisability of issuing further stock and of offering this stock to us in order that our government—"

Mr. Gesell: This is in evidence. Can't the witness just read it, Mr. Examiner?

By Mr. Gambrell:

Q. — "our government may have two distinct entities to deal with—"

Examiner Wrenn: Mr. Gambrell, let the witness see the document.

Mr. Gambrell: I am halfway through a question that I would like to resume if it is possible to do so.

The witness: Am I permitted to read the letter? I don't think it is occasioning any delay.

Mr. Gambrell: I thought I would ask him the question and then let him look at the document and answer it. As it is, I will have to start it over.

Examiner Wrenn: Let him read the letter.
The Witness: Yes, sir.
Examiner Wrenn: All right.
Now, your question, Mr. Gambrell.
Mr. Gambrell: May I borrow my book back sir?
Examiner Wrenn: All right.

—364—

[fol. 4105] By Mr. Gambrell:

Q. I call your attention to the third from the last paragraph of the letter. I will read it and ask you if that expresses a view narrowed to the matter of extensions:

"We furthermore feel that you should consider carefully the advisability of issuing further stock and offering this stock to us in order that our government may have two distinct entities to deal with and in order that the question which has constantly arisen as to the interest of your company being made subservient to that of the Pan American Airways Corp. interest, may be definitely removed."

Was that complaint there of constant subservience confined to the extension of Panagra to the United States?

A. That was a letter written by Mr. Iglehart. It was not written by me, and expressed his views which were not always in accordance with my own on these subjects.

Q. He was the top executive officer of the company.

A. Of W. R. Grace and Company, he was President at that time.

Q. Was he on the Board of Panagra at that time?

A. He was never on the Panagra Board and it is my definite feeling that that paragraph was still, while it is broad in its language, related primarily to this outstanding problem as the rest of the letter, I think, indicates.

Q. Is it your feeling that all of the matters complained of in Docket 744, by W. R. Grace and Company against Pan American Corporation and others will be fully settled and all friction removed?

—365—

[fol. 4106] A. I think you mean 779.

Q. No. 744.

A. 744.

Q. Yes, sir. Where Grace complained generally about Pan American's exercising its half interest in Panagra in such a way as to thwart its development, interfere with its progress.

A. Do you consider that this contract removes all points of friction?

A. It doesn't remove the points of friction that are always inevitable among strong minded men with definite ideas, but in my opinion, by removing the basic objection and the basic difficulty, and the only one which has never been solved, it will remove any basis for complaint made in 744.

As a matter of fact, 744 is already quite a few years old and it related to a good many matters which even then were not all entirely fresh, and there has been a great deal of improvement in relations all along the line, even before this contract was made. As a matter of fact if there hadn't been, I don't believe the contract could ever have been made.

Q. Isn't it true that Pan American's handling of publicity in this country for Panagra has been poor and has resulted in Panagra's interest being subordinated to those of Pan American?

A. In recent years it has been to our entire satisfaction. Anything we weren't satisfied with we have battled out one way or another.

Q. Hasn't it been your position that Panagra should have a separate and independent publicity department in the

—3666—

[fol. 4107] United States?

A. Well, in effect, we have gone somewhat along that direction in having one, and I think the present basis—that is, we have, under Mr. De Groot, a man who takes—and with Mr. De Groot, himself, in fact—takes an active interest in publicity. It is done in cooperation with Pan American's publicity department.

It doesn't always work a hundred per cent, but it has improved and I think will further improve under this contract.

Q. You had Mr. De Groot, in 1943 when you were complaining about that, didn't you?

A. Yes. I say there has been a definite improvement in recent years.

Q. Pan American presently has and exercises a veto power as to all rates and fares placed in effect on Panagra, does it not?

A. They do not.

Q. Haven't they until recently done so?

A. They never did.

Q. I point to transcript 139 in Docket 779—that is page 139 through 142.

Examiner Wrenn: Is that this witness' testimony?

Mr. Gambrell: It is the testimony of Mr. De Groot.

By Mr. Gambrell:

Q. Would you look at it and see whether that refreshes your recollection?

A. This is testimony of Mr. De Groot in 779 in which he states that in the preparation of new rates and fares that it is customary to confer with Pan American and that they

[fol. 4108] collaborate on the calculation of new fares because many of them involve connecting fares. "In a number of cases there are competitive fares via alternate routes which are partly or wholly under the jurisdiction of Pan American Airways."

It says further: "As a matter of fact, in setting new rates for Panagra, are they always cleared with Pan American Airways, Inc." and the answer is "Yes," but that doesn't mean that Pan American has a veto. I never understood that Pan American had a veto over our fares. They were discussed with them of course for the reasons indicated.

Examiner Wrenn: You can clear it up with him, Mr. Gambrell. He will be a witness.

(Discussion off the record.)

Examiner Wrenn: Take a five minute recess.

(Recess taken.)

Examiner Wrenn: Gentlemen, let's be in order. Proceed, Mr. Gambrell.

By Mr. Gambrell:

Q. Mr. Roi, I show you a document here dated December 14, 1944, labeled, "Brief of W. R. Grace and Company, intervenor before the Examiners" in Docket 525 of the CAB.

Do you recognize that as the brief of the company of which you are co-chairman?

A. Yes.

Mr. Gambrell: We wish to have it identified for the possibility of introduction of a quoted portion which we can put in later.

Examiner Wrenn: All right. It may be marked for iden-

[fol. 4109] tification as EAL No. 1.

Mr. Gesell: What is the date of the brief?

Mr. Gambrell: December 14, 1944.

Shall we introduce—

Examiner Wrenn: Have you distributed them?

Mr. Gambrell: No, sir. We can now.

Examiner Wrenn: All right. Go ahead.

Mr. Gambrell: In lieu of the entire brief an extract commencing at the middle of page 17 and going through to the middle of page 23, and mark that EAL-1 instead of brief itself.

Examiner Wrenn: All right, Mr. Gambrell, it will be so marked for identification.

(Eastern Air Lines Exhibit EAL-1 was marked for identification.)

By Mr. Gambrell:

Q. The brief we spoke of was filed with Grace's authority for Grace, wasn't it?

A. Yes, sir.

Mr. Gesell: Mr. Examiner, we will be glad to cooperate with Mr. Gambrell to speed this kind of process up. If

there is any kind of brief which has been filed by Grace or by Panagra that he wants to have identified just go ahead and have it identified.

We will stipulate that those are briefs that don't have to be identified by the witness unless he wants it.

Mr. Gambrell: I have one other brief of W. R. Grace and Company dated April 21, 1945, in Docket 525.

Examiner Wrenn: What brief is that—the one that is

369

[fol. 4110] filed with the Board?

Mr. Gambrell: That is right. On exceptions.

Examiner Wrenn: All right.

Mr. Gambrell: And there is no question about that.

Mr. Gesell: As to its authenticity none at all.

Examiner Wrenn: We will mark that for identification as EAL No. 2.

Mr. Gambrell: We do not wish to introduce the entire brief but we wish to introduce a paragraph in the middle of page 10. It is very short and I can quote it in the record.

Mr. Gesell: Wait minute. It isn't in evidence.

Mr. Gambrell: I beg your pardon. It is included in EAL-1 and I move to strike the other. I had forgotten it.

Examiner Wrenn: All right. And strike my identification as EAL No. 2. It is already included in EAL No. 1 which has been marked for identification.

Examiner Wrenn: All right. Let's be in order. Go ahead.

By Mr. Gambrell:

Q. Mr. Roig, I want to refer to the brief filed for Panagra in Docket 525 dated April 21, 1945. I don't want to introduce the brief as a whole but I want to call your attention to a statement in the brief and ask you if you concur in it.

Top of page 38: "No man can serve two masters."

A. You don't expect me to disagree with that.

Q. "Inevitably the carrier will favor one service to the detriment of the other. This may take the form of economizing and thereby rendering inferior service in one branch of the operation, or it may take the form of earning too

—370—

[fol. 4111] much out of one branch of the operation. The Board would find it difficult if not impossible to so supervise and regulate as to insure the proper development of both services.

Its problem of securing adequate services and proper rates would be greatly confused by the dual operation. The closest scrutiny of accounts and investigation of operations would be necessary if the Board were to come anywhere near living up to the standards which it has set for itself."

Mr. Gesell: May I see that document?

The Witness: You would like to see it here and see what it relates to.

By Mr. Gambrell:

Q. Is that a fair statement of good regulatory principles as you understand it?

Examiner Wrenn: Let's leave the question pending for a minute while the witness and counsel look at the document.

A. I think it is sound doctrine as related to the subject to which it refers, which is the combination of domestic and international operations by Eastern and Braniff between the United States gateways and Balboa.

By Mr. Gambrell:

Q. Do you mean to say that it wouldn't have application to anybody except the two you have mentioned?

A. That is the connection in which the statement is used. The first statement—as I say that is a general statement—but the rest is related to this situation or one that was strictly analogous to this one, obviously.

Q. Would you say that if Panagra and Pan American

—371—

[fol. 4112] join up in a compact such as represented by contracts A and B, that that would have a dual control presenting some of the problems referred to in this quotation.

A. No.

Q. What would be the difference between your two carriers and any other two carriers getting together?

A. That is a very long story. It would depend on how the other carriers were getting together. The only part of it that

Examiner Wyman: I don't know where we are going. I have no objection whatsoever to the witness making any answer he deems necessary to reconcile his answer with your question relating to the views expressed in the quotation you have just read, Mr. Gambrell, but I don't think we ought to get too far afield from that. Go ahead if you can answer the question.

A. (Continuing) I consider that the extent to which these parties have got together under the terms of these contracts, are a perfectly workable specific arrangement. How that might compare with a different arrangement that might be made between other carriers, I can't generalize to that extent.

By Mr. Gambrell:

Q. Do you take the position that there might not be a favoring of one and a penalizing of another in respect to publicity or in respect to handling of maintenance and allocation of costs in the contracts now under consideration?

A. Oh, no. I think that such a theoretical, and if you like, other possibility exists, but I think the contracts con-

372

[fol. 4113] tain provisions which are calculated to meet that situation and which I think will meet it.

Q. But you don't think two other carriers could get together and do that?

A. No, I don't think that at all. I think two other carriers signing an agreement exactly like this would, in principle, be in the same position that Pan American and Panagra are in.

Q. Do you believe that if Eastern were projected to the Canal Zone and entered into such an arrangement as this with Panagra, that that would be good and workable and desirable in the public interest?

A. In principle I certainly could raise no objection to it provided it was identical with this.

How that might be affected by other circumstances I would have to judge on the facts of the particular case, but certainly in principle I would agree with you.

Q. Is Panagra planning to make a strenuous effort to capture cargo business from here on?

A. Very definitely and not only from here on but always. Panagra was the first United States certificated airline to operate a regular scheduled freight service—and I mean first. We began that service on a pioneering basis. We have developed it and continued to develop it and we expect to keep on doing it.

Q. In fact, in the very early days heavy mining transport operations were handled through air service in the Andes, weren't they?

A. They were by Panagra and still are by Panagra. We

—373—

[fol. 4114] have an operation of that kind now. But that is not what I was referring to. I was referring to the scheduled cargo service over our whole international route between Buenos Aires and Balboa.

Q. Is Grace Line Inc., the steamship company, going to push energetically the cargo business also between points on the West Coast and Canal Zone and Caribbean and New York City?

A. Yes.

Q. Steamships?

A. Yes.

Q. You expect to press both of them—I mean the W. R. Grace interests will press both the air service of freight and the boat service of freight?

A. Oh, yes. Of course the competitive area as I said the other day is not identical at the moment. I might add, Mr. Gambrell, when you say is Grace going to press both, that it is a totally separate, totally independent, differently compensated, differently managed organization, which is doing the pressing.

Q. Grace Line, Inc., the steamship company is a hundred per cent owned by Grace and Company, is it not?

A. That is correct.

Mr. Gesell: That has been answered before.

Examiner Wrenn: All right. The question has been answered. Go ahead.

By Mr. Gambrell:

Q. Let's look at Exhibit 2 of Pan American Panagra, please. Do you know the mileage differential in respect to

-374-

[fol. 4115] New York-Buenos Aires, air service, as between Pan American's shortest route through Puerto Rico on the one hand and the connecting service by shortest routes through the Canal Zone on the other?

A. I haven't the exact figure in mind but I think that the connecting service through Miami, proceeding from Balboa over the Panagra great circle route, is slightly shorter.

Mr. Schneider: Excuse me. You mean the great circle from Balboa to BA or the point to point great circle?

The Witness: Well, it would be the same. I can't say —I mean as shown by this map—all the way.

Examiner Wrenn: That is Exhibit 2.

The Witness: We couldn't have a point to point comparison because he is asking about Buenos Aires.

Mr. Schneider: I mean it is the great circle from Balboa to BA non-stop.

The Witness: You are speaking of time rather than mileage.

Mr. Schneider: No.

Examiner Wrenn: He means do you follow down this heavy black line as shown as Exhibit 2 when you compute the mileage?

The Witness: I am figuring the dotted line.

By Mr. Gambrell:

Q. The dotted line represents the authorization received in 525, does it?

A. Yes. That involves some stops.

Examiner Wrenn: Mr. Friendly tells me he has the figures here. If you have them let's—just a minute, Mr.

Gambrell. I think Mr. Friendly said he had the figures

—375—

[fol. 4116] here if you want them.

Mr. Gambrell: I am willing for him to tell them to Mr. Roig and let him give them.

Mr. Gesell: We don't have to go through all that.

Mr. Friendly: The mileages given to me for the following route, New York-Washington-Miami-Balboa and thence by the dotted line shown on Exhibit P.A.A. 2 from Buenos Aires is 5735 miles.

The mileage by Pan American's route, New York-San Juan-Trinidad, Belen, Rio, Sao Paulo, Buenos Aires, is 6255; Panagra's route being slightly less than 500 miles shorter.

Examiner Wrenn: Thank you, Mr. Friendly.

By Mr. Gambrell:

Q. Does that represent the shortest possible flight via Pan American through the Puerto Rico gate or does that represent some unnecessary zigzagging from a non-stop standpoint?

In other words, is that the shortest flight that Pan American can make through the Puerto Rican gate?

Mr. Friendly: Substantially. There might be a few miles saved by cutting out Trinidad but very few.

Mr. Gambrell: It does take advantage of the so-called cut-off of the hump.

Mr. Friendly: Oh, yes, definitely.

By Mr. Gambrell:

Q. Would you say, Mr. Roig, that the 500 mile differential in favor of the Canal Zone route would compensate for the fact that there must be a transfer at Canal Zone in

—376—

[fol. 4117] respect to attracting business from New York to Buenos Aires?

A. No, I would not.

Q. Do you think the 500 mile distance advantage is not equal to the disadvantage of transfer at Canal Zone?

A. Well, there are other considerations. I consider the 500 miles a very important competitive advantage which I intend to use to the fullest possible limit, but it isn't the complete answer to the transfer point for a variety of reasons.

Just to mention one, if you have to transfer at Balboa your whole investment in sleeper planes may become a loss because we can't undertake to transfer people at Balboa let's say, in the middle of the night if that is the way the schedule worked out, and compensate them by telling them that they were saving a couple of hours in time which was being wasted in those transfers. They are not comparable things.

Q. What is Panagra's relationship to the thin line system northeast of Lapaz on the map there?

Examiner Wrenn: That is Exhibit 2 you are still talking about?

Mr. Gambrell: Yes.

The Witness: Yes.

A. That thin line service mostly north of Cochobamba, is that what you mean?

By Mr. Gambrell:

Q. That is right.

A. Yes. There are two little lines which are part of the same picture. That is the route of Lloyd Aereo Boliviana. It was a German route prior to the war. It was

—377—

[fol. 4118] considered a matter of great strategic importance that it should be Americanized. The United States government asked Panagra to assist them, and in cooperation with the United States government and Bolivia, arranged to Americanize or nationalize—when I say Americanize now I mean in the broad sense of North and South America—to nationalize that operation.

We, accordingly, in cooperation with the two governments—and under circumstances which were extremely dramatic, to say nothing more, from the war angle, which I needn't go into here—succeeded in working out a reorganization of that Lloyd Aereo Boliviana, under which the

Bolivian Government became the principal stockholder and that was over 51 per cent.

Bolivian Nationals who already were investors in the company, were carried along to the extent, I think of about 25 per cent or 20 per cent, something of that sort, and Panagra entered into a contract with LAB under which Panagra undertook to provide technical and administrative supervision of that operation and to build it up as a Bolivian National line for a period of five years.

In return for those services Panagra received a small cash payment which was very substantially less than our cash outlays in performing the contract, and we also received the right to purchase each year certain shares of the company for cash and to receive certain shares as partial compensation for our services.

Under that arrangement we have acquired a total of I think about 25 per cent.

Q. Do you have contract rights that may put you in possession of a great percentage as the relationship goes

—378—

[fol. 4119] on?

A. No. Actually the contract was modified about a year or two ago to reduce the number of shares which we might acquire—reduced by discussion with our consent—and the entire contract expired in August, I think, of this year, the five years being up.

We are going along on a modified basis at present, but under a basis which gives us no rights to subscribe to any shares at all nor to receive any shares as compensation.

Q. On Monday I understood you to stress the point that your company, Panagra, serves a country that Braniff is not authorized to serve. Was it Chile?

A. Chile is the principal spot, yes.

Q. And I believe you press the point that there is a substantial community of interest, and then later on, in another connection, you stress the fact that Braniff was substantially blanketing you throughout except Chile.

Now, do you mean to stress Chile as an important point that you serve that is not served by Braniff, or do you mean

to say that Braniff's blanketing of Panagra is so comprehensive that the Chilean difference doesn't amount to anything?

The Witness: Well, without going back to explain what may have been a correct or incorrect inference from anything I have said before, may I just answer the question now?

Examiner Wrenn: Certainly. Go ahead.

A. Braniff parallels our international route, in substance, all the way along, except Chile. Chile is not an unimportant part of our route. It is an important part of

379

[fol. 4120] our route. From Braniff's angle of course that is offset by the fact that he goes to Rio which is a many times larger traffic generating section than Chile.

By Mr. Gambrell:

Q. Have you any way of comparing Braniff's United States traffic potential in relation to points south of Balboa and the traffic potential that would normally flow from that portion east of the Mississippi through Miami.

Mr. Gesell: Mr. Examiner, Mr. De Groot is the witness on these questions of traffic estimates and things of that sort, and he is prepared to answer several questions that public counsel has raised right on this point.

Mr. Gambrell: Very well.

Mr. Gesell: If Mr. Gambrell would like to defer, I think, we could get along.

Mr. Gambrell: All right.

By Mr. Gambrell:

Q. Looking at Exhibit 4:

Mr. Gesell: Before we leave Exhibit 2, may I correct a couple of inaccuracies on the exhibit?

Examiner Wrenn: Go ahead.

Mr. Gesell: And to speak of one new development. This exhibit does not show that Panagra has reinstated its service between Quito and Cali but that service is now operated, I think, on a daily basis.

It also fails to show that we are authorized to operate to a point in Ecuador named Riobamba.

It also fails to show the order of the Board which was issued after this exhibit was prepared, eliminating the

—380—

[fol. 4124] Corumbá connection on the border of Bolivia and Brazil with Panair do Brasil and permitting Panagra, under a temporary exemption order, to proceed further into Brazil to a point known as Campo Grande, slightly to the southeast of Corumba, where connections will be made with Panair do Brasil.

Examiner Wrenn: All right.

By Mr. Gambrell:

Q. In connection with Lloyd Aereo Bolivia, still looking at Exhibit 2, does W. R. Grace and Company have any other subsidiary interests than that and Panagra as far as air transportation is concerned?

A. This is not a W. R. Grace and Company interest except as W. R. Grace and Company is interested in Panagra.

Q. I broadened it in order to include everything.

Are there any other airlines inside the W. R. Grace and Company system besides Panagra and Lloyd Aereo Bolivia?

A. W. R. Grace and Co. as such has no substantial holding of any airline except Panagra and Eastern.

Q. Does it have any in fact?

A. I think W. R. Grace and Company owns a few shares of the Faucett Company in Peru of which Panagra owns 25 per cent and I know that W. R. Grace and Company owns a thousand shares of Pan American Airways.

Q. Without laboring the point, are there any other holdings in airlines of W. R. Grace and Company or of any of Grace's subsidiaries, including Panagra—I mean without asking it all—you know what I mean, I think.

A. No. I think that the only airlines that we have,

—381—

[fol. 4122] as a group—

Q. Directly or indirectly?

A. Directly or indirectly, regardless of percentage that *we have*

which any ownership in in is primarily Panagra: the

next largest is Eastern and there are these two small holdings of Grace ~~and~~ in Pan American and Faucett, and there are the Panagra holdings in Lloyd Aereo Boliviana and Faucett.

Q. W. R. Grace and Company owns about three and a half per cent of the stock in Eastern, is that right?

A. It has been substantially reduced. It isn't a very large percentage, I think about 80,000 shares.

Q. Around 3½ per cent?

A. I should think that it was about right, yes.

Q. Does the record show where Faucett operates?

A. I don't know whether it does or not but I can readily tell you if you are interested.

Q. Just generalizing?

A. Faucett is a Peruvian Airline operating entirely within Peru. They operate routes along the coastal cities of Peru, and also to the interior point of Iquitos over towards the Brazilian border, Arequipa, and I think they have a service to Cuzco.

Q. Does the relationship of Grace and Panagra with Faucett and with Lloyd Aereo Boliviana, vouchsafe to the Grace airlines preferential ratings?

Examiner Wenchel: Preferential what did you say?

Mr. Gambrell: Preferential routings.

Mr. Gesell: What is the Grace Airlines?

Mr. Gambrell: I can cite them if you want to— Panagra

. . . . . .

—391—

[fol. 4123] tions with National which serves the eastern United States, and New Orleans which is in the middle of the Mississippi, more or less.

Q. Exhibit 25. Do you have listed here all of the agreements between Panagra and or W. R. Grace and Company on the one hand, and Pan American Airways, Inc. and or Pan American Airways Corp. on the other, in respect to arrangements for air transportation?

A. I shouldn't think that it does include every—well now, wait a minute—that I presume is something that has

to be filed. There are working understandings in connection with joint facilities perhaps. I don't know whether they are all here or not.

Q. Some of these do not appear in your notations to have been approved. Have all of these been approved by the Board?

A. I couldn't answer that, Mr. Gambrell. I would assume that the ones that required approval have been and that the ones that were merely required to be filed have been filed.

Q. Has the 1939 agreement been filed with the Board?

A. It was not filed; it was discussed with them at the time it was made.

Q. Do you have knowledge of that, or who has best knowledge of that?

A. I have some knowledge, because I was personally on one of the occasions present.

Q. Well, does that agreement not come within the terms of 408 and 412 of the Act?

—392—

[fol. 4124] Mr. Gesell: Isn't that a legal question, Mr. Examiner?

Examiner Wrenn: I think it is.

Mr. Gesell: I object to it.

By Mr. Gambrell:

Q. Do you know why you didn't file the document, if it wasn't filed?

A. My only recollection is that it was because the contract was between Pan American Corporation and W. R. Grace and Company, who were not carriers, air carriers. It was not because of any disposition that it shouldn't be fully understood because I have explained it was discussed with the Board.

Q. Don't those two companies control air carriers?

A. W. R. Grace and Company does not control any air carriers.

Q. Does it not have negative control of Panagra?

A. It owns 50 per cent of Panagra. It does not control it, in my opinion.

Q. Has any body adjudicated that W. R. Grace and Company is not an air carrier under the terms of the Act?

A. I don't recall any case in which it has been decided.

Mr. Gesell: I can throw some light on that.

Examiner Wrenn: Go ahead.

Mr. Gesell: There was a decision by Examiner Nye on that question, of the Civil Aeronautics Board.

By Mr. Gambrell:

Q. Was this document, the 1939 contract, submitted and did the Board render an opinion that it was not subject to the requirements for filing?

—362—

[fol. 4125] A. No.

Q. Have you any record to show the Board's consideration of it in any way?

A. Well, my recollection is all I can think of at the moment. Whether I have any written record or not, I don't know, but I ~~have no~~ doubt that I have.

Q. You haven't even a letter or anything in writing indicating that the Board has indicated its lack of interest in that contract for filing purposes?

A. I am sure there is no such letter from the Board.

Mr. Gambrell: That is all.

Examiner Wrenn: Mr. Fitzgerald, you may examine the witness.

Mr. Fitzgerald: I have a couple of questions, Mr. Examiner.

(Off the record)

Cross examination.

By Mr. Fitzgerald:

Q. Mr. Roig, is it true that Panagra will not receive any of the benefits of the revenues which accrue through the operation of your planes between Balboa and Miami?

A. Not directly as revenue from the operation. We will receive a charter hire which includes our expenses and a return on our capital investment.

Q. Isn't it fair to say, then, that any diversion which might accrue from that particular segment of the service, will not be of any harm to Panagra?

A. You mean any diversion of traffic from the Pangra plan?

. . . . . .

—396—

[fol. 4126] least as far as National is concerned, certainly not to favor us but to just treat us as one of many in the field.

Q. In that case, if National did that, you at least would get a share of National's traffic which you won't get at all under the present certification?

A. No. I think that under—well, under our present certification, without this through flight service to Miami:—but I am not considering that. That is a desperate situation. What little crumb we could pick up ~~under~~ *from National* ~~that~~ would not be of very much nourishment to us. We would have to have something more than that.

Q. When you were testifying regarding negotiations leading up to this agreement, you used the term "We", I believe, to describe yourself and certain other persons who I believe are on the Board of Panagra.

When you have used that term "we", were you thinking of yourself as a director of Panagra or as a representative of W. R. Grace and Company?

A. I couldn't answer the question without seeing the particular case. It may have been one in one case and another in another.

Q. Let me ask you this: Is it true that the negotiations in this case were in essence between W. R. Grace and Company and Pan American rather than between Pan American and Panagra?

A. Well, that is somewhat metaphysical, but actually what happened was the matter was brought up in the first instance in the Panagra meeting as a Panagra matter.

When it was decided that we would endeavor to work out

—397—

[fol. 4127] something, I asked Mr. Gesell, who was Pan-

agra's lawyer, and not Mr. Cahill, who had been Grace's lawyer in 779, to work the thing out.

I think the relative relationship is evidenced by the terms of the agreements. Now, no doubt that was a matter in which Grace was interested as well as Panagra, but Grace's interest was because of its interest in Panagra, not because of any outside consideration.

Q. Isn't it true that as long as the Pan American directors had one position and the remainder of the directors had another, that Panagra as such did not have a position on the case?

A. Yes.

Q. Now, Mr. Roig, there are certain elements in this contract which I believe we might call extra concessions which Pan American made to Panagra in connection with the negotiation of this arrangement.

Do you think that is fair to say that?

A. Yes.

Q. As president of Panagra, wouldn't it be fair to say that you would be glad to accept an arrangement whereby you merely chartered your planes and crews to Pan American for the through operation into the United States, without these extra concessions?

A. Oh, no. I would rather have this.

Q. Now, suppose you couldn't have it, wouldn't you take the other?

Mr. Gesell: Mr. Examiner, shouldn't we, to avoid any confusion here, ask Mr. Fitzgerald to state what the extra concessions are, because Mr. Roig might have one thing

—398—

[fol. 4128] in mind and Mr. Fitzgerald another?

Mr. Fitzgerald. I will state them briefly. I mean the agreement whereby Pan American does maintaining work, training work, and sales work for you?

By Mr. Fitzgerald:

Q. Wouldn't you be willing to take the through plane agreement without those things?

A. No. Not in the sense you mentioned, because you referred to a straight charter, just turning over our plane for so much an hour.

Q. I mean with your crews and just exactly as you have it, that is, take everything away from this agreement except that.

A. That would be very, very far from giving us what we have here.

Q. I agree, but wouldn't you take it?

A. You mean if that is all I could get?

Q. That is right. If that was all you could get.

A. I wouldn't take it as against the possibilities which I would consider certainly worth fighting for, in that case, of something better.

I wouldn't consider that a satisfactory disposition of the problem, in other words.

Q. But it would get you to a terminal in the United States which is your No. 1 objective.

A. It would get our plane through with our through traffic, that is true, but there again, not unless it were coupled with some of these other provisions such as the regulation of schedules, and a lot of things of that kind.

—399—

[fol. 4129] Q. Which have to do with that operation?

A. Yes.

Q. Well, let's just say suppose the Board were to say to you "Mr. Roig, you can have this, but you can't have this training agreement; you can't have this maintenance agreement and you can't have this Pan American sales service;" would you take that?

Mr. Gesell: What does he mean, Mr. Examiner? I object. I can't see the relevance to what Mr. Roig would take personally. It seems to me the question is very "iffy" and I can't see the materiality.

Examiner Wrenn: Let's get back to the point. I think what Mr. Fitzgerald has in mind, is that he may intend arguing certain provisions of this contract are contrary to the public interest and should be either disapproved or conditioned, and I take it what he is trying to get from Mr. Roig is the essential nature of those things to this agreement, and how much Panagra feels like they could accept

Mr. Fitzgerald: I think, Mr. Examiner, that they have a lot of things in this agreement which really have nothing to do with the interchange—I am sorry, I withdraw that—with

this through flight agreement, and I want to explore that just a moment.

By Mr. Fitzgerald:

Q. I am not trying to bring in anything that isn't in the contract. I am just talking about those three or four major concessions which Pan American made in addition to the contract to operate your planes into the United States and the incidental provisions which are necessary for the proper operation of that operation.

A. I think the maintenance comes pretty close to being

400

[fol. 4130] a part of that, but I wouldn't take any commitment at this time as to what I might do at some future time under a totally different set of facts.

Q. Now, Mr. Roig, do you believe that Pan American agrees with you in your conclusion that the maintenance of Panagra's planes in the United States is a substantial benefit to Panagra?

A. I think they do; yes.

Q. And do you believe they have the same opinion regarding the training of personnel in the United States and the sales and promotion provisions?

A. I think so. Mr. Friendly can answer directly.

Q. Do you believe that Pan American would agree to do those things without the through service agreement?

A. I can't answer that. I have no way of knowing.

Mr. Hamilton: Mr. Examiner, I object to that and suggest that the questions be addressed to the proper witness.

Mr. Fitzgerald: I wanted to ask him if he thought they would.

Mr. Gesell: He has been asked it once in this proceeding and said he didn't know.

Examiner Wrenn: I think it is more properly addressed to Mr. Friendly when he testifies.

By Mr. Fitzgerald:

Q. Doesn't Pan American do some of your sales and traffic work in the United States now?

A. Oh, yes.

Q. Could you give me a general idea as to how that is going to be augmented?

—401—

[fol. 4131] A. It is going to be modified as well as augmented in a number of important respects. In the first place, there is going to be an adequate Panagra display in the sales offices of our name and so on. In the second place, there is going to be one man in the principal sales office, particularly charged with looking after Panagra interests in connection with sales, with appropriate proceedings coordinating that work with the work of Panagra's independent general sales manager to see that the job is properly done.

Panagra's

There is also a provision that ~~Grace~~'s traffic organization may propose methods of sale and handling to be carried out in the Pan American sales offices and means for liquidating any difference of opinion as to the advisability of those suggestions.

There are also clear provisions on the subject of advertising and publicity. I consider that the changes made have the effect of completely revolutionizing the methods of handling Panagra sales through the Pan American sales offices.

Q. Did you ever make any effort to have this sort of a change made prior to this agreement?

A. Some of the things we have, yes.

Q. And you were unsuccessful?

A. Yes. Not on everything, but on these particular matters. I am trying to recall whether any of these particular matters have been specifically suggested on a previous occasion. I am not sure that they were in this specific form. Perhaps Mr. DeGroot could be a little more exact on that.

Q. Has Pan American been your agent in the United

—402—

[fol. 4132] States in the past?

A. I have just so testified.

Q. And they will continue to be; that part is not clear, then.

A. Well, that is just a work. They will continue to be now in a totally new form—

Q. There will be additional things added on?

A. Not only additional, but a total, as I expressed it, revolutionary change in the whole thing.

Q. Has W. R. Grace also been an agent of Panagra in the United States?

A. Not in the United States; although we have sold, in a general sense it might constitute an agency; we sell Panagra tickets; yes.

Mr. Fitzgerald: That is all.

Examiner Wrenn: Department of Justice may examine the witness.

Mr. McDowell: If the Examiner please, we are somewhat embarrassed by the necessary absence of Mr. Hickey this morning who had been preparing to cross examine the witness. I wonder if it would be convenient for the Examiner to break for the luncheon session now, so we can have Mr. Hickey here this afternoon to conduct that examination?

(Off the record)

Mr. Highsaw: Mr. Examiner, there has been a great deal of ground covered and I will make an attempt not to duplicate any of the questions, but I might inadvertently do so, and if you will just call my attention, I will withdraw them.

—403—

[fol. 4133] Cross-examination.

By Mr. Highsaw:

Q. How many of the Grace Company directors are also directors of Panagra, Mr. Roig?

A. Mr. Garni and I, who are directors of Panagra, are also directors of W. R. Grace and Company.

Q. How many directors does W. R. Grace have altogether?

A. I think we have a dozen or more. About 12, 13 or 14; I don't know exactly.

Q. Could you get us the same information as between W. R. Grace and Grace Lines?

A. You mean between Grace Line and Panagra?

Q. W. R. Grace and Grace Lines.

A. W. R. Grace and Company and the Grace Lines—suppose I get that accurately instead of trying to remember it. I will get it on to you during the noon recess and give it to you accurately.

Examiner Wrenn: All right.

By Mr. Highsaw:

Q. Are any of the directors of Panagra also directors of Grace Lines?

A. Yes.

Q. How many of those? Could you give that information?

A. As I recall right now, I am a director of Grace Lines and Mr. Garni is, and Mr. Patchen is.

Q. How many directors does Grace Lines have?

A. That I will look up for you.

Q. Does Panagra make any payments to Grace Lines for management whatever?

[fol. 4134] A. No payment to Grace Lines for management whatever.

Q. To W. R. Grace and Company?

A. Yes.

Q. Do you know how much that was during the past year?

Mr. Gesell: Aren't the Form 380's in evidence here? They show that information.

Examiner Wrenn: Aren't they contained in your stipulation?

Mr. Highsaw: Yes.

By Mr. Highsaw:

Q. Are any services rendered, Mr. Roig, by Panagra, for either W. R. Grace or the Grace Lines?

A. Only in that W. R. Grace & Company, I guess, is Panagra's best customer. Grace Line is an important customer too; I mean we render service to both of them in carrying personnel and mail and express from time to time.

Q. In other words, W. R. Grace performs services for Panagra and Panagra performs services for Grace?

A. The only service that Panagra performs for Grace is precisely the same as performed for any member of the public.

Mr. Fitzgerald: Revenue traffic?

The Witness: That is all. It is just traffic. As a common carrier we carry a great many Grace Line personnel, but we don't render any service outside of that.

By Mr. Highsaw:

Q. I assume they are paid for just like any other passenger would be?

A. Yes.

—405—

[fol. 4135] Q. These services that W. R. Grace performs for Panagra—you said there were such services—are they under some sort of contract arrangement?

A. It is not under any written contract except as the '39 agreement refers to it, but services rendered Panagra by both W. R. Grace and Company and Panair are the development of a ~~man~~ *plan* that has been carried out through the years. It varies from time to time.

Q. That is the management service?

A. That is it. Just to prevent any misunderstanding on that question of tariff, the Grace employees, I might say that up until some years ago there was a reciprocal arrangement between the Panagra and the Grace Line under which employees received reciprocal discounts. That was discontinued several years ago. There is no account of that kind. W. R. Grace and Company had a similar discount.

Q. Did the Board of W. R. Grace and Company discuss the contract between Pan American, Inc. and Panagra, which is Contract "A" in this proceeding?

A. When I submitted the matter to the W. R. Grace and Company Board, I naturally gave them the whole picture.

Q. They did discuss that contract, then?

A. The thing was discussed as a whole.

Q. Was the contract between Pan American, Inc. and Panagra, which is referred to as Contract "A", submitted to the Board of W. R. Grace and Company for approval before Panagra signed it and executed it?

A. No, it was not.

Q. Did W. R. Grace and Company, during the negotia-

—406—

[fol. 4136] tions, express any opinions as to any of the provisions, and urge you to have certain provisions put in, or other provisions suggested by Pan American changed?

A. The discussion with the W. R. Grace and Company Board didn't get down to fine points. It was related more to the overall picture and whether this was going to be a reasonable solution of our difficulties.

I don't recall discussions in our Board's meeting of any particular clause. I wouldn't say there wasn't, but I don't recall it.

Q. Do you remember who suggested the revision of the Grace-Pan American 1939 management contract as a part of this arrangement? That is, which source, whether it was from Pan American's side or the Panagra-Grace side?

Mr. Gesell: There is no testimony here, is there, Mr. Examiner, that there was any suggestion of a revision of the management relationship? I don't understand what Mr. Highsaw has in mind.

Mr. Highsaw: We have a contract here which terminates the 1939 agreement, as I understand it, so I would assume that the 1939 agreement has in some way been revised.

Examiner Wrenn: All right.

A. Well, except as the 1939 agreement is, as I said before, revised from time to time—it has been over the years—there have been no changes as yet made as a result of these contracts.

Examiner Wrenn: Mr. Gesell, there isn't any inference in their overruling you with respect to there not having

take it

been testimony on that. I ~~am taking~~ Mr. Highsaw has been

—407—

[fol. 4137] talking about the particular provision in the

agreement relating to it and he wants information as to why that provision was put in there.

I think that is true, isn't it, Mr. Highsaw?

Mr. Highsaw: My question doesn't go to the mere fact of that one word in there. My question goes to the fact that —I will withdraw the word "revision" if that will suit Mr. Gesell. What I want to know is who suggested a substitution of this present contract B for the 1939 management agreement.

A. Well, the suggestion of this type of contract as a settlement of the whole problem came from Pan American, as I pointed out. If you are interested in the particulars, does that answer your question?

By Mr. Highsaw:

Q. That answers it. Do you remember, Mr. Roig, from what source the particular provisions in Contract B, relating to the management of Panagra—that is, the election of the president, and those particular provisions, from what source they came?

Were they suggested by Panagra, Grace or Pan American?

A. In the first instance that came forward as a carry-over from the 1939 agreement more or less automatically.

Various changes in the way of restrictions on that power, to which I have testified before, I think came from Pan American's side. Other clauses relating to it, I don't know whether they came from the Pan American side or the Panagra side.

Mr. Friendly, who was a party to the discussions with

[fol. 4138] Mr. Gesell, would know that. I was not a party to those discussions.

Q. Do you have any similar information regarding the arbitration provisions or would you rather I would ask Mr. Friendly about that?

A. I would rather have you have Mr. Friendly answer that.

Q. Mr. Roig, would you regard Panagra as being in a

strong bargaining position in the renegotiation of these two contracts that we have here?

Mr. Gesell: What is the relevance of that? I object to what Mr. Roig thought was Panagra's bargaining power in this proceeding.

Mr. Highsaw: It has considerable relevancy on what they eventually arrived at.

Mr. Gesell: Mr. Roig has certified that this agreement was an agreement that was considered by him and by the Panagra people and the Grace people and it was determined that it was a sound business proposition.

Doesn't that cover that? He said it was perfectly clear from the testimony. There hasn't been any duress here. Is that what counsel has in mind?

Mr. Highsaw: I am not suggesting duress.

Mr. Gesell: What other meaning can it have?

Mr. Highsaw: Mr. Examiner, I think the witness is capable of expressing an opinion as to his position of his company at the time this agreement was entered into in relation to Pan American. I think that is quite relevant.

Mr. Gesell: But the mere assertion of that statement a

— 409 —

[fol. 4139] second time doesn't make it relevant, Mr. Examiner. Mr. Highsaw hasn't explained the relevancy to it. I would like to hear it.

Examiner Wrenn: What is the purpose of it? That is what I would like to get at.

Mr. Highsaw: Panagra in this contract as entered into has made various concessions and have received back concessions from Pan American.

Now, the question as to the element of the public interest that was involved in their negotiating and making decisions as to whether they were going to make a particular concession or whether they were not; it seems to me to be directly related to the opinion of the president of Panagra as to what the position of his company was in the negotiations.

If they didn't attempt to bargain at here, that is a fact that the Board should know, and if they were in a weak bargaining position, I think that is a fact that the Board should know in considering this contract.

Mr. Gesell: If there is any suggestion that this wasn't a hard negotiated contract, I think Mr. Roig be allowed to answer the question. I will withdraw my objection.

Examiner Wrenn: All right.

A. I consider that Panagra was in a very strong bargaining position. In the first place, Grace had some months before secured an opinion from the Circuit Court of Appeals, the Second Circuit in New York, which I thought greatly strengthened Panagra's whole stand in connection with this route extension. To be sure it was before the

—410—

[fol. 4140] Supreme Court on appeal, I was not concerned about the outcome any more than anyone is concerned about the outcome of any litigation. I felt confident about it. In addition to that, I felt that with the changed situation in the Caribbean, which had arisen with the new routes that had been granted there by 525, that Pan American might well be more disposed to make a reasonable proposal, as the events showed that they were, and I felt also that the language of the Board in 525 instructing the stockholders of Panagra to get together and provide some system of providing through service gave us a very strong trading position which we didn't fail to use.

Examiner Wrenn: Is this a convenient point to break, Mr. Highsaw?

Mr. Highsaw: Yes, sir.

Examiner Wrenn: We will recess until 2 o'clock.

(Whereupon, at 12:37 p. m., hearing in above-entitled matter recessed, to reconvene at 2 o'clock p. m., same day.)

—411—

[fol. 4141] AFTERNOON SESSION 2 p.m.

Examiner Wrenn: Let's come to order please.

Due to press of other matters, later in the afternoon Mr. Hickey of the Department of Justice has requested permission to cross examine at this time and Mr. Highsaw has agreed to that so Mr. Hickey you may proceed with cross examination of the witness.

HAROLD J. ROIG, resumed the stand, was examined and testified as follows:

Cross examination.

By Mr. Hickey:

Q. Mr. Roig, Panagra was organized in February 1929, was it not?

A. Yes.

Q. And from the time of its organization up to and including the present time it has been jointly owned and controlled by Pan American Airways Corporation and W. R. Grace and Company?

A. Yes.

Q. That is by virtue of the fact that each of those companies possess 50 per cent of the voting stock?

A. Yes.

Q. I believe you testified Monday to the effect that the Board of Directors of Panagra is composed of four directors who represent Pan American and four who represent W. R. Grace and Company?

A. Well, it is composed of four directors from each side. I have always considered they represented the stockholders of Panagra once they became a director of Panagra.

—412—

[fol. 4142] Q. But they are nominated by each of those companies?

A. Yes.

Q. And does that Board of Directors of Panagra determine and control all policy and action by Panagra?

A. Yes.

Q. Including the—

A. Except such matters as properly go to stockholders.

Q. Including the determination of what rates and fares for air transportation shall be charged by Panagra?

A. Yes.

Q. And including the determination of what routes will be sought and what schedules will be maintained in their operation?

A. Yes.

Q. So that as a practical matter it is true, is it not, that no air transportation rates or routes unacceptable to either Pan American Airways Corporation or W. R. Grace and Company, have or could be affected by Panagra?

A. Well, there have been, certainly in the matter of routes, there have been routes proposed which in the first instance have been considered unsatisfactory by Pan American, let's say, and after discussions have been agreed to.

Q. I realize that but I mean that it is impossible, is it not, that if Pan American finds a route or a rates unacceptable, it would be possible for Panagra to initiate it, isn't that so?

A. Mathematically that is so. Historically, based on 18 years of experience, with the exception of this extension to United States, it is not a realistic view of the situation.

413

(fol. 4143) Q. That is just as true today, under the agreement here in issue, as it was prior to the adoption of these contracts, exhibits A and B to your petition?

A. Yes.

Q. And it is a well known fact, is it not, that prior to the consummation of the present contracts all efforts by Panagra to secure a terminal within the United States were unsuccessful because unacceptable to Pan American Airways Corporation?

A. Yes.

Q. And that is also necessarily true, is it not, with respect to any route which Panagra might desire, or rates which it might want to charge, for air transportation?

A. I have answered that question, I think.

Mr. Gesell: Mr. Examiner, may I inquire who Mr. Hickey has in mind when he says "Panagra?"

Mr. Hickey: I have the company in mind of which Mr. Roig is the President.

Examiner Wrenn: All right.

Mr. Hamilton: Mr. Examiner, I think I may be in error about this, that the phraseology of Mr. Hickey's second question imports into it the first question.

I would like if I may, to have the reporter read it back. I don't think he intended that.

Examiner Wrenn: Read the question back please.

(Question read.)

Mr. Hickey: I will withdraw the question and rephrase it. I can see your point.

—414—

[fol. 4144] By Mr. Hickey:

Q. That would necessarily follow, would it not, with respect to any route which Panagra might desire and Pan American would be opposed to?

A. Well, as I have explained: theoretically, yes; historically, ~~not~~ *and* realistically, ~~yes~~ *no*.

Q. Has Panagra ever to your knowledge considered the desirability of operating a route along the East Coast of South America?

A. No.

Q. You never have?

A. No.

Q. Well, is there any reason why they wouldn't, in view of the natural development of the traffic potential which would inure to you as a result of such routes?

A. Well, except that when Panagra was originally formed the Grace interest was essentially on the West Coast of South America. That is where most of our business has always been, and our business in an airline at this time was one serving the West Coast of South America and Buenos Aires.

At the time the company was formed, Pan American had already started or laid out a route down the East Coast, and Panagra was set up with a view to operating on the West Coast, and we have always gone along on that basis.

Q. Do you mean by that that you respected each other's territories, spheres of operation?

A. In effect that has been true. There have been a number of quite important departures from it, however.

—415—

[fol. 4145] For instance, some years ago, when we decided that we wanted to run down from Lima through Bolivia and down through the center of the Argentine to Buenos Aires, on what we ~~consider~~ *call* our "diagonal route," that was brought up for discussion, although it was well over on the

eastern side, and after discussion—some considerable discussion—it was agreed that Panagra could apply for that route.

We did apply for it and have been operating it ever since. Later on, of course, we went to Corumba just inside the Brazilian border, along Bolivia, and now within these recent days have extended that to Campo Grande which is some 300 miles further inside the Brazilian border.

We also originally operated in the northern sector along the coast, Pacific Coast of Colombia, and at a later date by agreement diverted the route to an overland route serving Cali in Colombia.

Q. Isn't it a fact that your election to the presidency of Panagra was pursuant to an agreement between Pan American and Grace that the management of Panagra would be in the hands of a Grace and Company representative?

A. Well, that was—I was elected President under the 1939 agreement. The agreement speaks for itself and it says that "one of the Grace directors of Panagra who shall also be a director of Grace will be elected President of Panagra, and placed in responsible charge of the management of the company. If at any time the company's affairs are not being conducted to Pan American's reasonable satisfaction, then the President will resign."

That was the statement of the agreement which was

416

[fol. 4146] reached between the parties at that time.

Q. Wasn't it implicit also in that agreement that Panagra would confine its operations to the West Coast of South America, the few exceptions you have mentioned and would not operate north from the Canal Zone into the United States?

A. That has been a subject about which there has been great difference of opinion. When you go over the record in 779 which has been incorporated into the proceeding this morning you can see both sides of that question.

I have always maintained the negative of that issue.

Q. Except that you have also maintained that it would surprise you very much—I believe you used that expression in answer to one of Mr. Friendly's questions—that it would surprise you very much if Panagra would operate

down the East Coast of South America and it would equally surprise you if Pan American were to operate down the West Coast of South America?

A. Yes, it would, in view of the way the companies were originally set up and the way they have always gone along.

Q. In other words, if there isn't anything express in this contract, there is at least an understanding between the two companies.

Mr. Gesell: What contract?

Mr. Hickey: Excuse me, agreement.

Mr. Gesell: You are talking about the '39 agreement?

Mr. Hickey: Yes.

Mr. Gesell: I just wanted to be sure.

—417—

[fol. 4147] By Mr. Hickey:

Q. There isn't anything express in that agreement, there at least exists an understanding between the two companies that they will operate in that manner?

A. It never occurred to me that this agreement had anything to do with that subject.

As I say, the companies were originally set up that way, and while there has never been anything approaching a formal agreement on the subject, that general method of operation has been accepted on both sides.

Q. Now, referring back to your testimony on Monday—

A. When I say accepted on both sides, I mean without any limitation on the right of anybody to bring it up, as we have in numerous instances, to extend.

Q. Referring back to your testimony on Monday: Aside from the benefits which you say that at that time would inure to Panagra as a result of this agreement—that is, if I summarize them correctly, maintenance and training provisions, and the sales promotion by Pan American, and the right to operate on Pan American's domestic routes within the United States if subsequently granted by the Board—aside from those alleged benefits, Panagra is just as subject to control by Pan American Corporation and W. R. Grace and Company today as it always has been, isn't that correct?

A. Well, I think that there are certain other provisions in the agreement which facilitate the operation of the administration, so to speak, of the business.

On the question of corporate control there has been no change.

418

fol. 4148 Q. I believe you also testified on Monday under cross examination—I believe it was Mr. Gambrell that the issue of Pan American's monopoly was irrelevant in your opinion. I believe you used that expression.

A. Yes.

Q. And in support of that statement you stated the fact that Braniff plus approximately nine foreign companies were offering Pan American competition in South America.

A. Yes.

Q. Is that correct?

A. Yes, I think, substantially.

Q. Now, in support of that contention are you prepared to state what percentage of total air traffic, each of those approximately nine foreign companies and Braniff, control between Latin America and the United States.

A. I think there is a little confusion in the question there because the nine companies that I referred to, foreign companies, were companies flying in territory.

Some of those are also in Pan American's territory, others are not and there are additional companies in Pan American's territory that are not in ours. Is it Pan American or Panagra that you are interested in?

Q. Neither, strictly speaking. I meant only such companies as operate between Latin America, excluding Mexico, and the United States.

A. Of the companies that operate between Latin America and the United States I can't give you the percentages either of the total traffic or what they may be carrying of the traffic on the lines which are now operating and begin operating

419

fol. 4149 Q. Can you name any companies which are now operating

A. Yes. You have between the United States and South America companies which are carrying important traffic

KLM, TACA which operates from both Balboa and I think from Brazil—I think that line is still running from Brazil—and there are other lines: Avianca, I don't know whether they have actually begun their service but they have been authorized.

Q. I mean now. Excuse me. Let's try to put this question:

Now, operating between a United States Terminus and Latin America?

A. Well, I am not sure whether Avianca is actually operating at this moment or not. I know that TACA and KLM are.

Q. You state you don't know what percentage of traffic anyone of those or all of them in the aggregate control?

A. No, I do not.

Q. Do you know what percentage of total air traffic between Latin America and the United States is at present controlled by Pan American?

A. No. If I did I would know the others. It would be the difference. I have no doubt that Pan American is larger now, but I don't think this question can be decided entirely on the basis of what is existing now.

After all, Braniff isn't running yet. British Airlines isn't running yet.

Q. That is an argument that can be made.

Mr. Hamilton: It isn't an argument.

—420—

[fol. 4150] Mr. Hickey: I was merely trying to get the figures as to this incidental.

The Witness: I think some of our later witnesses can give you those figures but I don't know them.

By Mr. Hickey:

Q. Mr. Gambrell also asked you a question regarding the coincidence of Grace Lines ports and Panagra's air terminals along the West Coast of South America, and I believe you testified that many of the points served by Grace Lines were also served by Panagra, is that so?

A. Well, it depends how literal you are in that. Actually the number of common ports is relatively few. In the first

place, the Grace Line naturally serves only the ports whereas Panagra goes to the interior cities, but from the standpoint of the coastal area it is fair to say that they are serving to that extent a common territory.

When you get back of the coastal area I mean really back—why then you are in an ~~line~~ area which Grace Line of course doesn't serve at all.

Q. Is it also fair to say that the principal ports along the West Coast of South America are served both by Panagra and Grace Line?

A. No, definitely, not because the principal ports on the West Coast of South American are first Colombia, the Port of Buenaventure, Grace Line goes there, Panagra does not.

The next important port is Guayaquil. We both go there.

The next important port is, you might say, Talara, we both go there.

421

[fol. 4151] The next would be Callao, ~~the~~ a port of Peru. Grace Line goes there, Panagra does not. Panagra goes to Lima, the capital, back of Callao, served by Callao, however.

Then there are a number of other Peruvian ports, to none of which Panagra calls. Panagra calls in Peru are Talara, Lima and Arequipa. Arequipa is an inland point in the mountains and the Grace Line does not go there.

When you get to Chile, both Panagra and Grace Line call at Antofagasta. Grace Line calls at Valparaiso and Panagra calls at Santiago.

Q. I believe you also testified on Monday that approval of this agreement would make competition between Pan American and Panagra impossible. I think that is the word you used from Balboa north into the United States. Isn't that so?

A. I don't know the words that I used, but it is true that between Balboa and Miami, where Panagra has never had any service and Pan American has, there will not be competition between these two companies.

Q. By competition, what form of competition do you

mean? All forms, including service as well as rates and fares?

A. Well, we will simply not be running any planes in that area. We will be providing the public with through service through that area, but Panagra will not be operating planes in that area under this agreement any more than it has before. But that is no reduction in competition, and it is no prohibition about what the future may contain if there is a different set up, but under this contract, com-

—422—

[fol. 4152] petition between the two companies in that area is not contemplated any more than has existed in the past.

Q. As you say, it is obvious that the service as well as the rates and fares will be as determined heretofore by Pan American.

A. Panagra will have nothing to do with determination of rates in that area. We will have the selection of the airplane which we send through. It will be our plane.

Q. I think you further stated that if the pooling arrangement contemplated by Provision 13(a) of the agreement, were subsequently effectuated between the parties and approved by the Board, that there would also be no competition south from Balboa.

Mr. Gesell: I didn't so understand his testimony, Mr. Examiner.

Mr. Hickey: I haven't quite finished.

Mr. Gesell: I am sorry.

Examiner Wrenn: Go ahead.

Mr. Hickey: Maybe I can make this clear.

By Mr. Hickey:

Q. —that there will be no competition from the points served under the pooling arrangement any more than there would be north of Balboa?

A. That is not my understanding. If I said anything that led to that conclusion it wouldn't be a correct conclusion because as I thought I pointed out on a number of occasions, when talking about the pool, pools do not limit competition necessarily to the extent often supposed, for the reason that pools are generally set up on the basis of the

423

[fol. 4153] position which the members have in a particular trade at the time the pool is set up, but thereafter, unless each member maintains his position, at least up to what it was when the pool was formed, the other members cut him down. They don't carry him along.

Q. But it is true, I think you were talking to Mr. Schneider about this matter on Monday, it is true that you stated that as a result of this agreement, less rather than more competition would result in the final analysis.

A. Well, less competition could only be as between the members of the pool, and whether the result is more or less depends on all these other considerations.

Q. Let me refer to something else in your testimony.

Mr. Hickey: I want to say to Mr. Gesell that I am not trying to paraphrase this inaccurately at all because I wrote it down as it occurred.

I believe the expressions are about what Mr. Roig said.

Mr. Hamilton: Could you give us the reference to the record as you went along.

Mr. Hickey: No, I can't. I don't have the record with me.

Mr. Gesell: Would it be possible, Mr. Examiner, and Mr. Hickey, just to avoid this problem of trying to paraphrase a record which you don't have, wouldn't it be better to ask the direct question?

Examiner Wrenn: I think so.

Mr. Gesell: Concerning what the situation is, and get the answer of the witness.

424

[fol. 4154] Mr. Hickey: I will ask the question, and if you feel that it is objectionable.

Mr. Gesell: I feel it might be a little simpler for us all.

By Mr. Hickey:

Q. I believe you stated that your decision to enter into arrangements of this character were motivated: (1) by a desire to cooperate with Pan American to keep other competitors — and I am trying to quote you here — off your neck — I think that is about what you said — and secondly,

because it was perfectly proper in your opinion to eliminate ruinous competition between yourselves—meaning Panagra and Pan American—to withstand the threat of competition from foreign air carriers, is that substantially your testimony?

A. Well, whatever I said or in whatever form it may have been said, certainly those were not the primary considerations.

The primary considerations were to solve the problem which had been pending for a number of years, and which had arisen before this competitive situation developed, and the primary problem was to enable Panagra to compete at all—I mean long before we began to worry about any restriction of competition by a pool, it has to be considered that without this agreement, or some other means of getting through to the United States, Pan American-Grace—Panagra—was rapidly getting into a position where it couldn't compete with Pan American at all, much less compete with anybody else, because with Pan American

—425—

[fol. 4155] always having had a through route to United States, and with the Puerto Rico case having a direct route through to the United States, Panagra was in no position to compete with Pan American at all, and this agreement, far from reducing the competition with Pan American, makes it possible for Panagra to compete with them in a way that they couldn't possibly do without some such arrangement.

Q. In what way will you compete with Pan American?

A. For Buenos Aires traffic and for traffic—tourist traffic, based on relative advantages of the two coasts—but primarily in connection with Buenos Aires traffic.

Q. Pan American is going to run the planes from Balboa up into the United States, aren't they?

A. Oh, yes, but the traffic I am concerned about is the traffic that moves over our route from Balboa to Buenos Aires, but which will not take our route if they haven't got the benefit of through service to the United States.

Anyone going from Washington to Buenos Aires, and having a decision to make whether he will go by Eastern to Miami, Pan American to Balboa, and Panagra to Buenos

Aires, as against getting on a plane of Pan American in New York and going straight through, why, the chance of his taking our route is almost zero.

Q. In other words, you are saying that this agreement enables you to compete better with Pan American within South America?

A. Over our route.

Q. But it doesn't in any way enhance your ability to

426

[fol. 4156] compete with Pan American between the United States and South America?

A. Well, it does, Mr. Hickey. Not between Miami and Balboa.

Q. That is what I mean.

A. But between every other point on our route in South America, and including particularly Buenos Aires, which is the competitive point, it definitely improves our ability to compete with Pan American, and that has been the basis of the discussion over all these years, and that was the primary object that we have been seeking and which we have accomplished through these agreements.

Q. You wouldn't deny, would you, Mr. Roig, that one of the—if not the only one, one of the principal motivations in reaching this agreement was the threat of competition proposed by these foreign companies to which you refer, and by Braniff's newly approved route you wouldn't deny that, would you?

A. No, I wouldn't deny that.

Q. So that you wouldn't say now that you were entirely wrong when you said that it was proper to agree among yourselves in order to eliminate ruinous competition forced on you by others, would you?

Mr. Gesell: I must object, Mr. Examiner. We have gotten confused here between what Mr. Roig said about the Buenos Aires pool, which is not before us here, and this agreement which is before us, and Mr. Hickey has. I am sure not intentionally confused these two things and included this agreement here for approval in a discussion of the Buenos Aires pool.

—427—

[fol. 4157] Those are two separate and wholly distinct problems from a competition view and I think we must try to keep the testimony clear on it.

Examiner Wrenn: I think the testimony should be kept clear on that. I presume the testimony you have reference to is set forth on pages 97, 98 and 99 of the transcript.

Mr. Gesell: That is where the phrase "ruinous competition" was used, for example, in connection with the Buenos Aires pool, not in connection with this agreement.

Mr. Highsaw: Isn't there a provision in this agreement contemplating a Buenos Aires pool?

Mr. Gesell: Of course there is. Mr. Highsaw misses my point entirely. What Mr. Roig says as to the reasons and motivations behind the possibility of the Buenos Aires carriers pooling is not something he said as to this agreement which is before us here for approval. That is my point.

Mr. Hickey: I think he made the statement generally.

Mr. Gesell: Can you show us in the transcript where he did?

Mr. Hickey: I can. I haven't got it here.

Mr. Gesell: I can give you a copy.

Mr. Highsaw: Mr. Examiner, that distinction escapes me. As a part of this agreement, anything he said about that, I don't see how it can be about something else. It has to be about this agreement.

Examiner Wrenn: I am perfectly willing to have the witness state what he had in mind. I have no objection to Mr. Hickey asking him what he had in mind but let's be clear.

Mr. Hickey: I certainly intended no other result than

—428—

[fol. 4158] the one you state. I just asked the witness. My recollection was that at the time he made the statement he made it generally and he didn't limit it.

A. I would like to state, Mr. Examiner, if I may, since the question has been raised, just what our position is vis a vis competitors other than Pan American.

I have just explained what it was in connection with Pan American, and how this contract improved our competitive position in that situation.

Now, so far as other competitors are concerned we are not seeking under this agreement any unfair advantage against anybody. There has been a great deal of talk in this hearing about protecting Eastern, protecting National, protecting Braniff.

What we are trying to protect is the traveling public. We are trying to enable the public to travel over Panagra's route, to come through to the United States on our route just the same as they do on any other route.

We are not asking for a new route. We are not asking for anything except to give the traveler on our line a better ride, and at the same kind of a ride he can get on other lines.

By Mr. Hickey:

Q. You are speaking particularly for Panagra now?

A. I am speaking entirely for Panagra.

Q. That is the point I want to make clear.

Examiner Wrenn: Go ahead, Mr. Roig.

A. Now, in the matter of our dealings with competitors, we have offered Braniff our ground facilities and they are using them. They are using them on their survey flights

—429—

[fol. 4159] which are just about now completed.

We have offered the same services to Avianca and TACA and they are using them.

We intend to offer them to others and have offered them to others, but we do feel that we are entitled to give the public that travels over our route the same kind of a service that he gets in other places, and while we are not going to compete unfairly in any of these matters, or tie up with anybody to the prejudice of anybody else, we are going to compete with everybody—Pan American, Grace Line, Braniff, all the others—we are going to compete with them in ability to serve the public by giving the public the best kind of service that we know how in equipment and in schedules and above all, because experience has demonstrated its great importance, in a through flight from point of origin or destination on our route through to the United States.

Q. I just want to say, Mr. Roig, I fully appreciate the reasonableness of your statement made as a representative of Panagra and of course it wouldn't be fair to ask you what were the motivations behind Pan American's acceptance of this agreement—I am not going into that.

A. No. They would have to answer that.

Q. What was the purpose, if you know, Mr. Roig, of inserting the pooling arrangement contemplated by Provision 13(a) of Exhibit A as it now stands?

It is merely an agreement to agree sometime in the future, is it not?

Mr. Gesell: He was asked that precise question on direct

—430—

[fol. 4160] and gave a full answer.

Mr. Hickey: May I ask him again if the Examiner please?

The Witness: Can we refer to the record if we have got the record here? Because I have answered it three or four times.

Examiner Wrenn: Certainly you can.

Mr. Gesell: He has answered it in great detail and we might as well have it.

Mr. Hickey: I don't believe that specific question was ever answered.

Mr. Gesell: I will find it for you.

Examiner Wrenn: What point do you have to bring out?

Mr. Hickey: I want to know why it was necessary to include—I want to ask him this question—to include this agreement to agree sometime in the future where Board approval was still a requisite in this particular agreement.

The Witness: That is a different question.

Mr. Hickey: I think it is.

The Witness: I am afraid you would have to ask Mr. Friendly or Mr. Gesell for the answer to that.

Mr Gesell: There is an answer in the record. I am sure. I will try to find it.

Examiner Wrenn: Go ahead with your examination, Mr. Hickey.

By Mr. Hickey:

Q. Mr. Roig, do Exhibits A or B to this petition contemplate that during the term of this contract, Exhibit A, which

is a 50 year term. Panagra will not seek an independent franchise to the United States.

fol. 4161 A. There is no provision to that effect in the agreement unless it be the general provision that the contract will be liberally interpreted to accommodate itself to future conditions.

But it certainly is not within the reasonable understanding of this agreement that so long as we are able to fly the traffic through under this agreement we would seek to come through on a certificate of our own.

Q. May I refer your attention to provision 3 of Exhibit B to the agreement and read that provision, the second from the last paragraph? Pan American will consent to Panagra's application for an independent franchise are the terms set forth, are they not?

A. Well, there is one condition, one set of facts, under which Pan American will consent, yes, that being their inability to carry out their part of the contract by reason of cancellation of their certificates.

Q. Also I call it to your attention of their failing to fulfill their obligations under the agreement to you, isn't that also included?

A. No, I don't think so. I think this paragraph is related to Pan American's inability to operate where it is impossible for them to perform, owing to some infirmity having developed in their certificate.

Mr. Gesell: That testimony on the point I was talking about appears at page 75 of the transcript.

The Witness: But the question was different.

By Mr. Hicks:

Q. Referring again to my question, Mr. Rentz, isn't it implicit there in this provision that except for default of certificate, Pan American is under no obligation to consent to Panagra's application for an independent franchise?

fol. 4162

A. That is correct.

Q. As a part of this contract, did Grace agree that Panagra should not apply for an independent franchise?

A. Well, Grace has agreed to execute this exhibit B and have executed it. They have not entered into any agreement on that subject other than what is in print here. (indicating).

Mr. Hickey: That is all I have, Mr. Examiner.

Thank you very much for allowing me to go ahead.

—433—

[fol. 4163] Examiner Wrenn: Thank you, Mr. Highsaw, for interrupting your cross examination.

You may continue now.

Further cross examination.

By Mr. Highsaw:

Q. Mr. Roig, right before lunch I believe you said you would be able to get the information for me on the relations between W. R. Grace and Grace Lines as to directors.

A. Yes, and I now have that information.

Q. Will you put that in the record, please?

A. Yes. There are 14 directors of W. R. Grace and Co. two of whom are on the Panagra Board, those two being Mr. Garni and myself.

There are nine directors of Grace Line, three of whom are on the Panagra Board: Mr. Garni, Mr. Patchen, and myself.

Q. That covered the relations between W. R. Grace and Grace Line?

A. I didn't cover the last one. Did you want that too?

Q. Yes, I want that too.

A. On Grace Line, out of 9 directors, six are directors of W. R. Grace and Company: Messrs. Holloway, Garni, Roig, J. P. Grace, Jr., and J. T. Kirby.

Q. Before lunch I mentioned something about management fees. I believe you testified that there was a management fee paid to Grace by Panagra. Is that determined by some sort of agreement between Panagra and Grace?

—434—

[fol. 4164] A. Well, it is determined by the decision of the

CAB in our last rate case which fixed the basis of working the fee out.

Q. There is also a fee paid to Pan American?

A. Yes.

Q. And is there any kind of agreement between Panagra and Pan American and Grace and Pan American for the division of that fee—division of the fees between Grace and Pan American?

A. You mean—I don't understand quite what you mean.

Q. Well, as to how much of the fee goes to Pan American, or is that determined too by the

A. Well, actually this practice developed prior to the time when it came before the CAB in a rate case, and during that previous period the matter had been worked out by discussion and negotiation and agreement each year.

During those periods the amount was not the same every year—it isn't now—and the amounts received by each party were not the same each year.

I think generally speaking Pan American received a somewhat larger fee than did W. R. Grace and Company. Since the CAB time was before the CAB I think at that time we were receiving the same or substantially the same—I think that is about the way it is now. There might be some slight difference.

Q. There was never any set formula or agreement, it was always a year to year negotiation?

A. Yes. Until the CAB basis was determined.

4256

(fol. 4165) Q. Since then, has it always been made on that basis or have there been subsequent changes?

A. It has been made on that basis with adjustment only to cover the mileage.

I think the CAB indicated a certain amount per revenue mile, something of that kind, and for at least the amount that they allowed that year figured out so much a revenue mile. As the revenue miles have increased, the amount per revenue mile was reduced.

Q. Is there anything in either one of these agreements, A or B, which would affect such a situation at all?

A. No. I think I have explained, however, that it is contemplated that the fee situation will be revised and adjusted

to the new situation created by this new agreement if approved, but that isn't in the four corners of the instrument.

Q. You contemplate that that will be done by agreement of some sort?

A. Yes.

Q. Have any of those agreements ever been filed with the Board?

A. They are not really anything to file. They are just a determination of the matter, as I say, before the rate case on one basis, and afterward on another.

The same thing has been gone into before the Board in rate cases.

Q. You expect the Board to take a look at it in the rate case, then, don't you?

A. Oh, yes.

437

[fo. 4166] Q. I believe you just mentioned to Mr. Hickey that there was no commitment by Pan American as to Panagra applying for a route to the United States other than what is contained in this Paragraph 5, is it?

A. Yes.

Q. —of the Contract B?

A. Yes.

Q. During the negotiations for these two contracts, did you, Mr. Roig, attempt to bargain with Pan American at all on the question of whether or not, in the event this agreement should be disapproved by the Board, that Panagra would have a right to apply for a route into the United States?

Mr. Gesell: I object to that question, Mr. Examiner. I don't think it is appropriate in this proceeding to review the various offers and negotiations back and forth between the parties in reaching this compromise of their difficulties. That is what this question involves.

Mr. Highsaw: Mr. Examiner, this agreement purports to be more than just an agreement to operate a through service. If that is all there is to it, we wouldn't have so many of these difficulties, but it purports also to settle some of the situations which have existed down there and as long as it purports to be that, it seems to me proper to go into

some of those matters such as I am trying now to find out what the parties did between signing [illegible] settlement which they have not [illegible]

Mr. Goodlet: I quote [illegible]

fol. 4107 can look at the [illegible] on the public interest, [illegible] between the parties in [illegible] the various offers [illegible] other certainly doesn't seem to be [illegible]

Examiner Wrenn: How extensively are you going into this subject?

Mr. Highsaw: I think [illegible] have on at right now.

Examiner Wrenn: [illegible] at least for the time being.

A. I think Mr. Ferguson [illegible] those discussions, [illegible] than I can.

By Mr. Highsaw

Q. The question I asked Mr. [illegible] you, as president of Eastern, [illegible] with Pan American, [illegible] with Pan American, [illegible] the Board.

A. I discussed [illegible]

Q. And you [illegible]

A. No. I think [illegible] the reason I suggested Mr. Ferguson would be a better witness than I. He has [illegible]

Q. The only attempt on your part to [illegible] discuss it with your attorneys.

fol. 4108 A. That's right. I never discussed it with anybody on the Pan American side.

Q. Did you tell your attorneys that you wished them to try to obtain that?

A. I don't recall just what I told him, but in effect that was one of the things, at one stage of the discussions.

Q. Do you ever recall his reporting back to you on that point?

A. The point was not isolated; it was along with others, and my general recollection is, as refreshed by its absence that from the contract, that he reported back, ~~and~~ it had not been agreed to.

Q. There has been a considerable amount of discussion here as to the purposes of this agreement. I am not quite sure the record shows in one place just what all of the purposes are. There has been a considerable amount of questioning on individual purposes.

Mr. Highsaw: I don't want to duplicate a question, Mr. Examiner, but I would like for Mr. Roig to state now for the record what he conceives to be the chief purposes of the agreement. As I understand it, they have been to provide this new through service, and secondly, to settle outstanding differences between Pan American and Panagra and I am not clear whether there are any others.

If I have misstated those, I am willing to stand corrected.

The Witness: Those are the purposes. I think there are various purposes incidental to the first one, which you haven't referred to, but which is clear enough in the agree-

—440—

[fol. 4169] ment itself.

By Mr. Highsaw:

Q. Do you wish to say any more on that point?

A. I don't think so.

Q. Which one of these purposes do you consider the most important to the Board's consideration of the agreement?

A. I think the purposes are quite closely interwoven, and of them to which I referred, without going into them, inseparably interwoven, but the outstanding purpose of this agreement is to enable Panagra to offer the public a through flight service to points on its route to the United States.

Q. This next question also deals with a point that I am not quite clear on. There have been several individual

questions asked about whether this settled specific disputes in specific dockets that are before the Board.

I am not clear whether you have given an answer on the question or whether or not this agreement makes an attempt to settle the basic question of the divided responsibility in the ownership, excepting so far as that may be reflected in the specific disputes that this agreement covers.

Mr. Gesell: I am not sure I understand that question. Could I have it read?

Examiner Wrenn: Read it back, please.

The Witness: Perhaps you could state it another way.

(Question read)

Mr. Gesell: I don't understand it.

Mr. Highsaw: I will rephrase the question.

Examiner Wrenn: All right, Mr. Highsaw.

By Mr. Highsaw:

441

Fol. 4170 Q. What I have in mind is: In the decision in 779 the Board, at page 678 stated: "Deadlock between the two interests equally represented in the ownership of the company is always possible and certain to occur from time to time, especially in view of the special interests and the other activities of the two co-owners." The question to which I addressed myself is whether or not this agreement attempts to settle that specific problem which was referred to in that quoted language.

A. The agreements attempt to settle the one question of that character which over the years has proved insoluble. It goes further, however, and it not only provides for methods of settling the details of that question, but I think under the general arbitration clause, it does provide a fairly broad basis of determination of even some broader questions.

Q. That last phrase of yours is what I am not quite clear on. Would you mind clarifying that a little bit? Do you mean broader questions these specific points that are covered in the agreement such as advertising?

A. Well, you see, there is a method of avoiding deadlocks on all the questions incidental to the execution of the contract. So there can't be deadlocks under that heading. The contract itself takes care of the only question between the parties through the years that it hasn't been possible to settle between themselves.

Q. But the agreement does not, I take it then, attempt to settle any deadlock which might arise. There is no procedure in the agreement for that?

442

[fol. 4171] A. No. "any", however I want to be sure of the sense in which that is used. In the sense that it means some, the answer is no. In the sense that it means "all" the answer is yes.

Q. Was any consideration given in the negotiation as to this agreement as to the settlement of that broad basic question of the possibility of deadlocks arising out of the fact that there were two equal co-owners?

A. I don't recall any discussion of any contract provision to that end. I don't think so.

Q. Mr. Roig, do you consider that as president of Panagra, you are better protected in the management of Panagra's affairs under agreement A here as implemented by Agreement B than you were under the old 1939 management agreement which has been introduced here in evidence?

A. On balance, I should say it was the same. There point
are some particular provisions that ~~splint~~ in both directions.

Basically the administrative function of the president under his agreement is the same as it was before. Actually that has been limited, in one respect, by the Pan American approval of the operations manager, and by the provisions for the removal of the president, which I testified about yesterday.

On the other side of the picture, under this agreement, the president is given certain authority to inaugurate processes leading to the determination of questions that arise under the contract, which is an advantage.

Q. You would say, then, on balance of all the results, that it comes out practically the same?

443

fol. 4172 A. About the same.

Q. Mr. Roig, are you acquainted with the arbitration provisions of Agreement A, I believe paragraph 25? I wanted to ask you something about the American Arbitration Society but if you are not acquainted with that, I will address that to Mr. Friendly.

A. Yes, if you will, please. He knows more about it than I do.

Q. Does Paragraph 25 refer only to the arbitration of disputes arising under agreement A or Agreement B?

A. It was my understanding that 25 in "A" refers to disputes under that contract and that the analogous paragraph, No. 9 in "B", the disputes arising under "B".

Q. What would happen under Paragraph 5, Mr. Roig, if all the officers of the American Arbitration Society turned out to be in any way associated with one of the parties here?

A. Well, I guess that is something that hasn't been provided for. Lawyers always leave out something.

Q. Is it your understanding of these arbitration provisions, that if one of the parties refused to arbitrate, that the arbitration can go on without them and proceed to a successful conclusion, or to a conclusion, I should say?

A. I can't answer that question, but I should assume that the party could not block the arbitration by refusing to appear.

Mr. Gesell: Mr. Examiner, the New York statute is clear on that.

Mr. Highsaw: That they have to proceed?

Mr. Gesell: Yes.

444

[fol. 4173] By Mr. Highsaw:

Q. Mr. Roig, I would like to take up with you for just a moment, this matter of the Board's power over the contract in the future, in event it should approve either one or both of these agreements.

I have understood you already to say that it was your understanding that the Board could in the future disapprove the contract if it should decide that it was in the public interest:

Do you know whether that fact was ever transmitted to the directors of Panagra while they were considering this contract?

A. I am sure the directors were fully conscious of it.

Q. You mean either you or Mr. Gesell told them of the fact?

A. I don't recall by what process, but after all, I am a director myself. I certainly was fully conscious of it.

Q. Mr. Roig, you wouldn't consider that a Board approval of either contract A or Contract B, if it should take jurisdiction of Contract B, would in any way create a moral or any other kind of obligation on the Board to continue the approval for any particular length of time?

A. Well, I think the Board is bound by law, not by moral obligation of that sort. I think whatever the legal implication is, that is what it would be.

Q. Would you, Mr. Roig, as president of Panagra, object to the amendment of the contract to reflect the Board's continuing jurisdiction over all of it or any part

—445—

[fol. 4174] of it if that should prove to be the case?

A. What do you mean "if that should prove to be the case?"

Q. It is possible that the Board might decide that it didn't have continuing jurisdiction over it, but if the understanding that it does have continuing jurisdiction is true, would you object to the amendment of the contract to reflect that?

A. Well, I would like advice of counsel on that, but as far as the purely business angle of it is concerned, I would not object.

Q. Aside from advice of counsel, then, you would not object; is that your position?

A. Yes.

Q. For a moment I would like to refer to your statement about the extension of Panagra or Panagra coming into the United States, in Docket 525.

I believe you stated on gross examination not cross examination yes, I guess it was cross examination

Mr. Gesell: What page?

Mr. Highsaw: Early in Mr. Gambrell's cross examination. I am going to quote only one word.

Mr. Gesell: All right.

By Mr. Highsaw:

Q. —that you construed this agreement as meaning the Board's mandate in Docket 525 "in substance". I believe that is right.

A. Yes.

Q. Either "in substance" or "substantially." Yes?

[fol. 4175] A. Yes.

Q. Could you clarify that statement for us a little bit?

A. Is it the word "mandate" or "substantial"?

Q. Substantial.

A. I think the language of the Board's decision in 525 reads in terms of an extension of Panagra's route to the United States, and taking that literally, this is not an extension of Panagra's route, but substantially I consider it, especially from the public angle, as providing the public with the service contemplated by the Board's decision.

Q. Would you refer to Agreement A again, Mr. Rolph? There is one point in paragraph 1 that I don't believe has been covered.

If it has, I will withdraw the question. I am a little confused by the provision in there that the Panagra planes will be taken by Pan American and flown from the Canal Zone to the continental United States, and for return operations from Canal Zone over "the same route".

What I have in mind is in the event Pan American should be awarded domestic routes to other points in the United States, would that provision mean that when one of the Panagra planes was flown over those routes it would have to come back over the same way, couldn't be sent to another domestic point and come back over another route to Balboa?

A. Prima facie it would be the former, because if one of our planes was taken up to Chicago, for instance, we would want that to bring our Chicago traffic back, and not have it go around to New York and then leave the Chicago berth uncovered, but I suppose it wouldn't pre-

—447—

[fol. 4176] vent a substitution as long as our plane was kept in position in the schedules.

Q. Do you contemplate, Mr. Roig, that the Panagra flight crews which are going to continue on these planes north of Balboa, will wear any different kind of uniforms than they have been, or will they have any sort of insignia on their uniforms to indicate their status?

A. I had assumed they would wear their Panagra uniforms and insignia which are—I think the uniforms are entirely identical, the insignia, almost so.

Q. There won't be any kind of Pan American insignia on them, then?

A. It hadn't occurred to me that there would. There can be.

Mr. Gesell: Mr. Highsaw understands, I am sure, from looking at the folder of our exhibits, what the similarity of the two insignia is. On the face of our exhibits appears both the Pan American and Panag. insignia. It is probably not in evidence, as Mr. Schneider points out.

Mr. Schneider: I am not pointing it out.

The Witness: You would have to look very closely to notice a difference.

Mr. Gesell: Those insignia are there.

By Mr. Highsaw:

Q. Referring to paragraph 2(b) of the agreement, Mr. Roig, what kind of operating experience is contemplated in that provision as a basis upon which to extend the operations to Boston and other points?

A. What kind of operating experience?

Q. That is right.

A. You mean flight operations?

—448—

[fol. 4177] Q. Does that refer to some technical experience or difficulty in operating?

A. I don't see the clause.

Q. It is the next to-the-last line in paragraph 2(b).

A. "Provided operating or traffic experience demonstrates the desirability thereof."

Q. Yes.

A. I was thinking of something else. Well, the traffic experience, of course, means the volume of traffic offering between the points, and the operating experience means the standpoint of the feasibility of the stops from operating schedules and similar considerations.

In other words, the—it is not referring to technical operating technique, such as the CAA controls.

Q. What is your understanding, Mr. Roig, as to who will make the decision as to that operating and transfer experience under paragraph 2(b)?

A. I assume it would be made by mutual agreement, or failing that, by arbitration.

Q. That isn't specifically spelled out there.

A. No, but in a number of places where it isn't specifically stated, I assume is a matter of contract interpretation. Either party is entitled to take the position that traffic or operating experience does demonstrate.

Q. That is your understanding?

A. Yes. The other party may agree. If he doesn't, it is a controversy to go to arbitration.

(Off the record)

By Mr. Highsaw:

—449—

[fol. 4178] Q. Mr. Roig, referring to paragraph 2(c) of the contract—Contract A—what is your understanding as to the phrase "In the light of competitive conditions" that appears therein?

A. Well, that has to be read together. "If that route is obtained through flights may be made by Panagra aircraft under this agreement between the Canal Zone and New Orleans to such extent as Panagra shall determine

appropriate from time to time in the light of competitive conditions and the relative amount of traffic available for such route."

I understand that to mean that if we decided that there was not enough traffic to justify our operation of the route either because of intensive competition which left no room for us, or for any other reason, we would not be required to provide the plane for that trip.

Q. Referring to paragraph 2(c). Mr. Roig: In the pre-hearing conference, Public Counsel raised some question about that, and your counsel had you specifically answer it, and as I understood, your answer was to the effect that this paragraph was for the purpose of preventing Pan American from using Panagra's planes on other routes.

You said it might have been an inartistic way of stating it, but that was the intention of the paragraph. Would you have any objection, then, to deleting or modifying or rewriting this paragraph in the event of approval of this agreement?

A. If it isn't entirely clear, I would have no objections, again subject to the opinion of counsel to prevent implications that might arise in some other direction, but I certainly have no objection to anything being clarified

—450—

[fol. 4179] that needs it.

Q. It did contemplate that there might be an operation by Pan American over some other routes sometimes, didn't it?

I don't quite understand that "mutual consent"; what purpose that would serve otherwise.

A. I think perhaps Mr. Friendly or Mr. Gesell, who know the detailed discussion, may have a better answer. It might be, however, that the idea had been that: for instance, suppose a Panagra plane were at Miami and were, in normal course, scheduled to go tomorrow, let's say, back to Balboa, today it was ready to go and some situation—Pan American might have a shortage of equipment at the moment and it would be a convenient thing to send it over to Puerto Rico—there wouldn't be any objection to doing that, providing it was mutually agreed

to. That could be done irrespective of the contract, but Pan American couldn't just automatically decide that that would suit and send it over.

Q. If that were done, would all of the terms of this contract apply to the operation of that plane you were referring to?

A. No.

Q. It would not?

A. The terms of this contract would not apply, to my understanding, to any operation other than those specifically referred to in the contract.

Q. That would have to be a matter of separate agreement between Panagra and Pan American?

A. Yes. That would relate only to the physical use of the plane, not to the extension of the contract.

Q. If this provision 2(e) were left in Contract A, would

—451—

fol. 41840 you contemplate that the kind of agreement you were talking about would be submitted to the Board for approval?

A. Well, in my Puerto Rico illustration, I presume that all that would happen would be that the plane would be chartered to Pan American.

Q. And you wouldn't contemplate submitting that kind of agreement?

A. No, unless a charter agreement has to be submitted. I don't know whether it does or not.

Q. Referring to Paragraph 8(a), Mr. Roig, at the top of page 4, the second sentence: The agreement there reads "subject only to operating or other conditions beyond or

Panagra's or PAA's control."

What is your understanding as to the other conditions?

A. That is simply the usual force majeure clause. It doesn't covers anything beyond our control.

Mr. Gesell: Mr. Gambrell, our Latin expert, isn't here.

By Mr. Highsaw:

Q. Referring to paragraph 4, the requirement in that paragraph that "Pan American and Panagra will consult to cooperate in establishing schedules for the benefit of through traffic," between the United States and points on Panagra's routes in South America. Does that contemplate that the schedules will be established primarily for the benefit of that traffic?

A. Yes. As appears in a number of places, the Panagra plane is intended to be so handled as to accomplish its intended purpose of providing through flights of Panagra traffic.

[fol. 4181] Mr. Gesell: You understand, Mr. Highsaw, that clause relates only to the schedules that are going to utilize Panagra aircraft. Not to all Pan American schedules.

Mr. Highsaw: That is between Miami and Balboa?

Mr. Gesell: Right.

The Witness: Yes.

By Mr. Highsaw:

Q. Is it your understanding that under this agreement Panagra has absolute control of schedules for this through operation in a case that you can't agree.

A. Yes. I think under this next language Panagra is given certainly an important role in the determination of the schedules on which our own plane is operated, and has no bearing on any other schedules that Pan American may put into service.

Q. Mr. Roig, I would like for you to clarify just a little bit. You said "an important role". I was wondering if you had control over it. As I read the agreement, if you and Pan American couldn't get together, then you could set the schedules, and I was just wondering whether that is a correct reading.

A. Well, it doesn't exactly say that. What it says is that Panagra shall fix the hours of arrival of northbound

through flights at the Canal Zone. That means that we determine when our plane northbound gets to the Canal Zone. That doesn't say that we fix the exact moment when Panair carries that through. It does imply that if we are going to have a through flight it should be carried through with reasonable dispatch, but it doesn't give us control

455

[fol. 4182] of that schedule, and similarly southbound we decide when the plane will leave Balboa, and Pan Amer-

should have it

ican's there to go on at that point, but that doesn't enable us to fix the departure hours from New York or beyond.

Q. Pan American isn't obligated under the contract, then, to meet that schedule that you set?

A. Oh, yes. I think they are.

Q. They are?

A. Oh, yes.

Q. And if they fail to do it, it would be a violation of the contract, within your understanding?

A. Yes. Oh, yes.

Q. Would Pan American's failure to adjust their own schedules so as to meet those schedules that you set in and out of Balboa be a kind of dispute which you would regard as coming within arbitration provisions of the agreement?

A. Yes. You see, that involves such questions as how much time they are going to allow at the airport, how fast they are going to run the planes.

We have no control of that. That is their operation.

Q. But if they didn't set them to satisfy you, as meaning that you would be able to arbitrate that question within your understanding of paragraph 25?

A. Precisely; if we thought they were unreasonable.

Q. Turning to paragraph 6 of the agreement, Mr. Roig: In the handling of the passengers, passenger service and handling of traffic under that agreement, could you give us some sort of a clarification as to the time when Panagra's control ends going north and Pan American's control be-

454

[fol. 4183] gins under this provision, and vice versa?

Mr. Gesell: Mr. Examiner, I think those questions are more appropriate for Mr. Kirkland and Captain Brock, who is concerned with the operating details of the Canal.

Mr. Highsaw: That is perfectly all right.

Mr. Gesell: It is complicated by the fact that as you know, Pan American already has a relation to Panagra's operation south of the Canal.

Examiner Wrenn: Let's take a five-minute recess.

(Short recess)

455

[fol. 4184] Examiner Wrenn: You may proceed.

By Mr. Highsaw:

Q. I believe we were on paragraph 6, Mr. Roig. Is it your understanding of that agreement that any question relating to Pan American's obligations under this provision would be subject to arbitration under paragraph 25 if you were not satisfied with the way they were carrying them out?

A. Yes.

Q. Let's look for a moment at paragraph 8 of the agreement, Mr. Roig?

A. Yes.

Q. Just a moment. Before we go to 8, I would like to ask the same question with respect to paragraph 7 that I asked you with respect to paragraph 8.

If you weren't satisfied with the way Pan American was carrying out any of its obligations under that paragraph it is your understanding that you could take that to arbitration?

A. Yes.

Q. Referring to you paragraph 8 now, has there been anything done so far as you know in the development of the training plans which were referred to there.

A. Yes. Mr. Kirkland has been working on it and he can tell you exactly what primary progress has been made.

Q. In the pre-hearing conference Public Counsel raised the point about the provision in paragraph 8 relating to compensatin. Pan American for the training that is provided in that paragraph.

456

[fol. 4185] Your counsel asked you yesterday your understanding with respect to the filing of any agreement for such compensation with the Board and I believe you stated that you had no objection if there was any legal reason or any reason to make it desirable. That last confused me just a little bit, Mr. Rose.

I wonder what you had in mind by that.

A. I had in mind if the Board considered they would like to have it that would make it desirable in my mind.

Q. Even though you didn't think you legally had to file it, is that right?

A. Yes.

Q. Referring now to paragraph 10 of the agreement, Mr. Rose, this may have been asked before. I am not quite sure. Is there at present some sort of a sales agency agreement between Pan American and Panagra?

A. Well, we touched on that this morning. Part of the services which Pan American render Panagra, for which they receive a management fee, about which you were speaking a moment ago, part of those services consist in acting as sales agent for Panagra in the United States.

But as I explained this morning in some detail on a basis which is quite different and in our opinion much less effective than the plan provided by this contract.

Q. Are they going to continue to be paid as a part of the management fee, or are you going to arrive at some separate basis of compensation?

A. That is one of the things that I had in mind specifically when I said that the management fee would have to be

457

[fol. 4186] revised to accommodate itself to the changes effected by this agreement.

Q. Then you intend to reach some sort of a separate adjustment or agreement with respect to this matter?

A. Yes.

Q. I take it, it is also your understanding that any of the matters in paragraph 10 that are not carried out to your satisfaction can be made a subject of arbitration under paragraph 25 if you so desire.

A. Yes.

Mr. Gesell: If I may interrupt.

Examiner Wrenn: Certainly.

Mr. Gesell: While we are trying to understand the contracts. You will have in mind that there are more detailed provisions concerning how that is to be arbitrated in the Grace-Pan Corp. contract which discusses it.

Mr. Highsaw: You mean the procedure?

Mr. Gesell: Procedure for handling any unsatisfactory performance by PAA as general sales agent.

The Witness: Paragraph 4 of contract B.

Mr. Highsaw: It will be arbitrated under one of the procedures.

The Witness: Oh, yes.

Mr. Gesell: My point is that in this instance the standards are clearly defined in the other contract.

Mr. Highsaw: In contract B.

Mr. Gesell: Yes.

By Mr. Highsaw:

Q. Referring to Paragraph 11, Mr. Roig, there was con-

—458—

[fol. 4187] siderable discussion about the personnel of Panagra referred to therein and I believe you gave quite an extended discussion as to the particular reasons why you felt they were needed.

The one point that wasn't clear in my mind was whose direction will those personnel be under when they are at the Pan American bases performing those services that you mentioned?

A. Panagra in that case.

Mr. Gesell: If there is any detail about that, Mr. DeGroot can give it.

Mr. Highsaw: I didn't want to go into detail. I just wanted to ask the general question.

By Mr. Highsaw:

Q. Is it your understanding that any question in regard to their performing those services that there might be a dispute about is subject to arbitration under these agreements before us.

A. Well, yes to the extent that it involves any relationship with Pan American. To the extent it involved any question between Panagra and its own employee that is a different matter, but if Pan American should fail to provide reasonable access for these persons or, in other words made it impossible for them to function, that would be a matter to be arbitrated with them.

You see some of these provisions like the one we just spoke of about termination of the sales agency where there is specific arbitration provision in paragraph 4 of contract B, some of those things are specifically covered by

4159

[fol. 4188] specific arbitration provisions but all of those others are covered by the general language of Section 25

and all

which says "Any ~~misunderstanding~~ disputes as to the construction or operation of this agreement shall be submitted to arbitration."

Q. Let me ask you something at this point—I was going to ask it later but it would probably be well to bring it up now.

Mr. Roig, what was the reason for according the sales agency problem a particular treatment in paragraph 4 of contract B in treating all of these other questions under the provisions of paragraph 25 of the contract A?

A. The sales agency, for example, and the management question, and the Grace President, are a different category than the other questions, partly because of their importance and partly because the machinery provided there is one which may result in termination of this contract.

The other cases don't contemplate winding up in a termination of the contract but in merely a termination of the dispute.

Q. You regarded the sales agency services then of particular importance in this contract?

A. Oh, yes, because it is the proper administration of that sales agency provision that enables Panagra to maintain its independent and competitive position.

Mr. Gesell: I think perhaps for clarity, Mr. Examiner, the witness misspoke in referring to the termination of the agreement when I think he meant the termination of

the sales agency arrangement or the termination of the management and I don't want any confusion about what the contract provides.

—460—

[fol. 4189] The Witness: That is correct.

By Mr. Higlisaw:

Q. Then the sales agency part of it can be cut out of the contract without affecting the rest of it, is that right?

A. Under that provision.

Q. Paragraph 13, our old friend, is back, Mr. Roig. I believe that you said that one of the purposes of the kind of arrangement contemplated by paragraph 13 was to eliminate destructive competitive practices between PAA and Panagra.

If that is so, could you clarify and enumerate for the record some of the destructive competitive practices you have in mind as contrasted with what you might consider good competitive practices?

A. Well, I think an outstanding example of a destructive competitive practice was the—it is a good many years ago now—but when United and American began advertising which went over the highest mountains between the East and the West Coast of the United States—things which—practices and sales methods—which have a tendency to sacrifice the development of air traffic as a whole in favor of a momentary advantage of a particular company. That is a rather outstanding kind of thing that I call destructive competition.

Q. Do you have in mind anything else particularly for that?

A. Well, there are, in transportation history, a good

* * * * * * *

—464—

[fol. 4190] approval of this contract would not represent in this principle or substance an approval by the Board of a concept of an agreement such as involved in paragraph 13(a).

We would consider that would have to be looked at on its merits from A to Z under the conditions which prevail at that time under the terms of the agreement.

I presume Pan American would agree to that stipulation.

Mr. Hamilton: Yes, I would join in that stipulation on the part of Pan American.

Examiner Wrenn: All right. Is that sufficient for you, Mr. Highsaw?

Mr. Highsaw: That is sufficient.

By Mr. Highsaw:

Q. Referring to paragraph 19 of the agreement, Mr. Roig: there was considerable discussion in cross examination about what the Board of directors of Panagra could or could not do under this section and there was some specific talk about equipment, but I don't believe that the line of demarcation was ever very clearly drawn and I would like for you to clarify it as much as you possibly could.

A. Well, my understanding is that the Board of Directors of Panagra retains all the powers and prerogatives which pertain to a board of directors under corporate law, except as that may be modified by this contract in these limited respects.

Q. Just exactly what is your understanding as to those limited respects?

A. Well, they are stated here. It says: "Pan American agrees that any action to make any claim or take any

—465

[fol. 4191] position or to enforce any rights of Panagra under this agreement may be taken on behalf of Panagra by its President."

I understand that to mean that if such a claim arises, or the necessity of taking such a position or enforcing any rights of Panagra under this agreement, that instead of going to the Board of directors and getting their approval to corporate action, that in those particular kind of instances the President is authorized to act on his own initiative.

Q. Just one more point, Mr. Roig:

Turning to paragraph 14 of the agreement: at the prehearing conference Public Counsel raised some question about agreements for the relative contributions to the advertising that is provided in there.

Yesterday your counsel asked you to state your position on that, and as I understood it, you stated your position to be that such agreements for the division of the relative contributions contemplated there will automatically come before the Board in its first rate case.

A. Yes.

Q. Do I understand from that that you do not intend to file any agreement concerning such contributions for the Board's approval under Section 412?

A. Well, if counsel advises that the filing of such an agreement were required, of course, that would be done too.

Mr. Highsaw: Will counsel state now what their contemplation is on that score?

Mr. Geseli: I have never been able to understand the

[fol. 4192] point Mr. Highsaw raises. If the Board of Directors of Panagra meets and decides that Panagra will contribute "X" dollars to a joint advertising program which has been laid out by Pan American and Panagra. I have not assumed that that action of the Board of Directors required filing of 412. I had also not assumed that if Mr. DeGroot and some representative of Pan American get together and discuss the question of how Pan American's and Panagra's services and routes and schedules will be advertised in the time table, that when they get back they both have to sit down and draw up a memorandum and file it under 412 and get approval.

The net effect of it from my point of view, and the advice that I would give, unless some basic program is decided upon, involving some continuing allocation, I would advise that it is not necessary to file under 412.

Mr. Highsaw: That is sufficient answer.

Thank you very much, Mr. Roig.

Examiner Wrenn: Do you have anything on redirect, Mr. Gesell?

Redirect examination.

By Mr. Gesell:

Q. You stated on questioning by Mr. Hickey, Mr. Roig, that speaking for Panagra you were anxious to go into this agreement for the purpose of facilitating Panagra's ability to compete with other carriers, and explained your reasons in some detail.

Mr. Hickey was quite careful on three occasions to say that you were speaking for Panagra. Would your answer be the same if you were speaking for Grace?

[fol. 4193] A. Absolutely. I have been with W. R. Grace and Company thirty years. I have lived in an atmosphere of competition all my life. I wouldn't know how to live in any other atmosphere. I have always believed in competition and practiced it.

I was for a number of years in charge of the import department of W. R. Grace and Company, dealing in big basic commodities—coffee, cotton, wool—things which are the most competitive articles in the world.

I have always been in competitive business. Grace Line has always had competition. Panagra has generally had competition. Certainly W. R. Grace and Company's whole career and whole philosophy has been one of living in a world of competition.

Q. Was it your intention or the intention of Panagra or the intention of Grace to enter into this agreement for the purpose of keeping competitors off your neck?

A. Well, not in any such sense as that might sound. It was for the purpose of enabling us to maintain our own position in competition with Pan American and Grace Line and all comers, and without through service which this provided we just wouldn't be in a position to do that.

On that whole subject of competition and the attitude of Grace on the subject I might say that when the question of a chosen instrument was up I came down here as an officer of W. R. Grace and Company and testified before the Senate Committee against the idea of a chosen instrument and in favor of a competitive philosophy in aviation.

I don't think competition consists in me just tying my

—468—

[fol. 4194] hands behind my back and not being able to provide the public with a competitive service when everybody else is being put in a position to do it.

Q. Has Panagra or Grace denied facilities to Braniff Airways in the development of its routes in South America?

A. On the contrary, we have offered them our facilities and they are using them.

Q. What facilities do you speak of?

A. I speak of ground facilities and radio, and line maintenance on this survey flight.

Q. Do you consider that Panagra will be in a position to compete with Braniff or with the Braniff-National service, providing through connection at Havana in the event your traffic does not go through north of the Canal on your own planes?

A. I do not think in that case we would be able to compete.

Q. Mr. Schneider asked you whether Houston was left out of the agreement deliberately and you said it was left out deliberately. What did you mean?

A. Well, I think what I meant was that when we were considering service to different ports of entry, Houston was mentioned as one possibility. It was left out because we didn't feel that we could serve all the ports of entry with adequate traffic from our route in South America.

Q. Was it left out on any notion that you did not want to compete with Braniff?

A. Oh, no.

Q. Does Panagra have American competition from non-

—469—

[fol. 4195] scheduled operators in this region—charter operators?

A. Yes, there have been a number of charter operators flying down there—Skyways—and some of them are now seeking to regularize their operations.

I think both Skyways and Veterans Airways have applied for certificates in our territory.

Q. Do you consider the provision of the agreement that the through flights must initiate at Lima or a point south

thereof as restrictive of your competitive position in any way?

A. Not at all.

Q. Mr. Gambrell, in asking you about the competitive exhibit in this proceeding, I think it is Exhibit 4, was quite careful not to ask you about BOAC.

Do you contemplate that —

Mr. Gambrell: I object, Mr. Examiner, to Mr. Gesell's talking about my being quite careful not to do something. I don't think there is any justification for any such statement.

Examiner Wrenn: You don't object to the fact that you did not ask about BOAC, do you? Is there any question there?

Mr. Gambrell: I just object to his characterizing my question in any such way.

By Mr. Gesell:

Q. Mr. Gambrell did not ask you about BOAC in discussion of Exhibit 4.

Do you consider that you will have competition from BOAC?

A. Definitely. We have it today. That isn't anything

[fol. 4196] in the future. The British line is operating today between our most dense traffic centers—Buenos Aires and Santiago.

Under one of these international agreements, I think the Bermuda one, they have been authorized to operate a route from New York down the West Coast paralleling our international route all the way.

Q. Have you any reason to believe that American citizens and citizens of other nationalities such as you carry on the Panagra route will be carried on BOAC?

A. Certainly they will. The Chairman of the CAB just traveled on that line to Europe. It is a perfectly good line and a well run line. Lots of Americans travel on it.

Q. Mr. Gambrell asked you concerning Grace Line, whether or not it would seek to divert passengers from Panagra to Grace Line.

Would you consider that good business?

A. Well, I consider that the Grace Line will seek to sell traffic by water and will offer such inducements as it has in the way of an ocean voyage which is an appeal to a great many people.

In doing that, they will not in any way, remotely or to the slightest extent, interfere with Panagra's seeking to sell a parallel trip, if you like, by air.

Q. Would you say that the extent of the activity of the Grace organization on the West Coast of South America, in developing traffic for Panagra has lessened or increased over the years?

A. I think it has increased, and I think in the earlier

—471—

[fol. 4197] years it was one of the things that had perhaps more than any single thing to do with the rapid development or the rapid acceptance of air travel in that area.

Mr. Gesell: That is all.

The Witness: Mr. Examiner—

Examiner Wrenn: If the witness has a firm statement to make, go ahead.

The Witness: All I was about to say before leaving the stand, in looking at the transcript I noticed some corrections that ought to be made in my testimony.

For instance, it stated that the director's meeting which approved this contract was held on June 30. It ought to be on July 30. There are quite a number of other points. I would like the opportunity of having the record correct.

Examiner Wrenn: On that point if you have an opportunity to go through during the course of this hearing and file them before the end of it and we will do so and if not, provision will be made whereby you can file them after the close of the hearing.

Mr. Schneider: May we conduct the usual recross examination?

Examiner Wrenn: Not unless there are points arising out of what Mr. Gesell has brought up.

Mr. Schneider: I will let someone object if I violate that principle but may I proceed on the recross examination?

Examiner Wrenn: Does it arise out of points that have been brought up subsequently?

Mr. Schneider: I think so or I wouldn't be asking them.

—472—

[fol. 4198] Mr. Examiner.

Examiner Wrenn: All right.

Recross examination.

By Mr. Schneider:

Q. You stated in answer to a question by Mr. Gesell that you didn't think Panagra could compete effectively with a National-Braniff combination by connection at Havana. Will you give your reasons?

A. I understood him to say that we couldn't compete effectively with the Braniff-National hookup if we remained deadended at Balboa.

Q. That is right.

A. The reason is that, speaking merely now of competition with Braniff, that Braniff has direct connection to some points in the United States, direct through plane, through carrier service, that through National at Havana they have a hookup with Eastern Territory and with Chicago and Southern at the New Orleans territory, and I would expect—I might be wrong in this—that it would not be long before there would be some interchange or some agreement like this worked out between those companies, because I am sure you will find before you have been operating as long as I have, that that is the way to run that kind of service, and that you have got to have something to get over this breaking point.

Q. All right.

Now, if the agreement A and B are approved, you then would be able to fly your ship as far as Miami and will be

—473—

[fol. 4199] able to provide two plane service to the eastern part of the United States, will you not?

A. That is right.

Q. And that will be substantially the same type of service that Braniff and National will be able to offer in the absence of an interchange between the eastern part of the

United States and West Coast of South America, is that correct?

A. I am not sure I quite understand your question.

Examiner Wrenn: Read the question.

(Question read)

By Mr. Schneider:

Q. Do you understand the question, Mr. Roig? If you don't I will be glad to rephrase it.

A. I am afraid I don't.

Q. All right. There was a question preliminary to that to this effect, that if agreement A and B are approved here, Panagra will then be in a position to provide two plane service between the West Coast of South America and New York?

A. Yes.

Q. That is by connection with carriers at Miami?

A. That is right.

Q. And that will be substantially the same type of service as Braniff and National can provide between the same points in the absence of an interchange?

A. Yes.

Q. Now, if Pan American is successful in its domestic route case, in being extended from Miami to New York,

[fol. 4200] Panagra then will be in a position of providing one plane service from the West Coast of South America to New York, will they not?

A. That is right.

Q. Would you at that time oppose an interchange between Braniff and National which would seek to provide the same one plane service between the same points?

A. Well, that is a hypothetical question based on two things that are not yet in existence. I think I testified yesterday—and I stand by it—that I would not, in principle, oppose this type of an agreement in any situation where it was comparable, and I think the one you speak of would be comparable.

Q. Even if it would be competitive?

A. Now, there might be other factors in connection with it that will present themselves at that time, and I certainly am not going to make any commitment one way or the other, but my opinion would be that on principle I couldn't see any objection to that sort of arrangement.

Mr. Schneider: That is all.

Examiner Wrenn: Anything further of the witness? You had a question, Mr. Highsaw?

Mr. Highsaw: I want to clear up one point here. I believe Mr. Roig said he had competition now with BOAC and then he mentioned something about BOAC flying between Buenos Aires and Santiago and it left me in a little doubt as to whether or not they were flying between Balboa and down the West Coast of South America at the present time.

The Witness: Not as yet. At the present time they oper-

—475—

[fol. 4201] ate—the subsidiary has some other name—but the British Line operates between London and Buenos Aires, and then extends over to Santiago.

Mr. Highsaw: Thank you very much.

Mr. Hickey: Mr. Examiner, I have one question suggested by the redirect.

Examiner Wrenn: All right, Mr. Hickey.

Recross examination.

By Mr. Hickey:

Q. Mr. Roig, I believe you just stated to Mr. Gesell that you favored competition, is that correct?

A. Yes.

Q. As, among other reasons, being in the public interest?

A. Yes.

Q. And you also favor this agreement, do you not?

A. Yes.

Q. And you testified that by this agreement competition between Panagra and Pan American north of Balboa to the United States was impossible, is that correct?

A. By a belief in competition I—

Q. Excuse me. Didn't you testify that it was impossible?

A. The record will show exactly what I testified. I think I testified that there never had been competition between these companies between those points and that that condition would remain unchanged under these agreements.

Q. These agreements necessarily precluded competition did they not, between those two points?

—476—

[fol. 4202] Examiner Wrenn: Between those two carriers.

Mr. Hickey: Between those two carriers and these points.

A. So long as these agreements are functioning and Panagra has not been granted a route in that area, which I, for one, have tried for a good many years unsuccessfully to get, there would not be competition, but I don't consider I am under any obligation to compete with people who are flying between London and Paris, some place where I have never flown before, between Shanghai and Calcutta. Over the route I have been flying, that I have been certified to operate. This agreement will definitely and substantially increase our ability to compete with Pan American Airways for Buenos Aires traffic and not only with Buenos Aires but with other competitors.

Q. In other words, your belief in competition amounts to this: that you are willing to sacrifice a competitive opportunity for the sake of getting Panagra's line extended to the United States, isn't that correct?

Mr. Gesell: That is an argumentative question.

A. That is not correct, Mr. Hickey, and I really don't feel it is a fair question. I don't consider that I am sacrificing something that I have never had, that I have worn my hair grey and my bones ~~bear~~ are trying to get, a great deal of the effort being not only with Pan American Airways but with the Civil Aeronautics Board and the United States Courts, and have been at every stage of the game refused.

Now, how could you say in the light of my performance

—477—

[fol. 4203] and my effort to get this route, that I am now

is an
prepared to sacrifice for it what you say ~~is~~ elimination of competition. I don't agree with that. I consider it an absolutely unfair conclusion.

Q. I don't consider it unfair at all.

A. That is my opinion.

Examiner Wrenn: Let's don't argue with the witness.

Mr. Hickey: I am not arguing, Mr. Examiner. I am merely trying to clarify my statement here.

Examiner Wrenn: Go ahead.

By Mr. Hickey:

Q. I quote agree that your efforts have been rigorous and that you have made every effort to obtain it. I am merely stating that what you have done now, you have merely precluded yourself from making the effort that you have made so arduously in the past. That is a fact, is it not?

A. Well, I expect I have precluded myself for the time being, but there comes a time when you just can't bang your head against a stone wall forever.

When everybody who has authority to give you what you want refuses to give it to you, you have to do something to improve the competitive position in the rest of your picture.

Mr. Gesell: When you say that you precluded that you mean, do you not, if the Board determines that this agreement and arrangement furthers the objectives of the Act?

A. Certainly.

Mr. Hickey: As far as Mr. Roig is concerned he has precluded himself. He signed the agreement as far as Panagra

[fol. 4204] is concerned. That is all.

Examiner Wrenn: All right. You may be excused Mr. Roig.

Thank you, sir.

(Witness excused)

(Discussion off the record)

Mr. Schneider: Mr. Examiner, I would like to state now for the benefit of other parties that Braniff Airways does not expect to put on an affirmative case in view of the stipulation agreed upon this morning, but I would like to state in explanation of some of the questions I have asked, which involved a proposed or contemplated interchange in the future between National and Braniff, that no such agreement is presently under contemplation nor have any discussions been held between the two companies. I raised the question only as a hypothetical question.

Examiner Wrenn: Now, as a matter of procedure, Mr. Friendly will go for Pan American at this time.

Mr. Hamilton: That is right.

Examiner Wrenn: And you will alternate back and forth rather than the Pan American witnesses testifying consecutively?

Mr. Hamilton: Yes. If that is agreeable.

Examiner Wrenn: That is quite agreeable.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 421

HENRY J. FRIENDLY, was called as a witness, having been first duly sworn, was examined and testified as follows:

Mr. Hamilton: If the Examiner please, I have here a document entitled, "Experience and Qualifications of Henry

—479—

[fol. 4205] J. Friendly, which I should like to have marked for identification.

Examiner Wrenn: All right. That will accompany the combined exhibits of Pan American and Panagra which have previously been marked.

Mr. Hamilton: It has not been marked.

Examiner Wrenn: Now, but I am directing that it accompany the exhibits which have previously been filed.

Mr. Hamilton: And will be marked consecutively.

Examiner Wrenn: That is right. That will be Exhibit 31.

(Pan American's Exhibit No. 31 was marked for identification.)

Direct examination.

By Mr. Hamilton:

Q. Mr. Friendly, are your education and experience correctly stated in Exhibit No. 31?

A. Yes, they are correctly stated, but I would like to add a little bit to them.

Q. All right.

A. I think that, except for Mr. Trippe, who is leaving tomorrow for Europe to attend some meetings connected with International Air Transportation, my knowledge and experience relating to Panagra go back longer than any officer of Pan American at the present time—back to 1929, I think about a month after I first had any acquaintance with Pan American.

Since that time I have had the privilege of conducting certain legal matters for Panagra in addition to those that I have conducted for Pan American, including, if I might

[fol. 4206] mention one, assisting Mr. Roig in the work that he described in connection with the elimination of German Airlines in Bolivia and Ecuador.

For a time I was a director of Panagra. I think that I might add also, since it is a little unusual for me to be on this side of the table, two special reasons that led me to appear here.

One is that, as has appeared from testimony that has already been given, I did play an active part in the making of this agreement, and felt that my testimony might well be required in any event.

The other is a somewhat personal note which I hesitate a little bit to advance, and yet do, perhaps in anticipation of possibly becoming somewhat intense about this later on:

I feel very proud of having played a part in the conclusion of this agreement. I think it was one of the greatest services that I have ever been able to render and that it was a service not simply to Pan American but to the public, and I felt that, having carried it as far as I had, that I ought to do anything I could to make my knowledge of it available to the Examiners and to the Board.

Q. Mr. Friendly, I direct your attention to Exhibits numbered 1, 4, 5 and 25. Those are the PAA-Panagra exhibits which you are sponsoring—and ask you if they are true and correct?

A. Yes, they are to the best of my knowledge, with one exception, I think.

Exhibit 4, which shows the competitive picture, shows the lines of TACA de Colombia extending only as far south

—481—

as

[fol. 4207] Guayaquil. Whether or not that was correct at the time the exhibit was prepared, I do not know, but I am informed that they now extend as far south as Lima.

Q. Mr. Friendly, with reference to the agreement, is it the intention of Pan American, in entering into that agreement, to impose any restraints on air transportation?

A. No. It was the intention of Pan American to free air transportation from a barrier that it is now subject to, namely, the necessity of changing from one plane to another at Balboa.

Q. Was it the intention of Pan American, in entering into that agreement, to impose any restraint on Panagra?

A. No. On the contrary, it was our intention to enhance Panagra's ability to obtain traffic, and to obtain it not only against other companies but against Pan American.

Q. Was it the intention of Pan American to impose any restraint on Braniff?

A. Certainly not. It was our intention simply to develop a method whereby Pan American and Panagra, together, could handle more effectively, and give better service to the public, traffic which they have been authorized to handle for years, in competition with Braniff. There was some reference to the phrase "getting together" and it is perfectly true that we got together, but I want to make it perfectly clear that all we got together to do was to provide the same type of through plane service on our routes which the Civil Aeronautics Board has permitted Braniff to provide on its route.

—482—

[fol. 4208] Q. Was it the intention of Pan American to impose any restraints on Eastern lines?

A. Not in the slightest degree. As far as Eastern Air-

lines' present operations are concerned, it will be decidedly beneficial, in my opinion.

Q. Do you have any additional statement to make as to why you deem the agreement in the public interest?

A. It seems to me that we might get back to what I thought, at least yesterday, was the forgotten man in this case—I mean the man who wants to go from the United States to Lima or Santiago or via that route to Buenos Aires, or the Chilean or Peruvian or Bolivian who wants to come to this country.

I think what Mr. Patterson used to call the man with the suitcase. We have been hearing a great deal about Braniff and Eastern and Pan American and Panagra, but the basic purpose of the agreement, and its greatest advantage is for the fellow who is going down to South America or coming from it and who, but for this agreement, might be put out at Balboa in the middle of the night, and would be put out at some time.

It seems to me very hard to look at a map of the routes of these companies and not have this idea of the desirability of this type of arrangement impress itself on one.

Q. Mr. Friendly, I now direct your attention to the following question: After the failure of the 1941 negotiations which Mr. Roig has referred to, why wasn't the matter pursued further?

A. I should say there were two reasons. In the first

—483—

[fol. 4209] place, the 1944 negotiations failed, either late in November or early in December of that year. There was an important event in the history of this country right at that time and one which made it perfectly clear—at least made it clear within a few weeks—that the 4-engine equipment which we had been talking about was not going to be available to the airlines for some time to come.

Also, at the time that the negotiations were broken off, Grace initiated the litigation with which we are familiar. I think Docket 770 was filed the very day or the day after a letter from Mr. Roig announcing his dissatisfaction with the draft which has been identified here.

While that litigation was pending, we felt that on the whole, there was very little possibility, even after the 4-

engined equipment situation commenced to change—and that wasn't for some years—we felt that there was relatively little possibility that through service arrangements would be very seriously entertained.

Q. What led to the discussions that culminated in this agreement?

A. Mr. Roig has stated the facts as to what transpired, completely and accurately, and I have no reason to add or subtract anything as far as that statement is concerned, except, as I assume you wish me to, to give some of the thinking that occurred on the Pan American side, and which led to the advancing of the proposal at the Panagra Board meeting in early June.

As has appeared from other testimony, the idea of some type of through flight agreement was not new, had been

—484—

[fol. 4210] discussed at various times in the past, but had not been actively discussed recently for the reasons that I have mentioned.

However, we felt that with the coming down of the Latin American decision and the other events that Mr. Roig described, that we ought to give further thought to that possibility of solution.

There were a number of reasons for that. One was that, as has been referred to, the certification of Braniff and the growing competition made it evident that as a business matter, arrangements ought to be made to provide this through service if Panagra and Pan American were to keep any competitive place in this trade.

The other idea, or the other fact, rather, was that it seemed to us that the certification of Braniff put a good deal of different light on an idea that had been talked about a good deal. It had been talked about by Grace, and some of the documents that have been referred to have been talked about in other quarters; namely, the idea of making Panagra, in some form or other, Pan American's competitor in South America.

It seemed to us that the certification of Braniff completely changed that. The president had directed that Braniff be put in practically every point on Panagra's route except in Chile—every important point.

Also, to Rio and Sao Paulo, the two most important traffic centers in Brazil on Pan American's route; and to Buenos Aires on the route of both Pan American and Panagra, and it appeared to us that the pattern which was now formulating, and which the president intended to have

—485—

[fol. 4211] formulated, was one in which Pan American and Panagra, in cooperation, should compete against Braniff, and the connection at Havana with which Braniff had been provided.

We were impressed also with those remarks in the Board's opinion addressed to the owners of Panagra, to which Mr. Roig referred, and it was for those reasons that we felt, not only that we ought to do anything within our power to advance a proposal that might accomplish the result of making this through service possible, but also that it might be received by our partners, and that it might be developed, and the result was that Mr. Dean and I made the proposal, and I think Mr. Roig has stated what happened after it.

Q. With reference to the agreement, would you care to elaborate in greater detail the specific advantages accruing to the public from the agreement?

A. Well, I mentioned one of them once, but I am going to mention it again, although it is so obvious that somehow it gets buried, and that is that thousands of people will be spared the inconvenience of transferring from one plane to another at Balboa.

Another advantage—and I call it a public advantage—is that it is vital, in our opinion, to enable Pan American and Panagra to maintain and develop the through service to the points to which they are already certificated, against the competition that they are now confronted with, the kind of service that the public interest requires that they render.

Q. What is that competition?

A. Well, I want to start off with Braniff, because it seems to me that there has been some failure to appreciate

—486—

[fol. 4212] the strength of Braniff's position. We have heard some questions of Pan American dominating the east coast, and Pan American dominating the west coast, and there hasn't been much mention of the fact that Braniff

reaches every worthwhile traffic point on both the east and west coasts, except Chile and Montevideo perhaps, which they can reach quite easily through Buenos Aires.

Then we have heard a good deal about the great proportion of the South American traffic that comes from the east of the Mississippi. I think in that connection it is very illuminating to look at the figures in Exhibit PAA-8. I am referring to those at the bottom of the page which show, for the year 1945 and the first six months of 1946 the distribution of the Pan American traffic delivered to Panagra and received from Panagra through the various gateways.

Now, when you analyze those figures, taking the 18 months' period as a whole, you will see that 42 per cent of the Panagra traffic, which is no mean proportion, was from the Western Gateways and not from Miami.

Now, I may add in that same connection—I would like to comment on some of the questions that were addressed to the map which is P-A-5, showing the Braniff territory, and there was some suggestion made that that had been overstated.

In that connection, I would like to call the Examiner's attention—

Mr. Hamilton: I wonder if we could have that marked for identification?

The Witness: I have before me Braniff Exhibits in Dockets 525 and I am referring specifically to Exhibit No. B-3.

—487—

[fol. 4213] Mr. Hamilton: Mr. Examiner, is there any objection to the stipulation of that exhibit into the record?

Mr. Schneider: I will surprise you and say "no".

Mr. Gambrell: I am not familiar with it. Would it be possible for me to see it?

Mr. Hamilton: Mr. Examiner, then I take it it is agreeable?

Examiner Wrenn: I don't hear an objection.

Mr. Gambrell: I don't see the weight of it, but I don't see any reason to object.

Examiner Wrenn: Did you want to stipulate it into the record?

Mr. Hamilton: Yes, if there is no objection.

Mr. Gambrell: Without admitting the weight of it at all.

Examiner Wrena: All right. It may be incorporated by reference, then.

The Witness: I would comment briefly on it. Braniff there showed two types of generating areas, one which they call primary and the other secondary.

The primary area which they showed for themselves included all of the states except the territory west of the Mississippi and of that territory it included Minnesota, Iowa, and the northwestern half of Missouri.

For the second area, half of the generating area it included Wisconsin, Michigan, Illinois, the balance of Missouri, and Arkansas.

It did not include Tennessee although at that time Bran-

—488—

[fol. 4214] iff was not yet certificated to Tennessee.

Now, so much for the area which Braniff reaches directly. Then we have superimposed upon that, Braniff's ability to reach the eastern area through its connection with National. While, of course we fully accept Mr. Schneider's statement that no discussions looking toward an interchange agreement have yet been made, I think it is only realistic for us and for the Board to assume that these two parties who were put together by the Board—put together at Havana, I mean—will make the most effective arrangements possible. That means that Braniff with an interchange with National would have through plane service to very large areas of the United States as indicated in this map—or could have.

Then there is another factor which has been mentioned, but I think not sufficiently emphasized, and that is the Chicago and Southern connection at Havana, which is important because it gives Braniff a shorter route than its own to Chicago and access to the very important centers of Detroit and St. Louis.

Now, when you add upon all that the fact that Braniff and National and Chicago and Southern would have the advantage of getting to the traffic at the source—that is, the United States-originated portion of the traffic at the source—whereas Pan American and Panagra, at least at

present, are dependent on connecting carriers, most of whom are active competitors, at least in other fields.

I think that is the story on the American-flag end.

Mr. Hamilton: Mr. Examiner, I wonder if it would be appropriate for us to adjourn at this time?

Examiner Wrenn: All right. Mr. Highsaw, did you have

—489—

[fol. 4215] a statement you wanted on the record?

Mr. Highsaw: Mr. Examiner, I would like to make one statement with respect to the stipulation between the Grace and Pan American Corp. that was filed the other day, with respect to their becoming parties.

I don't believe that ordinarily Public Counsel would need to say anything about that stipulation, but because of the fact that we had considerable discussion, and my discussion of it might be taken as a statement that that might be a way to solve the problem, I would like to say that I have been examining the stipulation and there have been some doubts created in my mind as to whether or not that does solve the problem, and it may well be that the parties should follow a procedure of filing the agreements involved subject to receiving their right to contest the jurisdiction of the Board rather than the procedure outlined in that stipulation.

There is a very serious question in my mind as to whether or not the parties can put an agreement before the Board without actually filing it as they have tried to do in this stipulation, and then having the filing relate back ab initio.

I am not taking any position on that at this moment, but examination of the stipulation has brought that to my mind and I would like for counsel for Pan American and Panagra to consider that because I think it was primarily their problem.

I just didn't want to feel bound by it in case that question arose.

—490—

[fol. 4216] Examiner Wrenn: We will adjourn until 10 o'clock tomorrow morning.

(Whereupon, at 4:55 o'clock p. m., hearing in above-entitled matter adjourned, to reconvene tomorrow morning, October 10, 1946, at 10 o'clock.)

491

[fol. 4217]

UNITED STATES OF AMERICA

CIVIL AERONAUTICS BOARD

WASHINGTON, D. C.

Docket No. 2423

In the Matter of:

PAN AMERICAN-PANAGRA AGREEMENT

Room A, Departmental Auditorium
Washington, D.C.
Thursday, October 10, 1946

The above-entitled matter came on for hearing at 10 o'clock a.m., pursuant to adjournment.

BEFORE:

THOMAS L. WRENN, and
WARREN E. BAKER,
Examiners.

APPEARANCES:

As heretofore noted.

492

[fol. 4218]

PROCEEDINGS

Examiner Wrenn: Will you please come to order?

HENRY J. FRIENDLY, resumed the stand, was examined and testified as follows:

Direct examination (Continued).

By Mr. Hamilton:

Q. Mr. Friendly, when the hearing adjourned yesterday, you just finished describing the American flag carrier com-

petition confronting Pan American and Panagra on their service from Miami by the Canal Zone to points on Panagra's route on the West Coast of South America.

I would like to ask you now to describe the foreign flag competition confronting these carriers in this area?

A. I will try to be brief about it because a good deal of the ground has been covered. I think perhaps the most important of the foreign competitors is BOAC, which has a

route from New York through Havana and various points in the Caribbean to every important point in South America as far as Santiago served by Panagra, ~~was~~ given by the Bermuda agreement, and which, under other agreements that it has with South American countries goes on from Santiago to Buenos Aires and from there to Rio and Europe.

We expect that BOAC on any route that it operates is going to be a very important competitor. The importance of it from the standpoint of this proceeding is that BOAC's service from New York to places on Panagra's route in South America will be a through one plane service whereas without this agreement Panagra and Pan American will

—483

[fol. 4219] have a three plane connecting carrier service.

It may be of some interest also to point out the importance of the BOAC route not only from the standpoint of United States-Latin America travel but also from the standpoint of travel between Europe and the West Coast of South America via the United States.

BOAC is in a position to give a one-carrier service to that traffic whereas under the present set up the United States would try to compete with a four carrier combination.

Then starting at the other end, we have the Argentine company, FAMA, which will undoubtedly have a route up the West Coast to the Continental United States.

As to what points may not be certain but New York definitely, and ~~perhaps~~ probably others.

FAMA will have the same advantage in the way of access to traffic in the Argentine, traffic originated in the

Argentine, as I have already mentioned in the case of the domestic airlines for traffic in the United States.

I won't repeat that story for the Chilean Company and the Peruvian Company. The situation I should say would be the same as PAMA's, with respect to their particular countries.

I think it is worth making one point, however, about the two Colombian Companies—TACA and Aviança, because there was some suggestion that they were not effective competitors by virtue of the fact that they, at least their present authorizations, do not cover service between the United States and the Canal Zone.

The fact is nevertheless that their routes reach Ecuador

494

(fol. 4220) and Peru, and there the mileage via Bogota is very slightly, if any, greater than via the Canal Zone.

There is no peculiar virtue about going through the Canal Zone as a means of getting to the West Coast of South America. It seems to me that, summing up the picture of domestic and foreign competition, it is pretty clear that without this agreement, Pan American and Panagra are in a perfectly hopeless position to compete for the West Coast traffic.

Q. In your description of competition the competition that Panagra and Pan American are facing upon this routes you mean that they are facing mere competition from other American flag carriers and from foreign flag carriers in terms of number of carriers, or are you also taking into account the traffic potential?

A. I have been talking thus far about the number of carriers that they are subject to, but, of course, it is true that that is only part of the problem, and that the rest of the problem is the thinness of the traffic which has to be considered in connection with the number of these carriers.

I think those figures ought to be borne in mind, because we sometimes forget them. I think the Crozier Report shows that the 1938 sea traffic of all classes, including the third class and the 1941 air traffic to all the countries on Panagra's route—I should say between the United States and all countries on Panagra's route—and including the whole of the Argentine traffic, amounted to about 18 [illegible]

passengers in each direction per day, which is about half

—495—

[fol. 4221] what would be hauled in one Pullman car that is going between New York and Miami, and just to give some idea what a different order of magnitude that is, the flow of traffic by surface and air on the route to Miami, simply from points north of Washington on the East Coast —and I am talking now about only traffic to Miami and not about traffic to points between Washington and Miami or between other points on the route, was 223,000 a year or 305 passengers in each direction per day, and, of course, there, I am using the figures of the 1933 rail and bus traffic which ~~were~~ was the lowest point of the depression.

It seems to me that those historic figures show that the air traffic that we are talking about to the West Coast of South America, isn't something that now exists or has existed in any volume. It is something that has got to be developed and that in order to develop it successfully, Pan American and Panagra ought not to be handicapped by this purely artificial barrier of a necessity of changing planes at Balboa if the public interest is to be served as it ought to be.

Q. Mr. Friendly, I would like to ask you now why Pan American was willing to enter into this agreement with Panagra, although it had long opposed Panagra's application for a certificate into the United States?

A. Well, I think I can sum it up by saying that the agreement preserves precisely those relationships which the granting of a certificate to Panagra would have destroyed.

Q. Do you want to elaborate on that?

A. Yes, I can. I would like to emphasize, in the first

—496—

[fol. 4222] place that Pan American's position with respect to Panagra's applying for a certificate to the United States was something that was altogether separate and distinct from the general question of competition in international air transportation, or from the question of competition in American flag competition, I mean—

Of course, there was never any question about foreign flag competition, or even from the question of American

flag competition to Latin America or even South America. That latter question was a broad question of air transport economics and of governmental policy.

The question with respect to Panagra's applying involved on the contrary, very specific considerations applicable to the particular facts of this case.

Now, the first of those considerations was the effect which the granting to Panagra of a Balboa-Miami certificate would have had on Pan American.

It would have completely deprived Pan American of an outlet to the West Coast of South America. To have such an outlet was the very purpose for which Pan American, back in 1928, had joined with Grace in creating Panagra.

The figures in this record show that 40 per cent of the traffic which Pan American moved in the last 18 months between Miami and Balboa was traffic destined to points on Panagra's route and we believe that percentage will probably be higher in the future rather than lower. That

a

is ~~the~~ reason affecting Pan American.

The other reason is a reason affecting Panagra, and Pan American's investment in Panagra. We felt that the grant-

—497—

[fol. 4223] ing of such a certificate to Panagra would simply have transformed the relationship between the two companies, which had existed since the beginning, and that in the course of doing that would have wrought a very serious injury on Panagra, in addition to the injury I have described as to Pan American.

Q. Mr. Friendly, what has that relationship between Pan American and Panagra that you mentioned, been?

A. From the beginning, Panagra has had a very close relationship with Pan American, and it is a relationship which we think has been exceedingly beneficial to Panagra.

Just to give a few instances of it, one of them has already been mentioned, that from the beginning Pan American has acted as Panagra's sales agent in the United States, and has given Panagra a coverage which Panagra could not possibly have obtained on its own.

Along with that general sales agency have gone a great variety of other traffic services.

On the whole question of traffic procedures, experience in handling various types of traffic matters, handling of claims, and so on, filing of tariffs, the use of Pan American's departments that are are organized for that purpose, the immediate benefits of any arrangements that Pan American has made for the handling of traffic.

I might mention as one instance the agreement with Railway Express Agency. Of course all these things now seem very easy and matter of fact, and all that anyone has to do now is go out and copy them, but I know of my own knowledge that that agreement was the result of at least a

—498—

[fol. 4224] year's negotiations on the part of Pan American and when made, of course, Panagra immediately came in on them and got the resulting benefits.

Turning to another quite different field: that of engineering and technical services: I don't pretend any expert knowledge on that subject, but I think it is general reputation in the industry that Mr. Priester and his department have pioneered a great many techniques, again many of which are now standard, and that Pan American maintains an excellent engineering organization which is certainly far beyond anything that Panagra could have afforded or for that matter could now afford.

Then, there is the question of procurement of equipment. We like to think, and I believe the record bears this out, that Pan American has the most progressive record on equipment of any company in the business, and whatever Pan American has done in that field is immediately available to Panagra, and not when the contract has become public knowledge but from the very time when negotiations take form, when Panagra has an opportunity to come in or not to come in as its own interests dictate.

Q. How would the extension of Panagra affect this relationship that you have just described?

A. Well, it would have affected it simply by destroying it. It would have put Panagra into direct paralleling competition with Pan American between Balboa and the United States. The very figures that I have given, or that are in this record, show that Panagra in its own interests, would have had to go after the local Miami-Balboa traffic—that is

499

[fol. 4225] local United States Balboa traffic—gone after it vigorously, and we would have defended it vigorously.

Also, I don't suppose it is to be thought that Pan American would simply have smiled and handed over the haul to Balboa on the through traffic to Panagra. That doesn't seem to me to be competition, and we would have had to do what we could to keep some of that by making alliances with foreign carriers who were operating south of Balboa, or any way we could.

In other words, if the Civil Aeronautics Board had decided that Panagra was to compete with Pan American we would have assumed that they meant it and we would have competed—felt that we had to.

Q. What did Pan American consider that the effect of this change in relationship would be upon Panagra?

A. Well, we believed that that change would have been exceedingly destructive of Panagra and of our investment in it. We always thought so and we think so now more than ever.

Panagra is up against very big league competition as what I have said already shows. Pan American simply didn't believe that Panagra is in any position to take on that competition, and in addition the competition of Pan American with any great prospect of success.

I don't want anything that I say in this connection to be deemed belittling of Panagra because we are very proud of Panagra and we think it has done a fine job, but one has to face the fact that Panagra does have a long thin line, and that while it has a very long route mileage it does not

500

[fol. 4226] have a volume of business and it does not seem likely that it will have a volume of business which in any way corresponds to that. Its passenger revenues in 1945, which I think was the biggest year in its history, were somewhat less than Braniff's, and with Braniff now extended so as to duplicate everything Panagra has, and with an extension into Mexico in addition, even if Panagra were to be extended to United States it would still be a good deal smaller than Braniff, not to speak of BOAC and Pan Amer-

ican, and we think that it would have very great difficulty in meeting that competition.

I think one has to recognize that the situation of Panagra in that respect would be quite unlike the situation of some of the smaller domestic lines which have given a very good account of themselves.

For example, there is Mid-Continent, which was described in the recent opinion. Those lines draw traffic largely from the very territory in which they operate, they have no great problem of obtaining sales coverage. They, on the whole, are not exposed to great competition from bigger lines than themselves, at least on many of their hauls.

Panagra would have had to draw its traffic from the whole United States, and to do that against the competition of these foreign flag monopolies and of Braniff and of Pan American, and we don't see any future for Panagra in that, and never have.

Q. Mr. Friendly, what will Pan American's policy be, with reference to the operation of local Miami-Canal Zone service upon the approval of the contract?

—501—

[fol. 4227] A. Well it is impossible now, Mr. Hamilton, to lay down what our policy will be if by that you mean the precise number of schedules. We have given some illustrations here which other witnesses will cover.

Perhaps I might—I think about all one can do is to take a look at the figures and see what they indicate as to what a possible pattern might be and I hope that in doing that I won't be taken to have made any commitment that it will be done precisely this way.

I can't do that for the reason, among others, that one doesn't know how far the proportions shown in these figures will be characteristic of the future, what with changes in the traffic movement, competition, and so on.

However, if it would be helpful, I could give a little indication. The figures in Exhibit S, particularly those at the bottom of the page, show how the Panagra traffic to or from the United States, breaks at Balboa among the three gateways.

As I said yesterday, about 60 per cent goes to the Miami gateway and 40 the others. I think it was 58 and 42 per cent, but take it as 60 40, that would mean that about 40 percent of the space on these through flights north of Balboa would be available for the carriage of local Canal Zone-United States passengers.

When you look at the figures as to total carryings between Miami and Balboa, which is shown on the top line of that exhibit, and deduct the proportion of that which is through traffic for Panagra and the proportion which might be carried on these through flights, it would look as if one would

[fol. 4228] have to operate—as if there would be, rather, traffic enough to support about one local schedule for every two through schedules.

As I say, that is simply an indication from these figures and one will have to work the thing out as we go along. It is definitely our intention to provide such number of local schedules as is necessary for the proper accommodation of local traffic.

Q. In examination of previous witnesses, the question has been raised as to what the effect of approval by the Board of the financial provisions of this contract might be upon subsequent mail pay cases. I will ask you to express your views on that question.

A. Well, my thought in the preparation of the contract and its submission to the Board is this: of course I don't know that my views count very much, it is going to be the Board's views that govern, but I think the theory of our presentation was this, that there are certain provisions of the contract where the whole question of financial arrangements is left for subsequent determination even by the parties.

I might cite paragraph 8 of Exhibit A which relates to training. The basis of that isn't even stated in the contract. It is perfectly obvious that in a case of that sort, approval of the contract wouldn't indicate approval of any arrangement since there is no arrangement stated.

There are other provisions of the contract such as the general basis for the charter hire which are laid out in some

detail. We would suppose that if the Board approved the contract containing such provisions it would not at least

—503—

[fol. 4229] in the first instance, raise any question in a mail pay case as to the general line which had been stated, although of course it would be entirely free to question whether the principle had been properly ~~allied~~ applied in the actual charges that had been made.

Of course it has been repeatedly brought out that if at any time the Board felt that the contract was operating improperly in that respect or in any other, it has means at its disposal for dealing with the situation.

Q. I will ask you to direct your attention to a question that Mr. Schneider asked Mr. Roig as to the meaning of Paragraph 10(b) of the contract, and ask you to comment on that.

A. I will confess that Mr. Schneider's question took me by some surprise. It had never occurred to me that Pan American was not under an obligation to establish adequate disciplinary machinery although I can see that the language leaves something to be desired. If there is any doubt on that, I would be very glad to state that we consider ourselves bound to establish such machinery and have that stand as a binding construction of the contract.

Q. Mr. Friendly, reference has been made to agreement whereby Pan American renders services and facilities to Eastern Air Lines on its Miami-Puerto Rico route. Is it true that that arrangement relates only to communications?

A. No, that is not true.

Mr. Hamilton: Mr. Examiner, I have here copies of that agreement which I would like to have marked for identification at this time.

—504—

[fol. 4230] Examiner Wrenn: That will be marked for identification as PAA-Panagra Exhibit No. 32.

(PAA-Panagra Exhibit No. 32 was marked for identification.)

By Mr. Hamilton:

Q. Directing your attention to this agreement, was this agreement—

A. Do you want me to identify it first.

Q. Yes I expect that would be a good idea. Will you identify this PAA Exhibit 32?

A. I had something to do with the making of it and it has been furnished by our New York office as a correct copy of the agreement.

Q. Was this agreement an isolated act or an unusual occurrence?

A. It certainly was not an isolated act. It was the first of what we expect will be quite a series of acts. It is a part of Pan American's announced policy of its willingness to make its operating facilities and personnel available to other carriers that have been certificated by the Civil Aeronautics Board insofar as feasible. When I say the first of a series of acts, I think I ought to correct that. It is the first perhaps as far as American flag carriers in this particular area are concerned, but of course we have been doing this kind of thing for foreign flag carriers for a long time. We have had arrangements for sharing our facilities with BOAC, oh, I guess going back to 1937 when the Bermuda first service operated, and had arrangements with KLM in the Caribbean for many years, and so on.

– 505 –

[fol. 4231] Q. I would like to now direct your attention to a question which Mr. Hickey directed to Mr. Roig as to the character and extent of the competition facing Pan American on its route to Miami down the East Coast of South America, and ask you to comment on that question.

A. Well, I simply want to have the record perfectly clear that the list of competing carriers that have been given, was as I believe Mr. Roig made clear, only the carriers that have an effect on the combind services of Pan American and Panagra.

If you are talking about Pan American "monopoly", you have to introduce a great many other factors. There is no use in my describing the routes of the other American flag lines which, in addition to Braniff, and include American and Eastern and National and Chicago and Southern and

Western, because those are all in the record. I am not going to take the time to describe all of the foreign flag services but I think perhaps the record ought to have some indication of a few of them in view of this persistent use of the word "monopoly," so I will try to be reasonably brief about it, although necessarily incomplete.

In the first place, KLM, which has been operating in the Caribbean for years, an airline of the very highest excellence, and so known throughout the world, which has been given a permit to operate into Miami, and is now operating from Miami through various points in the Caribbean to its headquarters in the Netherlands West Indies, whence its lines extend on down to Rio and Buenos Aires.

Then the British—we have discussed the British line

—506—

[fol. 4232] down the West Coast but the Bermuda agreement also authorizes British operations between various islands of the West Indies into Miami.

The French have a service in the West Indies also, although it has not at present reached the Continental United States.

Then, turning to the Latin American countries and starting at the bottom, from a geographical latitude standpoint only, FAMA has plans for lines up the East Coast as well as up the West.

The recent agreement concluded with Brazil provides for Brazilian lines to operate to New York and Miami and to New Orleans, and we know that the Brazilians have excellent airlines which are set up and ready to go.

A permit has been issued to the National Airline of Venezuela, LAV, to operate both to Miami and through New York to Montreal.

In Cuba we have Espreso as well as our own Cuban Company which we are proposing to sell to Espreso.

Mexico, there are great numbers of companies.

Superimposed upon all that are the various TACA com

panies. TACA in Colombia already has a permit to operate to the United States. Other TACA companies have applications pending, and they afford, taken together, a complete network of operations ranging from Mexico City

where they have some kind of arrangement with American companies reaching that point, from Mexico City on the North as far as at least Rio, and I think Buenos Aires, on the South; almost a complete duplication of the routes that Pan American has.

507

[fol. 4233] Above all that are many non-scheduled operators, some of them—one of them at least—strike out some using equipment which bears the name of a very large domestic airline.

All that discussion has dealt only with foreign lines which are either operating or are about to operate, between the United States and countries of Latin America. It has not dealt with the legion of other operators that are operating between countries in South America such as the British and French lines that operate down the coast of Brazil and compete directly with Pan American between Rio and Buenos Aires, as Mr. Roig has testified they compete with Panagra between Buenos Aires and Santiago. It does not relate to the other Brazilian companies that are operating between Brazil and the Argentine. It does not attempt to cover the two other Venezuelan airlines which are operating international services.

It does not attempt to cover airlines such as Aerovias Braniff which is operating or proposing to operate various international lines in addition to its proposed operation across the border.

Well, I think that gives some idea, although as I say it is incomplete.

Q. Mr. Friendly, I would now like to address your attention to a question that Mr. Highsaw, yesterday asked Mr. Roig, with reference to a quotation from the decision of the Civil Aeronautics Board in Docket 779.

Mr. Hamilton: I am referring now, Mr. Examiner, to page 441 of the transcript.

508

[fol. 4234] By Mr. Hamilton:

Q. The excerpt from the decision quoted by Mr. Highsaw appears there and I shall read it, if that is agreeable.

Examiner Wrenn: Go ahead.

—509—

[fol. 4235] By Mr. Hamilton:

Q. I am quoting from the quotation: "Deadlock between the two interests equally represented in the ownership of the company is always possible and certain to occur from time to time, especially in view of the other activities between the two owners."

I will ask you if you care to comment upon that question.

A. I don't think one could quarrel with the statement that deadlock between the two interests equally represented in the ownership of the company is always possible.

It probably depends on the tone of voice in which you read it and where you put the emphasis. I would put it on "possible". Of course it is possible in the case of Panagra and possible in the case of any company where the ownership is equally divided, which I may say is not an unusual thing in American business life to have such a company.

is

However, I certainly do not accept the statement that it certain to occur.

Mr. Roig said yesterday, the agreements settled the only matters where there has been a deadlock of any standing, and they provide their methods for settling others, and it certainly seems to me to be worthwhile pointing out also that an extension of Panagra wouldn't have avoided those possibilities of deadlock; in fact, to my mind it would have increased the friction between the two owners to a point where the deadlocks might have occurred more rather than less.

—510—

[fol. 4236] Coming back to this "certain to occur" and to the reference to the special interests and other activities of the two co-owners, I would like to take advantage, if I might, of an opportunity to say a word about what seems to me to have been a feeling that has crept into some of the questions, that Pan American has some interest against Panagra, and I want to deny that just as emphatically as I can.

Pan American is just exactly as interested in the welfare of Panagra as anybody could be. Pan American had

a large share in their having been a Panagra. There was a lot of debate in Docket 779 as to whether or not the larger share, as we think we did, but we are not going to debate that now, because it is not important here, but Pan American has been very proud of what it did in bringing about what Panagra, and of ~~course~~ Panagra has accomplished, and it wants to see Panagra continue on a very high plane.

Now, lest I be thought to be preaching a sermon here, I wish to state that that interest is not of a purely sentimental character, although that does exist, and any suggestion that Pan American's financial interests are opposed to those of Panagra, seems to me to be completely belied by the least analysis of the figures, and I would like to talk a little about the figures in Exhibit 7 which show the content of Panagra's passenger revenue, and I think when you analyze those, you see just how little basis there is for any theory that Pan American's interest could be anything other than one of the most intense support.

In the first place, my remarks are all going to deal with the right-hand column, which deals with passenger rev-

—511

[fol. 4237] enue, not the number of passengers.

49 per cent of Panagra's revenues, that is, the difference between the 100 and 51, is from what might be called inter-port traffic. That is traffic between points on Panagra's route from Balboa south.

That traffic is obviously completely unavailable to any route which Pan American has. Pan American has just as much interest as our partner in the development of that traffic.

We get just as much out of it. We haven't the slightest adverse interest as to that.

Now, let's look at the other 51 per cent, and you go right down the analysis of that until you come to the last figure of 14.7 per cent, which is the traffic between the United States and Buenos Aires.

I suggest we call it 15 to make it a little easier to talk.

In other words, of the 51 per cent of Panagra's traffic which is traffic between the United States and points on its route, 36 per cent is to points which Pan American

does not serve and couldn't possibly get to any route of its own.

Now, I say that as to that 36 per cent, Pan American's interest in building up Panagra is not only as great as that of our associate, but if you want to talk about it, it is even greater, because in addition to getting just as much financial benefit out of what Panagra does with it, we have a very good chance at least of getting the haul between the United States and the Canal, which inures completely, to our benefit.

—512

[fol. 4238] Now, let's look at this 15 per cent. That is traffic between the United States and Buenos Aires; it is not traffic between Miami and Buenos Aires.

As I have said before, 40 per cent of that roughly comes from the western gateways and presumably the man who goes through the Brownsville gateway, or who comes from Los Angeles, is not going to take the East Coast route to Buenos Aires anyway, because it is too roundabout, so you have to deduct 40 per cent of the 15 per cent, and that brings you down to 9 per cent of Panagra's revenues, which might be thought to be subject to possible diversion to the East Coast route.

Let's look at that 9 per cent now. Passengers are not just cattle. They have their own ideas as to how they want to go. Many of them do, at least. Many people certainly many tourists, and also many businessmen who go to Buenos Aires want to go down one way and come back the other.

Other people have special reasons for going down the west coast because they want to stop at Lima or Santiago or some other point. I have no statistical measure of how many of those there are, but it would seem reasonable to assume that, say, half of the passengers have some reason for taking a particular route, and couldn't be diverted no matter what was desired.

So it seems to me you are down to about 4½ per cent of Panagra's revenues which Pan American might be able to change over to its East Coast right to Buenos Aires if

—513—

[fol. 4239] it wanted to and the suggestion is that in order

to prevent W. R. Grace and Company from getting the share of the profit to which it is entitled, from that 15 per cent of Panagra's business, Pan American is going to prejudice its ability to derive the profit from 50 per cent of the business.

An awful lot of things have been said about Pan American in the past, but I don't think we have generally been accused of being fools, and it seems to me that nobody who wasn't a complete fool, could do anything as silly as that, and the difference of opinion between us and our partner in Panagra, has not been at all over the question of whether Panagra ought to be developed, but how it should be developed, and now happily we have found a solution of that problem which is acceptable to both of us, and as we think at least, highly beneficial to the public, and we hope that we can be allowed to carry it out.

Mr. Hamilton: I think that is all, Mr. Examiner.

By Mr. Gesell:

Q. I wasn't quite clear, Mr. Friendly, as to whether or not you were saying that in the event Panagra were to come to the United States on its own route, Pan American would continue or discontinue its activities on Panagra's half before in the nature of its sales agency and engineering services and other assistance, in view of the competition which would be created?

A. Well, I can only say, Mr. Gesell, what I would recommend, and what would seem to me to be likely.

As to any sales activities or assistance of that sort, I would recommend in the strongest possible terms that that

514

[fol. 4240] be discontinued. I don't see how we could be in paralleling competition with Panagra between the United States and Balboa and be acting as its sales agent.

I would also recommend that we discontinue any other service which involved the slightest sharing of confidential information, or anything of the sort. I think the only things that we might continue would be the type of things that we have done and are doing with our competitors

as
such as this agreement that has been marked ~~with the~~ PA Exhibit 32, for sharing certain operating facilities with Eastern.

I don't mean to say that we would have any special animus against Panagra, certainly, that we would not have against anyone else, but I don't think that we could or, in the interests of proper competition, should do anything more.

Q. The question has been raised in this proceeding as to whether or not it would be possible for Panagra to work out with Pan American procedures for handling Panagra's maintenance in the United States at PAA's base and having cooperative activity under the heading of training, with or without this through flight provision for Panagra planes coming to a United States point over PAA's routes, and I want to ask you what has been the policy of Pan American with respect to performing maintenance and training services for other carriers.

A. Our policy has been to do it or not to do it, as our own operating requirements dictated. We have at times done certain maintenance for companies in which we have an interest. For that matter, we have at times done some

515

[fol. 4241] for companies in which we have no interest.

We would simply, in the absence of an agreement of this sort, deal with that matter from time to time, and look at each problem as it arose. We would not undertake any long-term commitment.

Q. Are you saying that you would not undertake a commitment which involved a regular and continuing obligation to perform maintenance and training to the extent that this agreement contemplates? That is the case?

A. That is definitely the case, and perhaps I ought to elaborate on the reason, because it surely wouldn't seem to be sheer obstinacy on our part. We have found, taking the maintenance problem, for example, that you go up in kind of steps, that you increase your maintenance facilities and at times you can take on other work and do it to your own advantage, then as your operations expand that condition ceases and it becomes a burden.

In the absence of some general agreement of this sort, we would not take on a commitment which might be inconvenient at various times.

Q. Now, on a somewhat different subject—

A. There is one other thing I would like to say also: that of course I have dealt with this only from the standpoint of Pan American. There is another question that shouldn't be confused with this, and that is how far the through operation of these planes into the United States is necessary from Panagra's standpoint to make these maintenance and training provisions as beneficial as they now are.

I assume other witnesses will deal with that.

—516—

[fol. 4242] Q. Another question somewhat unrelated, which I think can be asked in this matter, to cover inferences at least raised by questions of other counsel in this case. Is it the intention or purpose of Pan American to throw obstacles in the way of carrying out of this agreement by unreasonably restricting Panagra's right to establish rates and schedules or routes, or acquiring equipment or developing airways or constructing landing fields, and other matters of that sort which might come before the Board of Directors from time to time in the management of the company, and involve questions of business policy?

A. That certainly is not the intention, and I thought that my somewhat extended answer to Mr. Hamilton's last question indicates the reason, or at least one reason, in addition to good faith in carrying out this agreement, which leads to that, that it would be the height of stupidity for Pan American, in its own self interest, to follow any such policy as that.

Q. And what have you to say about this question which is raised by the fact that Pan American has—in 779 at least—in the past charged Grace or Grace Line with suppressing Panagra in the interests of the steamship business or some other interest? Do you consider that that situation is in any way affected or changed by this agreement or other developments?

A. Well, I would say at the start that we are not concerned about that situation in the slightest degree. I don't know how far you want me to elaborate on it.

Q. Well, you certainly have been concerned about it in
—517—
[fol. 4243] the past, have you not?

A. Yes. I am familiar with the charges that you refer to. Perhaps I should expand on my answer. I would like to preface that by the general statement that what I am about to say does not relate to steamship companies in air transportation in general. It relates to W. R. Grace and Company and Pan American-Grace Airways in the particular circumstances that we have in this case.

We made those charges in Docket 779, and we sincerely believed them. They related even when they were made—the evidence in support of them, I should say—went back to a period some years past, a period antedating Mr. Roig's election to the presidency of Panagra. We have lived with Mr. Roig and W. R. Grace and Company for a great many years.

We have lived with them very closely since then, and we do not have any fear of any such suppression on their parts, of this airline, as we did at the time when we made those statements.

I think also—let me break in there too. I don't want to put this on too personal a note, because we are making an agreement for a long time, and someone might say "No matter how confident you are in Mr. Roig, you shouldn't let that influence you."

We know other people in W. R. Grace and Company, and as was said, that is not a one-man show. I think that anyone who has had contact with Grace can't but be impressed with the stress that that company puts on the development of younger men who know what the policies are, and who are
—518—
[fol. 4244] developed so that they are ready to step in when occasion arises, and I am confident that Mr. Roig, and the others—Mr. Garni and so on—have impressed their personalities and their enthusiasm for air transportation upon those other men.

Turning to another phase, however, there are protections in this arrangement which certainly would not exist if you had a case of a steamship company owning an airline.

The solicitation of the business in the United States under these agreements is to be very largely in Pan Ameri-

can's hands. Arrangements have been made whereby the traffic end in South America is largely handled by Panagra's own employees.

I don't know the details of that as well as Mr. DeGroot, but I know the general effect, so that we are not placing the traffic solicitation for this airline in the hands of the steamship interests.

That about covers it.

By Mr. Gesell:

Q. There are a couple of questions that relate to somewhat legal problems that came up during Mr. Roig's examination which were deferred for you, and perhaps they ought to be covered.

One had to do with what is contemplated by the parties to this agreement with respect to the clause concerning the pending litigation. Could you state for us what the present status of that litigation is, and what is contemplated by that provision of the agreement?

A. Petitions for certiorari in Docket 779—or rather the

[fol. 4245] review of the decision of the court of appeals for the 2nd Circuit in Docket 779 were granted by the Supreme Court and are on the Supreme Court docket.

Shortly after the execution of this agreement, I took the matter up with the clerk of the Supreme Court and informed him what had occurred, addressed a letter in cooperation with counsel for W. R. Grace and Company to the clerk requesting that in the light of the making of the agreements and the pendency of this proceeding, we should

the

not be put to the expense of printing a record which we would otherwise have had to do before now.

The clerk said that he considered that request reasonable and wrote a letter indicating that while this proceeding was pending, we would not be required to print the record, and the case would not be docketed for argument.

Mr. Gesell: That is all, Mr. Examiner.

Examiner Wrenn: Mr. Schneider, you may examine the witness.

Cross examination.

By Mr. Schneider:

Q. May I say first, Mr. Friendly, I trust we may never find ourselves in the reverse situation? I am a little confused by the answer you gave to Mr. Gesell in connection with the steamship business of W. R. Grace.

In Docket 779, Pan American took a very firm position with respect to the steamship tie-up of W. R. Grace, did it not?

A. Yes. The record speaks for itself. It is in here.

Q. That is right. And I take it now that the position

—520—

[fol. 4246] of Pan American is somewhat changed from what it was in 779; is that correct?

A. I stated what our position is now.

Q. Do you consider it to be different than what it was in 779?

A. Yes, to the extent that comparison will reveal.

Q. You are not as vigorously opposed today to the tie-up between W. R. Grace and Grace Lines as you were then?

A. We are not opposed to W. R. Grace and companies owning the stock that they own in Panagra and having the rights that they have under these agreements.

Q. Are you still opposed to W. R. Grace having a tie-up with the steamship business?

A. We have nothing to say about that.

Q. Well, I ask for an answer to my question. Is Pan American still opposed or isn't it?

A. I can't contribute anything on that beyond what I have, Mr. Schneider. I have said that we are not concerned about this situation in this particular case under the circumstances that I have mentioned.

Q. Mr. Friendly, leaving aside this case, does Pan American still hold the position it held in Docket 779 with respect to steamship company affiliation of W. R. Grace?

Mr. Hamilton: Mr. Examiner, I object. I think the witness has answered that question.

Mr. Schneider: I submit he has not. He has said that he does not oppose the steamship affiliations in so far as they affect this contract.

Examiner Wrenn: On the basis of your question, what

521

[fol. 4247] is the materiality of it?

Mr. Schneider: The materiality is this: If Pan American Airways took a position in 779 against W. R. Grace steamship affiliations, I want to know if they still think that is bad, and if it is, then I can argue whether it affects this contract as well as he can argue that it does not affect this contract.

Examiner Wrenn: I understand, but I am going on the basis of your question as you have just stated it, Mr. Schneider. I don't see what bearing it has. As I understand you, you said leaving aside this contract in this case here. If we are getting into something abstract, I am going to have to sustain the objection on that basis.

Mr. Schneider: All right. Let me rephrase the question.

By Mr. Schneider:

Q. Leaving aside any consideration of this contract, Mr. Friendly, has Pan American Airways changed its mind on the steamship affiliation question as set forth in 779?

Mr. Hamilton: I submit, Mr. Examiner, that Mr. Friendly has already testified on that to the extent that it is relevant.

Mr. Schneider: Mr. Examiner, we have already had a ruling from you by stipulation to the effect that the material in 779 is relevant. That was the effect of the stipulation. It was received in evidence as being relevant over the exception of counsel for Grace and Pan American-Grace.

Now, if that has been received in evidence over their objection as relevant, I am entitled to know to what extent

522

[fol. 4248] they still take the position in that material?

Examiner Wrenn: As I understand your question and maybe I am wrong: you were excluding any considera'ing of this proceeding we have here before us now, and if that is the import of your question, I can't see the relevancy of it.

Mr. Schneider: Certainly, I can't take Docket 779 which is now in this record, and make an argument that Pan American felt so-and-so about a steamship affiliation of

W. R. Grace unless I know whether they still think that. I am trying to be fair to Pan American.

Examiner Wrenn: The part I am trying to find out is if we leave aside any consideration of this case that we have before us—

Mr. Schneider: I didn't say "leaving aside any consideration." I said "leaving aside any possible effect on the terms of this contract."

Mr. Hamilton: It comes to the same thing.

Mr. Schneider: Mr. Friendly said "I don't think that the steamship affiliation of W. R. Grace particularly hurts this contract; they had not any adverse effect upon this contract."

I am asking the broader question. Do they still think it is wrong for W. R. Grace to have steamship affiliations? They say they did here. I want to know whether I can still make the argument from 779 from what they have said there. If they have changed their mind, I can't make the argument. That is all I want to know. Have they changed their mind?

Examiner Wrenn: I will let him answer it.

A. All I can say is this: On the general question of steamship control; by that I mean a hundred per cent control

—523—

[fol. 4249] or something the equivalent of that: that gives the steamship company complete "say" about an airline, we were the first to oppose that, I believe, and we still oppose it.

As to the ownership of W. R. Grace and Company of the stock of Panagra under the arrangement contemplated by these agreements which are before the Board, we do not think that such stock ownership is adverse to the public interest; we do not make any complaint about it and we don't intend to.

By Mr. Schneider:

Q I take it from your testimony, then, that if this agreement were not in existence, you would still adhere to the position you took in 779 in this question?

A. I will decide that when the question arises.

Q. You refuse to answer the question?

A. I have answered it.

Examiner Wrenn: He has answered it.

By Mr. Schneider:

Q. Mr. Friendly, in your negotiations with Mr. Gesell with respect to this contract, did he at any time attempt to obtain for Panagra the right to apply in its own name for a route to the United States?

A. That had been fully debated at the meeting of the Panagra board. It was perfectly evident that Pan American was not going to agree to that. The negotiation didn't include that as a possibility.

Q. Then, I take it, your answer is that Mr. Gesell did not raise the point in his negotiations with you?

A. We started on the basis that we were to find a way that would give Panagra the things that it thought it needed without involving such an extension.

524

[fol. 4250] Q. Then as part of the bargaining and negotiating for this particular contract; he didn't attempt to acquire as one of the conditions of the contract a right to apply in its own name to the United States?

A. You mean right now?

Q. That is right.

A. No, he did not.

Q. Now, Mr. Friendly, do you understand, as a result of contracts A and B, that Panagra is prevented from applying for a route to the United States in its own name?

A. No.

Q. There is no informal understanding on that basis?

A. Well, my understanding is exactly as Mr. Roig has testified: that there is no express provision in the agreement on the subject; there is nothing whatever in the agreement that would prevent Panagra, upon proper action of the Board of Directors, from making an application. There is an understanding which you can say is implicit in the agreement, or which you can say is a result of the express provisions in regard to the dismissal of litigation, that Grace and Company will not agitate for such an extension.

Q. The reason I raised it: I wanted to see if your answer was the same as Mr. Roig's.

A. Precisely the same. If I haven't phrased it the same, I will adopt his, because it was undoubtedly better.

Q. One last question, merely to clarify the record, Mr. Friendly: In your reference to the extension of Braniff to South America, I believe you said that the president had directed that Braniff be extended. You are aware that

—525—

[fol. 4251] the decision in the Latin American case shows that the President merely decided the need for a second carrier and that CAB made the choice of carriers?

A. I believe that is correct, Mr. Schneider. Thank you for correcting me.

Mr. Schneider: That is all.

Examiner Wrenn: Mr. Gambrell, do you have any examination of the witness?

Cross examination.

By Mr. Gambrell:

Q. Mr. Friendly, am I correct in understanding that you, as an officer and executive of Pan American Airways, Inc. and Pan American Corp., were the chief negotiator with W. R. Grace and Company and Panagra in the development of these two contracts?

A. Well, the facts were as already testified. I would say, Mr. Gambrell, that I had my other suit on during those negotiations and was acting as a lawyer rather than as a corporate officer.

Mr. Gesell and I met as counsel for the respective parties. We did a good deal of talking. We didn't have any idea that anything—strike that out.

We often made proposals that we made simply for the purpose of seeing what each other thought about them without having had prior clearance with anyone.

Our idea was to put our heads together and see if we could create something which our principals would accept. It was done in that spirit.

Q. You agree with Mr. Roig, who stated that the chief executives of the companies on each side did not, in the

—526—

[fol. 4252] first instance, create a framework or a basic outline of agreement and tell you lawyers to develop it, that you didn't have a basic outline or basic framework, and you were not told as lawyers merely to do the editing or creation of the literature for that agreement; is that right?

A. That is correct.

Q. But you went out and started from the ground up and developed something which was finally acceptable by the boards of the affected companies; is that right?

A. That is substantially right; the only qualification being that there had been a little ground laid at the board meeting of Panagra, but that was in very general terms indeed.

Q. Were there exchanges of memoranda and correspondence between the representatives of the four companies which ultimately signed these two contracts?

A. I can recall none. There were of course drafts of the agreement, but my recollection is that I at least wrote no memoranda to anyone.

Q. Were there any communications from one side to the other in writing or between the negotiators or officials on one side and those on the other?

A. Not to the best of my recollection. You mean written communications now?

Q. Yes.

Mr. Schneider: May I interrupt just for a minute? As I understand when you were cross examining Mr. Roig, there was an understanding that minutes of the board of directors meetings would be furnished.

Mr. Gesell: That is right.

—527—

[fol. 4253] Mr. Gambrell: And executive committee meetings.

Mr. Schneider: Are they available now?

Mr. Gesell: I have the Panagra minutes; I do not know about the others.

Mr. Schneider: Could we have those now, Mr. Examiner?

Mr. Gesell: I don't mind.

Mr. Schneider: When will the Pan American minutes be ready?

Mr. Hamilton: I don't know. I will let you know during the noon recess as soon as I hear from New York.

(Off the record)

Mr. Gambrell: May I ask whether the minutes referred to in respect to Pan American Corp. and Pan American Airways were already established and approved, Mr. Hamilton? Have they already been cleared?

I know sometimes minutes aren't completely written up at the time of meetings. Have the minutes that were referred to already been written and established records of the company?

Mr. Hamilton: I am afraid I can't answer that now, Mr. Gambrell, because I don't keep the minutes and I am not familiar with it. I will be glad to report to you on it as to what the status now of the minutes is.

Mr. Gambrell: When the report is made, it will indicate when the minutes were prepared?

Mr. Hamilton: Yes. I will be glad to make a report to you on that question that you raised whether they have been prepared or not.

Mr. Gambrell: And when?

—528—

[fol. 4254] Mr. Hamilton: Well, I suppose they will show when they become official documents.

Mr. Gambrell: May I inquire of Mr. Gesell as to when these minutes were established?

Mr. Gesell: I don't know, but it was long before your request, Mr. Gambrell. These minutes were all set long before you asked for them.

Examiner Wrenn: In view of this discussion about minutes and so on, I want to see what the state of the record is there.

(Question read)

By Mr. Gambrell:

Q. Mr. Friendly, would you be willing, as vice president and general counsel of Pan American Airways and as a representative of Pan American Corp. to also make available to parties in this hearing any and all memoranda or copies of memoranda prepared or interchanged between the people who were negotiating for these agreements?

A. I would not, unless I was ordered by the board and I would argue very strenuously before the Board that I should not be so ordered.

Q. Do you take it that the proper interpretation of these two contracts, and the objectives sought to be attained through them, would in some measure be reflected by the work notes and interchange of correspondence, and memoranda and conferences which contributed to the development of these contracts?

Mr. Hamilton: Mr. Examiner, I submit that Mr. Friendly has stated his position on that question, and that this is not

—529—

[fol. 4255] a proper scope of cross examination.

Mr. Gambrell: I am developing the importance and relevancy and I would appreciate it if he would answer it.

Mr. Hamilton: I object to it.

Examiner Wrenn: So far as I am aware of the testimony here, I haven't heard that there is any such.

Mr. Gesell: That is the point.

Mr. Gambrell: He said that he wouldn't be willing to let us see them.

Examiner Wrenn: Go back up the road a little further to your previous questions.

By Mr. Gambrell:

Q. Were there any memoranda, or was there any exchange of communications in writing between the representatives of these four companies?

A. I have testified, Mr. Gambrell, that to the best of my recollection, there was no exchange of communications between the representatives of the two companies in writing. There were of course earlier drafts of these agreements.

Q. And those drafts in part, some of them at any rate finally ended up in the documents, I assume; is that right?

A. You know what a draft is, Mr. Gambrell?

Q. I am asking the question. A draft might be anything.

Mr. Hamilton: I object to the question, Mr. Examiner.

By Mr. Gambrell:

Q. Did some of those drafts ultimately contribute to the contracts as adopted?

Mr. Hamilton: I object to the question, Mr. Examiner.

530

[fol. 4256] Examiner Wrenn: What particular bearing does it have?

Mr. Gambrell: It shows the relevancy of the draft, the materiality of it.

Mr. Hamilton: Mr. Examiner, I submit that the witness has already stated his views on that question.

By Mr. Gambrell:

Q. Do you have in your files or do you know whether there are in the files in either of the Pan American companies any copies of any such drafts?

A. Yes, I have copies.

Q. Would you be willing to supply them for the light that they might throw on the purposes, objectives and meaning of these two contracts?

A. I have answered that once.

Q. I didn't ask just that before. Will you answer it now?

A. The answer is the same.

Q. Will you state what the answer is?

Mr. Hamilton: Mr. Examiner, I submit the record shows what the answer is.

Examiner Wrenn: The record shows it. He says the answer is the same as he made to the previous question.

Mr. Gambrell: He could just say "yes" or "no".

Examiner Wrenn: I submit that he has answered the question.

Mr. Gambrell: I am not sure which he said. I have never said. I have never asked him for just that and I want the record to protect me on that question, sir.

Mr. Hamilton: Mr. Examiner, I submit that it is clear

[fol. 4257] on the record.

The Witness: I will save time.

Examiner Wrenn: Go ahead.

The Witness: I am not supplying [illegible] as ordered by the Civil Aeronautics Board and I will oppose to the best of my ability the making of any such order.

By Mr. Gambrell:

Q. Do you consider that the conferences and discussions and proposals that enter into the making of these two contracts would have a function of interpreting the meaning of those contracts similar to the function of discussions before committees of Congress in interpreting laws of Congress?

Mr. Hamilton: Mr. Examiner, I feel that I must object to that question. It is irrelevant.

Mr. Gosell: The same question, Mr. Examiner, that came up with the prior witness on cross-examination as to whether this was more like a law than it was a contract, came up, and more like a contract than it was a regulation. I don't see that has anything to do with this case at all.

By Mr. Gambrell:

Q. Is it your position that such drafts would throw no light, Mr. Friendly, upon the meanings, purposes, or objectives of these contracts?

Mr. Hamilton: I object to that question, if the Examiner please. The witness has stated his position as clearly and categorically as a man could with respect to this whole matter.

Mr. Gambrell: No further questions.

[fol. 4258] Examiner Wrenn: I don't know whether he has covered that particular phase of it.

Mr. Gambrell: I would like a ruling on it. I have asked him a question.

Mr. Hamilton: Let's have the question read back.

Examiner Wrenn: I was trying to rule on it. Do you want the question read back?

Mr. Gambrell: Yes.

Examiner Wrenn: All right, read it back.

(Question read)

Mr. Hamilton: I have my objection on the record, Mr. Examiner.

Examiner Wrenn: I am going to overrule the objection, Mr. Hamilton.

A. I would say, Mr. Gambrell, if there is some ambiguity in the contract, which I have not heard of up to date, a draft might throw some light on it. As to the purposes and all of the other things that you mentioned, I consider them wholly irrelevant. I don't consider that things that Mr. Gesell and I put down on paper in an effort to reach an agreement would have the slightest bearing on the question of whether what we eventually reached is in the public interest or isn't in the public interest. If there is some provision in this agreement which is of concern to the public as distinguished from concern to the parties, which is ambiguous, I think that can be developed, but I have heard of none to date.

Mr. Gambrell: No other questions.

Mr. Gesell: Mr. Examiner, I now have the Panagra

—533—

[fol. 4259] minutes requested by Mr. Gambrell. I have two copies of them, which I can make available to the Examiner for such distribution as he thinks appropriate. They consist of 10 pages.

Possibly one means of handling it would be to have the 10 pages copied into the transcript.

Mr. Gambrell: We first want to see them. We ask that we be permitted to see them.

Mr. Gesell: Certainly you can see them.

Examiner Wrenn: We will take a five-minute recess and you can look at them at that time.

(Short recess)

Examiner Wrenn: Let's come to order, gentlemen.

Mr. Gambrell: Mr. Examiner, that completes our cross-examination. We are going to study these minutes during the day.

Examiner Wrenn: I would like the record also to show that pursuant to a request, counsel for Eastern Airlines made on yesterday and agreed to by counsel for Panagra, the copies of the minutes have been furnished by Panagra, and pursuant to counsel for Eastern's statement, they are now being examined.

Minutes of Pan American have not yet been furnished and counsel for Pan American stated that he will have further information on the subject after the noon recess.

The Department of Justice may examine the witness.

(Off the record)

Examiner Wrenn: Go ahead with your examination, Mr. McDowell.

534

[fol. 4260] Cross examination.

By Mr. McDowell:

Q. Mr. Friendly, in response to Mr. Gambrell's last question, I understood you to state that if there be any provision in these contracts now involved in this proceeding which affect the public interest, then you think it possible that drafts of contracts may possibly be relevant to consideration in this proceeding?

A. That is not what I said, Mr. McDowell.

Examiner Wrenn: Will you read back Mr. Friendly's answer to Mr. Gambrell's question on that?

The Witness: I think I can answer it just as quickly.

Examiner Wrenn: All right.

A. What I said or what I intended to say was that I understood that where there is ambiguity in the contract, drafts sometimes are of use in enabling the court to determine the true meaning. I haven't yet heard of any provision of this contract as to which there is any ambiguity or at least, if there be one, as to which it isn't quite possible to arrive at the correct understanding by questions of the two parties in this proceeding.

I therefore see no occasion to resort to drafts to cure any ambiguity, because there haven't been any pointed out.

By Mr. McDowell:

Q. I would like to ask you whether that answer extends, then, to the question of intent of the parties in making the contract. Do you feel that that intent is sufficiently apparent on the face of the contract without reference to any contracts?

[fol. 4261] A. I think it is, but I would like to supplement it, if I might, as to the character of these drafts.

These drafts are not representations of the positions as between the parties. They were not submitted as official offers and counter-offers. They were work that Mr. Gesell and I did as lawyers, in many cases at least at the outset, without our clients, at least in my case, having seen them, in an effort to reach an agreement and I cannot conceive what possible relevancy such pieces of paper have.

Q. I am not sure whether I understood you correctly, but my impression is that you stated on direct examination that the discussions looking toward this contract originated with the Board of Directors of Panagra; is that correct?

A. That is right.

Q. Can you tell me on which side of the ownership of Panagra the motivation came?

Mr. Gesell: That was all described, Mr. Examiner, by Mr. Roig and the minutes show precisely what happened at those meetings. Mr. McDowell must not have been here when that was discussed because that was gone into at great length.

Examiner Wrenn: I think it is perfectly clear on the record. Do you have some particular point? Was it a question of your not having heard it, Mr. McDowell, or was it a point—some specific point—in addition to what has been said?

Mr. McDowell: I merely have not been informed on that point Mr. Examiner, and I think that the question bears upon the intent of the parties in making the contract.

Mr. Gelsell: I have no objection. I just wanted to point out it has all been covered.

536

[fol. 4262] Examiner Wrenn: I think it has been answered, but the witness may answer it again.

The Witness: As Mr. McDowell wasn't here, perhaps we should, although it has been covered.

Perhaps it would be easier for him to read Mr. Roig's testimony.

Mr. McDowell: I see the answer is included in the minutes of Panagra which have been produced here. I will withdraw the question.

By Mr. McDowell:

Q. Mr. Friendly in response to a question by Mr. Schneider on cross examination, I understood you to say that there was nothing in the agreement involved in this proceeding to prevent Panagra from applying for an independent franchise to enter into the United States; is that correct?

A. That is right.

Q. I would like to know whether there is any understanding outside of the agreement now involved in this proceeding which would so prevent Panagra from applying?

A. There is no understanding whatever in regard to Panagra's applying or not applying. Panagra can apply at any time if its board of directors so authorized.

Q. Is it understood that this contract, and the arrangements contemplated under it for charter operation into the United States will settle the dispute which has existed for sometime between Pan American and Grace as to whether Panagra should be permitted to apply for an independent entry to the United States?

A. Yes, I should say so.

537

[fol. 4263] Q. And as part of the settlement of that dispute, is it understood between the parties that Panagra will not, so long as this contract is in effect, apply for such independent entry?

A. No. I don't want to seem unduly technical, Mr. McDowell, but I want to be perfectly clear about this. There is nothing in these agreements that limits the ability of Panagra as a corporation to make such an application.

Of course, Panagra can make such an application only by authorization of the Board of Directors. Pan American's views have been opposed to the making of such application for the reasons that I have indicated. So far as I can see at the moment, I see no reason, and I have no reason to think that Pan American's views would change.

What may happen over 99 years is more than I can say. Now, as to the understanding with respect to Grace, that has already been testified to by Mr. Roig, and I am in complete accord with what he said.

Q. Mr. Roig said in another connection, in the course of his testimony, Mr. Friendly, that this contract removes the basic difficulty which has existed between Pan American and Grace with respect to Panagra.

Do you concur in that opinion?

A. One hundred per cent.

Q. In other words, you think the basic difficulty has been the question of whether Panagra should be permitted to come into the United States independently?

A. I certainly do. I don't mean to say that we haven't had other matters on which we have had differences of

—538—

[fol. 4264] opinion just as officers of a company may have differences of opinion with each other, but over the years this is the only one—at least over recent years—the only one that has given rise to any real difficulty.

Q. Mr. Friendly, would you not agree with me that that so-called basic difficulty is really merely an outgrowth of a more fundamental difficulty, which is the division of ownership in Panagra and division of control in such a way that each of the parties have disparate interests on occasion and have the power to exercise control which will block Panagra from taking any action detrimental to the interests of either party?

A. No, I would not agree with that.

Q. It is true, is it not, Mr. Friendly, that since the formation and beginning of operations of Panagra, the board of

directors of Panagra, composed of four representatives each from Pan American and from Grace, has on many occasions been on dead center, incapable of resolving the corporate will because of a dispute between Grace and Pan American as to whether the contemplated exercise of the corporate will was proper?

A. Well, there are two inaccuracies in that, Mr. McDowell—one minor and the other major. The minor one which I correct simply for the sake of the record, is that while it is true that Pan American and Grace have each always been represented by the same number of directors, the number has not always been four. There was a period when it was 3. It may have been less.

Getting, however, to the real intent of your question,

539

[fol. 4265] I can think of no issue other that this, when all these philosophical consequences have ensued.

Q. Is it not true that from time to time there has been inability on the part of the Board of Directors of Panagra to resolve questions concerning areas in South America in which Panagra should operate?

A. ~~You~~ would say not, Mr. McDowell. The only question which I can remember on which there was a difference of opinion for an appreciable time, was the question of operation through Cali. Those discussions did take some months. There was a difference of opinion on it that was ultimately resolved. The view held by the Grace directors prevailed.

Q. And the existence of a difference of opinion has also occurred with respect to types of equipment to be used, has it not?

A. Well, there have been differences of opinion, but as I recall it, certainly I can recall no instance within the last 12 years when there was any difference of opinion with respect to equipment, as between Grace on the one hand and Pan American on the other, except perhaps this question that was directly related to the Cali matter.

We have had discussions about equipment just as I can assure you there are many differences of opinion within the Pan American board about types of equipment, and we have

discussed those as businessmen and we have come to conclusions.

Panagra has bought many types of equipment different from Pan American, with our complete approval, within the last two years. There have been two occasions of that:

—540—

[fol. 4266] one within the last few months. Pan American was buying twin-engined equipment for replacement of the DC-3's. We surveyed the available planes, came to the conclusion that the Consolidated 240's were the best for our purposes.

All of the results of our surveys have been available to Panagra all the time. Panagra has studied the matter in cooperation with our technical department, came to the conclusion that for its purposes the Martins were preferable, because of the high altitude airports out of which Panagra operates.

After some discussion—I don't know whether it was 30 minutes or 3 days—our technical people were entirely in accord. Panagra bought the Martins and we bought the 240's.

Panagra has bought the DC-6's whereas we have not. There have been differences of opinion between individuals, as there are within any company, and I would certainly want always be in any that I was connected with, but there has been no difference of opinion on party lines, and there has been no delay in action beyond the delay that I would think ought to occur before large commitments were made, to be sure you were doing the right thing.

Q. These differences of opinion have also existed with respect to—

Mr. Gesell: What does he mean "these differences of opinion"?

Mr. McDowell: The differences we have been discussing. This question goes back to the earlier question, and the differences of opinion between the directors serving on Panagra's board as representing on the one hand, Grace,

—541—

[fol. 4267] and on the other hand, Pan American.

By Mr. McDowell:

Q. Now, these differences of opinion have existed also, Mr. Friendly, have they not, with respect to the type, nature and extent of facilities necessary to discharge Panagra's service to the public?

A. I of course am going to object—or not going to fall in for this "also". I presume you don't have any evil intent in it, but I want to be clear about my answer.

I know of no instance to my knowledge that has occurred within the last 10 or 12 years—I should think that might be long enough—where there has been any division of opinion about ground equipment or facilities as between Grace on the one hand and Pan American on the other. There were some differences of opinion, if you want to go back to the late 20's or the early 30's, about radio and such things, but they were resolved, again after a reasonable period, and they have not occurred again on any basis, that involved a conflict

~~contract~~ between the two owners.

Q. That difference of opinion to which I referred earlier, Mr. Friendly, is also true with respect to the —

A. Why can't we have the question directly?

Mr. Hamilton: I have no disposition to be captious, but I do suggest it would be more appropriate if Mr. McDowell phrased his questions independently, instead of carrying forward an overtone that I don't believe that the record supports.

Mr. McDowell: I think, Mr. Examiner, that the witness has understood the questions without difficulty and I think it is a convenient way of shortening the record.

—542—

[fol. 4268] Mr. Hamilton: Mr. Examiner, I suggest that the witness just previously stated that he didn't.

Examiner Wrenn: Suppose you clarify your question.

By Mr. McDowell:

Q. Shall I say then, Mr. Friendly, that directors on the Board of Panagra representing the Pan American and directors representing Grace on the Board of Panagra have

also differed with respect to the adequacy and character of services performed for Panagra by each of the parent companies?

A. I can't recall that that matter has come before the directors, or in the last analysis, occasioned any real difference of opinion. There have been times which Mr. Roig has felt that certain services performed by Pan American were not what they desired, and he has called those to our attention, and we have to the best of our ability remedied the defects of which he complained.

don't

I assume, although I know—perhaps I shouldn't say so—there have been occasions when we had some fault to find about services rendered in South America by Grace.

Those matters never came before the Board of Directors at all. They were handled by administrative action by the officers of the company, and the disposition of the parties rendering the services was to cure any inadequacies that had been found.

Q. The question of the inadequacy of Pan American's Miami Canal Zone connecting service—

A. That of course you appreciate, Mr. McDowell, is not

543

[fol. 1269] within the ambit of your question about services rendered by the parent company.

Pan American's connecting service to Canal Zone is an independent transportation operation conducted by Pan American Airways in which to be sure Panagra had a very vital interest. There were complaints about it certainly.

Q. Mr. Friendly, would you agree with me that the record in Docket 779 will show that with respect to each of these differences of opinion and failures to agree between Pan American and Grace directors on the Board of Panagra, charges were made by Pan American on the one hand and Grace on the other, and a great deal of evidence was offered by both in the course of that proceeding, to bring out these differences of opinion, for the purpose of showing that in various instances each of the parent companies had blocked action by Panagra or had retarded action by Panagra as being contrary to the special interests of that particular parent.

Mr. Hamilton: Mr. Examiner, I don't wish to be technical but I submit that what the record in 779 shows is established best by that record.

Examiner Wrenn: I think you are right on that. The record has been incorporated in here. I don't get the pertinency of your question, Mr. McDowell.

Mr. McDowell: The purposes of the question, Mr. Examiner, is to secure from this witness his answer and opinion as to whether or not these difficulties in making up the corporate mind of Panagra have actually been attributable to the differences in the fundamental interests of

—544—

[fol. 4270] the two owners.

Mr. Hamilton: Mr. Examiner, as I recall it, that was one of the very first questions that Mr. McDowell put to Mr. Friendly and it was answered.

Examiner Wrenn: I rather feel that he has answered the question, Mr. McDowell. I don't have any desire to prevent you from developing any information that you think is material and necessary toward deciding this case.

Mr. McDowell: Well, I will put it this way, Mr. Examiner: I understood the witness to say that the only real conflict there had ever been between the parties in the Panagra board was the question of Panagra's independent entry into the United States.

Examiner Wrenn: Do you want him to reflect

Mr. McDowell: I want the record to reflect that there have been other serious difficulties and delays in the exercise of Panagra's corporate will occasioned by the special private interests of the two parent companies.

Mr. Hamilton: Mr. Examiner, I believe that has all been covered.

Mr. Gesell: It seems to me that gets down particularly, Mr. Examiner, to the whole area of who is at fault? That is one thing I thought we were at least getting pretty clearly out of this record. Every one of these issues is

Examiner Wrenn: I certainly have no desire to get that in this record. I don't think that has any bearing, who is at fault.

Mr. McDowell: I am not attempting to raise the question of who is at fault. I think you can appreciate what I am

—545—

[fol. 4271] getting at here.

Examiner Wrenn: What are you getting at, whether there has been one basic difficulty or whether there have been more?

Mr. McDowell: That is right.

Examiner Wrenn: I have no objection to his answering that.

A. I think I have answered it once, but I would like to state that—I am going back now over a period of 17 years, and I am doing my best, but as I look back on that period, apart from this question of the extension to the United States, I can think of only two matters in which there was any appreciable delay in arriving at a settlement.

One was the Cali matter, the other was the question of radio and so forth, which goes back to practically prehistoric times.

Now, I don't say that, as to either of those matters, the delay was in any way inordinate. ~~There~~ They were serious matters, the views on ~~every~~ each side were strongly held and sincerely held, I think, and they were solved.

Now, as to what the motivation was or wasn't, I am not going to testify. The record will show what it will show. But the facts are that with the exception of this extension issue there has been no issue which has not been solved within a reasonable time and so far as my recollection goes, only those two that took any substantial time at all.

By Mr. McDowell:

Q. Do you agree that with respect to any difference of opinion which might arise between Grace and Pan Americ-

—546—

[fol. 4272] an Corporation, in the management of Panagra, either of the latter two has the power, should it consider that matter in issue to be sufficiently important, to block any determination of the question by Panagra's board of directors.

Examiner Wrenn: Is that under this contract or independent of it now?

Mr. McDowell: Independent of this contract.

A. I think that is a very important exception, of course, differences of opinion
Under this contract machinery for handling A has been arrived at.

As to other questions which might conceivably arise, it is perfectly true that as a theoretical matter, that either party could block action just as in any other case, where the stock of a corporation is owned half by one party and half by another, and each is equally represented, of which there are many hundreds in this country.

By Mr. McDowell:

Q. Now, as you suggested, Mr. Friendly, there are provisions in this contract which look to the resolution of any such difficulties, and I would like to ask whether you are relying principally on the provision for arbitration.

A. No. We are relying on the fact that we are all businessmen, that we are interested in this company, that we have quite a large financial stake in it, and that we *will* get along with each other, as we have in the past, in substantially every question that has arisen.

Q. I understood you, Mr. Friendly, to say in response to a question by Mr. Schneider, that you continue to be of the opinion today that 100 per cent control by a steam-

—547—

[fol. 4273] ship company of an air carrier would be bad and not in the public interest, is that correct?

A. That is correct.

Q. Do you not agree, Mr. Friendly, that if Grace continues to have, under this basic arrangement between Grace and Pan American for the divided ownership of Panagra, a 50 per cent control which at least gives theoretical power, as you put it, of negative control?

A. I think that is true.

Q. But you do not consider that bad?

A. Not in the particular circumstances we have here, I do not, under these agreements.

Q. Mr. Friendly, I was particularly interested in your remarks about Pan American's "monopoly" and you recited quite a substantial list of other companies engaged in air transportation.

I wonder if you could give us the percentage of the traffic between the United States and South America which is carried on one hand by your swarming competitors, as against that percentage carried by Pan American, including Panagra, on the other hand.

A. Well, if you want me to give the percentage now, I can give that, and if you want to ask a fair question and not one limited to a situation where these other people are just getting started and have just received authorization, I will answer that, too.

Examiner Wrenn: Suppose you give us the benefit of both of them.

Mr. McDowell: I think the record should show both, al-

—548—

[fol. 4274] though I have some difficulty in seeing how you can say what percentage of the traffic future competitors will carry.

The Witness: I can see tremendous difficulty, and I have been seeing it for years in any government department looking at a situation based on a keyhole view which doesn't go beyond the end of your nose and refusing to look at agreements that this very government has signed which are just as certain to produce results as two and two are to make four, Mr. McDowell.

Now, let's get back to the situation: I can't give you percentages. KLM is carrying a very large amount of traffic between Miami and Havana and Port au Prince and Curacao. The records of the Board show how much. There was an opinion about it showing it was very substantial.

The T.A.C.A. system which does a lot of carrying which it is not authorized to do has been operating a great number of flights into Miami all of last winter. They ran as much as, I think, ten flights a day from Havana until the season was over, and I can't say whether that was 5 per cent or 10 per cent, but it was big business.

The American companies, of course, are getting started. Eastern started its service to Puerto Rico early in September, and our load factors on that route took a very nice drop immediately.

American Air Lines has been operating into Mexico, and in part because of the inadequate service that we get from

Eastern, American carries much more business to Mexico than we do

Aerovias Braniff, a Mexican Company, which Mr. Tomc.

549

[fol. 4275] Braniff went down and organized in Mexico, and got a permit to go over to the border connecting with his own line carries a very large amount of traffic into Mexico City.'

Espreso, the Cubag Company, is a substantial carrier now between Havana and Miami. It carries all the Cuban mail, I may say, which we had previously carried.

I could go on.

Let's look ahead. What is the sense of closing your eyes

ing

to BOAC and just assume that it doesn't exist which we have been doing for the past few years. Do we think that

are fooling

the British, idling, that they don't intend to do anything in the air? Do we think they came here and got these rights to run an airline through the United States to Latin America just to have something on paper?

Don't we know enough about what transportation means to Great Britain to understand that the British are going after that and going after it in a big way. Talk to some of the members of the Civil Aeronautics Board who have been negotiating with the Argentines and the Brazilians and see what they think as to whether these foreign companies are going to carry some business.

I am not going to say as to whether in the future it is going to be 30 per cent foreign and 70 per cent American, or 50 per cent foreign and 50 per cent American, or exactly what the percentage of the American share Pan American is going to have, but I am sure that our percentage is going to be very very well under the 50 per cent when we get all through, well under it.

550

[fol. 4276] By Mr. McDowell:

Q. Thank you, Mr. Friendly.

Now, passing for a moment to the question of future competition, could you give us past and present percentages on competition now existing between the United States and South America?

A. No, I can't.

Q. Could you undertake to supply that information?

A. No. We can give you our own figures. Other agencies can give you the rest.

Q. With respect to some of the South American companies which you mentioned as being competitors in South America: do you exclude therefrom, Mr. Friendly, those South American companies in which Pan American owns a substantial interest?

A. Do I exclude them?

Q. Exclude them from that list of competitors?

A. Well, they are competitors. Why should I exclude them.

Q. You don't consider Panagra a competitor, do you?

A. I don't consider Panagra a competitor except to Buenos Aires because that is the only common point we have with them. They are competitors to Buenos Aires, definitely, and to Montevideo.

Q. How about some of the others? Could you tell us what percentage of control Pan American owns in a number of the competitors in the South American companies which you listed as competitors?

Examiner Wrenn: I think you are a little vague and indefinite there. Do you have a particular company in min'?

—55'—

[fol. 4277] Mr. McDowell: I am referring to the companies which he listed. I don't know what companies he had in mind. He said there were a great many companies, and I think with respect to the companies which he is putting forward as competitors the record doesn't show to wh' extent they are independent competitors and to what extent they are competitors of the sort that Panagra is a competitor.

The Witness: I will be glad to answer.

Examiner Wrenn: All right.

A. I referred to Brazilian companies. There are, I don't know how many airlines in Brazil, Mr. McDowell, probably 10 or 12. We have less than a majority interest in one of them. Whether that is the airline that the Brazilians will authorize to come to the United States is not yet determined. They may authorize one or two or three.

Certainly I don't think ours will be the only one that they authorize.

By Mr. McDowell:

Q. Could you give us the exact percentage?

A. If you won't hold me to one or two per cent, it is in the neighborhood of 46 per cent. It might be 47 but it is in that range.

Q. What is the name of the company?

do

A. Panair do Brasil.

In Mexico—well, there are probably about 20 airlines there conservatively in which we have an interest in two.

The only one of those two that is planning any operation to the United States is Mexicana. We have again about a 45 or 46 per cent interest in that.

—552—

[fol. 4278] There are other Mexican airlines that are candidates for permits to operate to this country.

Of the two Colombian companies that we have spoken of—TACA de Colombia and Avianca—we have a stock interest in Avianca amounting, I think, to 48 per cent.

However, under the Colombian law our voting rights are limited to 25 per cent.

In Cuba—

Q. May I ask your percentage ownership. You say you had a percentage in TACA.

A. Oh, no.

Q. I am sorry. I misunderstood you.

A. Control of that is in TWA. We have had a company in Cuba which I did not mention as a competitor because we were expecting to sell it. Cubana—our stock interest in that, the only one of these in which we have had a majority in recent months—is 52 per cent, but that we are proposing to sell to the Espreso Company in which we have no interest whatever and will have none after the sale is consummated.

I want, however, to add one thing: we have spoken about stock ownership. That gives a wholly misleading impression. The directors of these companies are and in many cases have to be—Nationals of their various countries. In

some cases we do not have any representative on the board. In other cases we may have one.

In no case do we have anything approaching—not only not a majority—we don't even have anything approaching a substantial minority. The executive administration of

—553—

[fol. 4279] these companies is vested in men who are prominent citizens of their own country, who run those companies as their national interest dictates, and we encourage them to do that, and when they want to compete with us, they compete with us without any let or hindrance on our part.

If you want to put those companies in a compartment, brand them as somewhat different, I have no objection to it, I think that should be noted, and I assure you I had no intention to conceal it, but in the first place it is not true that we control them, and in the second place they are only a small element in this entire competitive situation.

(Discussion off the record)

By Mr. McDowell:

Q. Mr. Friendly, have you mentioned all the companies in South America, all the air operating companies, in which Pan American owns an interest?

A. All the ones that are engaged in international operations.

Q. You have mentioned only those that are engaged in international operations?

A. That is right.

Q. Those that are not engaged in international operations are also important in the air traffic there, are they not?

A. To some minor extent.

Q. Could you give us the information concerning those?

A. I don't have that at hand. There are a number of

—554—

[fol. 4280] them. They are companies of very small size.

Q. Would you be willing to undertake to supply that?

A. If it has any relevancy here. I confess I can't see it.

Mr. McDowell: I think it is quite relevant, but there is no argument about that, is there, Mr Examiner?

The Witness: I suggest we also get some statistics as to non-competitive air routes in the United States at the same time.

Mr. McDowell: I will not undertake to put in the information which I think your counsel would like to have brought forward, Mr. Friendly.

Examiner Wrenn: Now, what is the situation here? Is there going to be an agreement to--

Mr. McDowell: I understand that there is an undertaking by the witness to produce the information which I have requested concerning the ownership by Pan American in non-international South American air operating companies.

Mr. Hamilton: That is right. We will produce that.

Examiner Wrenn: Did I also understand that in doing that, Mr. Friendly wants to show something regarding non-competitive companies in this country, is that it?

The Witness: Yes and I think we ought to get in the TWA network and a few other things if we are going into all these things.

Mr. McDowell: I have no objection, Mr. Examiner.

Mr. Gesell: It is my impression that the Form 2380's were stipulated into this record at the request of Pan American and Panagra and that those forms show the

[fol. 4281] holdings of all the airlines and other airlines, and it is all laid out here, isn't that true?

Examiner Wrenn: Is that correct, Mr. Highsaw?

Mr. Schneider: I looked it over and I can't find it. It is not available.

Mr. Gesell: Is Mr. McDowell asking this question for you?

Mr. Schneider: No, he isn't.

Mr. McDowell: In the light of the witness' answer a few moments ago about the competition which Pan American is meeting in South America, it is appropriate that the record disclose directly on the face of the record and not through an exhibit the extent to which that is genuine competition.

Mr. Hamilton: We will provide information which is not already in the record in this case and of course reserve

the right to amplify it any way we see fit to give additional information to give a complete picture to which I take it Mr. McDowell has no objection.

Mr. McDowell: Oh, no.

Examiner Wrenn: The record will so show.

Mr. McDowell: I would like to know if that could be expanded a little bit to include—unless Mr. Friendly is able to supply that information at the moment—information concerning past ownership by Pan American in South American air operating companies.

Examiner Wrenn: Back to when?

Mr. McDowell: Back as far as 1928. I would like to ask, in order to bring out the relevance of that request for

—556—

[fol. 4282] information, I would like to ask Mr. Friendly whether it is not true that Pan American has in the past controlled or held stock ownership in South American air operating companies which control or ownership has subsequently been disposed of, with agreements with the purchasers which have a bearing, and affect the question of the future ability of those companies to compete with Pan American.

By Mr. McDowell:

Q. Is that not true, Mr. Friendly?

A. Which question? Will you ask one question at a time? May I have that done, Mr. Examiner?

Mr. McDowell: I think the record will show that first I asked counsel if he would undertake to supply the information about past ownership, and when the question was raised as to its relevance, then I asked this question, Mr. Friendly:

As to whether or not it is true that in the past Pan American has owned control or ownership shares:—certain South American Companies—which control or ownership shares have been disposed of with agreements with purchasers which restrict the competition of those companies with Pan American.

Mr. Hamilton: If the Examiner please, I am a little confused on the state of this record. My understanding

was that I undertook to supply Mr. McDowell information, if the point were not adequately covered by the record, information on the extent to which Pan American now owns stock interests in airlines in South America together with such additional information as we thought appropri-

[fol. 4283] ate in order to give a well-rounded and complete picture.

Examiner Wrenn: That reflects my understanding of the undertaking.

Mr. McDowell: It reflects mine to.

Now, I am asking whether it can be expanded.

The Witness: I can answer the question.

We have at times owned a larger percentage in some of the companies I mentioned than we now do. We have disposed of what we have, ~~and~~ pursuant to the requirements of local law in some instances, and because of our belief that it was consistent with this government's policy toward Latin America to have ~~those~~ Nationals of those countries own these companies. I know of no instance in which any such agreement as you describe has been made.

By Mr. McDowell:

Q. Mr. Friendly, could you extend that answer as to no instance in which such an agreement has been made, as to the sale by Panagra of any previous ownership which it held in any South American operating company?

I know

A. No, ~~I~~ nothing about that.

Mr. McDowell: I would like to ask Mr. Gesell whether you could supply information of the same sort that Mr. Hamilton is going to supply?

Mr. Gesell: It has been all supplied in the record already.

By Mr. McDowell:

Q. Mr. Friendly, I understood you to testify, in describing the relationship between Pan American and Panagra, that there has in the past been a very close relationship,

—558—

[fol. 4284] and that under this relationship Panagra got the benefit of commercial arrangements negotiated by Pan American in the United States, including particularly the sales representation, engineering and technical service and procurement of aircraft.

And that the independent entry into the United States of Panagra would destroy this relationship, put Panagra into competition with Pan American, and destroy Panagra, is that a fair summary of your testimony on that point?

A. Except for the last word. I don't think I said it would destroy Panagra. I said it would seriously injure Panagra and prejudice our investment in it.

Q. There was a difference of opinion on that point between Pan American and Grace, was there not?

A. Certainly was. Both people held their views very sincerely strongly and very ~~singularly~~, I am sure.

Q. Do you have respect for the business judgment of the Grace directors on the Panagra Board?

Examiner Wrenn: Where are we going on that, Mr. McDowell?

Mr. McDowell: I am merely undertaking to qualify the statement made by the witness concerning the injurious effect of an independent relationship between Panagra and Pan American upon Panagra, showing by getting the witness to agree, that Pan American's partner in that joint enterprise known as Panagra, had an entirely different opinion and fought for that independent relationship.

Examiner Wrenn: Then what bearing does that have on the statement they have made in the first page of the application for agreement, I believe, that they have re-

—559—

[fol. 4285] solved their differences and are here now pressing this contract.

Mr. McDowell: I think it has a very important bearing on the question as to whether or not the contract brought forward here for approval is really in the public interest and is really necessary for the continued welfare of Panagra and Pan American.

Examiner Wrenn: I don't see your point when you have the chief official of Panagra here and the Vice President of Grace and the Vice President and General Counsel of Pan American both testifying on their present attitude. I don't see your point, admitting what has taken place in the past.

Mr. McDowell: I think, Mr. Examiner--perhaps I am merely not expressing it clearly, but it seems to me that it is simply a question of whether Mr. Friendly would agree that people who held a different partners in the enterprise held a different point of view, and that they were actually effective businessmen participating actively in the enterprise.

Mr. Hamilton: I submit the witness has stated.

Mr. Gesell: I think I could testify for Mr. Friendly on this point that he perhaps would not want to testify to that obviously when he has a difference of opinion even with a good businessman he thinks his own opinion is better than that of the businessman and I can't see what that has to do with this case.

Mr. McDowell: Is it your understanding, Mr. Examiner, that the information is clear enough on the record?

Examiner Wrenn: So far as I can understand your [fol. 4286] question, Mr. McDowell, I feel like it has been answered.

Mr. McDowell: I will withdraw the question then.

Examiner Wrenn: You can let it stand if you like. I feel like it has been answered as far as I understand it.

By Mr. McDowell:

Q. Mr. Friendly, you stated that Pan American has no interest contrary to the interests of Panagra, I believe, is that correct?

A. I would much prefer if you could ask me direct questions, Mr. McDowell, ~~except~~ instead of "you stated this and you stated that." The record will show what I stated. I don't say there is a substantial inaccuracy but we can't get these

matters from the record. I remember what I stated and if it is not clear I will be glad to try to explain it.

Q. I appreciate that and I think you appreciate it as very difficult to set up the question without giving that.

A. I am sorry. I don't understand that at all.

Q. I have no intention to misstate your previous testimony.

Examiner Wrenn: How much more examination do you have of the witness?

Mr. McDowell: I should think perhaps five minutes.

Examiner Wrenn: Without any thought of curtailing you or anything if you think you can finish within that time we will continue. Otherwise we will adjourn for lunch.

Mr. McDowell: I would like very much to continue.

Examiner Wrenn: All right.

Mr. McDowell: I don't recall whether the question is before the witness or not.

—561—

[fol. 4287] By Mr. McDowell:

Q. I want to ask, Mr. Friendly, whether in his opinion the fact that only 4½ per cent of Panagra's revenues represent traffic to and from Buenos Aires, and I want to add parenthetically that that 4½ per cent is accepting your figures—in other words, I am not suggesting that that is the figure—

A. I understand.

Q. —but assuming for the sake of argument that you are correct on that, do you think that the smallness of that percentage renders Panagra, in its present geographical limitation, not competitive to Pan American?

Mr. Hamilton: I would like to know what the implications of the "limitation" are. You mean by that, Mr. McDowell—well, frankly, I just don't quite understand the question.

The Witness: I think I do.

Mr. Hamilton: If the witness understands it, all right.

Mr. McDowell: In deference to the witness I am not repeating his testimony but he said he could recall.

A. Of course we compete for Buenos Aires traffic. Whether the amount is 1 per cent or 10 per cent we compete for it. What I was endeavoring to point out was that any theoretical interest which Pan American might have in diverting this very small percentage of Buenos Aires traffic that it could divert from a company which it owns half of, and where in addition it get a haul of substantial length on its own run, it is insignificant compared to the benefits which Pan American gets from a healthy Panagra with 95½ per cent of the traffic beyond any possible power of Pan

562—

[fol. 4288] American to divert, that there is no danger whatever from the public interest standpoint in that position.

Q. It is only when Panagra threatens to enter the United States independently that you consider Panagra a threat to Pan American competitivewise, is that correct?

A. I didn't say that.

Q. I am asking you whether you agree to that.

A. Of course what I said, and I would like to have it clear, was that we felt that for Panagra to get itself into that position was not a good thing for Panagra.

So far as its effect on Pan American was concerned, it is perfectly clear to my mind that if Panagra were extended from Miami to Balboa, or vice versa, it would have a most serious effect upon Pan American's Miami-Balboa route.

Panagra, assuming that it could equip itself with the proper kind of sales organization, which it would do at great expense and perhaps come to the Treasury for assistance on that, would in some way get a great deal of the through business and a great deal of the local business.

It would get more of the through business, I think, than we could hold unless we were able to work out some arrangement with a foreign airline or someone else south of Balboa, and it should do quite well I should think on the local business, and we would be placed in direct paralleling competition, which the Civil Aeronautics Board has recognized as the most virulent form of competition on that route, and with Panagra having a considerable advantage in its ability to handle the through traffic.

—563—

[fol. 4289] By Mr. McDowell:

Q. I didn't want to cut you off, Mr. Friendly, but I wanted to ask you:

There has been reference here to the fact that in the past Panagra rates and schedules have been submitted—confine the question to rates—have been submitted to Pan American for clearance.

Do you agree that that has been the fact?

A. I would prefer if you would ask that of Mr. Lounsbury or Mr. deGroot. I don't have the details which those witnesses have.

Q. I think perhaps you are in a better position to answer the question I want to ask with respect to that, and that is whether or not, assuming that that has been the practice, that such practice has been pursuant to an agreement between Pan American and Grace?

A. Well, I certainly know of no agreement whatever between Pan American and Grace on that subject. I think that what has been done—and my reluctance to answer your previous question is simply that I don't have the detailed knowledge of the technical terms and exactly what the procedures are. The matters have been taken up simply as a matter of good business and nothing more than that.

Mr. Hamilton: Mr. Examiner, I can just state for Mr. McDowell on the record that we will have witnesses who will be prepared to go into detail on the rates and fares procedures and practice.

Mr. McDowell: The reason I raised the question with this witness—I appreciate he is not going to testify on rates

—564—

[fol. 4290] and fares—but I understood him to say in qualifying himself, that with the exception of Mr. Trippe he was the best qualified person in the United States, or language to that effect, to discuss the question of the relationship of Pan American and Panagra from the Pan American point of view.

Mr. Hamilton: I think he has testified that he has been associated with Pan American-Panagra matters for a long time.

Examiner Wrenn: The record will show that. Do you have many additional questions?

Mr. McDowell: I have two more questions, and I just don't know how long the witness will take to answer them.

By Mr. McDowell:

Q. The reason I asked that question, I wanted to know what you would testify with respect to the understandings between Grace and Pan American which were part of the original contract of association and formation of Panagra.

A. I can definitely testify that there is no agreement of any kind or description between Grace and Pan American on the subject of rates.

Q. Do you know whether or not there was an agreement at the time Panagra was organized, between Pan American and Grace, agreement or understanding, that Panagra would confine its operations to the West Coast whereas Pan American would confine its operations to the East Coast.

Mr. Gesell: Mr. Examiner, that is the subject of 779. That is what 779 had been concerned with until the record was closed. There was dispute between the parties as to

—565—

[fol. 4291] that; that dispute continues and all the facts are in the record. What is the purpose of asking Mr. Friendly to recite his side of that controversy again, which is clearly set forth in the record? Where are we progressing for? The public interest in this contract? Honest to goodness, as I listen to these proceedings I wonder whether anybody remembers the contract.

Examiner Wrenn: All right, Mr. McDowell.

The Witness: May I have the question read?

Examiner Wrenn: Do you want to answer the question?

The Witness: No. I thought you had taken a position.

Mr. McDowell: The reason I asked this question of Mr. Friendly is for the same reason I indicated to Mr. Hamilton a moment ago that I asked the rate question, that Mr. Friendly is represented here as a man who is particularly familiar with the early organization of Panagra from the Pan American point of view and I would like to have his answer on that question.

I think it is very relevant to the determination of this matter.

Examiner Wrenn: Of what importance is it? Is it important only if they have changed any such position?

Mr. McDowell: I think it is important whether they have changed it or not. If they haven't changed, I think it is important, the original relationship between Pan American and Grace I think is very important in determining, in the history of that relationship, in determining the suitability of Panagra to discharge the service which it proposes to undertake under this contract.

-566-

[fol. 4292] Examiner Wrenn: Aren't you going back to 779?

Mr. McDowell: That matter was touched upon in 779 but we do not in 779 have the benefit of Mr. Friendly's testimony on it.

Examiner Wrenn: I don't see what bearing Mr. Friendly's testimony has on the question of us, on that point, I mean.

Mr. McDowell: From the point that he has represented himself as an expert on that matter, the best informed man in the United States.

The Witness: I object to that characterization. It seems to me we are entitled to a little fairness from a representative of a great agency in the government.

Mr. Gambrell: I would like to have the information, Mr. Examiner. I think it is most pertinent.

Examiner Wrenn: On the strength of what I have heard I am going to sustain the objection. If there is any more, I think we better recess for lunch.

Mr. Highsaw: Mr. Examiner, is there a formal objection to that question?

Mr. Gesell: There most certainly was.

Mr. Schneider: By counsel for Mr. Friendly?

Mr. Gesell: I have a right as a party to object to any question.

Mr. Schneider: I am merely asking for information. I was not raising a point. I want to know whether Mr. Hamilton objected.

Mr. Hamilton: I think the record shows that Mr. Gesell objected.

Mr. Schneider: I merely wanted to know.

—567—

[fol. 4293] Examiner Wrenn: We will recess until two o'clock.

(Whereupon, at 12:30 o'clock p.m. a recess was taken to 2 o'clock p.m. the same day.)

—568—

[fol. 4294] AFTERNOON SESSION 2 p.m.

Examiner Wrenn: Come to order please.

Mr. Hamilton: May I state for the record that the Pan American minutes that were referred to in the morning session will be here and be available in the morning.

Examiner Wrenn: All right. Thank you, sir.

Mr. McDowell: Will there be sufficient copies to supply copies to counsel or will they be included in the record?

Mr. Hamilton: We will be glad to supply copies. I believe the record also shows that I have an objection to the question that is pending.

Examiner Wrenn: While we are on that point when you said Pan American, were you referring to all the minutes of Pan American?

Mr. Hamilton: All the minutes that have been requested.

Examiner Wrenn: What about the situation on the Grace?

Mr. Gesell: Same.

Mr. McDowell: May I interrupt there?

Examiner Wrenn: All right, Mr. McDowell.

Mr. McDowell: I am not certain from Mr. Hamilton's answer whether he understood that the Department of Justice is requesting that the minutes of the Pan American Corp., the holding company, be included as well as those of the operating company.

Mr. Hamilton: Did you say you had an objection pending? I wasn't quite clear as to the state of the record.

—569—

[fol. 4295] Examiner Wrenn: I thought there had been a ruling. Any way, we will pick up and go ahead, Mr. McDowell.

HENRY J. FRIENDLY, resumed the stand, was examined and testified as follows:

Cross-examination (continued).

By Mr. McDowell:

Q. Mr. Friendly, we were discussing at the close of the session this morning the relationship between Pan American and Panagra in South America. I would like to ask you whether Pan American owns, either directly or indirectly, any operating rights in countries located on the West Coast of South America?

A. No, unless you consider the fact that we also operate into the northern part of Colombia,—we have rights of course that cover our operations there—but we do not own the rights under which Panagra operates.

Q. Pardon me.

A. We do not own any rights or have any rights in Colombia under which Panagra operates.

Q. I am speaking apart from your interest in Panagra.

A. We operate into Colombia and we have a right to do it through the Colombian government.

Q. Is that through a subsidiary?

A. Actually we have two operations in Colombia; one our own and the other a very small operation known as CMCA, which operates from Panama Canal to Turbo and Medellin.

Q. Does your operation in Colombia connect with the routes operated by Panagra in that country?

A. No.

—570—

[fol. 4296] Q. Other than those operations which you mentioned, I want to be clear that you own no interest—also that your answer include or preclude any possibility of your having any interest through other companies which own operating rights on the West Coast other than Panagra.

A. Avianca, of course, is a Colombian company which operates in Colombia and also to Ecuador and plans to operate further south. I am not familiar with just what

they have, but they obviously must have some permits from Ecuadorian government to permit them to do that.

Q. I believe you testified this morning, Mr. Friendly, that Pan American owns some interest in Avianca.

A. Yes. I think it is approximately 48 per cent, although under the Colombian law we can only vote up to the extent of 25 per cent.

Q. Is the route of Avianca on the west coast of South America physically competitive with the route of Panagra?

A. It would be as far as Avianca operates.

Q. How far can you say again, is that?

A. Into Ecuador.

Q. From where?

A. Avianca is a Colombian airline that operates to a great many points in Colombia. I think the actual routing is shown on the time tables that are in evidence, Mr. McDowell. It is in Exhibit 15, time table 6-A shows—yes, if you look at the—there is a route from Cali, Quito, to Guayquil, which operates three times a week, also an operation from Tipiales to Quito which operates once a week.

—571—

[fol. 4297] Q. Do you know whether Panagra owns any operating rights in any countries on the East Coast of South America?

A. Not to my knowledge except of course that it operates into the Argentine.

Mr. Gesell: And Brazil?

A. Oh, yes, and over the Brazilian border. It has rights which are provided for in Brazil under the recently negotiated governmental agreement, simply to operate to a point right over the border.

By Mr. McDowell:

Q. Is there any agreement or understanding between Pan American and Grace so far as you know which would preclude either Pan American from buying operating rights or undertaking operations on the West Coast, or on the other hand Panagra from buying operating rights or undertaking operations on the East Coast?

A. Well, that subject of course was covered at great length in Docket 779, and was reviewed by Mr. Roig. There is the letter of September 1928 which goes back before my time which states the general basis on which Panagra was organized which was to operate an airline down the west coast.

There was a difference of opinion as to what the legal effect of that is, as to whether it is simply a general statement of plan or something more, but I don't know that I can add anything to that.

Q. Perhaps you can bring the matter up to date. What is your understanding of the situation at the present time

—572—

[fol. 4298] with respect to any such understandings?

A. Well, there has been no change in the situation since the record in Docket 779 was completed, it occurs to me.

Q. In connection with the negotiation of the contract involved in this proceeding, did you participate in any discussions with reference to such a division of territory?

A. No.

Q. Mr. Friendly, I would like to know in brief how you as an officer of Pan American viewed the relationship between Pan American and Panagra, the essential relationship between the two companies?

Do you regard Panagra's essentially as a subsidiary of Pan American or as an independent entity?

A. I regard Panagra as a company in which Pan American has a 50 per cent stock interest and equal representation on our Board of Directors which connects with our line at Canal Zone and in whose welfare we have a very great interest. You can draw your own inferences from what particular terms you wish to apply to that. I don't think of the matter in those terms.

Mr. McDowell: That is all.

Examiner Wrenn: Public Counsel may examine the witness.

Mr. Highsaw: I assume these references to all these agreements like the Bermuda agreement, that those agreements are to be considered as a part of the record for brief writing and that sort of thing.

Mr. Gesell: Certainly the Board can take notice of something like this Bermuda agreement which has been nego-

—573—

[fol. 4299] tiated.

Mr. Hamilton: I have no objection.

Cross examination.

By Mr. Highsaw:

Q. Mr. Friendly, do you know whether this agreement has ever been filed with the Board between Pan American and Eastern?

A. I have seen a copy of the letter transmitting it for filing.

Examiner Wrenn: You are talking about the one we marked this morning—32.

Mr. Highsaw: That is right, Mr. Examiner.

By Mr. Highsaw:

Q. I believe there was some reference to hundreds of companies in the United States in which there was a co-owner situation, either similar or somewhat similar to the Panagra situation. In that reference, did you intend to refer to any similar situation existing in air transportation?

A. I know of none, although I don't know that there aren't.

Q. Did you intend in that reference to refer to any similar situation in any other transportation field?

A. I am sure there are a great many of them. I know there are many of them in the motor field. I know that the Matson Line and the American Hawaiian Line had such a company which operated to the South Pacific, and I have been told by both parties that it operated with great success and harmony. I am sure there are a great many such instances.

Q. You say there are some in the motor field?

A. Oh, yes.

—574—

[fol. 4300] Q. Do you know of some in the motor field?

there are

A. I think ^ a great many.

Q. Do you know of any similar in the railroad field?

A. I believe the Burlington is owned fifty-fifty by the Great Northern and the Northern Pacific. I am not saying there aren't many more. I might mention another one very near here which is owned in equal proportions, namely, the RF and P. That isn't a fifty-fifty, but I think it is a 33⅓ between the Southern, the Seaboard, and the Atlantic Coast line.

Q. Do you know anything about the experiences of these particular companies you have been naming, other than the reference you made to the steamship?

A. No. It keeps me busy knowing Pan American.

Q. Referring to competition between Pan American and Panagra, in the event that Panagra should have a route in the United States, I gathered you definitely thought that competition was bad and I also gathered you thought that the volume of traffic was not sufficient to support such competition, isn't that correct?

A. Well, there are quite a few things wrapped up in that, Mr. Highsaw. I tried to make it clear that I regarded this question of competition between Panagra and Pan American as something quite separate and distinct from any general questions as to competition. I never thought that competition was bad. The whole argument, with which you are familiar, has never been about the question of competition as being bad but about the question of whether it was a good idea for the United States to divide its own

—576—

[fol. 4301] efforts up as against foreigners or not.

However, the important point is that we regard this question of Panagra's operations between Miami and the Canal Zone as resting on very special facts, and not really related to the general question.

However, in answer to your other question, I definitely think that the volume of traffic between the United States and the Canal Zone which in my opinion is not enough to support two American flag services in addition to all of the foreign competition that we are going to have there, is certainly not sufficient to support a third, which is the problem as it now poses itself.

Q. In referring to the contract, I believe that you made reference to several provisions where they have been worked out in general terms and the details have not been worked out. I have noticed at least three or four paragraphs, 8, 13, 14 and 17, I believe. I was wondering why the details were not worked out to any greater extent than they were at the time this contract was executed. Is it matter of time or you just didn't feel this was the proper place to put them?

A. I think it might be more proper if we took them up one by one.

Q. All right.

A. I would prefer not to make a general answer. 8, I believe, is the first one.

Q. Paragraph 8, yes.

A. I think the reason for not working out paragraph 8, which deals with training in more detail, was that a

—576—

[fol. 4302] training plan involves the development of a curriculum which the person desiring the training wishes, and a method of payment, designation of a place where it is to be done—all those things change from time to time, depending on the type of personnel.

They are not controversial. We did a great deal of that type of work for the Army and the Navy during the war. We had all different kinds of forms of contracts. I don't think the negotiation of any one of them took over five hours apiece, and it was thought that it was better to leave that flexible and handle it as the occasion arose.

Q. 13 is the other one. That is just a contemplated pooling arrangement?

A. I think there our feeling was that it was a very difficult subject to handle, and that we didn't have enough light on the facts and also I think the question of time was involved. We thought if we ever did make such an agreement we would want to spend a good deal of time on it.

Since we were not proposing to make it immediately we didn't want to hold this one up until all those possible future arrangements had been settled.

Q. The next one I guess is paragraph 14, the establishment of the relative contributions in advertising?

A. Those will depend on the particular advertising program that was adopted from time to time, and the amount of emphasis given to services of each company.

We really couldn't do anything about that. We might have settled it—had some very general phrase but it would have been so general that it would not have been much

—577—

[fol. 4363] better than this.

Q. The next one I note was the last sentence of paragraph 17(b). It is not quite the last sentence. It is up toward the top, the last sentence, that paragraph right there (indicating).

A. Paragraph 14(b) deals with the basis of payment by Panagra for maintenance and overhaul performed by Pan American. It would have been possible to prepare an annex dealing with that, the same way as we did for the charter hire. It seemed to me that we had gone far enough in establishing a formula that was pretty readily understandable and that the detailed provisions were really matters of accounting which we didn't want to encumber this contract with.

Q. Mr. Friendly, to what extent do you feel that the granting of the domestic routes which are pictured in these exhibits affect the public interest element of the service as proposed here?

A. Well, I would put it this way: we think that this is a great instrument of public service as Pan American's routes now stand. It will become a still greater one when the domestic routes are granted.

Q. It is just a question of degree then in your mind.

A. Yes.

Examiner Wrenn: They have no dependence, one on the other, as far as the approval is concerned.

The Witness: No. Either is advantageous. Each will be more advantageous with the other.

—578—

[fol. 4394] Q. I don't believe it has yet been stated for the record, Mr. Friendly, that Pan American, Inc. is 100 per cent owned by Pan American Corp., is that true?

A. That certainly is true.

Q. Mr. Friendly, how many of the directors of Pan American Corp. are also directors of Pan American, Inc.?

A. Well, they are exactly the same except for the technicality that some, such as myself, have interlocking relationship applications pending and therefore are not as yet able technically to serve on the board of the company to which we were elected later.

Q. Does Pan American Corp. have any interest in any other corporations or carriers?

A. Yes. One is Panagra. I think that the only other interests which are held directly by Pan American Airways Corporation are the stock interest in Avianca which was described and a 20 per cent interest in the new China National Aviation Corporation.

Q. Does Pan American, Inc. pay any fees to Pan American Corp. for services rendered?

A. No.

Q. Was the agreement between Pan American, Inc. and Panagra presented to the Board of Pan American Corp. for consideration previous to its execution?

A. Well, the Board are the same people, the meetings are usually held at the same time and place, and the two agreements were presented simultaneously and were considered together.

I assume that the resolution shows separate action, but they certainly were considered by both boards.

—379—

[fol. 4305] Q. We have come to that arbitration question now, Mr. Friendly. I was just interested in having the record show who this American Arbitration Society is, whether it is a partnership or corporation, or just a group of people, or just exactly what it is?

A. Subject to correction, I believe it is what is called a membership corporation. It is a non-profit body. I will check on that and if I am wrong I will have the record fixed accordingly. It is a well known body—I should say the most well-known of the various bodies which have interested themselves in the adoption and application of arbitration procedures. It has been designated, I think,

at the instance of the anti trust division as an arbitral agency in some important matters.

The Board of Directors is made up of men of high reputation and standing. ~~It is a~~ Its panel of arbitrators likewise. We picked it as an organization of such high reputation that there could simply be no question about it.

Q. To your knowledge, is there anyone connected as an officer or director of Pan American, Inc., Pan American Corp., W. R. Grace, or Panagra, interested in or a participant in any way in this society—that is, as an officer?

A. From a Pan American standpoint, I just can't be positive. Mr. Evan Young in his life time was very active in this and I have an impression that Mr. Bixby has become so in a lesser degree. I can check on that.

Q. Would you supply that later?

A. Certainly.

Mr. Highsaw: Mr. Gesell, could you supply the same information later with respect to Panagra?

Mr. Gesell: Yes.

—580—

[fol. 4306] By Mr. Highsaw:

Q. Do you know whether or not the president of the Society has been consulted as to whether he will undertake to appoint a third arbitrator in a case where it is needed under paragraph 25, Contract A?

A. Not to my knowledge, but that is just what the Association is for, and its rules provide for its acting. I hardly think that would be necessary.

Q. Do you know whether or not any fee will be paid to the Society for the president appointing an arbitrator as provided in paragraph 25?

A. Exhibit No. 30 shows the schedule of fees for holding arbitrations. I don't know whether there is any special fee for just appointing an arbitrator.

Q. There is one other point on the arbitration here I would like for you to clear up, Mr. Friendly. It says the results of the American Arbitration Association having general application. Could you shed a little light on this phrase "having general application"?

A. Yes. We had in mind the set of rules which had been marked as Exhibit No. 30. There are certain special rules that have been formulated from time to time in arbitration in particular trades such as the woolen trade, and our intention was to designate those rules, not some which relate to a particular industry with which we were not concerned.

Q. Would the sanction which would be provided for the decision of this arbitral society something that appears in the laws of the State of New York?

A. Yes. New York has a very effective arbitration law

— 581 —

[fol. 4307] which you will find in the New York statute.

Q. There is just one other point and I think probably this is some information which you could supply later easier. In looking over those rules of the Arbitration Society, it occurred to me that some of them might not be applicable here, such as initiating the proceedings. I would appreciate it if you would look those over and if there are any which do not apply here, let us know in connection with these other questions.

A. I will be glad to.

(Public Counsel)

Q. Is it your understanding of this agreement, Mr. Friendly, that if either Pan American or Panagra desires it, that any question concerning interpretation of any word, phrase or provision of this Agreement A, or any operations under it can be arbitrated in accordance with paragraph 25?

(Mr. Friendly)

A. Yes.

Q. And you have a similar understanding as to the contract which is identified as Exhibit B with respect to the arbitration provisions, I believe it is paragraph 9.

A. I do.

Q. Turning for a moment to this question of subsequent action by the Board with respect to either or both of these agreements: Is it your understanding, Mr. Friendly, that if the Board acts and approves either or both of these agreements, later on the Board may disapprove them if it finds them to be adverse to the public interest?

A. That is what the law says, and I expect that to be done.

Q. Would you consider the Board in any way morally

—582—

[fol. 4308] bound to continue with its approval of either one or both of these agreements in the event of such approval in the event that approval is granted in this proceeding?

A. I don't understand that Government agencies have moral obligations and their legal authority is set forth in Section 412 of the Civil Aeronautics Act.

Q. Strange as it may seem, that point has been raised previously.

A. Well, I may say I wouldn't expect them to turn around the next day and disapprove it, but that is not a moral obligation; that is simply a proper respect for the administrative process, I would say.

Q. Would you have any objection to the amendment of either one of these agreements to reflect the continuing jurisdiction of the Board?

A. No.

Q. Or a condition applied to the approval if that were possible?

A. No. If the Board deems it necessary, it would seem to me not to be, but if they feel it necessary, I would have no objection to it. Just what the law says.

Q. Turning to Agreement A, Mr. Friendly: paragraph 2(c) it is. Is it your interpretation of the contract, that this phrase here in the middle of the paragraph 2(c) "to such an extent as Panagra shall determine appropriate from time to time" as modified by the requirements of paragraph 3 with respect to notices of flights?

A. Oh, yes. Paragraph 3 in regard to notice applies to everything, but that is simply a mechanical method so that

—583—

[fol. 4309] Pan American knows a little ahead of time what schedules will be run of the Panagra aircraft so as to be able to make its plans. It is not any limitation on the rights of Panagra except that they have to give some reasonable advance notice, and of course if in a particular instance it were convenient we would be glad to consider waiving it or reducing it.

Q. Mr. Friendly, I believe we have already had some interpretation from the Panagra side, of paragraph 2(c).

Could you state your understanding of that provision for the record?

A. It is precisely the same as Mr. Roig's.

Q. Namely, that that was put in there to be intended to prevent Pan American from operating Panagra's planes over other routes of Pan American except under unusual circumstances or emergencies; something like that?

A. Yes. That we could not operate them at all on any other routes without Panagra's consent, and that it doesn't contemplate any such regular operation would be done without formulating a new agreement and bringing it down for approval.

Q. That is what I was trying to get at. There is no thought there that if you wanted to extend some sort of scheduled operations to another point, that you would just start operating a Panagra plane and consider it covered by this agreement?

A. No, there was no thought of it although I can see that the language could have been somewhat better chosen.

Q. Referring to paragraph 10 again: Will you explain for the record why nothing more was done to put more

584

[fol. 4310] detailed provisions in the contract? I wonder if Pan American has done anything yet about formulating such plans?

A. Yes, they have, but Mr. Kirkland and Mr. Brock can tell you much more about them than I can.

Q. Referring to paragraph 10 of the agreement: Is it an advantage for Pan American to act as a general sales agent for Panagra under this provision or was this an accommodation or concession by Pan American?

A. Well, I think there are advantages moving in both directions. I think, as I have stated before, that it is of great advantage to Panagra to have the kind of sales representation in the United States that Pan American can give

Panagra

it. That is an advantage to ~~Pan American~~. It is an advantage to Pan American for one thing, because of Pan American having the interest that it does in Panagra, and because of the connecting service.

By connecting, I mean route connection. Both a through service operated under this agreement, and other schedules which Pan American operates that connect with Panagra. Anything that improves Panagra's business is good for Pan American.

There is also another advantage to Pan American in the shape of the fact that we will be paid a reasonable basis somewhat for this work and it undoubtedly gives us a ~~very much~~ greater volume of sales over which to spread certain costs than we would otherwise have.

I think the point about whether it is a concession or not a concession, is again, that it is for a very long term and that it would not be made certainly with a company in which we were in direct paralleling competition.

—585—

[fol. 4311] Q. Referring to paragraph 10(b), Mr. Friendly: Is that phrase "evidence reasonably indicating" a matter to be determined by Pan American or can that be arbitrated if Pan American disputes whether or not the evidence is reasonably indicated what is there set forth?

A. I think it could be arbitrated. I would make quite a guarantee that we would settle that in some more expeditious way.

Q. In other words, it is not intended under this agreement that Pan American could flatly refuse to accept the Panagra evidence and that would be the end of it?

A. No, it certainly is not.

Q. If Pan American should continue to refuse to accept it, then it would be covered by the arbitration provisions of the agreement?

A. Correct.

Q. Referring to the phrase, "availability of Panagra's services" there in the middle paragraph 10(b), would the operations contemplated under this agreement be one of those services?

A. Let me be clear about that. If all that had happened was that we had not called to the attention of a passenger that he could go to the Canal Zone—that is, a local passenger to the Canal Zone, that he could go on one of these planes as distinguished from some other, I would not think that that came within the language, but of course, if the

subject was a passenger who is going to a point on Panagra's route by these planes, certainly the provision applies to that.

Q. In other words, that provision would only apply to

—586—

[fol. 4312] a through passenger south of the Canal Zone?

A. Yes. Traffic in which Panagra has a financial interest.

Q. Will you turn over to paragraph 13, Mr. Friendly?

A. Yes, sir.

Q. Could you explain the advantage of the pooling arrangement from Pan American's point of view? I think we have already had it from Panagra's, but I would like the record to show what Pan American thinks of it.

A. I think the considerations were the same. I really have nothing to add to what Mr. Roig stated.

Q. You adopt all of Mr. Roig's statements?

A. Yes.

Q. Referring to paragraph 13(b), Mr. Friendly, do you at present have anything in mind in the way that that might be accomplished?

A. I think I ought to call Mr. Gesell at this point. That was one of his particular brainchildren and I never could believe it was very important, but he did and so it went in. That is about all I can say on that.

Q. I am frankly just a little stumped.

Mr. Gesell: I can explain it, Mr. Examiner.

Examiner Wrenn: Go ahead, Mr. Gesell.

Mr. Gesell: We felt that if over the period of 99 years there should be developments in aircraft which made it possible, to fly, let us say, nonstop from Lima, Peru, to (sic)

Balboa, and operating and other conditions traffic-wise, and so forth, made that a desirable thing, that we wished to be free to have a basis for working out that type of flight

—587—

[fol. 4313] without having to to continue to stop enroute. It is conceivable that that will take place in 99 years, and we were trying to look a little ahead.

Mr. Highsaw: I was wondering whether you think that at present it could legally be done under the Civil Aeronautics Act.

Mr. Gesell: We certainly indicated our doubts about that in the paragraph which sets up all the existing regulations and requirements of the Civil Aeronautics Board, but we assumed that the Board would be people as aggressive as we were and if it became operatively possible, the Board would find some way to work out some way that we could do it.

By Mr. Highsaw:

Q. Do you believe that the traffic flow between Miami and Balboa is at present heavy enough or will be in the immediate future, for Pan American to make money out of this operation?

A. That is a very large question. It depends upon rates and costs and competition, and present and future, and what not. I will say this—perhaps this is the point you are getting at—I think that the arrangements that are provided in this agreement will improve by a good deal Pan American's ability to make money out of that operation.

Q. That agreement?

A. Yes. It will do so, I might add, by stimulating the flow of traffic to Panagra's routes—to points on Panagra's routes in South America which will travel over that sector of Pan American's route.

Q. What I had in mind was not the total sector—that is, the Pan American flights that fly Pan American planes,

—588—

[fol. 4314] but just the operation provided for by this agreement in which Pan American will be flying Panagra planes between Miami and Balboa.

A. Well, as we see it—Mr. Ferguson can go into greater detail on this if you desire—the operation of the Panagra planes will be no more expensive in relation to the type operated, than would the operation of our own planes. If it is going to bring more traffic, therefore, it is going to help us.

Q. In the discussions yesterday, Mr. Roig stated that the agreements that are now before us meet in substance what he regarded as the Board's mandate in Docket 525.

Could you give us your views on that for the record, please?

A. Well, we feel that they do. We feel that what the Board was after was through service between the United States and points on the west coast of South America, and not the particular means by which that was afforded, and that this meets it completely, and in a very satisfactory form.

Q. I understood Mr. Roig to say that this didn't meet it in accordance with the exact letter of the Board's statement, but in effect he thought it met it in spirit; would that be your position?

A. Precisely.

Q. Suppose that Panagra's president insists upon arbitrating something of Pan American's performance under this contract that he might be dissatisfied with: can Pan American avail itself of paragraph 3 of Agreement B to

—589—

[fol. 4315] question that action of the Panagra president in insisting upon such arbitration?

A. Well, I suppose it is like asking "Can a man bring a lawsuit" to which the answer is always "yes".

Literally he can, but I can't imagine that any responsible company would say that the mere fact that someone had made a complaint was a cause for invoking these procedures. I know what my own views would be about such a course of conduct.

Q. You don't feel, then, that Pan American would ever be dissatisfied with Mr. Roig or any other Panagra president merely because he insisted upon arbitrating some provision of one of these agreements?

A. Certainly not.

Q. Is there any understanding, Mr. Friendly, formal or informal or otherwise, between Pan American, Inc. and Panagra, Pan American, Inc. and Grace, Pan American Corporation and Panagra, and Pan American Corp. and Grace, as to permitting Panagra to apply for a route to the United States in the event either one or both of these contracts were disapproved?

A. There is not.

Q. Is there any understanding, formal or otherwise, of any kind, between the same parties as to what will be done to meet the threat of competition which you have depicted in your testimony, in event that either one or both of these contracts were disapproved?

A. No. We are hoping and expecting they will be approved. We haven't had the time or desire to think of what we would do if they are not. At least, I haven't.

—590—

[fol. 4316] Q. Mr. Friendly, in your estimation, is the threat of competition in the areas covered by this operation, so severe as to force Pan American and Panagra to work out some other kind of arrangement if this particular one were disapproved by the Board?

A. Well, you have heard what I said about the competition, and I think it is most important that Panagra and Pan American should be in a position to offer through plane service. Certainly if the Board turned down this agreement and in so doing gave any hope of any other kind of agreement, I would do my level best to work it out, but I really can't say just exactly what I would do under circumstances that haven't arisen and I hope will not arise.

Q. During the negotiations for these agreements, Mr. Friendly, did you ever put forward a straight interchange agreement similar to the United-Western agreement as a basis for an arrangement?

A. If by "these negotiations" you mean as I think you do, the negotiations that began in June of this year—

Q. That is right.

A. —the answer is "no".

Q. One other question, Mr Friendly. Has any thought been given by Pan American as to what the—

add

A. May I ~~ad~~just one word?

Q. Certainly.

The we

A. ~~A~~ reason why ~~it~~ did not is that it was made perfectly clear by us at the meeting of the Panagra board which I initiated, that we would not propose any such type of arrangement. The whole basis on which the negotiations were

591

[fol. 4317] entered into would have precluded any such suggestion being advanced.

Q. If that had not been the case, would you have advanced such a suggestion, Mr. Friendly?

A. I think if that had not been the case, there wouldn't have been a negotiation.

Mr. Highsaw: I think that is all, Mr. Examiner.

Examiner Wrenn: Anything on redirect?

Mr. Hamilton: No redirect.

Examiner Wrenn: Very well, then. You may be excused. Thank you, sir.

(Witness excused)

Mr. Gesell: Mr. Kirkland?

(Off the record).

Examiner Wrenn: Let's come to order, gentlemen.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 422

T. J. KIRKLAND called as a witness, being first duly sworn, was examined and testified as follows:

Direct examination.

By Mr. Gesell:

Q. Mr. Kirkland, what is your position in Panagra?

A. I am the vice-president in charge of operations.

Q. How long have you been employed by Panagra?

A. 15 years last August.

Q. A substantial amount of that time you were in South America and were directly familiar with the operations there, are you not?

A. That is correct.

* * * * * * *

737

[fol. 4318] interest in Panagra.

Mr. Schneider: That is all. Thank you, Mr. Roig.

Examiner Wrenn: Are there any other questions of Mr. Roig?

(No response)

Examiner Wrenn: All right. You may be excused.

(Witness excused)

Examiner Wrenn: Are there any questions of Mr. Friendly?

Mr. Schneider: I have no questions of Mr. Friendly in the light of that.

Examiner Wrenn: Then is it understood by counsel that Mr. Friendly and Mr. Roig are free to leave if their interests so dictate?

(Off the record)

Examiner Wrenn: Let the record show we will hold that question open until just prior to adjournment for lunch.

Mr. Schneider: Mr. Examiner, I would like to offer in evidence at this time the minutes of the meetings of Board of Directors and Executive Committees of the following corporations: Pan American Airways Corporation; Pan American Airways, Inc.; Pan American-Grace Airways, Inc.; and W. R. Grace and Company; those being the minutes which were requested of counsel for those parties and distributed by counsel.

I assume you have a full set now.

Examiner Wrenn: Yes, I have a full set.

(Off the record)

Examiner Wrenn: Is there objection to the receipt in evidence of the tender that Mr. Schneider has made, which

* * * * * * *

—739—

[fol. 4319] C. Lounsbury", which I would like to have marked for identification.

Examiner Wrenn: All right. That will be marked for identification as PAA Exhibit No. 35.

(Document above referred to was marked PAA Exhibit No. 35, for identification)

Mr. Hamilton: I would like the record to show one correction in Line 13. For the phrase "his present", the word "the" should be substituted.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 423

Examiner Wrenn: Proceed.

Direct examination.

By Mr. Hamilton:

Q. Mr. Lounsbury, does Pan American Panagra Exhibit No. 35 correctly state your qualifications and experience?

A. Yes, sir.

Q. Mr. Lounsbury, are you sponsoring Pan American Panagra Exhibits

~~Pan American~~ Nos. 6, 11, 12, 13, 14, 15 and 24?

A. That is correct.

Q. I would like to direct your attention to Exhibit No. 24, please. Does that exhibit refer both to offices maintained directly by Pan American and sales offices maintained by agents of Pan American?

A. Yes, that is correct. Out of this total number of cities and offices there are 10 sales offices which are Pan American offices, and the others are agents.

Q. Would you name the 10 cities in which the Pan American sales offices are located?

A. Los Angeles; San Francisco; Washington, D. C.; Miami; Chicago; New Orleans; Boston; New York; and there is one at Laredo which is not shown on here; and at Seattle.

—740—

[fol. 4320] Q. Did you hear testimony of Mr. De Groot as to the advantages that the through flight service contemplated by the contract would have over the existing connecting arrangements?

A. Yes, sir. I did. I think he described the advantages very well. The public would thereby have a through one-plane service which would eliminate the necessity of deplaning at Balboa, and that would be of special advantage in the operation of sleeper planes because it would be very

inconvenient for passengers to disembark at Balboa and get on again in the middle of the night; also, in connection with the problem Mr. De Groot described of delayed planes causing missed connections, I think there is one point that he might also have emphasized, namely, that any businessman in the higher salaried brackets, of which there are many traveling in Latin America, loses considerable time when delays are caused because of missed connections, and that in addition to the actual outlay of 20 dollars a day is something of considerable importance to a great many of the traveling public.

Q. So as I understand it, you concur in his statement of the disadvantages and add in the loss of time factor?

A. That is correct.

Q. Mr. Lounsbury, what difference will there be, if any, in the ticketing procedures, with reference to Miami and points on Panagra's route after the contract is approved?

A. There would be no difference in the procedures under the contract as compared to the present ticketing procedures.

[fol. 4321] Q. Mr. Lounsbury, in your opinion, are the reservation control procedures provided for in the contract feasible?

A. Yes, I think they are quite feasible, and the reservation control would be considerably simplified, especially in view of the fact that the problem of missed connections would be eliminated, and that in itself—when that occurs, rather—reservation control becomes particularly complicated.

Q. Would you care to elaborate on how reservation control procedures become complicated when a connection is missed?

A. When a connection is missed, the passengers who were intended for the onward carrier's planes have to be cancelled out, the charts have to be changed at the terminal points as well as any central control point, which means numerous radio messages back and forth, and then of course if there are other passengers who perhaps can be booked at the last minute, those have to be added to the charts, the control charts for the plane, and each onward destination advised so that all in all it becomes a rather

complicated problem and one that has to be handled within a very short period of time.

Q. What advantages, if any, will accrue to Pan American, from the traffic point of view, by virtue of the through flight service provided for by the contract?

A. I think this can be compared to the advantages that would accrue to any business concern from improvement of its service. I think it is quite usual that improvement of

742—

[fol. 4322] product means increased sales.

Q. With reference to the present practice as to publishing of Pan American tariffs: would there be any change in that practice as a result of the arrangements contemplated by this contract?

A. No. There would be no change necessary.

Q. Now, with reference to the procedures relating to joint rates, would this contract cause any change in those procedures?

A. No, sir. There would be no change necessary in that either.

Q. In so far as traffic matters are concerned, Mr. Lounsbury, is Pan American now prepared to undertake the operations covered by the contract?

A. Yes, sir. We would be prepared to undertake them immediately. The only time required would be that necessary to file schedules within the 10-day period required by the Civil Aeronautics Act.

Mr. Hamilton: I think that is all, Mr. Examiner.

Examiner Wrenn: Mr. Gesell, do you have any questions of Mr. Lounsbury?

Mr. Gesell: No.

Examiner Wrenn: Mr. Schneider isn't present.

Mr. Harlan, do you have any questions?

Mr. Harlan: Yes. I have two questions.

Cross examination.

By Mr. Harlan:

Q. Mr. Lounsbury, isn't it true that Pan American has for a number of years provided preferential accommoda

743

[fol. 4323] tions for Panagra's traffic with respect to the Miami and Balboa segment?

A. What do you mean, sir, by "preferential accommodations"?

Q. I really mean that you have provided preferential reservations for those passengers.

A. If you mean that we have maintained a through seat allotment of a certain number of seats, that is correct.

Q. That has been true and is true now, isn't that right? I mean that has been true for several years and is true at the present time.

A. That is correct.

Q. With respect to these various sales offices shown on Exhibit 24, do these offices presently sell transportation over Panagra?

A. Yes, sir, they do.

Q. Could you tell us how many of these are Pan American's own offices and how many are traffic agencies?

A. I think I read that—

Mr. Hamilton: Mr. Examiner, I believe he testified on that—covered it on direct examination.

(Off the record)

Mr. Harlan: I will withdraw the question.

By Mr. Harlan:

Q. Mr. Lounsbury, with respect to points which are where you have a travel agency, could you explain, just in general, how you choose the agency?

A. How we choose the agency?

Q. Yes.

744

[fol. 4324] A. Yes. In the first place, the agency is required to be an established travel bureau, and also we choose the agencies whom we think will produce the most business for us and Pan American Grace. We have a method of testing that out which other airlines also use, which seems to be quite effective. The result has been that we have built up the number of active agencies which you see listed here in Exhibit 24.

Q. In most instances do you initiate the negotiations with the travel agency or is it the other way around?

A. Well, it depends largely on circumstances.

Recently, since the war, many agents have been coming back into business that were in business before the war and had closed, and sometimes they come to us and advise us that they are ready to open again, and in other cases we have noticed it through other means, and have solicited their business.

I might say that we have actively at all times a very active solicitation campaign going on among all these agents to be sure that they are adequately serviced with information about Pan American and Pan American Grace services.

Q. Just as an illustration of this—and this is all I have on the point—I notice that there is only one city in New Mexico where you have such an agency and that is the city of Taos. I would assume that you didn't choose that one city as the best city in New Mexico for Pan American to have an agency in, is that correct?

A. Well, there are other cities in New Mexico such as

[fol. 4325] Albuquerque and Santa Fe who might have agents at the present time. They might not be active enough for us to have taken on the servicing of them.

Mr. Harlan: That is all.

Examiner Wrenn: Does the Department of Justice have any questions?

Mr. McFarlane: No, sir.

Examiner Wrenn: Public Counsel?

Mr. Highsaw: Yes.

Cross examination.

By Mr. Highsaw:

Q. Mr. Lounsbury, I believe we have a little bit of unfinished business from Mr. DeGroot with reference to these load factors on this operation between Miami and Balboa. Could you give the anticipated load factors in the immediate future for this operation, both southbound from Miami to Balboa and northbound from Balboa to Miami?

A. I am afraid I would not want to predict any exact load factor in percentages, because I don't think anybody is capable of doing that with any accuracy, but I do think from recent experience, and experience in the past when service has been improved, that the traffic carried, and the load factors resulting therefrom, thereby substantially increased.

Q. That is, over the figures shown in Exhibit No. 7?

A. Yes, sir.

Q. That is as close as you would care to come to a statement on it?

A. Yes. I simply think that the improvement in service

746

[fol. 4326] and the additional frequency of service as contemplated in some of these exhibits on schedules, will in themselves generate more business.

I think we also should realize from these exhibits that have been shown here, that the service during some of this period at least, has not been adequate to supply the demand. Mr. De Groot mentioned that, and if the service had been more adequate; which we were both unable to make it, because of the lack of aircraft, the total figures here would be higher than they are.

Q. In advising Pan American on this contract, is that all the advice you gave them, just that general statement as to what you thought the traffic would be there?

A. We arrived at a judgment estimate in the form of numbers of schedules. We did not attempt to estimate exactly the number of passengers that we probably would carry, because we believe in the idea of making the service fit the demand.

If there is more demand than there is service, now that we are able to get more aircraft, we will put more service on.

Q. I would like the record to be fairly clear on this matter of Pan American acting as tariff publishing agent of Panagra. As I understand it, there is an agency or power of agency on file with the Civil Aeronautics Board whereby you act as Panagra's agent for filing tariffs?

A. That is correct. There is a power of attorney on file appointing me for the filing of passenger tariffs, and

another one appointing another man, Mr. Colbert, for the

747

fol 4327 handling of express tariffs, cargo tariffs.

Q. Of course, on through rates it is necessary for you to get together in accordance with the Act to decide upon a joint rate?

A. That is correct.

Q. Where Panagra submits a rate only for its own route or own operation, that is not a joint rate, is there any discussion with Pan American or with you about that report submitted, or is that made unilaterally by them?

A. The fundamental rate level is made up entirely by Panagra, and they send it to me for publication.

Sometimes, since we have the job of doing the rates, compiling at Panagra's direction, there are certain minor adjustments that have to be made as to the case in making any tariff before it comes to publication, and those adjustments are frequently suggested by me for Panagra's approval. They are not published without their approval.

That is only a mechanical process, however, Mr. Higgins saw.

Q. Other than these minor adjustments you have just mentioned, you have never made any suggestions to Panagra as to any change in any rate, rule or regulation that they have submitted to you to publish under the agency power?

A. All I can say is that if I notice something that occurred to me as possibly an impractical rate between a certain set of points, I might suggest to them that they reconsider it, but I certainly have no control over the decision.

Q. I take it that you have never refused to publish a rate or a rule or regulation which they have submitted to

748

fol 4328 you?

A. That is correct. I have never refused to publish anything. That is not my job.

Q. Mr. Lounsbury, have you done anything looking toward the establishment of a similar rate to B.A. by the west coast and the east coast in the event that this contract is approved?

Mr. Gesell: I don't understand that, Mr. Examiner.

The Witness: I don't either, quite. I am sorry.

Mr. Gesell: What is the question?

Mr. Highsaw: I will try to explain it. What I am trying to get at is this: Is there any thought on Pan American's or Panagra's part that if this joint fact is approved and there are two services, one running down the east coast and one running down the west coast, that you will have the same rate to Montevideo and B.A. which are the two common points, irrespective of this pooling arrangement that is talked about?

A. Well, there hasn't been any discussion of this in connection with the contract. The fact is now, and has been for a long time, that the rates to those two common points are the same, and that is quite common practice as I think you will realize, between many carriers.

Between New York and Chicago, for example, there are something like 25 or 26 different routings via different airlines, different combinations of airlines, where the rate is exactly the same.

That condition has obtained between Miami and Buenos Aires and Montevideo for a good many years. I have no idea what may happen in the future, but it is a very practical situation.

-749-

(fol. 4329)

Mr. Highsaw: I have nothing further.

Examiner Wrenn: Any redirect?

Mr. Hamilton: No, sir.

Examiner Wrenn: You may be excused.

(Witness excused)

(Off the record)

Examiner Wrenn: Let the record show that the off-the-record discussion pertained to, first, the question of schedule of future witnesses and the time that will probably be consumed, and, secondly, the representative of the Department of Justice stated that he had no further questions of Mr. Friendly.

I think that will clear up the state of the record that was left a while ago when the Examiner stated that the ques-

tion of whether Mr. Friendly would be released would be kept open until we adjourned for lunch.

We will recess until 2 o'clock.

(Whereupon, at 12:30 o'clock p. m., hearing in above-entitled matter adjourned, to reconvene at 2 o'clock p. m., same day).

[fol. 4330]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 424

IN THE UNITED STATES DISTRICT COURT

FOR THE SOUTHERN DISTRICT OF NEW YORK

Civil Action No. 90-259

UNITED STATES OF AMERICA,

Plaintiff,

v.

PAN AMERICAN WORLD AIRWAYS, INC., W. R. GRACE AND COMPANY, and PAN AMERICAN-GRACE AIRWAYS, INC.,

Defendants.

ADDITIONAL TESTIMONY OF JUAN T. TRIPPE IN CAB DOCKET 779 WHICH PAN AMERICAN INTENDS TO OFFER IN EVIDENCE

pp. 1567-1579:

By Mr. Friendly:

Q. Shortly after Pan American Grace Airways was organized, did any question arise as to its management?

A. Yes. The question arose as to the choice of a president of the company and who should be in charge of its operations.

Q. Will you tell us what the question was?

A. Pan American had understood that since the agreement provided that it should have charge of the joint com-

panies' operation, it should designate the president. Grace had carried out this understanding in the case of Peruvian Airways Corporation but Grace now refused to do so in the case of Pan American-Grace and an impasse developed.

Q. What did Pan American do about this?

A. We asked Mr. Hoit to attempt to straighten out the matter in line with the agreement.

Q. Do you know what he did?

A. I only know the result.

Q. And what was that?

A. No one was elected president at the time and Mr. MacGregor was elected vice president and general manager. [fol. 4331] Q. Will you tell us who Mr. MacGregor was, please?

A. Mr. MacGregor was an employee of the Atlantic Gulf and West Indies Steamship Company.

In the spring of 1928 an American had arranged to obtain a loan of his services from the AGWI—that is the Atlantic Gulf and West Indies Steamship Company—and he had been in Central America negotiating various concessions for us.

I should say in this connection also that Mr. Hoit was an official and an important stockholder in the AGWI Steamship Company.

Q. Did Pan American consider that the election of Mr. MacGregor was a solution of the management problem?

A. We did not feel that it was a sound arrangement or in accordance with our contract. The matter kept coming up from time to time.

* * * * * * *

Q. Will you tell us what your recollection is?

A. The matter of placing a Pan American nominee in responsible charge of the operations of the company continued to come up. Pan American considered that Grace was constantly interfering in the management, including attempts to edit instructions sent to the field by the company's head office here. The company's business, in our opinion, was not being conducted as efficiently as elsewhere on the system. We did propose to Grace that an arrangement whereby we be permitted to buy out their interest be discussed, but we got nowhere.

Q. Were there then further discussions between you and W. R. Grace & Company as to the management of Pan American-Grace Airways?

A. Yes.

Q. Will you tell us what they were? By the way, these discussions were primarily with Mr. Roig, were they not? [fol. 4332] A. That is correct.

Q. Now, tell us what they were.

A. Grace suggested that Pan American be given the presidency of the joint company, their nominee, Mr. Roig, serving as chairman of the Board, also that an executive committee to consist of the chairman and president be appointed.

The Grace Houses were to continue to serve as general agents in charge of Governmental negotiations, traffic solicitation, and general business problems of the company as well.

However, the Grace Houses, as agents, were not to report to the executive department of Pan American Grace Airways but directly to Mr. Roig.

Q. Did Pan American consider that to be a sound and workable arrangement?

A. No, we did not; and we so advised Mr. Roig.

. . . . . .

Q. Were these discussions in the spring of 1930, Mr. Trippe?

A. Yes, they were. At the time of the meeting referred to in the minutes of the Grace Board, which we have just discussed.

Q. That is, then, either the winter or the end, or the spring of 1930?

A. That is correct.

Q. They continued over some period of time?

A. They did for several months.

Q. Now, what reasons did you give in your discussions with Mr. Roig as to why you did not consider this proposal to be sound and workable?

A. We stated that we felt that a chief executive of a company should be in responsible charge to the executive committee and Board for the operations of the company,

and, in our opinion, the company could not function successfully with a two-man head working from entirely different offices.

. . . . . .

[fol. 4333] Q. Do you recall this meeting of March 17, 1930?

A. Yes, I do. I don't recall any details, but remember the subject and also remember that we were always supporting the Pan American-Grace management in trying to get more flight equipment on the line, better hotel accommodations on the ground, and larger equipment and improved facilities generally, and that the Grace directors were many times on the other side of the fence.

Q. Do the minutes of the meetings of the Board of Directors of Pan American-Grace Airways set forth all of the discussions which took place at those meetings?

A. The one which I have looked over in the past few weeks certainly do not. They appear to be confined to matters on which some decision was reached.

Q. Who keeps the minutes of Pan American-Grace meetings?

A. The secretary of the company, Mr. Cogswell.

Q. Has he been the secretary from the outset?

A. That is correct.

Q. Were there other controversies in regard to flight equipment in these early years?

A. Yes. Pan American believed that all operation should be conducted by multi-engine planes, as they were on other Pan American trunk line operations.

Q. Did the Grace directors oppose this?

A. Yes. They wanted to continue running the single-engine planes in the Argentine until they were worn out.

Q. Did they wish to carry passengers in them?

A. Yes.

Q. Did the management of Pan American-Grace make any request of the directors as to the procurement of radio?

A. Yes. Actually the first order for radio equipment was placed with Pan American in the fall of 1929, by Mr. [fol. 4334] Jacobs, the former employee of Grace who had become an employee of Pan American-Grace.

However, the Grace directors insisted that this order be countermanded. From the very early days, Mr. MacGregor and Colonel Harris were constantly urging the installation of radio, and the Pan American directors were as constantly supporting them.

Q. What was the attitude of the Grace directors?

A. There was one objection after another. These are all set forth in the exhibits. I don't remember all the details, but the correspondence is set forth in the minutes.

Q. What was the result of the attitude taken by the Grace directors?

A. The result was that Pan American-Grace did not have radio, not only in 1929, but throughout 1930, and well into 1931.

Q. What did Pan American do about this?

A. By March, 1931, Pan American felt that the operation of single-engine airplanes, the lack of radio, and the lack of proper passenger stations on Pan American-Grace route were threatening the good name which we had been building up during the past three and a half years over the rest of the Pan American Airways System. I have had the figures looked up and find that at the end of 1930 the average investment in ground facilities per mile of route was $12.57 on Pan American-Grace as against $213 per mile on the other international routes of the system in Latin America.

* * * * * * *

Q. Will you proceed, Mr. Trippe?

A. While we continued to try to avoid open controversy with our Grace partners, we felt that we would be delinquent in our duty if we kept silent.

The result was the protest which was presented at the meeting of the Board of Directors of the joint company on March 18, 1931.

[fol. 4335] Q. Did the making of this formal protest by Pan American lead to any improvement in the equipment or facilities of Pan American-Grace?

A. It led to some improvement. Arrangements, as desired by the management for the installation of radio, were finally made, and in the summer of 1931 the Grace directors

accepted the management's recommendation for the purchase of two more Fords, but only on condition that the single engine equipment should be used as spares until all remaining mileage had been gotten out of it, and that Pan American should not even make a request of the Grace directors for the purchase of additional multi-engine equipment until this had been accomplished.

Q. There has been some reference to the fact that Pan American's original proposal for radio did not contemplate the sale of radio equipment, but the operation of radio by its own personnel. Can you explain why that was done?

A. Well, first, we had a very serious patent problem. We had developed these sets largely ourselves, and while the Radio Corporation of America was making no objection to our using them on our own operations, they did not look with favor on our selling them. It was not until May, 1931, that we had any formal agreement with the Radio Corporation.

Q. Is the agreement which appears on page 42 and following of Exhibit P-36-A the one to which you have reference?

A. Yes. And I might add here that the negotiations of this agreement was a most difficult task involving many months and numerous conferences with the Radio Corporation officials in some of which I participated. Another and broader agreement was negotiated some years later.

Q. Were there any other reasons for Pan American's making the proposal which it did?

A. I do not know whether this also would qualify as a reason, but we certainly did feel that for us to operate [fol. 3336] Pan American-Grace's radio under a contract such as we proposed was entirely consistent with our agreement with Grace.

Q. Was Pan American able to make any progress at this time on the provision of suitable passenger facilities for Pan American-Grace?

A. Not at this time or for a long while afterward.

Q. Will you please summarize for us what the situation as to the management of Pan American-Grace Airways was in 1931 and 1932?

A. Mr. MacGregor, as general manager of the company, and Colonel Harris were doing the best that they could; but the Grace directors, instead of confining themselves to major items of policy, were interfering in details concerning the day to day operation.

pp. 1587-1597:

Q. After the inauguration of service with the S 42s on the trans-Caribbean route, was Pan American willing at all times to operate the trips to the Canal without a stop at Barranquilla if the Post Office Department had been willing so to designate them?

A. Yes, and we made numerous efforts to get them to do so.

Q. Has your connecting service between Miami and the Canal Zone been affected by the service operated by Pan American-Grace south of the Canal?

A. Definitely, from the very beginning.

Q. Has that sector of Pan American-Grace's route immediately south of the Canal been what is called a bottleneck?

A. Yes, it has.

Q. Would you explain, please, what you mean by that word?

A. I think the word is used in various senses,—

* * * * * * *

A. (continuing) —but the conditions on the northern sector of Pan American-Grace's route qualify it, in my opinion, [fol. 4337] for all of them.

In the first place this was a sector of the route which had to carry all of the through traffic in addition to traffic that was local to the sector.

In the second place it involved at least at the onset, and for years thereafter, the longest nonstop flight made by Pan American-Grace:

The distance of 442 miles between Cristobal and Buenaventura, compared with the distance of 499 miles between Kingston and Barranquilla, and later of 631 miles between Kingston and Cristobal which Pan American was flying on its trans-Carribbean service with much larger equipment.

In the third place the aircraft operated over this sector have always been too small, in my opinion, for the job, and have had to be operated with restricted loads.

Q. When you use the word "bottleneck" in regard to this sector, you are using it in the various senses that you have just described?

A. I am.

* * * * * * *

Q. Has Pan American made efforts from at least 1932 on to eliminate the bottleneck on the route of Pan American-Grace immediately south of the Canal?

A. Yes, it has.

Q. And how would the elimination of that bottleneck have affected Pan American-Grace's business?

A. The elimination of the bottleneck would have permitted the development of considerably more through traffic between the United States and Ecuador, Peru, Chile, Bolivia, and the Argentine.

Q. Why was the elimination of this bottleneck a matter of concern to Pan American?

[fol. 4338] A. For various reasons. In the first place, our company's interest as a stockholder, in building up the business of Pan American-Grace. Second, our interest as a connecting carrier in building up a bigger outlet for our two services to the Canal. And third, our general interest as an airline connecting the United States with Latin America and building up in every possible way commercial traffic so that we could carry on at the earliest opportunity without subsidy.

Q. Pan American emphasis to the management of Pan American-Grace the desirability of securing flying equipment that would lead to Pan American-Grace's becoming independent of subsidy?

A. Yes, this was always Pan American's policy, and we discussed it frequently with the Pan American-Grace management.

Q. When you speak of Pan American-Grace management in this period, you refer primarily to Mr. MacGregor, do you not?

A. That is correct.

Q. Do you recall talks with the management of Pan American Grace as to the desirability of its securing flying equipment for the bottleneck that would give it greater carrying capacity there?

A. Yes. We discussed this repeatedly.

Q. After the delivery to Pan American of the four-engine S-40's, which appears from the exhibits to have been in 1931, did Pan American go to work with aircraft manufacturers on the development of new and larger types of four-engine aircraft?

A. Yes, we did, in 1932, and out of that work there came the four-engine flying boats eventually known as the Sikorsky S-42 and Martin 130 series.

Q. Did you at about this time take up with the management of Pan American-Grace the desirability of its operating S-42's on the sector immediately south of the Canal?

A. Yes, we did.

Q. Do you recall when you first did this?

[fol. 4339] A. Only that it was while our discussions with the manufacturers were still proceeding, and, therefore, it must have been in 1932.

Q. With whom were those discussions had?

A. Initially with Mr. MacGregor.

Q. Were you able to give Mr. MacGregor detailed performance figures on the S-42?

A. Not at the time of my first conversation with him on this subject.

Q. Why was that?

A. The detail performance figures were not available inasmuch as Pan American's engineers were still working with the manufacturers. The actual procurement contract was not let for some months thereafter.

Q. Was it Pan American's position in 1932 that Pan American Grace should acquire a new type of four-engine flying boat for use on the sector immediately south of the Canal?

A. Yes, it definitely was.

Q. Did Pan American later give to Pan American-Grace performance figures on the S-42?

A. Yes, we did. Some time early in 1933, and after the procurement contracts had been completed.

Q. Those figures, of course, were not based on actual performance, were they?

A. No, they were based on the manufacturer's specifications since the airplanes themselves were not flown for over a year thereafter.

Q. Can you tell us generally in regard to the performance of the S-42?

A. The S-42 was an outstanding transport, far ahead of its time. At the manufacturer's trials 12 world's records for flight performance were recovered for the United [fol. 4340] States. This high speed clipper had accommodations for some 30 passengers, a high degree of luxury was provided in comparison with other aircraft of that period, including both the DC-2 land transport and the S-43, amphibian or flying boat type. In carrying capacity over medium ranges, this aircraft was outstanding. It carried a 5-man flight crew, including an engineer and radio operator. The safety standards were also greatly improved over previous types, through provision of a number of separate watertight bulkheads, unique at that time in marine transport construction.

Q. Was the S-42 type later put into successful operation by Pan American in Latin America?

A. Yes, it was. On the east coast as well as the trans-Carribbean services.

Q. Let us come back to the bottleneck on Pan American-Grace's route, and will you tell us, please, what the situation was in 1933.

A. By 1933 the S-38 was a year older, and their inadequacy for operation on the northern sector of Pan American-Grace's route was even more apparent than a year before. We felt that on this bottleneck of the trunk line down the west coast, Pan American-Grace should acquire equipment of a capacity that would permit it to handle the trans-Caribbean traffic which Pan American could be in a position to offer with the bigger and faster equipment it had on order.

Q. I would like you to look at Exhibits G-53 and G-54. Do you recall any discussions that you had with Mr. Roig around the date of these letters?

A. Yes, I do.

Q. Tell us what they were, please.

A. The Grace directors were in favor of a more modern twin-engine amphibian to replace the S-38, whereas we wanted Pan American-Grace to operate the four-engine S-42's.

[fol. 4341] Q. Was it Pan American's proposal that Pan American-Grace should purchase an S-42 or should charter an S-42?

A. Pan American was willing to agree to any equitable form of arrangement agreeable to the Grace directors. We were willing that Pan American-Grace should purchase an S-42; we were willing to charter an S-42 to them to operate with their own personnel; we were willing to run an S-42 through from Miami to Guayaquil with our flight crews Pan American-Grace paying the ratable share of the cost.

Q. Did Pan American insist that S-42's which might be operated by Pan American-Grace over the bottleneck should be operated for Pan American-Grace by Pan American or by Pan American flight crews?

A. No, it did not. We were interested in getting a ship of sufficient size in operation on this sector to cut out the bottleneck. If the most efficient and economical arrangement would have been to have the S-42's operated by Pan American flight crews at the start, we saw no reason why this should not be done, but if there was objection to this, we were quite willing to agree to any other form of arrangement that would have put this fine equipment in use and overcome the bottleneck. The discussions never proceeded to this stage because the Grace directors would not agree to equipment of this size. The question of the method of operation became academic.

Q. Is it correct, then, that throughout 1933 Pan American was unable to secure any action on a proposal that Pan American-Grace should make arrangements for either the purchase or charter of S-42's?

A. That is correct.

[fol. 4342] pp. 1700-1701:

Q. Reference has been made, Mr. Trippe, to a conference held with the Civil Aeronautics Board on October 28, 1942, and to Grace's letter to the Board of that date, which is Exhibit G-75. Would you tell us, please, the rea-

sons why Pan American was unwilling to agree to the proposal of an odd director except with the limitations that are referred to in the letter of Grace's?

A. Yes, it appeared to us that without these limitations this 9th director would simply be an arbitrator of the entire controversy with respect to the extension north of the Canal. I heard Mr. Roig testify the other day that this odd director would in effect act as an arbitrator. In 1939 we had made an agreement with W. R. Grace & Company which we considered had reaffirmed the original understanding as to the territorial scope of the company's operations and it provided for enlarging that scope as to include an extension to the United States in the event that a particular issue with respect to our connecting service was decided by arbitration against us. We felt that if there was to be arbitration, it should be under this supplementary agreement—

Q. (Interposing) Under this what?

A. Supplementary or settlement agreement.

(Continuing) —which the two companies had made in 1939 and which Grace, in our opinion, had walked out on. We saw no reason why Grace should now be permitted to have a separate arbitration on the issue of territorial scope which we considered to have been one of the points settled once and for all in 1939.

Q. Did Pan American agree to the appointment of a ninth director who would have power to break any deadlock on any questions arising in connection with operations of the company that fell within what Pan American considered its territorial scope?

A. Yes, we did.

[fol. 4343] Q. Was Pan American willing in the event that such a ninth director were appointed to proceed to arbitration with Grace under the 1939 agreement?

A. Yes, we were, as I have been at all times since, and are today.

pp. 1709-1710:

Q. Have you any other comments to make upon the subject of the connecting service between Miami and the Canal Zone, as it bears upon this controversy?

A. I would like to say this: There have, of course, been instances since the beginning of the national emergency when we have not been able to provide transportation between Miami and the Canal Zone for passengers destined to points on the Pan American Grace route, particularly those not holding priorities.

There have also been many occasions when Pan American-Grace has not been able to handle passengers to whom we have provided or could have provided transportation to and from the Canal.

There have been times during this period of emergency when the congestion on our lines to the Canal may have been slightly greater than on the sector to the south. Right now the situation is reversed.

pp. 1723-1726:

Q. Will you tell us now how this general program applies to the service between Miami and the Canal?

A. The Miami-Canal Zone link to the west coast of South America is one of our most important routes, and would of course be flown by the most modern equipment, attracting increased traffic not only by more comfortable and speedier aircraft, but by lower fares and higher frequencies.

We still favor the through operation of equipment to suitable point or points on the route of Pan American [fol. 4344] Grace under equitable arrangements for the interchange of equipment.

Q. Do you believe it is practicable to work out an interchange arrangement that would relieve the present bottleneck between the Canal Zone and Guayaquil?

A. Yes. An interchange program could be put into effect as soon as the Pan American-Grace pilots could be checked out so that they could operate four-engine land equipment.

Q. How could this be done?

A. A reciprocal interchange agreement between Pan American and Pan American-Grace could be concluded with a provision that would permit Pan American-Grace to utilize Pan American Boeing 307s over the Canal Zone-Guayaquil bottleneck until such time as Pan American-Grace is able to obtain additional four-engine equipment.

Q. In what ways would this be helpful to Pan American Grace?

A. The traffic congestion south of the Canal Zone would be reduced and the availability of this additional equipment on this sector of the route would help the entire west coast service.

Also it would give Pan American-Grace pilots a chance to acquire experience in the operation of four-engine land planes before the time when Pan American-Grace obtains its own four-engine equipment.

Q. Do you think it would also be practicable to have three-way interchange agreements whereby aircraft would be operated directly over Eastern Airlines from, say, New York and Chicago through Miami and Canal to points on the west coast?

A. Yes. I think that would be entirely practicable and should be considered when the respective carriers have acquired suitable equipment.

* * * * * * *

Q. Would you state what efforts Pan American has made to increase the frequency and the service offered by Pan American-Grace?

fol. 4345 A. Our efforts began with the very early days. Our very first estimate was on the basis of three trips a week with multi-engine equipment, as against Grace's proposal of one trip a week with single engine equipment. After Grace had exercised its option to take up its full 50 percent interest in the west coast route, we pressed for the installation of passenger service on all parts of the route, and that all such operations should be flown with multi-engine equipment.

We urged that more adequate hotel facilities be provided, suggesting arrangements similar to those we had made on the east coast of South America to improve hotel accommodations at overnight stops for our passengers.

We repeatedly urged the Post Office Department to provide for increased frequencies on Pan American-Grace's route as well as elsewhere on the Pan American system.

After the Civil Aeronautics Act was passed we again pressed for a program of increasing the frequency over two trips per week on both coasts.

We had numerous talks with the Civil Aeronautics Board and with the Post Office Department in an effort to convince them that the Post Office Department had authority to increase those services without the delay inherent in waiting for the Civil Aeronautics Board to fix new rates under the Act.

pp. 1731-1740:

Q. What other specific benefits has Pan American-Grace received as a result of its affiliation with the Pan American Airways System?

A. These benefits are too numerous to mention here except, in most general terms, with a few illustrations. In dollars and cents, the most direct benefit has come from Pan American's traffic and sales organization. There are literally hundreds of travel and tourist agencies throughout the United States that act under Pan American's supervision as sales representatives for the Pan American Airways System. These arrangements have been developed by years of effort, those agencies are serviced by a well organized system of district traffic offices, located in the largest travel markets in the country.

The sales organization has given Pan American-Grace equal representation with every other part of the Pan American Airways System and in our judgment deserves a considerable portion of the credit for the financial success of Pan American-Grace's operations. Had Pan American-Grace been an independent airline, it could not have had a sales representation anything like what it has received.

I don't see how, for example, its schedules, routes, and tariffs could have been better publicized than through their inclusion in the Pan American System timetables of which over 600,000 have gone out annually for many years, first on a quarterly basis and later on a monthly basis. I will not stop to dwell on the numerous efforts that Pan American's traffic department has made over a long period of

time to foster the development of South American air travel, by Around South American tours and the like.

I would, however, like to list some of the techniques and procedures which have been originated by Pan American Airways and passed on to Pan American-Grace as an to Pan American-Grace as an integral part of the system. They include the development of the combination ticket and exchange order which makes it possible to route traffic between South America and points on the 78 domestic airlines in the United States in addition to points on connecting railroad and steamship lines; the years of work and effort that have been put into the development of its ticket and ticket contract which afforded the maximum protection to which the international air carriers are en- [fol. 4347] titled under the governing international conventions; the development of the valuable business in credit sales under Pan American's credit and transportation contracts; the origination and development of a most successful reservation code which now forms the basis of the American Air Traffic Conference Code and the establishment of the area reservations control system. All these Pan American-Grace has taken full advantage of and properly so.

It has had like benefits from Pan American's work in the field of express traffic. The contract entered into between Pan American and the Railway Express Agency has made available to Pan American-Grace the 23,000 offices of that organization for the promotion and sale of air express. Likewise Pan American-Grace has enjoyed the result of Pan American's work in the development of the techniques of handling express traffic. The through airway bill, which represented nearly two years of research and development, and which in a single document handles all the matters which normally require numerous consular and shipping documents for other forms of transportation, is the finest example of the work that the Pan American System has done in this field. This international air express system was installed on the Pan American-Grace route by one of our senior express officials, familiar with all its ramifications. Reference should also be made to

the fact that the experience which Pan American's traffic department has amassed in the handling of passenger and express traffic is reflected in the passenger and express traffic manuals which the system has created and which Pan American-Grace now uses.

Pan American's airmail specialist was largely instrumental in organizing all arrangements relating to international mail traffic in the west coast countries served by Pan American-Grace and in integrating Pan American-Grace's air mail service from these countries with the whole complicated structure of international airmail, which is coordinated through the Berne Bureau in Switzerland. [fol. 4348] In short, all the various steps which we have taken to develop passenger, express, and mail traffic have redounded greatly to the benefit of Pan American-Grace.

(Discussion had off the record.)

By Mr. Friendly:

Q. Will you also briefly summarize and illustrate the benefits which Pan American-Grace has derived from its affiliation with the Pan American Airways System in the technical field such as operations and maintenance?

A. From the very outset the operations of Pan American Airways have served as a practical clinic in the development of international air transportation. Not only has this been so—

Mr. Cahill: I am awfully sorry and I do apologize, but will you give me that question, please?

(The question was read by the reporter.)

A. (Continuing) Not only has this been so with respect to the art of aircraft operation itself, but it has been equally true in matters such as maintenance procedures, the development of pilot training techniques, including pioneering in blind flying, the development of training programs for maintenance personnel, and the development and application of radio and meteorology to international aviation, plus many other technical matters too numerous to mention.

That, alone, however, is only half of the story, for, in addition to being an aviation clinic, the system also has been the foremost aviation research laboratory in the air transport industry. We believe, with considerable pride, that through its engineers, Pan American has had much to do with such improvements as the increase in horsepower output of engines, the lowering of fuel consumption, the development of more efficient propellers, the elimination of fire hazards in aircraft and the improvement in aviation fuel and lubricating oils. From all of these research projects Pan American-Grace has benefitted.

[fol. 4349] I have given a general outline of the various technical fields in which Pan American has been able to afford Pan American-Grace the benefits of its experience and research. I would like to mention, however, a few specific instances of this nature.

They have, of course, occurred from the very time of the organization of the joint west coast operation. When eventually radio facilities were installed on the Pan American-Grace line a good part of the equipment was developed and manufactured by Pan American Airways and with it went trained system radio operators. The system brought to Pan American-Grace the desirability of establishing our procedure for the collection of weather information and we furnished them with their first meteorologist. Afterward, when we had satisfied Pan American-Grace as to the desirability of employing a weather forecaster, he likewise was furnished from our staff.

We developed in connection with the manufacturers the first streamlined loop direction finder and cooperated with Pan American-Grace in the installation of such equipment on its planes. The same is true, I believe, of the system's original development of the gasoline dump valve which has had such an important effect upon provisional loads.

Just as one illustration of the laboratory research work that I have mentioned before, I would like to refer briefly to the studies which we have caused to be made with respect to the subject of flight crew fatigue. This research made by the system medical director, Dr. McFarland, includes investigations of the effects of high altitude opera-

tion in the Andes. This resulted in the development of certain techniques for combatting fatigue and keeping fit for flying thus increasing safety in air transport.

[fol. 4350] We made application of our findings by establishing field medical centers at the main system bases of operation to improve the physical fitness of ground as well as flight personnel. In the development of this medical program and as in many other similar instances, Pan American-Grace has had the opportunity of fully sharing in the benefits to be derived therefrom.

Pan American-Grace now has its own medical center at its base in Lima which is participating in the cooperative system effort of medical research.

Q. Have the various procedures for operation and maintenance which Pan American Airways System has developed been adopted by Pan American-Grace?

A. Yes, gradually. Pan American operations and maintenance manuals have been adopted and are now followed by Pan American-Grace.

Q. Is it true, Mr. Trippe, that Pan American's interest in the Miami-Canal Zone service lies primarily in providing a local service between Miami and Balboa, and in serving its other operations in Central and South America?

A. Decidedly not. Our original interest in the route to the Canal was as a link in the through route to the west coast.

The local traffic to the Canal has never been important except under the extraordinary circumstances that have prevailed since 1940.

The Miami-Canal Zone route has not served Central America directly since 1931, and whatever minor importance it ever may have had for Central American traffic has certainly disappeared now that the New Orleans gateway has been opened.

As to the north coast of South America, a stop was made there between 1931 and the spring of 1939, because Pan American-Grace, with its limited capacity could not fill our ships on a direct flight to the Canal, and because the Post Office Department routed the flights that way.

[fol. 4351] The direct route to the Canal which is separately described in our certificate does not serve the north coast at all.

Q. If the Board were to order an extension of Pan American-Grace's certificate to include an operation between the Canal Zone and Miami, and this should be placed in operation, what would be the effect upon Pan American's service between Miami and the Canal?

A. It would be disastrous. In normal times the greater portion of the traffic carried by us on direct flights on our route between Miami and the Canal Zone was traffic destined for or originating at points on the routes of Pan American-Grace.

Even if we assume that our military establishments at the Canal Zone would be on a larger scale after the war than they were before, I doubt that this would greatly affect the situation, since I believe the military would perform a large part of their own air transport work.

If Pan American-Grace's own operations were ever to be extended to the United States northbound business from the West Coast to points most conveniently reached through the Miami gateway would be almost wholly diverted from Pan American, since Pan American-Grace, as the originating carrier would control this traffic through to the United States.

Southbound the situation would be almost as bad since Pan American-Grace would naturally give preference in making reservations to through passengers originating on its own lines in Miami, rather than hold space at the Canal for Pan American bookings, which would be contrary to its own interest.

In other words, Pan American's route from Miami would be almost completely cut off from participation in the business to and from the west coast of South America, and the west coast operation would not be part of the Pan American Airways system service as it was set up to be and still is today, but would become an integral part of a competitive air route.

[fol. 4352] Q. In your opinion, would the requiring of Pan American-Grace to extend its line from the Canal to the United States constitute a constructive step in the development of air transportation between the United States and the countries of South America now served by Pan American-Grace?

A. No, I do not think that it would.

Q. Why do you say that?

A. Because I think that the constitution of the company would prevent it from developing this service as it should be developed.

Q. Will you please explain what you mean by that?

A. The company would be placed in the position where there was a conflict of interest, not only between it and Grace, as has been true in the past, but with both of its two owners.

From the very onset the Grace Company as owner of the Grace Line has had an interest adverse to the through passenger business of Pan American-Grace.

While this adverse interest, of course, has been dormant since 1940, I think it will be revived when the Grace Line resumes passenger operations, and that it will be felt to the same extent in the field of air cargo when that part of the air transportation business develops.

In addition, if this extension were to be made, Pan American-Grace would be placed, for the first time, in the position where Pan American also had a direct adverse interest.

TESTIMONY OF CHRISTOPHER DE GROOT IN CAB DOCKET 779 WHICH PAN AMERICAN INTENDS TO OFFER IN EVIDENCE

pp. 161-162:

By Mr. Friendly:

Q. Mr. Wanner's question about the stop-over passengers, the percentage of Buenos Aires traffic that stop over some place en route, could you give us an idea whether that percentage, admitting that you have no accurate figures, is substantial, and perhaps divide your answer between business and tourist travel?

A. It is quite obvious that no tourist would spend $700 of the better part thereof to go nonstop from Miami to Buenos Aires. Even business men would not go straight through except under rare circumstances, because it is true that there are not too many business men who would just have a transaction to attend to in Buenos Aires without stopping off en route. The present emergency has, I think, increased the number of people who would travel nonstop such as couriers and those on military missions.

Q. In normal times, men such as commercial travelers or representatives of the United States, firms having large interests in South America would normally stop at one of more points en route, would they not?

A. Yes, I think that could be assumed.

TESTIMONY OF A. B. SHEA PRESIDENT OF PANAGRA AND FIRST VICE PRESIDENT OF W. R. GRACE AND COMPANY, IN CAB DOCKET 88-2 ON OCTOBER 11, 1951, WHICH TESTIMONY PAN AMERICAN INTENDS TO INTRODUCE IN EVIDENCE.

pp. 1195-1199:

A. B. Shea was called as a witness for and on behalf of Pan American Grace Airways, Inc., and having been first duly sworn, was examined and testified as follows:

Direct examination.

by Mr. Burns:

Q. Mr. Shea, will you state your position, experience and qualifications?

A. I am president of Pan American-Grace Airways and a director. And I am first vice president and a director of W. R. Grace and Company.

Q. I would like to have you set forth Panagra's position regarding the Pan American-Panagra through flight agreement.

A. Well, we urge very strongly on the board that approval of that agreement be extended for as long a period as possible. The agreement has been in operation since 1947. Performance under the agreement has, in my judgment, been thoroughly satisfactory, and I think has been of great benefit to the travelling public, and has been of mutual benefit to Pan American and to Panagra.

[fol. 4355] Q. Have you any comment to make about the maintenance experience, under this contract?

A. Our maintenance experience has been very good. I think the record speaks for itself in that regard. Our costs, which were rather high when we started, have been steadily brought down and are still being further reduced, and with the acquisition by Pan American of DC-6B aircraft, they should be still further reduced and substantially, because then we would have more or less uniform equipment.

Q. Have you a comment to make about a possible advantage in the through flight because of the pilot arrangements?

A. Well, the through flight agreement as it was conceived and as it has operated, was extremely useful in solving a pretty thorny pilot personnel problem that we had.

Prior to that all our flight crews were based in Lima, Santiago and Buenos Aires, but principally in Lima, and naturally those men did not look forward with a great deal of pressure to spending the rest of their active lives in the South American countries, with children growing up and so forth, and as a result of the through flight agreement we were able to bring a substantial number of pilots and co-pilots and their families to the United States and base them in Miami.

Q. Where does the training of Panagra pilots take place?

A. The four-engine training takes place in Miami.

Q. And you regard that as desirable?

A. I do, yes sir.

Q. Will you state briefly to the Examiner your views as to Panagra's need of an interchange?

A. You mean an interchange which would bring our planes through to New York?

Q. That is right.

[fol. 4356] A. Well, I think that whole subject has been so thoroughly ventilated, and there is such a unanimity of opinion on the desirability of a through one-plane service from Buenos Aires, via the west coast of South America, to New York, that it is hardly necessary to elaborate very much.

All the benefits have been presented on the record, but essentially, it suits the convenience of the public very substantially to be able to get on an airplane in Buenos Aires and get off the same airplane in New York, and vice versa, and avoid missed connections, and I think the approval of an interchange would be substantially increasing the volume of traffic over the routes we are talking about.

* * * * * * *

Q. There is before the Board now the question, under the issues framed, as to the approval of the proposed National-Panagra interchange?

A. Yes.

Q. Will you express for the record your views on that?

A. Yes, my views on that are as follows: I am advised by counsel that there is a valid and binding contract between Panagra and National subject, of course, to Board approval, for a Panagra-National interchange. If the Board approves that agreement, I will do everything in my power that I can to see that that agreement is implemented and becomes effective.

Q. Now, would you state what your views are with reference to the tendered interchange with Eastern, under the provisions of the Pan American-Eastern agreement, which is now before the Board?

A. Well, the interests of Panagra lie in operating into New York through an interchange agreement or arrangement, and it suits Panagra's interests, and Panagra should operate an interchange under whatever arrangements the Board approves.

[fol. 4357] Q. Suppose the Board should approve the Eastern-Panagra interchange? What steps would you think Panagra should take?

A. I think Panagra should execute an agreement with Eastern Airlines, as provided in the Pan American-Eastern interchange agreement, and start operating under it at the earliest practical moment.

pp. 1207-1223:

Cross-examination.

By Mr. Russell:

Q. Mr. Shea, you have testified that you would be willing to have Panagra enter into an interchange which would permit Panagra aircraft to be operated over the Miami-New York route of either Eastern or National, as the CAB might determine.

Now, would you state what you would consider to be the preferable and more advantageous arrangement from Panagra's standpoint, and why?

A. Yes. At the time that I applied to the CAB for approval of the Panagra-National agreement—after all these incidents took place—my principal consideration was the saving of time that could thereby be accomplished.

The Board, as you know, temporarily approved the agreement and then rescinded its approval and now we are at the point where we are considering not only that but the other arrangements as well. I haven't listened to the testimony in this case, but I have read most of it, and it seems to me that if the Board should either approve the Panagra-National agreement, or should order a compulsory interchange between Pan American and National with Panagra equipment, which are two possibilities, that the Board, and Panagra, might be faced again with protracted litigation.

On the other hand, if the Board should approve the Pan American-Eastern-Panagra interchange, with all the [fol. 4358] parties to it willing and voluntary parties, there would hardly be any prospect of delay by litigation or by further proceedings in connection with the Board's orders.

Therefore, should the Eastern agreement be approved, I think that the likelihood of Panagra beginning its through one-plane operation into New York, immediately, or promptly, would be much better than if we had to rely on a Panagra-National interchange or on a compulsory Pan American-Panagra-National interchange.

That is the first and perhaps the most important consideration.

Another consideration, however, to which I also attach real importance, is the likelihood that with things as they are today, despite the great strides that National has made in the last few years, I think that probably the amount of traffic that Eastern would feed to Panagra would be greater than if we were working with National.

On the basis of those two considerations, therefore, and speaking solely from the Panagra viewpoint, it seems to me that as a commercial and practical proposition, the Eastern interchange would be preferable.

Q. And you believe that an interchange agrangement under which Panagra's aircraft would operate or be operated over Eastern Miami-New York route would be in the public interest?

A. I certainly do.

* * * * * * *

By Mr. Fitzgerald:

Q. Mr. Shea, you testified that Panagra might be somewhat better off to go along with Eastern and Pan American, in that deal, because it would avoid delays due to litigation.

Do you feel that the public interest would be similarly served by bowing to Pan American's and Eastern's demands?

A. I don't know what you mean by "bowing to Pan American's demands."

[fol. 4359] My feeling is that the public interest will best be served by getting a through one-plane service into operation at the earliest practical moment, with Panagra aircraft operating from the points served by us in South America.

Q. And you also stated that another consideration from Panagra's viewpoint was the fact that Eastern would feed more traffic to Panagra than National.

I am not sure I stated it exactly correctly, but I thought that was your point.

A. That is my opinion.

Q. Why, in your opinion, would Eastern be able to generate more traffic for Panagra than National?

A. Well, because, as I said, with all due regard and respect for the National sales organization, which I also said has made tremendous strides in the last few years, I say that as things are today, with the extensive Eastern sales organization, and with the extensive Eastern route pattern, I believe that Eastern would feed us more traffic than National would, as things are today.

Whether that would be true in two or three years, I don't know.

Q. You mean you think they would have the ability to do so, not that they would do it, but that they would have access to more traffic, is that correct?

A. That is correct.

Q. And is that based on the fact that Eastern is larger and better established in this Northeastern market? Is that one of the considerations?

A. No, it is due to the fact that Eastern carries more people than National does. Eastern still has a tremendous pull in the market, because of the fact that they have been in the business for so long, and for so many years, they are [fol. 4360] very aggressive sellers, and I think that as things are today, they have much more of a pull than National has, although National has made strides and is making strides to cut into their business.

Q. You mean because Eastern not only carries people out of New York and Miami, but because they have contacts with people going to Houston, Atlanta, and all of the other points on the Eastern system, increases their ability—

A. To sell.

Q. —to sell and to give traffic to Panagra?

A. I think that is right.

pp. 1258-1262:

By Mr. Fitzgerald:

Q. Mr. Shea, at the time of the National-Panagra-Pan American agreements were before the Board for approval, before the decision in the temporary case, you testified, and you believed, did you not, that the approval of that interchange agreement was very much in the public interest?

A. Yes.

Q. And is there any difference between the situation as it then existed and the present situation, except for the fact that Pan American indicates it will not go along with that?

A. Well, there is the time elements, as I said. Both matters are now being indicated simultaneously. At the time the temporary approval matter was up there was a possibility that the approval would stick and that we could start operating immediately.

Q. But otherwise except for this factor of possible delay because of litigation, you would still testify that the Panagra-National agreement is just as much in the public interest today as it was before?

A. I think that is right.

[fol. 4361] Q. Is your decision to go along with the Eastern agreement in any way influenced by the efforts of the Pan American directors on Panagra's board?

A. No sir.

* * * * * * *

By Mr. Schneider:

Q. This question arises out of something Mr. Burns said that confuses me.

In answer to Mr. Russell's question, did you say, Mr. Shea, that you did prefer an Eastern interchange over National, or did you say that Eastern's would have more advantages?

A. My recollection is I did not use the word "prefer." I thought I said and I say now that I thought it would have greater advantage to Panagra than the National interchange.

Q. Then I take it Panagra doesn't state any preference today with respect to one over the other?

A. Well, only to that extent. I say it would be more advantageous to us to have the Eastern interchange than it would be to have the National.

Q. That is what I am getting at. Mr. Burns raised some distinction between preference and statement of advantages. When you say Eastern would have certain advantages, do you mean to say you prefer to have the one that has those advantages?

A. Now that we are attaching so much to the word "prefer," I will stand on what I said. From the commercial viewpoint, the Eastern interchange would be more advantageous in our opinion than a National interchange.

Q. You are not stating any preference?

A. No further than that.

HEARINGS BEFORE THE ANTITRUST SUBCOMMITTEE (SUBCOMMITTEE NO. 5) OF THE COMMITTEE ON THE JUDICIARY HOUSE OF REPRESENTATIVES, EIGHTY-FOURTH CONGRESS, SECOND SESSION.

pp. 2489-2491:

The Chairman. Proceed.

Mr. Trippe. Mr. Chairman, I would like briefly to go back to the history of our company, over the past 29 years.

It was founded in 1927 by 12 young ex-World War military pilots who invested on the average $25,000 apiece in the enterprise in order to provide the total capital in the amount of $300,000 that we started business with.

The first international operations were between Key West and Havana. We also had services in Alaska.

. . . . . .

Mr. Keating. Were you one of those 12 original people that put $25,000 in it?

Mr. Trippe. I was; yes.

The Chairman. Go ahead.

Mr. Trippe. Mr. Chairman, the company gained its present position in the international field, first by pioneering throughout Latin America. We extended from Florida to Cuba, down through the West Indies, as far as Trinidad and the Dutch Guiana, in 1929, extensions were also made from Brownsville, Tex., the other original terminus in the United States, through Mexico and Central America to the [fol. 4268] Canal, and across the north coast of South America. Later, the system was extended so that at the end of 6 years, it served every single country in Latin America.

During that period, Mr. Chairman, our European competitors were not asleep. They not only extended their services from Europe across the South Atlantic to serve Latin America through that principal trade route, but they were extending out through the Middle East and to the Orient, the rich market of the Orient, from which we were separated by 5,000 miles of ocean.

We started back in the early 1930's to organize the first trans-pacific service. We had hoped to operate through Alaska and Siberia. The then Colonel, now General Lindbergh, our technical adviser, made the first flight in 1931 from the United States to Alaska, and through Soviet territory and Japanese territory to China, surveying that so-called great-circle route for our company.

We commenced active operations in Alaska in 1932, and as I say, we hoped to extend those operations through to the Orient and China in 1934 and 1935.

We had an agreement with the Amtorg Trading Corp., then the agency for the Soviet Government, whereby we

would organize for the Soviet Government a chain of airports from the Bering Sea through their territory in Siberia. The agreement contemplated that we would have the right to operate over that airway to connect the United States with our affiliate in China, China National Airways, a corporation owned 45 percent by Pan American and 55 percent by the Chinese National Government.

Unfortunately, Mr. Chairman, at that time also, difficulties prevailed between our Government and the Soviet Government. There was the question of working out a solution for American debts then outstanding. Our Government asked that we not implement that contract at the time. [fol. 4364] Mr. Hull was the Secretary of State. A year later there was a settlement of the debt situation. We were told that we could proceed. Then unfortunately the Soviet Government changed its mind. We were advised it would be impossible to operate through Soviet territory. We were prohibited, therefore from arranging a route from the United States through Alaska and, with our affiliated operations in China, to the Orient.

The relations between our Government and Japan were deteriorating in those days. The only practical route available to an American-flag airline was the roundabout route across the Pacific, using steppingstones in the control of our Government, Honolulu, Midway, Wake, and Guam en route to Manila and Hong Kong. That service was set up in 1936. It was the first airline to operate over a major ocean route. It was flown by an airplane built in the United States in charge of an American captain and an American flight crew—by an American company, flying the United States flag.

We were proud that the first overocean service for mail, passengers, and cargo was set up under our house flag.

Several years later service was extended to New Zealand and Australia. I won't go into the details, unless the committee is interested. Also before the outbreak of the European war, World War II, we pioneered air service across the Atlantic to Europe, operating over the southern route via Lisbon to France and over the northern route via New Foundland and Ireland to Great Britain.

Then war came and most of our service went into direct operation for the military, including our services to Europe

and our services across the Pacific. Only a small part of our operations were left in the form of commercial operations.

I am happy to be able to say that over half of all of the military work entrusted by our Government to the American-flag civil airlines was entrusted to Pan American during the war years.

COMPOSITE and JOINT MEETINGS
TRAFFIC CONFERENCES 1, 2 and 3
MINUTES

•••

Castle Harbour Hotel, Bermuda
May 8–28, 1951

Sixth Meeting of Traffic Conference 1
Eighth Meeting of Traffic Conference 2
Seventh Meeting of Traffic Conference 3
Eighth Joint Meeting of Traffic Conferences 1 and 2
Eighth Joint Meeting of Traffic Conferences 2 and 3
Eighth Joint Meeting of Traffic Conferences 3 and 1
Sixth Joint Meeting of Traffic Conferences 1, 2 and 3

[fol. 4367] PLEASE NOTE

1. Most of the sessions of this meeting were held on a "composite" or "joint" basis. Frequently, matters affecting one Conference were discussed and acted on in the presence of the other two. However, in the interest of economy and efficiency, only one set of minutes has been produced.

2. To avoid confusion in the future, the Members are requested to address correspondence to the individual Secretaries in accordance with the division of work among them, as follows:

Traffic Conference 1,
Joint Meetings of Conferences 1 and 2,
Global traffic matters involving
Conferences 1, 2 and 3:

Mr. E. S. Pefanis
New York

Traffic Conference 2,
Joint Meetings of Conferences 2 and 3:

Mr. V. de Boursac
Paris

Traffic Conference 3,
Joint Meetings of Conferences 3 and 1:

Mr. H. J. Dedekam
Singapore.

[fol. 4377] CHAIRMANSHIP

Mr. R. E. S. Deichler, as Chairman of Conference 1, the host Conference, was in the Chair for Composite Meetings and when Conference 1 was in individual session.

Mr. J. W. S. Brancker was in the Chair when Conference 2 was in individual session.

Mr. B. L. Anderson was in the Chair when Conference 3 was in individual session.

COMPOSITE MEETINGS

MINUTES

OPENING OF MEETING

M/1 Mr. R. E. S. Deichler, Chairman of Traffic Conference 1, called the meeting to order and introduced Captain The Hon. Bayard Dill, Chairmand of the Board of Civil Aviation of Bermuda, who welcomed the delegates. Sir William Hildred, Director General of IATA, thanked Captain Dill on behalf of the association.

M/2 The Chairman informed the Conference that to expedite progress, a set of Traffic Conference Rules and Procedures had been drafted and suggested that these be adopted by the Conference. These rules as at Appendix "A" were accepted to govern the proceedings of this and future Conference meetings.

M/3 Members were requested to refrain from discussing the business of the Conference with the press. At the close of the meeting a press communique would be drafted and would be available to delegates before issue.

M/4 The Chairman advised Members that no verbatim records would be made of the proceedings and that Members should inform the Chairman whenever they wished to have their remarks taken down for the record. A Situation Report would be issued daily and would form the basis of the minutes.

EXAMINATION OF CREDENTIALS OF REPRESENTATIVES

M/5 The Chairman announced that the credentials had been examined by the Secretary and had been found to be in order.

DETERMINATION OF VOTING MEMBERSHIP

DETERMINATION OF MEMBERS OPERATING SCHEDULED COMMERCIAL INTERNATIONAL AIR TRANSPORT SERVICES BETWEEN THE AREAS OF

Conferences 1 and 2
Conferences 2 and 3
Conferences 3 and 1
Conferences 1, 2 and 3

[fol. 4382] —6—

M/6 The Chairman announced that the list of Voting Members as shown on the first pages of the resolutions of the Conference and as at Appendix "B" and the list of Members operating between Conferences as at Appendix "C", had been determined and approved in accordance with the Conference Provisions.

APPROVAL OF MINUTES OF PREVIOUS MEETINGS

M/7 The Conference approved the minutes of the Madrid meetings as previously circulated with the following amendments:

M/68 (p. 19)—Add the following sentence:

"PAA stated that the mileage of 2,580 miles stated by QEA between San Francisco and New York was not correct."

M/84 (p. 22)—Reads as follows:

"Several Members were opposed in principle to the inclusion of the escape clause for Conference 2 fare and rate agreements and preferred to close them for a definite 12 months period. When it became clear that for tariff considerations it was proposed to insert the escape clause for all areas Aer Lingus, who opposed the insertion of this escape clause in Conference 2 fares and rates tables, went on record as stating that the re-opening of fares and rates in Conference 2 was primarily a matter for Conference 2 carriers and not for carriers in some other part of the world, and for that reason hoped that the escape clause would not be invoked and that Conference 2 carriers would not be involved in an autumn Conference unless they, themselves, desired to re-open Conference 2 fares and rates."

M/154 (p. 32)—Delete the initials "U.S." in the second line.

M/214 (p. 42)—Delete the following sentence at the end of Items 3 and 4:

"No details given."

Add the following sentence at the end of Items 3 and 4:

"Details are contained in the carriers' tariffs."

M/215 (p. 42)—Add the following sentence at the end of this minute:

"Except as permitted by Resolution 200."

M/252 (p. 48)—Instead of:

"There was no support for..."

this minute should read:

"There was no sufficient support to agree on...".

REPORT OF COMPOSITE FRCS COMMITTEES

M/8 In the absence, due to illness, of Mr. S. F. Wheatcroft, during the first week of the meeting, Mr. J. R. Barch, Chairman of Conference 1 FRCS, commented on the Composite FRCS report.

Fare and Rate Level in Conference 1

M/9 Detailed questions leading to the closing of fares and rates in Conference 1 were discussed at individual sessions of this Conference. Under the terms of the final agreement reached, Members accepted the fares and rates contained in the tariffs of seven (7) Members (Braniff, Chicago & Southern, Eastern Airlines, National Airlines, Pan American World Airways, Pan American-Grace Airways, Trans-Canada Air Lines) as a basis for building up the Conference specified Fares and Rates Table. A draft table was prepared but time did not permit Members to finalize this document. The Conference instructed, therefore, that the FRCS Committee should meet in New York in June in order to complete the work.

M/10 The Conference recognized that at the FRCS meeting certain fares and rates would require negotiation. It was decided, therefore, that, in the absence of any unanimous agreement regarding a fare or rate under dispute, the lowest fare or rate in the tariffs of any one of these seven (7) Members would become the specified minimum fare in the table. It was the understanding, however, that

this condition would not apply in the case of cabotage sectors.

M/11 TCA stated that they were prepared to adjust their cargo rates so as to avoid Canadian cargo rates being lower than rates from points south of Canada such as New York. Carriers concerned also agreed to use a 10% discount for round-trip fares from and to Canada and the U. S. regardless of the effect of the domestic 5% discount. American Airlines agreed to specify United States/Mexico fares and rates in resolution form but felt that since they were the only direct air carrier operating competing services between the points concerned, no apparent practical purpose was served in specifying the United States/Mexico fares and rates.

[fol. 4384] —8—

M/12 Resolutions 160/051 and 160/051a will be filed with Governments when the fares and rates tables referred to above are completed.

Closing Fares and Rates in Conference 1

M/13 The FRCS Committee reported that at its meeting in Nicosia there was unanimous agreement in principle to close fares and rates. It was necessary, however, for the Conference to resolve conditions on which Members stated they required agreement before the area could be closed. From statements made by Members present at Bermuda, the following were identified as the essential conditions to be satisfied:

(i) Acceptance of the seven (7) carriers' tariffs as a basic fares and rates table.

(ii) An effective currency resolution.

(iii) A fast escape clause to meet competition.

(iv) Construction rules embodying circuity provisions and the ability to combine fares.

(v) A satisfactory charter resolution.

(vi) Determination of the liability of General Agents.

(vii) A limiting definition for first and tourist class services.

M/14 The above questions were developed and resolved at both individual sessions in Conference 1 and joint sessions of the three Traffic Conferences and are discussed under the appropriate headings of this report.

M/15 In agreeing to close fares and rates in Traffic Conference 1, the interests of unanimity and the desire to establish a stabilized world-wide fares and rates structure influenced Members' final decisions. In the spirit of cooperation, agreements were reached by Members yielding on positions they stated previously that they would accept no compromise.

Fare Level of the North Atlantic

M/16 Several meetings of the North Atlantic Ad Hoc Committee were held to discuss the North Atlantic fare level and attendant problems. The report of this Committee, which was accepted by the Conference, provided for a fare pattern based on a one-way fare between London and New York at U. S. $395, round-trip off-season fare at 1⅓, 17 day special round-trip fare at 1-1/10 and the introduction of an experimental tourist service across the North Atlantic on October 1, 1952.

[fol. 4385] —9—

North Atlantic Tourist Services

M/17 Pan American World Airways' proposal to introduce a tourist service across the Atlantic at U. S. $225 one-way and $405 round-trip during the Fall of 1951, dominated discussions regarding level of fares across the North Atlantic. This proposal, full details of which are given as at Appendix "D", contemplated no increase of the normal one-way fare and the elimination of discounts for off-season transportation.

M/18 Pan American World Airways stated that they could not agree to the closing of fares across the North Atlantic unless Members made definite provision for the introduc-

tion of a tourist class service across the North Atlantic. It was recalled that Pan American World Airways' first proposal to institute tourist services was made at Bermuda in 1948.

M/19 Carriers expressed their willingness to be committed to tourist service but could not agree to the dates suggested by Pan American World Airways. Opposition to the early introduction stemmed from the fact that the majority felt that the whole question required thorough study from political, technical, commercial and economic points of view. They felt that to take action on the dates proposed by Pan American World Airways would be premature and when once committed to tourist class service the carriers could not retract in the event of this service across the Atlantic proving unsuccessful.

M/20 Other proposals, designed to provide a more gradual approach toward the ultimate accomplishment of mass reduced transportation across the North Atlantic, were considered. TWA, suggested a 17 day year-round 1-1/10 round-trip fare in combination with a special student fare to be introduced for application during the summer vacation months. Neither this proposal nor any others of a similar nature were acceptable to Pan American World Airways.

M/21 After much discussion within the Ad Hoc Committee, an agreement which was accepted later by the Traffic Conferences, was drafted. The basic terms of this agreement are as follows:

(i) The normal one-way fare New York to London was raised from $375 to $395.

(ii) The off-season round-trip fare during the months of September 1st to March 31st Eastbound and December 1st to June 30th Westbound, was fixed at 1⅓ the normal one-way fare.

(iii) A 17 day round-trip fare valid for travel during January 1 and March 31, 1952, was fixed at 1-1/10 the normal one-way fare.

(iv) Members may introduce experimental tourist class services on October 1st, 1952 and a long-range tourist service on April 1st, 1953.

[fol. 4386] —10—

(v) The one-way tourist fare between New York and Shannon be not less than $195 and not more than $220.

(vi) A North Atlantic Operators' Committee was created for the purpose of studying, reviewing and recommending action as to both the experimental and long range phases of the tourist service program. Terms of reference of this Committee covered the technical, commercial and economic aspects of this type of service.

(vii) The actual fare of the experimental phase, within the range mentioned in (vi) above, to be agreed on the recommendation of the North Atlantic Operators' Committee by mail vote action to be concluded by October 10th, 1951. When meeting to decide this fare the majority vote shall rule and it was understood that Pan American World Airways would agree to reconsider the range of fares should economic factors make this necessary. In the event of failure of this mail vote, a joint meeting of Traffic Conferences 1 and 2 will be convened for November 13th.

(viii) Prior to the meeting of the North Atlantic Operators' Committee, meetings of cost and technical experts will be held. To facilitate these studies, replies to the North Atlantic Tourist Service Questionnaire, would be made available to the appropriate study groups.

(ix) Failure to agree the level of the one-way tourist fare, or in the event of a Government disapproving the tourist service program in whole or in part, would result in an open rate situation across the North Atlantic.

(x) The North Atlantic Operators' Committee to recommend minimum seat densities for various

aircraft. This recommendation will be made on the basis of study undertaken by carriers' technical representatives and for the guidance of this group, the following densities were suggested at Bermuda:

Aircraft Type	*No. of Seats*
DC-4 M1	48
DC-4	55 to 60
DC-6	60 to 64
L-49	60 to 64
B-377	91

(xi) During the experimental phase, the maximum frequency of service, including extra sections, of each Member across the North Atlantic shall be 4 round-trips per week.

[fol. 4387] —11—

(xii) The North Atlantic Operators' Committee to recommend the scale of charges for meals, drinks, ground transportation and other incidental services.

M/22 When the North Atlantic agreement was presented to the Traffic Conferences the question of combination of tourist class and normal fares was discussed. Carriers were concerned that unless a formula could be established which would limit the tourist service to the gateways, the TC2 fare structure would be destroyed. One suggestion made was that where the tourist class service extended into TC2, combination services be offered at fares that equalize the through-tourist class fares provided that the passenger is not carried on standard service for more than 25% of the journey. This formula was not accepted but the Conferences felt that this proposal should be given further study by the FRCS.

M/23 Agreement was finally reached to hold the tourist fares to the gateways and constructing through fares East of Shannon and Prestwick by combinations using the lowest normal fare for all sectors.

M/24 At the request of El Al an exception was made in the case of Lydda. This Member explained that because of equipment limitations it would be necessary for them to operate tourist class high density seating aircraft over the whole route from New York to Lydda. They could not accept the principle that with such a service they should compete at the same through fare against a combination of tourist class service New York, London or Paris and a first class service from these points to Lydda. To overcome this difficulty, it was agreed to allow El Al to offer an exceptional fare between New York and Lydda, based on a combination of a tourist fare between New York and Shannon and a normal fare between Shannon and Lydda at 25% less. El Al would be permitted to quote this reduced fare until such time as they increase the frequency of their services—standard or tourist class—to three times weekly. During this concessionary period, other Members may offer the same fares between New York and Lydda on tourist services not in excess of two round-trip services per week.

M/25 The above agreements resulted in Resolutions JT12(8)001a, JT12(8)054, JT12(8)155a and JT12(8)180. Eleven Members voted in favor and the following abstained:

American Airlines
Air India International, Ltd.
Aer Lingus Teoranta
British European Airways
British Commonwealth Pacific Airl.
British Overseas Airways Corp.
Braniff International Airways
Central African Airways Corp.
Canadian Pacific Air Lines
Chicago & Southern Airlines
Cyprus Airways Ltd.
IBERIA Compania Mercantil Anonima de Lineas Aereas
National Airlines
Northwest Airlines
Philippine Air Lines
Qantas Empire Airways
Scandinavian Airlines System
Swiss Air Transport Co., Ltd.
Trans-Canada Air Lines
Trans World Airlines
United Airlines

[fol. 4388]

M/26 With reference to the above vote, the following statements were recorded:

British Overseas Airways Corporation

"I would like, if I may, to explain the position of BOAC in respect of this resolution.

"We believe very sincerely that cheap fare facilities must be introduced on the North Atlantic as soon as this can be done. We believe equally sincerely, however, that in introducing these facilities we must avoid both uneconomic operation and equally any general collapse of the existing worldwide rating structure.

"Either of these eventualities can only have a singularly unfortunate effect on both the Members of this Association and ultimately the general public. We shall not be fulfilling our function if we produce chaos.

"During the discussions which have taken place, we have consistently suggested that the Conference should adopt suitable resolutions to ensure that immediate and practical steps should be taken to make a comprehensive study of the whole problem. This study would be directed to solving the outstanding difficulties of which we believe there are many, and permitting the introduction of separate tourist service at the earliest practical moment. It seems to us, however, unwise to determine any definite date for this introduction until further progress has taken place in the industry-wide examination. To avoid penalizing the public while this examination is being made, we feel that there should be an extension of some of the cheap round-trip and off-season fares on normal services. We are already accustomed to use these fares; they do not upset any other rate structures, and they do not make it necessary for transatlantic operators to rush into expensive equipment programmes before having full information available.

"These appear to us to be the sentiments of the great majority of the operators concerned.

"It may appear illogical for BOAC to take this attitude with regard to North Atlantic tourist services and at the same time to be co-sponsor of a paper recommending the introduction of a tourist service between the United Kingdom and South Africa.

"I would merely say that in the case of this particular service, we gave general notice of the intention and the proposed fares at the FRCS in Nicosia; we submitted every ascertainable fact and detailed costs and revenue to the Conference; every precaution was taken to pre-

—13—

[fol. 4389] vent this service upsetting the rest of the structure, and we were ready to adopt other limitations to meet the wishes of other operators. Furthermore, although this proposal had, by its very nature, very much less effect on the general rate system, we do not threaten an open rate situation with all its troubles, if the Conference—in its wisdom—decides not to accept it.

"We still urge that a study of the North Atlantic tourist services should proceed as quickly as possible, regardless of the ultimate fate of these resolutions. I would again emphasise that BOAC is in favor of the introduction of tourist services as quickly as possible, but the proposed resolutions dealing with North Atlantic fares have the following objections.

"It appears extremely unwise to determine a tourist fare within such close brackets for introduction in October 1952; it may well be that this level will prove economically impractical.

"Similarly, no attempt has yet been made to settle completely the repercussive effect of such services, nor to overcome all the known problems.

"There is as yet no agreed definition of a 'tourist service.'

"An experiment conducted during the winter is unlikely to produce reliable data, and it is obviously going to be difficult for Members wishing to participate to convert aircraft during the high season.

"Finally, no arrangements have been included to give improved cheap fare facilities on normal services during the Summer of 1952.

"For the reasons given, therefore, BOAC does not consider that the proposals are really in the best interests of either the public or the industry. As, however, they may represent a compromise which is sufficiently acceptable to prevent an open rate situation, and may ultimately accelerate the introduction of tourist services, we feel our only course is to abstain from voting."

Trans-Canada Air Lines

"TCA wishes to record the following statement in the minutes as to its reasons for abstaining on Resolution JT12(8)(180):

"1. We believe tourist service is both necessary and desirable provided such service is offered to the public

—14—

[fol. 4390] at fares the industry agrees are reasonable and economically sound.

"2. We feel that the fare which has been agreed is not economically sound.

"3. We feel that an unrealistic approach is being made to the problem of providing tourist or second class service and that only after a full-blown study should the service be initially inaugurated.

"4. TCA thinks that as a result of this study just referred to, the proposed relationship between tourist and standard *must be* altered so that the percentage differential will be substantially lower in order to reduce diversionary effect.

"5. In our opinion, the proposed fares cannot be justified on a full-allocated cost basis and this fact will

be evidenced by the IATA Cost Study. In view of this, the experimental period which has been agreed to will hamper our joint efforts to bring about a satisfactory solution to the problem of reaching the potential market at cheaper fares.

"6. In our opinion, alternative proposals featuring special promotional fares calculated to tap a vast new potential market would be preferable and at the same time allow the Member carriers to sample and digest the problems associated with cheaper fares, at no additional expense to the carriers and with a reasonable opportunity to increase their revenue considerably."

Trans World Airlines

"I would like to make a statement for the record in connection with our abstention from the last vote.

"TWA has always endorsed low fares and has taken a leading position in urging promotional fare devices that have been made available in the past.

"The North Atlantic operators were unanimously agreed on the principle of tourist class service but we, and I believe others, were reluctant to set a specified fare and other details of operation including a starting date for such service without an adequate study of the economics of such an operation.

"The need for study is obvious since no one has produced figures showing the estimated profit or loss of any proposed tourist class service or its operating results on a system basis after giving effect to diversion

—15—

[fol. 4391] from standard services or how much additional subsidy from Governments will be required to sustain it.

"Nevertheless from the outset of this Conference, we have stated that we would not attempt to force our individual views on the other transatlantic operators and that we would not oppose the tourist class service if it was the will of the Conference that such a service should be agreed upon at this time."

Scandinavian Airlines System

SAS, in registering their abstention from voting on the North Atlantic tourist service program, wish to record the following statement:

"Mr. Chairman, with all the seriousness and sincerity in my command, I would like to go on record with a short outline of basic reasons why SAS are opposing the proposed tourist class as placed before us by Pan American World Airways in Bermuda, May 7th.

"I am speaking on behalf of my company, SAS, here. Although it is a small carrier, only responsible for some 8% of the total traffic carried across the Atlantic, it is generally acknowledged around this table that it is a sound operator, carrying its traffic in a dependable, regular way and with a high standard of service, probably second to no other carrier. I think it is also known, through our Cost Committees, that we are a low cost operator and I would also like you to rest assured that we conduct our affairs purely on a business and commercial basis. I am not certain whether it is generally known, but it is a fact that we have during the five years of our operations, received no subsidy whatsoever for our North Atlantic service and have yet been able to make a profit including proper allocations for depreciation and development costs. This record, I think, entitles me to defend and explain our attitude.

"I think part of a good defense is attacking the opponent's weak points and, therefore, I will look a little bit into the record of the carrier proposing tourist class.

"But first I would like to say that to my great disappointment we have been spending ten days in Bermuda with one carrier trying, without success nor single support, to convince a compact majority of eleven operators that its idea was to the benefit of the public and the airlines. We are all here as international operators trying to solve our problems by negotiation and com-

[fol. 4392] promise. That is what we call the IATA spirit. The carrier involved has even indicated that due to his Government's interest in tourist class he can see no other solution to this problem—apart from giving way to the majority point of view—than to create an open rate situation.

"It is known to all around this table that the Government agency of this carrier has advised its IATA Members, that although they are interested in the introduction of the tourist class, they have a second thought in case the majority of international carriers are opposed to the introduction of tourist class at present. I hesitate to believe that this means that this carrier's Government will be in agreement with an open rate situation. I do not think that we are entitled to enter into either domestic or international politics, but with the experience of this Government's tremendous effort to create goodwill and cooperation, help and assistance to those who need it, it is difficult to understand such an interpretation by the carrier of this Government's policy.

"Secondly, I would like to underline that as far as we are concerned, we are here just as men of business and to talk business. The carrier, who during this Conference, has singled himself out as not willing to go along with the majority is not exactly representative of what I would call profitable affairs. During the last couple of years, which I have casually investigated and which appear to have been quite profitable years for ourselves and others, this carrier in 1949 in its annual report, has reported a mail pay of $19,000,000 on its Atlantic Division. Out of this, around $9,000,000 have been actually received, the balance still pending appropriate authorities' decisions. If this carrier during 1949 on its Atlantic Division operations (which include North Atlantic, Bermuda, Africa and through to Calcutta, as far as my information goes) had only received the appropriate international mail rate payment (6 gold francs, etc.) on the same proportion of differ-

ent categories of mail as SAS have carried, they would have sustained a loss of around 8.2 million dollars. The equivalent figure for 1950, as far as I can make out, is 6.9 million dollars. The figures can naturally be discussed but the tendency is clear. If one carrier is given such tremendous support by its Government it is easy to understand why such a carrier can involve itself in costly experiments which might ruin carriers who want to carry out their traffic and fulfill their responsibility, without any charge to the taxpayers.

—17—

[fol. 4393] "I have difficulties in understanding that this carrier's government will accept such an experiment if it cannot be proved to be founded on business-like principles and at the same time also implies the effect on others that their sound economic base will be destroyed. I hesitate so much more because this carrier's Government is known during the last years to have made immense efforts to to carry out economic aid to those nations whose carriers are represented around this table. It may be true that this carrier's Government has good reasons for this policy and it may also be true that the same Government has assisted other nations' carriers to create a North Atlantic service through currency measures and economic aid which have allowed the purchase of American aircraft, but I hesitate again in accepting, that this Government —contrary to the previous intentions—now should be willing to possibly ruin the business of the carriers which hitherto have been aided through this Government's policy.

"If political principles like this are involved in our discussions about North Atlantic fare levels, I can as a man of business do nothing better than leave these questions in the hands of those who are more able to deal with them than myself and my company.

"Then I would revert to a discussion of the business in the proposed tourist class service. Firstly I want to deal with the question looked upon as a separate North

Atlantic problem. I will ignore the completely unknown counter-actions which we may have to face from our competitors in the steamship business in the event of the introduction of the tourist class on the North Atlantic. I think I can trustfully leave the aspect of this problem to the imagination of my colleagues around this table. Thereafter, I want to consider for a moment the impact of a tourist class on the North Atlantic on the European rate structure and even the impact on the worldwide route net and fare pattern of other Members.

"The Pan American paper placed before us on May 7 is a very complicated document dealing with a still more complicated problem. We would not think that the carrier intentionally has delayed the presentation of this document until we were all divorced from our headquarters with our files, statistics, and experts, and the views of our managements, but I think it is asking for much if it has been seriously expected that we should be able to discuss the details of the proposal based upon that preliminary paper during this Conference.

—18—

[fol. 4394] "The document is not sufficiently accurate nor complete to imply the element studies and element figures and has not tried to evaluate important aspects of the proposal.

"I will not take up your time with the many facts which I could state here, but just turn to the two important pages of all business, the cost page and the revenue page. On the cost side I want it to be known that this paper has quoted a cost figure less depreciation, which is in itself lower than the cost figure presented by the same carrier in Brussels in February, 1949. This is in spite of the fact that everybody round this table will agree to general increases in operating costs. Even the same carrier has reported a roughly 30% increase in operating costs between February 1949 and February 1951 on their standard operations costs within the IATA Cost Committees.

"Then turning to the revenue side, there has been no attempt in the Pan American study to evaluate the diversion from the normal standard fare traffic. I want you to bear in mind that we have been presented with a factor diversion of at least 65% by the same carrier regarding their 1-1/10th fare traffic experience. On our own operational cost experience with 82 round trips, during one calendar year, using DC-4 tourist class aircraft equipped with 55 seats, the proposed 40% reduced fares will show a net loss of $680,000—or something between ½ and ¾ million dollars—based on 60% load factor and assuming that four out of every ten passengers carried on the tourist service were diverted from the standard services—a diversional factor of 40%. I can vary the figures and diversion factors but the result remains: loss. As I said, this is based upon the experience of a carrier operating far into the black on this section with the know-how of profitable business. You can yourself figure out the results Pan American would achieve with their documented cost figures, operation 365 flights per year or 4-5 times as many as ourselves.

"So far I have concerned myself with purely North Atlantic operations and have made no reference at all to the impact which it is bound to have on European shorthaul operations. We ourselves operate a very considerable network in Europe, but we have had the advantage of access to the proposal and been in a position to make rough and ready calculations as to the effects. Our colleagues in IATA who are not so fortunate are completely in the dark as to the effect of this proposal on their services. If our ideas are indicative—and I am certain they are—many of these carriers will be faced with economic disaster if this proposal is allowed to go forward in its present form. I think this is one of the most important points to bear

—19—

[fol. 4395] in mind before any agreement to the institution of a tourist class is given. Although the proposal purports to contain the North Atlantic tourist

class within gateways, it must be quite obvious to everybody that this is impossible and the extent to which the tourist class will creep on is almost without limit.

"I have always been willing to go along with other carriers in our Conferences and I will continue to do so. But I am not in favor of the introduction of tourist class service according to PAA's unsupported proposal—I hesitate to make a statement in favor of something in the future which is unknown. Therefore, I can not either go along, Mr. Chairman, with your proposal kindly submitted to us tonight, but I would like to say that if necessary we will accept the introduction of a tourist class when time is right and I am willing to discuss, negotiate and accept the view of the majority with regard to such timing. This is our position in this matter and our attitude towards IATA, an association which we like, which we will back and which I hope will continue in the future to the benefit of all of us."

SAS stated that they also joined with TWA and BOAC in regard to the statements made for the records of Conferences 1/2.

Pan American World Airways

"It has been the position of a number of the Members operating North Atlantic services that, while they agree in principle with the introduction of a tourist service across the North Atlantic, they think that the matter should be given more study, before any such service, even an experimental one, should be inaugurated.

"This position is not new. In effect it has been advanced by these Members every time within the last three years that Pan American raised the matter. It was advanced at the meeting of the Conferences in Bermuda in 1948 when Pan American first proposed the tourist service. It was advanced at the meeting of the Ad Hoc Committee of the North Atlantic operators

which met in February of 1949, in Brussels, for the sole purpose of considering a detailed tourist service proposal submitted by Pan American. It was advanced, again, when Pan American raised the matter of its tourist service proposals at the meetings of the Conferences in Nice in May 1949, in Mexico City in November 1949 and in Madrid in May 1950.

"This procrastination has continued in spite of the fact that at the Nice meeting Pan American openly offered to make available to the Members its detailed studies of the tourist service proposals. Only two of the Members availed themselves of this offer.

—20—

[fol. 4396] "In Pan American's opinion for the Conferences further to have deferred a definite tourist service program on the grounds of additional study would have been shortsighted and contrary to the interest of the public and of the Members themselves."

M/27 The following were nominated to represent their respective Conferences on the North Atlantic Operators Committee:

Traffic Conference 1

Mr. C. E. Beard	—	Braniff International
Mr. R. W. Ireland	—	United Air Lines

Traffic Conference 2

Mr. M. Stuart-Shaw	—	Aer Lingus Teoranta
Mr. P. C. F. Lawton	—	British European Airways

Traffic Conference 3

Mr. A. Culbert	—	Northwest Airlines
Mr .B. L. Anderson	—	Philippine Airlines

Mid-Atlantic Fares

M/28 In the absence of a specific recommendation from the FRCS, the Conferences set up a working group to examine the Mid-Atlantic fare structure. The report of the group, which was accepted by the Conferences, provided for a fare pattern as follows:

(i) With the exception of fares to and from Madrid, a general increase of the one-way fares by $20 was

agreed. To remove the inconsistencies existing in the present Mid-Atlantic table, it was necessary, in some cases, to apply greater increases.

(ii) The normal on-season round-trip fares were established at 180% of the one-way fares and off-season round-trip fares at a reduction of $150 over the normal round-trip fares.

(iii) A 17 day fare established at $225 less than on-season round-trip fares was agreed.

(iv) Miami, Nassau, Tampa and West Palm Beach were common-rated at $428 from London with routings via New York or Bermuda-Azores.

M/29 With reference to the fares to and from Madrid, IBERIA was opposed to any increases. AVIANCA, however, suggested that Barranquilla and Caracas should be common-rated. This Member felt that since the mileage

—21—

[fol. 4397] between these two points and Madrid were approximately the same, the present fare differential in favor of Caracas could not be justified. After negotiation between the Members concerned, the Madrid/Caracas fare was raised from $454 to $461.

M/30 Air France notified the Conference of its intention to introduce a service between Paris and Martinique via a more direct route than that at present operated over the Mid-Atlantic. This would have the effect of reducing fares between the Southeastern area of the Caribbean and points in Europe. To allow for this eventuality, the Mid-Atlantic fares agreement included an alternate table of lower fares between certain points to become effective 45 days after a Member notifies the Conference that a service over a more direct route will be inaugurated.

M/31 In view of the fact that the Caribbean area is also served by Members operating via the North Atlantic route, the FRCS had suggested that, as a basis for applying the 15% deviation rule, mileages between points should be specified. This proposal was not acceptable and it was agreed instead to name specific basic routings against fares. Furthermore, it was agreed that when the routing from

Aruba, Barranquilla, Caracas, Curacao, Maracaibo or Port of Spain to points in Conferences 2 or 3 via New York is within 15% of the basic routing, Members would be permitted to quote the same fare via routings over Montreal.

M/32 PAA stated that since some of the routings specified were not the shortest operated as defined in the Construction Resolution JT12(8)014a, they understood that Members may quote the same fare via any routings within 15% deviation of the basic routing.

M/33 Provision was made to enable any Member operating over the Mid-Atlantic route to meet any undercuts arising from the application of combination of fares via the North Atlantic.

M/34 Air France informed the Conferences of its intention of applying a resident fare between Paris-Martinique-Guadeloupe at approximately $395 one-way. This and other cabotage sectors were designated in the fares table as being included "for information only" and that "no other fare shall be used for construction purposes."

M/35 It was the opinion of the majority that a North Atlantic tourist service would have an immediate effect on Mid-Atlantic fares and that it would be unrealistic to suppose that a tourist service across the North Atlantic could be contained by imposing restrictions on advertising and sale of such fares in the Central American and Caribbean traffic generating areas, or by any other means. These carriers felt that they would be compelled to introduce Mid-Atlantic tourist service fare levels despite the economic considerations involved and notwithstanding the fact that because of operational limitations—in particular the long section Azores-Bermuda, high density seating could not be utilized profitably.

[fol. 4398] —22—

M/36 Because of the close relationship between Mid and North Atlantic fares, it was decided to cover the Mid-Atlantic agreements—Resolutions JT12(8)054b and JT12-(8)155b—with a Special Effectiveness Resolution JT12-(8)001f. Under this resolution if, for any reason, the

North Atlantic fare agreement becomes void, any Member operating the Mid-Atlantic route could, upon notice to the Conference, void the Mid-Atlantic fares agreement.

South Atlantic Fares

M/37 The Conferences accepted Resolution JT12(8)054c prepared by a Working Group of South Atlantic operators. On the assumption that a satisfactory currency resolution would be adopted by the Conference, the Group recommended retention, with minor adjustments, of the present fare pattern.

M/38 The Conferences also agreed to renew the Special Spanish Resident fares which, at IBERIA's request, were increased by approximately 19%. Provision was made to enable the Resolution JT12(8)054d passed to become effective on July 1, 1951.

M/39 During discussions in the Working Group, two Members favored Northbound fare reductions of 25% for the reason that with the present rate of exchange for the Argentine peso at 14.03 to U.S. $, the selling fares in that country had reached a point which made sales difficult. There was also a desire to be in a better competitive position, vis-a-vis steamship carriers. Other Members considered that load factors were satisfactory and that no reduction was necessary. With reference to surface competition, Air France, who had been asked by the FRCS to make a survey of the position, informed the Group that as from April 15 steamship companies had increased their fares from Buenos Aires by 15% and recent statistics indicated a diversionary trend of passenger traffic in favor of air.

M/40 A proposal that the present North and Southbound fares between Rio de Janeiro and Europe be equalized by removal of the $90 differential found little support.

M/41 The effect that a possible institution of tourist fares to Europe would have on the South Atlantic fare structure was considered. A rough calculation of fares from South America via North America to Europe compared with South America direct to Europe showed that a tourist

class service from Brazil and Chile to Europe via North America would undercut first class fares from South America direct to Europe by approximately 10% but would not undercut fares from Argentina and Uruguay. At the present level of Southbound fares, practically no undercuts would result. For the time being, therefore, the Conferences considered that the possible effect of North Atlantic tourist class services on the South Atlantic fare structure could be disregarded.

[fol. 4399] —23—

M/42 Resolution JT12(8)164d, governing off-season fares between Europe and South America, was adopted unanimously. This resolution permits off-season fare constructions combining South Atlantic crossings with crossings via the North and Mid-Atlantic routes.

Fares in Conference 2
Europe only

M/43 The FRCS reported that cost estimates submitted by Members justified a 10% overall increase of the fares in Europe. Mail Vote Resolution 200(Mail 17)052 had the effect of increasing those fares in Europe which required adjustment in order to raise fares from Europe to the Middle East.

M/44 Using the mail vote figures as a basis, and taking into account the FRCS recommendations, the European Working Group met in Paris on April 10 and prepared a table of fares. The fare structure recommended to the Conference eliminated the undercuts caused by the mail vote and removed the existing differential fares between Switzerland and Germany/Austria. Several questions which the Working Group were unable to settle were referred to the Conference for action.

M/45 Air France reminded the Conference that at Nicosia they had voiced the opinion that, compared with surface transport, the level of air fares in Europe was too high. Furthermore, to attract the large percentage of passengers in Europe who still travelled by surface means,

they had been considering the introduction of tourist class services in the near future. In the meantime, Air France felt that there was a need for lower fares.

M/46 Specifically, this Member requested a reduction of the fares between France and Switzerland and the removal of the present directional feature of these fares.

M/47 SWISSAIR, who stated that their present load factors were good, believed that the fares were at an economical level and that very little extra traffic would be gained by decreasing fares.

M/48 The Members concerned agreed to accept a compromise proposal which would diminish the prevailing directional differential. The fares from France were kept at approximately the present level but the fares from Switzerland were reduced. Resolution 280/052a, which was adopted, provides that these new fares and also directional fares from Geneva to Amsterdam/Brussels come into force at the same time as the mail vote. Air France and SWISSAIR notified the Conference that it might be necessary for them to use the escape clause if the mail vote fares were disapproved.

[fol. 4400] —24—

M/49 It was agreed that the fares within Germany would not be increased although several Members wished to make upward adjustments. SAS accepted increased fares in Scandinavia but gave notice that they wished to file special 8 day round-trip fares within Scandinavia.

Fares between Europe and Middle East

M/50 The Conference agreed to revalidate, with adjustments to eliminate undercuts, the fares as increased by the mail vote. To permit ALI, using DC3 equipment on their routes within the Middle East, to remain competitive, the Conference granted their request that Class "B" fares be introduced between Rome-Athens and Rome-Beirut.

Fares between Europe and Africa

M/51 Mail Vote 18, together with upward adjustments of fares to East Africa, formed the basis of the fares agreed between Europe and Africa.

M/52 PAA explained that according to their understanding, Resolution 200 (Mail 18)052 would not disturb the existing relationship between fares but would be in the nature of an overall increase. Since the mail vote did disturb the relationship, PAA was obliged to vote negatively.

M/53 BOAC informed the Conference that they were now prepared to increase fares to East Africa and thus restore the balance between East and West African fares. With this assurance and bearing in mind that the period of validity of the fares proposed by Mail Vote 18 was only for three months, PAA withdrew their negative vote.

Tourist Service between Johannesburg and London

M/54 SAA, with BOAC as co-sponsor, submitted full details of the tourist service they wished to introduce between Johannesburg and London.

M/55 Commenting on their proposal, SAA stated that they had no traffic rights between Lydda and London and that they undertook not to institute a tourist service between London and Cairo until tourist class services had been agreed in Europe.

M/56 The proposal envisaged a weekly return service between Johannesburg and London operated by DC4 aircraft with 54 seats. The service was designed to cater solely for through passengers from Johannesburg/Livingstone/Nairobi to Rome/London and to protect other carriers on the route passengers would not be carried at tourist class fares between the intermediate points. According to SAA's estimates, assuming an end-to-end load factor of approximately 64%, the unit cost per seat mile in respect of the tourist service would be about 33⅓% lower than that of the standard class constellation service.

M/57 BOAC drew attention to the fact that unless SAA were permitted to operate this tourist class service, a non-IATA carrier—Pan African Air Charters—would be au-

—25—

[fol. 4401] thorized by the South African Transport Commission to operate a similar service for a five year period. BOAC contended that IATA Members would encounter greater difficulty in competing with such a service operated by a non-IATA Member than if it were operated by SAA. They believed that the case was not parallel to the North Atlantic in that the South African route was an end-to-end route which did not have repercussions on the IATA fare structures beyond the termini. Furthermore, whatever decision was taken by the Conference, a tourist class service would exist; if not operated by South African Airways, then by its non-IATA competitor—Pan African Air Charters.

M/58 SAS believed that it would be difficult to accept SAA's proposal to be effective in October 1951 when the tourist service across the North Atlantic had been postponed until October 1952. They felt that the same reasons which governed the decision taken on the North Atlantic should apply to the South African proposal and that the matter was of such importance that it should be given more complete study. This view was supported by other Members and it was agreed, therefore, to provide for an experimental weekly tourist service to commence on October 1, 1952, and a study program similar to that agreed for the North Atlantic. This decision resulted in Resolution 280/180 with Air India International, BEA, KLM, QEA, SABENA, SAS, TWA recording abstentions. SABENA abstained from voting as they were not aware of their Government's attitude to this tourist service which might affect the fare structure of their operations to and from the Belgian Congo.

Special Fares in Conference 2

M/59 Resolution 280/155 extends the validity of a number of Conference 2 excursion fares at present in force.

M/60 The Conference adopted Resolution 280/155c providing for a special directional round-trip fare Paris-London-Paris proposed by BEA. This Member explained that on the London-Paris route there is a very large directional flow of traffic at the main holiday weekends such as Easter, Whitsun, August Bank Holiday, etc. This traffic necessitates the operation of numerous extra services which carry full loads from London to Paris for the few days before the holiday and return empty, whereas for the few days following the holiday they operate empty from London and return full.

M/61 BEA believed that the return traffic from Paris to London could be created by the introduction of this very low fare for the periods when the flow was heavy in the opposite direction. To prevent diversion of normal traffic, it was agreed that these fares would be valid for 5 days and would be available for sale only in Paris. The effective date of this resolution was set for July 1, 1951.

M/62 Resolution 280/155d specifies the 17 day special round-trip fares between points in Europe agreed by the Conference.

[fol. 4402]

—26—

M/63 When the level of normal fares in Europe was discussed, Air France agreed to increases and to maintaining directional fares to and from Switzerland provided they would be permitted to introduce special round-trip fares between France on the one hand and Switzerland and Italy on the other hand. This Member proposed a special 10 day round-trip fare at 110% of the normal one-way fare.

M/64 It was established that 61% of the traffic on the routes to Switzerland consisted of persons not resident either in Switzerland or France and it was thought that the introduction of these special fares might have a diversionary effect on traffic on other routes.

M/65 After much discussion and negotiation between the Members concerned, agreement was reached. Resolution

280/155h which becomes effective on July 1, 1951, permits 17 day special round-trip fares between France and Switzerland at approximately 125% one-way. Also included in this resolution are agreed 23 day special round-trip fares from Geneva to Amsterdam and Brussels. Sale and advertising of these fares are restricted to the country of commencement of travel.

M/66 Air France's request for reduced round-trip fares between France and Italy was met in part by the adoption of Special Winter Resident Fares—Resolution 280/171, valid until April 30, 1952. These 8 day fares are available only to French and Italian nationals proving permanent residence in France and Italy. Air France notified the Conference that they would request a mail vote to extend the effect of this resolution beyond April 30 as it was their desire to offer these special fares during the whole period of the fares and rates agreement. PAA abstained from voting since these fares were available only to French and Italian citizens.

M/67 Resolution 280/156b which permits Members to establish special one-way night fares during the summer season of 1952 between London and Dublin was agreed unanimously.

M/68 In order to make adequate provision for the special nature of the heavy flow of traffic between Western Europe and the oil fields in the Persian Gulf, the following series of fares were agreed. To prevent IATA agreed or constructed fares being undercut, these fares may be combined only with North Atlantic fares.

(i) Resolution 280/164a—Off-season specified directional return fares commencing from points in Europe good for travel from March 1 to June 30 Eastbound and from October 1 to February 29 Westbound. Sales of these fares are restricted to U.K., U.S.A., Canada, France, Belgium, Switzerland and Netherlands.

(ii) Resolution 280/165—Special round-trip fares at 20% discount on twice the normal one-way fares,

sales being restricted to those countries in TC2 between which the fares apply and North America.

[fol. 4403] —27—

(iii) To encourage vacation traffic from the Persian Gulf to Europe, two 17 day round-trip fare resolutions were agreed. In both resolutions sales are restricted to the Persian Gulf, but whereas tickets sold under Resolution 280/165a are valid for travel only between 1st December and 15th February, those under Resolution 280/165b are available for travel between 15th October and 15th April.

M/69 The following Class "B" (now referred to as "B" fares) in the Middle East were approved. These fares were expressed in specific amounts instead of percentage reductions from the normal fare. These fares were agreed in deference to Middle East regional operators who were unable to accept increases in the local fare structure. In permitting this departure from the accepted method of expressing Class "B" fares and also in agreeing larger differentials than hitherto allowed, the Conference wished to record that they were not thereby creating a precedent.

Abstained.

Fares between Conferences 2 and 3

M/70 Fares between Conferences 2 and 3 based on Resolution JT23(Mail 3)055 with further increases to India/Pakistan/Ceylon, Australia and New Zealand were agreed and resulted in Resolution JT23(8)055.

M/71 These fares were prepared by a Working Group of Conference 2/3 operators who examined and recorded the different views held by Members as to the level of fares.

M/72 Air India International and SAS represented the extremes and the latter explained that in their opinion fare levels should be based on cost, a reasonable profit and what the traffic can bear. Their experience showed that cost of operations to the East was higher than on other trunk routes whilst on the other hand, fares expressed on a mileage basis were lower. In any case, an increase of 20% in fares appeared necessary to compensate for the increase in costs as established by the Costs Committee.

[fol. 4404] —28—

M/73 SAS drew a comparison between sea and air fares and explained that whilst the actual shipping fares were lower, a combination of these fares, the expenses incurred en route and elapsed time presented a different picture.

M/74 Air India International stated their position and explained that owing to a delay their cost figures had not been included in the representative data established by the Cost Committee. Their latest cost figures showed a 7% decrease on the previous figures. This Member requested the Conferences to keep the special commercial considerations prevailing on the Indian sub-Continent in mind. In their opinion an increase in the air fares would divert traffic to surface carriers. They were, however, willing to accept a small increase in fares, but their main concern was the off-season when very little traffic is carried.

M/75 Air India International stated that they had experimented with a three month validity round-trip excursion fare which had not proved successful. On the other

hand, the result of an off-season round-trip fare had been very encouraging, but they felt that to exploit the off-season market to the fullest extent, a supplementary one-way off-season fare was required. By this means they hoped to tap 3 new types of traffic, normal surface traffic travelling first-class, government employees travelling second-class and student traffic between Europe and India.

M/76 The level of off-season one-way fares proposed by Air India International was based on a Bombay-London fare of £100. The 2a carriers were willing to study the proposal but were apprehensive of the effect these fares would have on other sectors, including around-the-world fares. They felt that unless through fares were protected, AII's proposal was unacceptable. A carrier proposed the introduction of a new type ticket with a special validity for the return journey. Under this system a certificate would be issued to the passenger indicating that the return ticket is directionally valid for a specified time but limited to a certain period of the year. This proposal was rejected as being impracticable. Other methods of attacking the problem such as residential qualifications, control through currency restrictions, travel subject to space available and limitation of sales to Indian, Pakistani and Ceylanese nationals were also explored. Finally Members decided to base eligibility to travel on residential status.

M/77 Resolution JT23(8)164e gave effect to the off-season fares agreed by the two Conferences. This resolution set the one-way Bombay—London fare at £115 and the off-season from 1st October to 28th February. QEA and PAL abstained from voting. These Members qualified their abstentions as follows:

(i) "QEA is not in favor of low one-way off-season fares, however restricted, owing to their far-reaching effect on the fare structure. Also in this particular case it has serious repercussions on fares in the immediate area and in our opinion

—29—

[fol. 4405] the net result will be to dilute revenue rather than to increase it. However, in order to

allow AII to try the experiment, we shall abstain from voting, but it is felt that full details should be made available to the next Conference as to the results actually achieved."

(ii) "Philippine Air Lines are opposed to the introduction of this resolution because our traffic records did not show the need for such reduced fares, which will, in the opinion of PAL, only result in dilution of revenue. PAL does not wish, however, to stand in the way of an experiment desired by a carrier whose main traffic stems from sectors directly concerned with the above resolution. Nevertheless, PAL requests that supporting traffic data be produced at the next Conference to justify consideration of these reduced fares should their continuation be desired by any carrier."

M/78 PAL also abstained from voting on Resolution JT23(8)155g for the same reasons as given above. This resolution was proposed by Air India International and permits Members to offer Special Christmas 17 day round-trip fares at 110% of the normal one-way for travel commencing in India, Pakistan and Ceylon to points in Europe. Air India International maintained that there is a demand for these fares amongst European residents in India, Pakistan and Ceylon wishing to spend the Christmas holidays in Europe.

London-Sydney Fares

M/79 Three carriers were in favor of an increase in the London-Sydney fare, two wished to maintain the status quo.

M/80 BOAC and QEA qualified their position by stating that competition from shipping companies is extremely acute on this route and an increase would divert traffic to surface carriers offering transportation at substantially lower fares; moreover, the latter, who were scheduled to put new ships in service, had no intention of increasing their fares.

M/81 PAA felt that the traffic referred to by BOAC and QEA was essentially of a round-trip nature and suggested an increase of the one-way fare, but retaining the present round-trip level by a special round-trip fares. This suggestion found no support.

M/82 After many proposals were considered, BOAC and QEA, supported by the majority, expressed their willingness to agree on an increase to £280 of the London-Sydney Eastabout fare, provided the fare via the Western Hemisphere is fixed at a higher level of £290. PAA, although accepting the proposal as a compromise solution, felt that the £10 differential was disproportionate to the difference in mileage and contrary to the principles applied in the construction of fares.

—30—

[fol. 4406]

M/83 Other fares, related to the London-Sydney fares, were agreed as follows:

London—Wellington/Auckland £285 (both directions)

London—Noumea £290.

Fare Level in Conference 3

M/84 Except for small upward adjustments to fares from India/Pakistan to Siam/Hong Kong/Philippines/Japan, fares at levels substantially the same as those provided for in the recent Mail Vote Resolution 300(Mail 2)053, were agreed. Additionally, the sectors not affected by the mail vote were increased.

M/85 TEAL abstained from voting on the fares from Sydney to Nandi/Suva via Auckland. Nandi and Suva were common-rated at Sh. 1100, whereas TEAL felt that the Sydney-Suva fare should be Sh. 60 lower than the Nandi fare.

M/86 The Conference accepted Air India International's proposal to increase fares between India, Pakistan and Ceylon and to maintain the principle of differential trunk and regional service fare levels. Resolution 370 053 also provides for a reduction of the fares between India,

Pakistan and Ceylon, contingent upon lower fares being applied by any regional operator.

Special Fares in Conference 3

M/87 Resolution 370/155 extends the validity of Conference 3 excursion fares.

M/88 The Common Interest Group Travel Resolution between Australia and New Zealand was re-adopted. At TEAL's request, Resolution 370/158 reduces the number of passengers constituting a group to ten.

M/89 Resolution 370/164 reintroduces off-season fares between Sydney and Singapore and also extends off-season facilities to cover traffic between Singapore and Auckland/Wellington.

M/90 Resident fares between Colombo and Singapore were revalidated for another year, as at Resolution 370/171a.

Fares between Conferences 3 and 1
Central and North Pacific fares

M/91 Except for increases from Singapore to the West Coast set at $780 direct and $835 via Sydney, the fare levels were not changed.

M/92 The Conferences agreed to specify fares between the West Coast gateway points and Bangkok, Delhi and Karachi but not to Calcutta. TWA opposed the inclusion of these fares since they felt that between India and North

—31—

[fol. 4407] America fares should be constructed over the Atlantic gateway points. They agreed, however, to withdraw their objection on the condition that transpacific fares to India are constructed over the Pacific gateway points and not equalized with fares constructed over the Atlantic.

M/93 PAA stated that the distance curve had not been used for the construction of transpacific fares and considered that fares via the Pacific would not undercut fares via the Atlantic.

South Pacific Fares

M/94 In view of the increase in the fare from London to Sydney, BCPA and CPAL recommended an increase between the Canadian and U.S. West Coast points on the one hand and Australia and New Zealand on the other. They suggested an upward adjustment of 8% but would agree to a smaller increase.

M/95 PAA did not desire any increase and since no agreement could be reached, it was decided to maintain the status quo.

M/96 Resolution JT31(8)056 reflects the fare levels between Conferences 3 and 1.

Around-the-World Fares—Resolution 154a

M/97 In arriving at a solution to the problem of around-the-world fares, which has been a subject of disagreement since Mexico, two schools of thought had to be reconciled. On the one hand, Members interested primarily in encouraging certain markets, especially those in the Western Hemisphere, stressed the advantages of an agreed specified fare from all points of origin. Opposed to this, other Members maintained that they would, as a consequence, lose revenue by charging less than if the circle-trip construction principles were used to compute fares.

M/98 In the final agreement reached, the Conferences, acting on the recommendation of a Working Group, decided in favor of constructing around-the-world fares by the application of the circle-trip construction rule. However, to a certain extent the fixed price feature from on-line points in North America was retained. This was made possible by Members agreeing to apply the full amount of the North American sector of the journey regardless of the point of origin.

M/99 In Resolution 154a, which was adopted unanimously, fares from U. S and Canadian points are constructed on the basis of one-half the lowest round-trip fare between point of exit from and entry into North America plus one-half the sum of the lowest on-season round-trip of the

portion of the journey travelled outside the U. S. and Canada. The fare for trips originating outside Continental North America is a summation of the lowest through round-trip on-season fares from the point of commencement of the trip. The resolution limits construction to the use of the through fares, including jointly published through fares, as published by the Member performing the transportation, and advantage cannot be taken of other fares published by a carrier not performing the carriage.

[fol. 4408] —32—

M/100 Resolution 154, defining around-the-world trips, as distinct from circle-trips, was accepted by all Conferences.

Relationship between London and Paris—Transatlantic and Eastern Hemisphere Traffic

M/101 Air France explained that when the relationship between London and Paris in conjunction with transatlantic and Eastern Hemisphere traffic was originally discussed some 5 years ago, consideration was given in the first place to traffic between U. S. and Western Europe only. Circumstances have since changed and much of the traffic now proceeds beyond Europe. The present differential of $20 for transatlantic traffic was held to be unfair when related to the prevailing rate per mile over the North Atlantic route. Air France proposed a reduction to $14.

M/102 Although there was sympathy for the point of view expressed by Air France, the Conferences were unable to agree to this adjustment since it would have the effect of disturbing the North Atlantic fare structure. In this connection the question arose as to whether the difference of $6 should be added to the London—New York fare, should be deducted from the Paris fare or should be divided between the two fares. There was considerable opposition to further increases in the New York/London fare which traditionally set the transatlantic level and which had already been agreed at $395. There was also considerable opposition to reducing the Paris fare by $6 as this would in turn reduce the Amsterdam, Brussels and Scandinavian fares. For the same reasons, Members were opposed to

splitting the difference. In view of the importance of obtaining agreement at this meeting, Air France accepted the present differential on the understanding that their proposal would be accepted at the next Conference.

Possible effect of Cabotage fares on the IATA fare Structure

M/103 The FRCS at Nicosia had given careful study to this question and had suggested two methods to prevent extended use of special cabotage fares undermining the IATA fare structure.

M/104 One method proposed that in the fare tables of fares affected by cabotage sectors should be identified and that in the event of these being changed by the cabotage carrier during the period of the fare agreement, other Members would be permitted to adjust the other fares affected by the alteration. The cabotage carrier should not have the power to protest these changes.

M/105 Alternatively, it was suggested that the Conferences resolve that all carriers draw the attention of their governments to the desirability of giving maximum regard to the effect on the international rate structure of any cabotage fare of rate alterations. Carriers themselves would undertake formally to continue to observe the policy already followed by which every effort is made to limit the effect of cabotage fares and rates on adjacent international points. Specifically, carriers should undertake to ensure that cabotage fares and rates are governed where necessary by imposing conditions such as residential qualifications,

—33—

[fol. 4409] proof of nationality, short period return limitations, etc. A great deal of experience in the administration of such precautionary measures has already been obtained by many companies and these Members believed that an exchange of information and a comparison of methods will show that the elements of an entirely satisfactory means of control exist.

M/106 Supporters of this suggestion maintained that it was hardly practicable for the carriers responsible for the

cabotage sectors to bind themselves not to alter the cabotage fares and rates between Conferences without Conference action because governments may direct changes and carriers cannot themselves place limitations on the freedom of action of their governments. Nevertheless, they believed that it would be possible to agree on the basis of a Recommended Practice that unless exceptional circumstances arose, all other interested carriers would be given 30 days notice of any contemplated cabotage sector changes.

M/107 PAA considered that the two methods represented opposite extremes and that neither was satisfactory. This Member proposed that all cabotage fares be included in IATA rate structures as agreed specified fares.

M/108 BOAC, Air France and SABENA were unable to agree to the PAA proposal. BOAC stated that it has been their policy, where operating over routes regarded as cabotages by their government, to avoid dislocation of the international fare and rate structure. This had been done voluntarily and they had hitherto refrained from making changes except in order to conform with governmental policy or where domestic national considerations dictated the necessity for making changes. Air France stated that they regretted that they could not agree to the proposal since traffic within the French Union was more important to them than other international traffic. The French Government had no statutory control over the fares of other air lines operating within the French Union but had complete control over the fares of Air France. It would be quite impossible for this Member to relinquish their rights to alter fares on their cabotage sectors as proposed.

M/109 The Conferences were unable to agree on any of the various proposals made. It was decided, therefore, to continue the present policy of specifying cabotage sectors in fares and rates agreements for construction purposes only.

Duration of Fare and Rate agreements

M/110 With the exception of the North Atlantic and TC1 rate agreements for which special escape clause provisions

were made, fare and rate agreements were established for a period of 12 months beginning October 1st, 1951, with the proviso that notice of rescission of approval can be given by any one carrier on or before October 9th, 1951 and such notice of rescission to take effect for the period following March 31st, 1952.

[fol. 4410] —34—

Rate Level in Conference 1

M/111 The level of rates in the tariffs of seven Members (Braniff, C & S, Eastern, National, PAA, Panagra, TCA) were adopted as the basis on which rates in Conference 1 were to be agreed. A draft rates table was prepared but time did not permit Members to eliminate the discrepancies contained in the draft. The Conference instructed the FRCS to meet in New York in June to finalize the table and ruled that in the absence of unanimous agreement on any rate, the lowest rate appearing in the tariff of any one of the seven Members would become the minimum specified rate in the table.

Rate Level over the North Atlantic

M/112 The Conferences agreed to increase basic cargo rates by 10%.

Rate Level over the Mid-Atlantic

M/113 The present Mid-Atlantic specified rates were increased approximately 10% with rates to additional interior points in Conference 1 being included in the specified table.

Rate Level over the South Atlantic

M/114 Agreement was reached to increase South Atlantic rates by 10%.

Rate Level in Conference 2

M/115 Rates within Europe were increased approximately 10% except in those cases where the Conferences felt that certain sectors could not absorb such an increase without materially affecting the traffic flow.

M/116 The Chairman of the FRCS reported that when preparing the European rates table, KLM had submitted a list of the routes over which they did not desire to see increases. This list included nearly all the routes they operate in Europe which, in view of the importance of this Member's network, would have prohibited the application of an overall 10% increase in European cargo rates. KLM were of the opinion that an increase would result in more commodity rates being filed. To overcome KLM's apprehension it was agreed that all commodity rates at present in effect would expire with the resolution. They would then have to be refiled, and the Board was directed by the Conference to increase the net revenue available from commodity rates and to limit the number of rates to be accepted.

M/117 A general commodity rate for consignments of over 500 kgs. at the present rate of Shs. 1 was agreed for the Frankfurt/Berlin and the Nuremburg/Frankfurt/Munich/Berlin routes.

M/118 Eastbound rates to Middle East were increased by 10% above the level agreed in Mail Vote 20 but Westbound rates were left unchanged. PAA, TWA and SAS were

—35—

[fol. 4411] opposed to the principle of directional rates and believed that the Commodity Rates Board should be used to cover directional rates.

M/119 SAS drew attention to the fact that rates from Lydda to points in Scandinavia were extremely high compared with rates to other European points. They were prepared to accept this relationship and not to decrease rates to Scandinavian points if it were possible to file a commodity rate of Shs. 4/3 for textiles from Lydda to Copenhagen. This Member stated that they were losing considerable traffic because shipments were being despatched from Lydda to points in Europe—notably Zurich—and then carrier to destination by truck at very low rates. Members agreed that if SAS filed a commodity rate as suggested it would be given sympathetic consideration.

M/120 Cyprus Airways were opposed to any increases in the cargo rates in the Middle East or between the Middle East and European gateways.

M/121 A 10% increase Southbound and no change Northbound was agreed for the Europe-Africa cargo rates.

Rate Level between Conferences 2 and 3

M/122 Rates between Conferences 2 and 3 were increased in the Eastbound direction only from 5% to 15%.

M/123 The Conferences agreed to add cargo rates between Auckland and London to Resolutions JT23(8)055 and JT123(6)057 at Shs. 40.25 Southbound and Shs. 27.92 Northbound.

Rates within Conference 3

M/124 With certain adjustments to eliminate undercuts, the rates within Conference 3 were maintained at the present level.

M/125 Air India International had recommended a 25% increase in the regional cargo rates. This Member stated that they intended bringing the matter up again at the next Conference and in the meantime requested other Members to study the possibility of increasing their rates or alternatively to discontinue quantity rebates.

Rates between Conferences 3 and 1

M/126 With the exception of adju..nents to eliminate undercuts, the existing level of rates was maintained.

Construction Rules for Passenger Fares and Cargo Rates—Resolutions 014a and 014b

M/127 Mr. Bareh, Chairman of the Ad Hoc Committee set up by the FRCS at Nicosia to study questions connected with construction of fares and rates, presented a comprehensive report on the subject.

M/128 Mr. Barch recalled that at the Madrid meeting, two draft resolutions were submitted to the Conferences. The first was an elaboration of an existing contruction resolution and the other dealt with indirect routings and introduced several far-reaching principles. Although these proposals were discussed at great length, the Conferences were unable to accept them and they were referred back to the composite FRCS for further study and clarification.

M/129 The FRCS at Nicosia attacked the problem by drawing up a detailed questionnaire and appointed a committee under Mr. Barch as Chairman to analyse the results. For want of time, the committee was unable to finish its work at Nicosia and it was arranged therefore that the Chairman, in collaboration with the LDO, would make a complete analysis and prepare a report for submission to the Conferences.

M/130 On the basis of studies made, the many difficulties and various principles involved in formulating construction rules were segregated under two headings as follows:

(i) Those principles on which there was unanimous or nearly unanimous agreement.

(ii) Those principles on which there was a clear division of opinion.

M/131 The report also discussed the generally accepted fundamental principles of IATA rate-making which, in the opinion of the committee, form an integral part of construction rules to make these sound and workable. Briefly, these principles were identified as follows:

(i) *Definitions*

An agreed basic terminology was regarded as a first essential. In the past it had been found useful to classify all rates set out definitely in a Conference resolution as "specified" and those established between meetings as "constructed." A "normal" fare is regarded as the full fare charged for a regular or standard service whilst a "special"

fare denotes a reduced fare based on some limitation of service, period of validity, class of persons eligible, type of aircraft, etc.

(ii) *Establishment of fares and rates at Conference meetings*

One of the principal functions of a Conference meeting is to agree fares and rates. Those agreed as normal are specified in the 050 series of resolutions and any special fares are specified in the 150 series of resolutions.

—37—

[fol. 4413]

Experience has shown that every fare between two points must be specified in relation to a particular route, otherwise it would be difficult if not impossible to apply construction principles such as the indirect routing rule.

Whilst it is axiomatic that at meetings Conferences must have complete freedom to take whatever action is considered necessary with regard to fares and rates, nevertheless, certain procedures (Recommended Practice 1014) have been established and are followed as closely as practicable.

Agreed specified fares and rates may be either higher, lower or equivalent to the amount that would be derived from the direct application of construction principles. If a fare or rate is made higher, it is essential that it be identified or "flagged" as not being subject to any between-Conference construction rules, otherwise after termination of a meeting, these rules would immediately unsettle the higher agreed fare or rate. Similarly, those fares or rates established in amounts equal to those obtained by the application of normal construction principles must also be "flagged."

(iii) *Construction of Fares and Rates between Conference meetings*

The IATA rate-making machinery attempts to reach a practicable compromise between two conflicting principles, namely stability and flexibility. Stability is obtained by specifying the maximum number of fares and rates at Conference meetings and these may not be changed until they expire. Members look to the between-Conference construction rules for flexibility. Greater stability is achieved by either flagging a great many key sectors or by making the between-Conference construction rules severely restrictive. Conversely, a higher degree of flexibility is obtained by minimizing the number of flagged fares and rates or by making a construction resolution less restrictive.

(iv) *Basic Construction Principles*

Construction rules have been sufficiently flexible to enable Members to make between-Conference adjustments in order to meet competition from any scheduled air carrier. It has also been the practice to establish a floor, below which Members may not go, determined by any one of the three principles, namely, the "lowest combination principle", "more distant point principle" and the "indirect routing principle."

[fol. 4414] —38—

The construction rule is worded so that a Member may apply whichever one of these principles is the most favorable (the lowest). In addition to these basic principles, the construction rule should deal with new routes, combination of different types of fares, notice of newly constructed fares, basic currency, and what shall be done when sectional fares are increased between Conferences.

M/132 In order to finalize their recommendation to the Conference, the Ad Hoc Committee submitted a list of policy matters requiring Conference decision and on the basis of such decisions construction resolutions for passen-

gers and cargo were drafted. For the sake of clarity, examples and diagrams were included wherever appropriate and the construction rules were dealt with in the following manner:

Para. (1) lists series of agreed definitions.

Para. (2) explains 3 basic principles—"lowest combination," "more distant point" and "indirect route."

Para. (3) reflects the Conferences' decision with respect to the "higher intermediate fares" or "backhaul principle."

Para. (4) establishes the method of constructing fares over new routes in a manner which protects existing specified or constructed fares.

Para. (5) defines the procedure to be followed by a Member constructing, between Conferences, a fare lower than an existing IATA specified or constructed fare.

Para. (6) defines the procedure to be followed to effect an upward adjustment of a specified or constructed fare in cases where the sectional fare over which the through fare has been constructed is increased by any Member.

Para. (7) establishes the rule that special fares may not be combined with other special or normal fares unless expressly authorized by the appropriate fare resolution.

Para. (8) reflects the recommendation made by the Traffic Committee with respect to the combination of tourist and normal fares.

Para. (9) explains the purpose of proportional fares and ensures that these fares shall not be used to circumvent or defeat the agreed principles of construction.

—30—

[fol. 4415]

Para. (10) stipulates that all fares and rates shall be constructed initially in the basic currency of the Conference.

Para. (11) establishes the date on which all existing fares other than specified fares must conform with the construction resolution.

Para. (12) provides that any fares constructed between Conferences are subject to subsequent action by the Traffic Conference.

M/133 In presenting the draft resolution for the construction of passenger fares, the LDO explained that it represented the result of extensive study and experience gained by Members over a period of years. With reference to paragraph (3) dealing with higher intermediate fares, SAA felt that since no attempt had been made to control the lim of backhaul, some additional words should be added in order that carriers could specify points where they did not wish the backhaul principle to apply. This view was not supported since the rule as set out in the resolution had general acceptance and, furthermore, it was recognized that any particular situation could be protected in a Conference fare agreement.

M/134 PAA, whilst they did not object in principle to the exception made in paragraph 3 where a portion of the indirect fare is in U.S. and Canada, felt that the resolution should not give special privilege to any Member or area. In their opinion, adjustments of a similar nature are frequently necessary on domestic sectors in several parts of the world where cities of iimportance are located fairly close together. This Member suggested an amendment to the resolution enabling the exception to be applied in other domestic areas. This was not agreed.

M/135 A further suggestion made by PAA that, to avoid confusion, the term "regular fare" be substituted for "normal fare" was not accepted.

M/136 The passenger construction rules Resolution 014a recommended by the Ad Hoc Committee were accepted by Traffic Conferences 2 and 3 and all joint meetings.

[Handwritten notation—Minutes—Bermuda—May 8-28, 1951]

M/137 With reference to the position in Traffic Conference 1, Members decided that it would be unrealistic during this initial period of closing of fares and rates for the Conference to impose stringent construction rules. It was agreed, therefore, to adopt the recommended passenger construction resolution with certain modifications. These were:

(i) Deletion of the indirect route or 15% deviation rule.

(ii) Deletion of the higher intermediate fare or backhaul rule.

(iii) That fares established between Conferences should not be subject to the right of protest.

—40—

[fol. 4416]

(iv) That although the resolution becomes effective on October 1, 1951, Members would be given until January 1, 1952 to adjust any fares other than those specified in the agreed fares table, introduced before October 1, 1951 to conform with the resolution.

M/138 The Conferences agreed that where appropriate, the provisions of the construction rules for passenger fares should be applied for the construction of cargo rates. Certain principles differed however. It was the opinion of the Conferences that a rate could be met over an indirect route. However, if the indirect route exceeded the direct route by more than 15%, the rate via the indirect route could not be altered although carriage may take place via the indirect route at the same rate. In other words, cargo destined to a farther point may be carried via an indirect route through a higher rated area.

M/139 Another important question concerned the combination of special and normal cargo rates. The Conferences were of the opinion that IATA general commodity rates

may be combined with domestic rates or other IATA general commodity rates, but unless expressly authorized by the appropriate specific commodity rate or class rate resolution, these should not be combined with any specific commodity or class rate to produce lower through rates.

M/140 The above decisions were reflected in resolutions agreed by the Traffic Conferences and joint meetings. Resolution 160/014b adopted by Traffic Conference 1 modified the resolution accepted by the other Traffic Conferences to to the extent described in paragraph M/137 above.

M/141 Members congratulated Messrs. Barch and Sheehan on the excellent results of their studies.

Meeting Special Fares in other Areas—Resolution 014c

M/142 Joint meetings 23, 31 and 123 accepted an amendment to the present resolution to cover student and tourist fares. Basically this resolution permits carriers operating the Pacific to take account of discounted fares on routes across the North Atlantic as they might affect traffic moving between the Far East and the Western hemisphere.

Special Construction Rule—Directional Fares and Rates—Resolution 014d

M/143 Traffic Conference 2 adopted Resolution 280/014d governing the construction of fares where directional fares are involved. The resolution applies to Europe only.

Special Canadian Construction Rule—Resolution 014e

M/144 TCA proposed that paragraph 8(a) of Resolution 014a be amended by the addition of the words "except that this paragraph should not apply to constructions to and

[fol. 4417] from the U. S. and Canada." This Member referred to previous discussions when TCA stated that their acceptance of the North Atlantic fares was conditional upon their right to take tourist fares into the domestic area where no tourist service is operated

M/145 The Conferences felt that a separate resolution should be adopted to cover TCA's point. PAA suggested that an exception could be made by specifying the London/Vancouver fare. TCA, however, opposed this as they did not wish to be held to a specified fare level.

M/146 PAA, supported by NWA, stated that they were not in favor of a resolution making it possible for a carrier to charge a fare to and from Vancouver based on the sum of the Seattle/New York coach fare plus the New York overseas first class fare and to provide first class service between origin and destination. It was suggested that if TCA wished to quote a tourist fare for the transcontinental portion of the journey, the solution would be for this Member to introduce a coach service.

M/147 Resolutions JT12(8)014e and JT123(6)014e which were adopted, represent a compromise limiting the applicability of the special construction rule to routings via Montreal. This resolution also contains a protest feature based on 50% of the carriers concerned and provision is made that the resolution will be rescinded if and when TCA introduce a transcontinental tourist service in Canada.

Advertising and Combinations of Special Fares

M/148 The FRCS meeting at Nicosia made an analysis of the combination provisions of existing resolutions and recommended inclusion in the construction rules of a clause which would preclude, in general, the combination of special and normal fares. The FRCS further suggested various methods of enforcing a "no combination" rule.

M/149 Whereas the Conferences accepted the proposal to incorporate a "no combination" rule in the construction resolution, it did not consider it practicable to adopt a further resolution covering the advertising of special fares. As far as possible, this matter is covered in the existing resolutions on special fares. It was felt that it is virtually impossible to prohibit insertion of special fares in Members' tariffs, timetable and in official guides and that the advertisement of fares in national and international newspapers and periodicals, which Members must have the right

to continue, cannot be controlled in such a manner as to prevent their appearance in print in a country other than those designated.

M 150 With reference to the recommendation made by the FRCS that action be taken to explain to agents the "no combination rule" and the reason for it, it was agreed that the Agency Committees of the Traffic Conferences prepare a letter on this subject for dispatch to all IATA approved agents. By this means, agents should be advised that infringements of these regulations constitute a violation of their Sales Agency Agreement and also if a passenger

—42—

[fol. 4418] misses a connection regarding two or more fares in combination, he may be charged a "no show charge" at the point of connection. The FRCS Committee was requested to continue study of the question of the combination of fares and in particular to examine the possibility and desirability of applying residential qualifications to all special fares.

Advertising and Ticketing of Tourist Fares—Resolution 120

M 151 At Bermuda, the Traffic Committee was requested to study the combination of normal fares and tourist class fares and also the problem of competition between fares based wholly upon normal service and those based wholly or in part on tourist service. With reference to the latter question, the Traffic Committee recommended the adoption of a resolution providing that all advertising and promotional material for journeys involving in whole or in part tourist fares should make it clear to the public that a tourist service is involved. It was further suggested that on the front cover of a ticket sold in connection with a fare wholly or partly tourist, the word "tourist" should be printed or rubber stamped.

M 152 This proposal was accepted by all Conferences and joint meetings as at Resolution 120 with the addition of the provision that for the purpose of this resolution the term "tourist" includes Class B and coach fares.

Accumulation of Discounts

M 153 The Conferences agreed the following principles recommended by the FRCS:

(i) That discounts allowed under Resolution 158 (Common Interest Group Travel) should apply only to normal on-season and off-season fares and that off-season fares should be taken to include off-peak, off-hour and Special Night Fares.

(ii) That children's and infants' discounts be cumulative with any Special Fares.

(iii) That the 25% discount in Resolution 268 810e could only be allowed on the normal through one-way fare.

M 154 With reference to the 50% discounts permitted for tour conductors in Resolution 204, Conferences could not accept the FRCS view and agreed that the discount should not be applicable against the normal one-way fare, but against the fare applicable to the tour.

M 155 The FRCS was requested to give further study to the question of accumulation of discounts.

[fol. 4419] —43—

Conversion Rates—Resolution 021a

M 156 Mr. de Murias, Chairman of the Conversion Rates Ad Hoc Committee explained that the draft prepared by the FRCS Committee does not depart materially from the existing principles except insofar as it provides that the rates of exchange in Resolution 021b shall be used to convert from published fares to selling rates. Most of the other changes were made either as a result of this change, or to provide solutions to the specific problems raised by Members.

M 157 For Conference 1, it appeared necessary to make the resolution considerably more restrictive in order to minimize the effect of the large spread between official rates and free market rates for certain currencies in the Western Hemisphere. For instance, the draft resolution

recommended for adoption by Conference 1 goes as far as possible in restricting the acceptance of currencies at an undesirable exchange rate for sales made in the currency of the country of sale. The device employed was to require that other sales be made in Canadian or U. S. dollars.

M/158 The draft submitted for Conferences 2 and 3 were accepted as at Resolutions 280 021a and 370 021a. Conference 1 adopted Resolution 160 021a as drafted, with an amendment permitting British subjects in Argentine to purchase tickets in sterling for transportation from this country to Europe. Braniff abstained from voting in Conference 1.

Conversion Rate Table—Resolution 021b

M/159 Conferences agreed, with certain changes, the table of conversion rates prepared by a Working Group.

Rounding-Off and Application of Discounts—Resolution 023

M/160 The Conferences considered the draft submitted by the FRCS which introduced a formula for the rounding-off from published to selling fares and rates. This formula uses a numerical factor designed to eliminate one or more rounding-off steps.

M/161 A new section (2c) was added to provide for handling of minimum value charges, and value surcharges. The new draft elaborated the method of rounding-off prorates by the addition of the prorate provisions covered in Resolution 017. The FRCS reported that the reason for the numerical factor formula was due to the shortcomings of the present resolution. Three round-ups are required under the existing method before final rate in pounds(lbs.) is obtained, and this gives rise to a high percentage of cargo rates being approximately one cent higher per pound when converted from a currency other than the basic currency. The proposed resolution is aimed at avoiding these three round-ups and reduces the calculating time and improves accuracy by permitting the establishment of consistent numerical factors in calculating machines.

[fol. 4420] 44

M 162 There was opposition to the new proposal being applicable to passenger traffic as it did not result in exact round-trip fares of 180% of the one-way fare. It was agreed, therefore, to adopt the ERCS proposal for cargo and excess baggage, but to retain the present method in respect to passenger traffic.

M 163 It was the understanding of the Conferences that under Paragraph 1 of the present Resolution 023, that when using fares quoted by a non-IATA source in local currency other than dollars for £(Sterling), it would be correct to convert the through one-way fare into the IATA basic currency and then apply the round-trip discount and round-off.

Meeting Rates and Practices in Traffic Conference 1— Resolution 150/115

M 164 Braniff had stated that they could not agree to the closing of fares and rates in Traffic Conference 1 unless they were permitted under a Conference resolution to meet, with a minimum delay, any competitive situation arising from action by either a non-IATA or an IATA air carrier.

M 165 Braniff submitted a draft resolution for consideration by the Conference. With reference to the paragraphs of this draft resolution which concerned meeting competition from IATA carriers, the majority considered that Braniff's proposal, which virtually allowed the carrier to take the law into their own hands, was a radical departure from the principles as set forth in the Conference Provisions. It was felt that it would not be proper to introduce an additional and novel method of enforcement before the present machinery had been tested. The suggestion made by Braniff might give the impression that Members already considered the enforcement machinery as already created inadequate.

M 166 Braniff stated that they had foreseen the very same objections voiced by the majority, but they considered it essential to provide for a fast escape clause on the lines

of their proposal if fares and rates were to be closed. This Member was willing, however, to meet the Conference's view by extending the escape clause from 30 days to 60 days and in this way allow sufficient time to determine the effectiveness of the present enforcement machinery for giving relief to carriers injured by unfair competition.

M/167 In view of the peculiar situation connected with the closing of Conference 1-fares and rates, Braniff's proposal was accepted in redrafted form as at Resolution 160/115.

Meeting Non-IATA Competition in the Middle East — Resolution 280/115

M/168 The FRCS Committee drew attention to the very serious situation in the Middle East where in a number of instances local operators have been compelled to reduce their fares in order to meet non-IATA competition. With short distance operations and seasonal traffic, the ability of local operators to hold on in the face of rate cutting by non-IATA carriers is very much less than in the case of the trunk route operators. The non-IATA carriers in the

—45—

[fol. 4421] area use the same type of equipment as the IATA local operators and, therefore, the latter are more affected than the trunk line operators using superior equipment.

M/169 Local IATA operators are unable to wait for normal Conference action and, as a solution, the FRCS recommended the adoption of a resolution which would permit greater flexibility than can at present be given by annual Conference meetings and the mail vote procedure.

M/170 The draft resolution contained a protest clause which would protect all carriers as much as does a mail vote. The main difference between fares being put into effect on the basis of the recommended resolution as compared to a mail vote lies in speedy action due to simpler machinery which avoids the complicated procedure of return ballots.

M/171 Traffic Conference 2 accepted the recommendation made by the FRCS as at Resolution 28t 115b with certain

amendments proposed by Members. The protest period in paragraph 3 was reduced from 30 to 20 days and provision was made for the fare to become effective 50 days from the date of original notice. Malta, Cyrenaica and Tripolitania were added to paragraph 8(a) and Italy was added to paragraph 8(b).

India/Africa

M 172 Air India International requested that a non IATA competition resolution be adopted to apply for traffic between Conferences 2 and 3 to cover their routte from India and Pakistan to Aden and Kenya. This was agreed and Resolution JT23(8)115 was adopted.

"B" Fares in the Middle East—Resolution 280/172k

M 173 The FRCS recommended that there should be a clear distinction between "B" fares as established in the Middle East and tourist and other reduced fares which are principally of promotional value. The Committee considered that the introduction of "B" fares should be only for the purpose of equalizing the competitive difference between various types of aircraft used by Members serving the same or similar points, so that Members operating inferior equipment have the opportunity of participating in the traffic. This description was included in the draft resolution submitted to the Conference.

M 174 The FRCS also considered that the problem of non-IATA competition in the Middle East should be dealt with separately under another resolution. Furthermore, it was recommended that a "B" fare should not be regarded as a specified fare but as an agreed percentage reduction to the normal or any other special fares applicable to be applied by a carrier operating inferior equipment.

M 175 With minor changes the Conference accepted the FRCS draft resolution. Malta, Tripolitania, Cyrenaica were added to paragraph 5(a). ALI suggested that Italy also be added, but in view of strong objection, withdrew their proposal.

[fol. 4422] 46

M 176. Considerable discussion took place as to the term to be used for this type of fare. The words "regional" and "local" were held to be confusing as they are used with other meanings in IATA. Several carriers objected to the expression "Class 'B' fares" as they held that when the term "class" was used in advertising it implied inferior maintenance, air crew, etc. Other Members believed that publicity should denote that the services using this type of fare were below normal, which in fact is the case.

M 177 Finally, for want of a more suitable term, "'B' fares" was agreed upon, and the resolution was amended to provide that when published or shown in the companies' timetables, the fares must be specified as "B" fares and should not be advertised as normal class fares. ALI and SAS abstained from voting.

M 178 ALI abstained since they felt that they should not be compelled to use any special expression when advertising these fares. Furthermore, they considered that the resolution adopted does not favor the development of Class "B" air traffic which, in their opinion, was represented by that segment of the public who were not able to pay normal fares. In their opinion, Class "B" fares should remain independent of possible future increases in the normal fares and should in all cases be agreed as specific amounts and not percentage reductions.

Cost of Ground Transportation—Resolution 105

M 179 A proposal to make it mandatory in all Conferences to charge passengers for road transport from the airport to town terminals was defeated. However, Recommended Practice 160 1105 as at Appendix "L" containing this provision was adopted by Conference 1 and it was agreed that this Recommended Practice, in the form of a resolution, would be submitted for mail vote on January 1, 1952.

M 180 In Conference 2, Recommended Practice 280 1105 as at Appendix "F" was adopted as an interim measure. This recommends that Members give early consideration to

the proposition that passengers be charged for ground transportation and provides for study of the proposition on an area basis at local meetings of Members' representatives. Members were requested to give the question of making a charge for ground transportation further study and to submit comments to the Secretary of Traffic Conference 2. Based on these comments, the Secretary was authorized to issue a mail vote on January 1, 1952.

M 181 In view of the fact that Conferences 2 and 3 did not agree to make a charge for ground transportation, it was necessary to consider means of controlling practices in certain areas where long-distance surface transport is being provided free of charge to common rated points. Resolution 280 105 and 370 105 were adopted to restrict such practices. In this resolution no money may be paid directly or indirectly to the passenger in lieu of ground transportation and when one or more cities or town terminals are served by an airport, free ground transportation may not

—47—

[fol. 4423] be offered to a city-center other than the nearest one, except if 30 days written notice is given to Conference Members and no protests are received.

M 182 Certain Members applied for immediate exemption under the terms of this resolution, as follows:

(i) Permission was granted in respect of Jan Smuts Airport which lies between Johannesburg and Victoria and serves both these cities.

(ii) Permission was granted in respect of Livingston Airport to serve both Livingston and Victoria Falls which are separated by a distance of 14 miles.

(iii) Permission was granted in respect of Dusseldorf and Cologne which are separated by a distance of some 40 kilometers and can each be served from the airports of Wahn and Lohausen.

(iv) SAS requested that an exception be made for their service which operates alternatively to Beirut and Damascus. Permission was not granted by

the Conference since Beirut and Damascus were in different countries and approximately 65 miles apart by road.

Sleeper Surcharge—Resolution 250

M 183 *Traffic Conference 1.* A sleeper surcharge of $15 for an upper berth and $25 for a lower berth per trip was agreed with five Members abstaining. Resolution 160 250 reflecting this decision does not apply to transportation between Honolulu and the West Coast points in Canada and the United States.

M 184 *North Atlantic.* TWA moved that a sleeper surcharge of $50 be applicable over the North Atlantic. 8 Members were in favor, 2 voted against.

M 185 *Mid-Atlantic.* A sleeper surcharge of $50 per trip was agreed across the Mid-Atlantic via the Southern route.

M 186 A motion by PAA that the sleeper surcharge for transportation across the Mid-Atlantic, including to and from points in Europe, be $25 per night. This received 2 favorable votes and 14 Members abstained from voting.

M 187 *South Atlantic.* It was agreed that the sleeper surcharge across the South Atlantic would be fixed at a minimum of $50 per trip.

[fol. 4424] —48—

M 188 *Europe/Africa.* A sleeper surcharge of £15 for single occupancy and 220 for double occupancy per trip was agreed. PAA abstained from voting.

M 189 *Balance of Conference 2.* A motion that the sleeper surcharge be £15 for single occupancy and £20 for double occupancy failed by one vote. PAA explained that they could not accept a higher charge within Traffic Conference 2 than that over the North Atlantic on services which extended into Traffic Conference 2 as far as Beirut. As an alternative, PAA proposed $25 per night. The motion was carried by two favorable votes and 11 abstentions.

M 190 *Between Conferences 2 and 3.* A sleeper surcharge of £15 for single occupancy and £20 double occupancy per trip was agreed with three abstentions.

M 200 *Conference 2.* The present resolution was amended to show a sleeper surcharge of £15 single occupancy and £20 double occupancy. PAA abstained.

M 201 *Central and North Pacific.* A motion that the surcharge be $50 per trip failed by one vote. PAA moved a surcharge of $25 per trip. This was agreed with 10 abstentions.

M 202 *South Pacific.* A motion that the surcharge be $25 failed.

Free Baggage Allowance—Resolution 310

M 203 No change was made to the free baggage allowance resolution at present in effect in Conference 1 and for Joint 1 2 traffic.

M*204 A proposal to increase the free baggage allowance in Conference 2 from 20 to 30 kgs. failed. It was agreed however, to increase the free baggage allowance in the Middle East to 30 kgs. and to reduce the break-point from £50 to £25 for passengers travelling within Southern and East Africa. Members stated that equipment limitations prevented an increase in Europe although in principle a uniform allowance throughout the Conference was favored.

M 205 A proposal to permit passengers to carry briefcases weighing no more than 5 kgs. was defeated.

M 206 In Conference 3 the free baggage allowance between India, Pakistan and Ceylon was reduced from 30 to 20 kgs.

M 207 The application of the free baggage allowance for around-the-world journeys and the London Sydney route was considered. After a protracted discussion as to whether the 40 kgs. free baggage allowance for around-the-world passengers would be retained or the free baggage allowance universally be reduced to 30 kgs. (with the exception of cer-

[fol. 4425] tain areas where an allowance of 20 kgs. applies), it was finally agreed to maintain the 40 kgs. free baggage allowance for around-the-world journeys. Furthermore, in order to cover the London Sydney problem,

the Conferences accepted the QEA proposal to permit passengers travelling between Europe on the one hand, and Australia, New Zealand and New Caledonia on the other hand, to be granted a similar allowance.

M/208 Resolutions 280/310, 370/310, JT23(8)310 and JT 123(6)310 reflecting the above agreements were agreed unanimously.

M/209 PAA recommended that Resolution 310 be amended to ensure that, in respect of cabotage services, Members do not grant free baggage allowances in excess of those provided for in Resolution 310. Air France, speaking as a carrier operating cabotage services, confirmed that they had been directed to give French civil servants returning from Colonies a greater allowance during off-season periods. This Member stated that they had no control over the matter since they were acting on instructions from their Government. The Conferences were informed, however, this practice had been discontinued several months ago and that Air France would make every endeavor to avoid undercutting IATA rates if, in the future, they are directed to re-introduce these baggage allowances.

Pooling of Baggage—Resolution 319a

M/210 This new resolution governs the pooling of baggage and permits two or more passengers travelling as one party to pool their baggage and grants a free baggage allowance equal to the combination of the individual free baggage allowances.

Baggage Excess Weight Charge—Resolution 311

M/211 The FRCS recommendation was agreed by all Conferences and Joint Meetings with an amendment to paragraph 3 to the effect that the reduced charge for pooling of baggage should apply after the first 10 kilograms instead of after each passenger had contributed 10 kilograms. A Member proposed that the excess charges be expressed in pounds in areas where pounds are considered the unit of weight. This was agreed and for the purpose of this reso-

lution, a conversion rate of 2.2 pounds per kilogram was established.

Charges for Specific Baggage Items - Resolution 311a

M 212 The new resolution as drafted by the FRCS was accepted by Traffic Conference 2. A motion to extend the application of this resolution to the Middle East received no support and was withdrawn.

[fol. 4426] —50—

Freight Forwarders and Consolidators

M 213 The FRCS reported that PAA had proposed a revision of the quantity discount and mixed consignment resolutions in order to adapt IATA rate structure so that IATA carriers could derive more benefit from the sales efforts of air freight forwarders. Specifically, PAA suggested larger margins upon which freight forwarders could work and proposed introducing special discounts for shipments of over 500 and 1500 kilos which would apply to all the charges normally applicable to the consignments making up a shipment. Taking into account these additional breakpoints, it was not contemplated that commission would be payable on these shipments.

M 214 The advantages of encouraging the activities of freight forwarders was stated to be:

(i) That this policy will give the air carriers large consignments instead of the present multitude of small consignments and, therefore, lead to a reduction in carriers' accounting and handling costs.

(ii) That it would give the air carriers the benefit of the sales organizations of the freight forwarders.

(iii) That it would ensure that in the U.S.A. the Government would continue its policy of requiring a freight forwarder to deal only with scheduled air carriers.

M 215 As against PAA's proposal, other Members pointed out the following disadvantages:

(i) That there was a danger of air cargo being held up whilst consolidators gathered sufficient consignments to meet larger breakpoints.

(ii) That the system tended to isolate the air carrier from its shippers by the creation of a middle man.

(iii) That existing IATA-approved cargo agents would be antagonized by the development. In those countries where freight forwarders were not controlled as they are in the U.S.A., it would be difficult to make a distinction between the activities of a freight consolidator and an IATA-approved cargo agent.

(iv) That although the consolidator would always pay the carrier the agreed IATA rate for the total shipment, he would nevertheless be in a position to quote lower rates to the public than those quoted by IATA-approved agents and the carriers themselves. In consequence, the IATA rate structure would be endangered.

(v) That the development of the system would tend to give the consolidator a large measure of control over the IATA rate structure.

[fol. 4427] —51—

M/216 Although the majority of the Committee was opposed, at this stage, to encouraging the development of freight forwarders, cognizance was taken of the fact that freight consolidation already took place on a fairly large scale, not only in the U.S.A., but in other parts of the world and the practice was spreading. It was held to be necessary that IATA should set up machinery for the regulation of freight consolidation which would take into account the different situations in countries where, unlike the U.S.A. freight forwarders are not regulated by a Governmental Agency. The possibility of control and development of freight forwarders was considered by the FRCS to fall into three categories:

(i) Control of margins allowed by quantity discounts.

(ii) Degree of consolidation on commodity-rated consignments by terms of the mixed consignment resolution.

(iii) Registration and regulation of freight forwarders with IATA in the same way as IATA approved agents. In this connection the FRCS recommended that this should be studied by Agency Committees together with the question of whether IATA approved agents should receive commission when handling shipments presented by a freight forwarder.

M/217 The Conferences appointed an Ad Hoc Committee composed of FRCS and Agency experts to study this complex problem but the Group was unable to reach agreement on questions such as registration of freight forwarders and the payment of commissions. It was decided, therefore, to refer the matter to the Legal Committee and a joint FRCS and Agency Committee for study between now and the next Conference meeting.

Quantity Discounts—Resolution 530

M/218 Resolution 530 was agreed in all areas except Conference 1 on the basis of a 25% reduction against the basic rate at a 45 kilogram breakpoint. Aer Lingus and BEA abstained from voting in Traffic Conference 2 and AH abstained from voting in Traffic Conference 3.

M/219 SAS desired an increase in cargo revenue and felt that this could be obtained by reducing the rebate on quantity discounts. This Member was prepared to accept the continuation of the present system provided that cargo rates themselves were appreciably increased.

M/220 PAA proposed a breakpoint at 1500 kgs. with a ceiling of 3¢ per ton-mile over the North Atlantic. Their experience indicated that without this breakpoint traffic was being lost. However, in view of the unanimity amongst carriers in accepting the 45 kilogram breakpoint at 25% discount, they were, with extreme reluctance, prepared to abandon their suggestion for the time being. It was agreed,

however, to instruct Commodity Rate Boards to give special consideration to the filings involving shipments of 1500 kilograms and over.

[fol. 4428] —52—

M 221 Resolution 160 530 adopted by Conference 1 establishes a floor for shipments weighing 1500 kilograms or more.

Charges on Mixed Consignments—Resolution 513

M 222 The FRCS proposed a liberalization of the present resolution but also realized that this might give rise to handling difficulties particularly in those countries where freight forwarders are not regulated by government action. An Ad Hoc Committee was created to study this question and submitted a redraft of the present resolution which was adopted by all Conferences and Joint Meetings.

M 223 It was noted that the mixed consignment rule filed by several carriers in Barrington's tariff does not conform with the present resolution.

Minimum Charges for Cargo—Resolution 501

M 224 When minimum charges for cargo were studied by the FRCS at Nicosia, consideration was given to the suggestion made by the Executive Committee arising from its meeting with the Universal Postal Union. The Executive Committee proposed that to avoid competition between administrations and air carriers for light parcel traffic a minimum charge be set for 5 kilos.

M 225 The FRCS was unable to accept this suggestion entirely because a flat rate on 5 kilos would result in extremely high charges on certain long route sectors such as the South Atlantic or the Pacific. The draft resolution submitted to the Conferences did, however, use the Executive Committee figure of 5 kilos but set a maximum of $5. ($7. for JT12 and JT123) and a minimum of $1 and further exempted route sectors where parcel post services are not available. In the latter case, the minimum charge recommended was set at 1 kilo or 5 shgs., whichever is higher.

M/226 These changes have the effect of increasing the minimum charge wherever practicable and provide greater uniformity. The Conferences and Joint Meetings adopted the FRCS recommendations with amendments to ensure that all sectors where parcel post facilities are not available are excluded. At the request of TCA, the resolutions for JT12 and JT123 provides for a minimum charge of $5 instead of $7 for consignments originating in Canada.

Cargo Classification

M/227 The FRCS reported that it had studied the question of a cargo classification scheme and come to the conclusion that whilst such scheme could cover transportation from Europe to U.S.A. and Canada via the North Atlantic, it would not offer any appreciable simplification in Europe over the present commodity rate system. Although the principle of a classification scheme was favorably received, the FRCS believed that a change at this time would be premature. It recommended, therefore, that coordinated study be continued by the respective working groups of the New York and Paris Boards and that this study should include an analysis of the classes of the commodities carried by surface transport. In the meantime, Commodity Rate Boards should seek to establish greater order in their rates.

[fol. 4429] —53—

M/228 The views expressed by the FRCS were accepted by the Conferences.

COMMODITY RATES

Commodity Rates Board—Resolution 552b

M/229 In view of the success of the Commodity Rate Board machinery, the FRCS recommended an extension of the jurisdiction of the Paris and New York Boards and also a broadening of membership of all existing Boards.

M/230 In the revised resolution submitted to the Conferences, a new paragraph (4) was inserted to emphasize that deviations from the normal practices relating to minimum charges, density requirements and charges in relation

to value must be clearly specified in the filing notice. A further provision (paragraph (3)(c).) was inserted to indicate the procedure to be followed where it is desired to establish a rate higher than the existing rate or to cancel the existing rate. Paragraph (8) was revised to deal with the effectiveness of rates established under previous resolutions. An amendment to permit filings on a per item basis was also recommended.

M/231 In principle, the FRCS proposal was accepted. Air India International did not wish the Board to have jurisdiction over commodity rates from India, Pakistan and Ceylon to Traffic Conference 1, Europe, or the Middle East as they believed that the system of filing their commodity rates with the Secretary and all Members under Resolution 552c was satisfactory.

M/232 Traffic Conference 1 authorized the New York Commodity Rates Board to approve or disapprove specific commodity rates wholly within Traffic Conference 1 in accordance with the resolution governing joint 12 traffic. It was also agreed that all specific commodity rates at present in effect be filed with the Commodity Rates Board by October 1, 1951 for study and appropriate recommendation. The Board was not authorized to change such rates without the consent of the Members concerned.

M/233 A motion to increase the membership of the New York Commodity Rates Board to five was agreed and the order in which panel representatives may sit on the Board was rearranged to prevent any individuals serving on the Board for more than three months during a 12 month period. It was understood that a representative nominated by a Member to serve on the Board must be a person wholly employed by such Member. The above decisions resulted in the adoption of Resolutions 160/552b, 280/552b, JT12(8)552b and JT31(8)552b.

Specific Commodity Rates—Resolution 552c

M/234 Resolutions 552c (specific commodity rates in areas where there are no Boards) were altered to reflect the modified jurisdiction of the Specific Commodity Rates

Boards. At the recommendation of the FRCS further modifications were made to bring this resolution into line with Resolution 552b with respect to the protest and cable notice filing procedures. 280 552c, 370 552c, JT23(5)552c and JT123(6)552c were adopted on the basis of the FRCS proposal.

[fol. 4430] —54—

Application Form for Specific Commodity Rates

M 235 The form for the filing of Commodity Rates Resolution 552d was altered so that more information may be available to judge the necessity for a commodity rate being placed into effect. Resolution 160 552d, 280 552d, 370 552d, JT12(8)552d, JT23(8)552d, JT31(8)552d and JT123(6)552d were adopted by the Conferences and Joint Meetings. Air France and TWA abstained from voting.

Description of Commodities

M 236 At the request of the FRCS at Nicosia, an alphabetical list of commodities was compiled by a Working Group and this list was submitted to the meeting. While it was realized that advantage would be gained by standardizing the numbering and description system for commodity rates, the Conferences did not wish to pass a formal resolution on this matter. It was decided, however, that with effect from January 1, 1952, Commodity Rate Boards be directed to adopt the numbering and description system and that new filings should be made in accordance with the new list of descriptions. The Secretary was instructed to circulate this list to all Members.

Charges in Relation to Value—Resolution 503

M 237 The FRCS reported that although it was not fully satisfied with the present resolution, it was averse to making any change at this stage which would involve new instructions to staff. It recommended, therefore, the revalidation of the present resolutions by all Conferences and joint meetings. This was agreed with the exception that the term "basic rate" was changed to "normal rate."

M/238 In Conference 2 Aer Lingus abstained from voting and made the following statement for the record:

> "A considerable degree of uncertainty exists with regard to legal liability on routes between Ireland and the United Kingdom. This position results from certain difficulties with regard to the ratification of the Warsaw Convention. As the result of this situation Aer Lingus is unable to offer a choice of rates for carriage of cargo and collects valuation charges for local traffic moving between these two countries. Aer Lingus does not wish to oppose the adoption of Resolution 503 and abstains from voting on the understanding that the Conference appreciates these difficulties and agrees that Aer Lingus be exempted from applying provisions of Resolution 280/503 for traffic between Ireland and the United Kingdom until such time as the position as to the legal liability with respect to the carriage of such traffic has been resolved."

[fol. 4431] —55—

Proration of Valuation Charges—Resolution 503a

M/239 The Insurance Sub-Committee of the Financial Committee drew the attention of the Conferences to the confusion that exists, particularly in Europe, regarding the extent to which Resolution 503a is being applied. According to a circular letter issued by the IATA Paris Office on this subject, certain carriers were applying paragraph (1) of Resolution 503a without restriction, some were applying it with restriction, and others did not indicate whether or not they are applying the resolution at all. As a consequence, many carriers were experiencing considerable difficulty from an insurance standpoint. The Conferences noted these comments and urged Members, in their own interests, to conform to the provisions of Resolution 503a.

Air/Rail and Air/Bus Interchange

M/240 The FRCS recommended that Conference 2 appoint a Committee to study the possibilities of interchange arrangements with railway and bus companies in Europe. This was agreed and the following were appointed to ex-

plore the matter and to make recommendations to the Conferences at its next meeting:

G. Delelaux
D. Handover
P. C. F. Lawton
J. W. Meijer.

Sea/Air Transportation—Resolution 160/153

M/241 Resolution 160/153 amends the existing sea-air transportation resolution in Conference 1 by the deletion of the words "and the fare of the sea portion shall be ½ of the round-trip sea fare." This deletion was made in recognition of the fact that IATA cannot make provision for the fares steamship companies may charge.

Mileages and Routes for Tariff Purposes

M/242 PAA believe that the listing of mileages applicable against each fare and rate caused unnecessary work. The Conferences, however, agreed that it would be extremely useful for mileages to appear on the FRCS working papers but did not consider that it was desirable to specify mileages in formal fares and rates agreements adopted by Conferences.

Proration of Joint Fares and Rates—Resolution 017

M/243 The Conferences and Joint Meetings adopted Resolution 017 based on the recommendations made by the FRCS Committee. These recommendations provide for the determination of prorates in basic currency and a formula to prorate directional fares and rates so as to limit a carrier's prorated portion to not more than its applicable fare or rate. The new resolution also clarifies that minimum charges are to be prorated on the same basis as normal charges.

[fol. 4432] —56—

Proration of Involuntary Re-Routed Consignments Resolution 018

M/244 This new resolution clarifies the method of proration to be employed in the case of involuntary re-routed

consignments or shipments. Attention was drawn to the fact that the draft prepared by the FRCS covered only part of the problem. Certain legal difficulties are involved and the Clearing House Sub-Committee had stated that a new waybill should be prepared by the re-routing carrier. The Conferences considered, however, that the draft was an improvement over the present situation and accepted the resolution as an interim measure. The FRCS was instructed to give the matter further study at its next meeting.

M/245 It was noted that the adoption of this resolution by all Conferences and Joint Meetings necessitated an amendment to the IATA Interline Handling Agreement.

M/246 Air France, Aer Lingus, Air India, SABENA and KLM abstained from voting. KLM made the following statement for the record:

> "According to our information the Clearing House and Revenue Accounting Sub-Committees noted that considerable accounting difficulties would be made if prorating of re-routed shipments are dealt with according to the above proposal. As this Committee will discuss this question at its next meeting, KLM has suggested that no specific action be taken by the Conferences at this time and that the question be referred to the FRCS and Revenue Accounting Sub-Committees."

Stop-Overs—Resolution 160/040

M/247 Consequent upon the closing of Conference 1 fares, Members were willing to accept the same conditions governing stop-overs as at present in force in other Conference areas.

M/248 Resolution 160/040 was agreed unanimously.

Changes in Fares—Resolutions 049 and 049b

M/249 The Conferences agreed to maintain the present resolution with the inclusion of exchange orders in paragraph 1. This decision resulted in the adoption of Resolution 049 for all Conference areas. BEA abstained from

voting as they do not favor the principle of passing on increases to passengers.

M 250 Resolution 280 049b was adopted at the request of BEA and Air France. These Members explained that they had agreed to an increase in the off peak fare between London and Paris from £10 to £11 effective from June 1, 1951. Some 12,000 passengers had already purchased tickets for travel after July 1, 1951 and in view of the administrative difficulties involved in collecting the extra £1, BEA and Air France requested the Conference to grant exemption from the application of Resolution 049 in this particular instance.

[fol. 4433] —57—

Passenger Expenses at Connecting Points—Resolution 102a

M 251 The FRUS recommended that paragraph 3 of the present resolution be amended to prevent money being paid to passengers or sales agents and, furthermore, revised paragraph 4 to restrict advertising and publicity.

M 252 Since the Conferences considered that these provisions were too severe, the resolution was redrafted to provide for Members filing notices, without protest, naming the city where money is paid to a passenger or sales agent for passenger expenses, the amount thus paid and the period of layover. With reference to paragraph 4 dealing with publicity and advertising the wording of the existing resolution was preferred although a small alteration was made to emphasize that Members should not advertise the absorption of transit costs as an inducement to travel.

M 253 In all resolutions adopted by the Conferences and Joint Meetings, specific provision was made for traffic from Australia or New Zealand traveling to Europe via North America. Members may advertise and pay such passengers a sum not exceeding $15 U.S. in lieu of hotel accommodation and airport transfer charges in North America provided they are ticketed to depart from the North American continent within 84 hours after arrival. Braniff abstained from voting in resolution adopted by Conference 1.

Round-Trip Discount—Resolution 150a

M 254 The Conferences accepted the changes to Resolution 150a, recommended by the FRCS. The resolution adopted by Conference 1 recognized that Members grant a lower discount than 10%, therefore, Resolution 160 150a sets the 10% discount as a maximum and not a specific discount as in the case of other Conference areas. It was also agreed that the constructed fare for traffic from Conference 1 to other areas should take into account the lower discount appertaining to the part of the journey in Conference 1.

M 255 In Europe where many round-trip fares have been introduced and those cases where specific points are served by more than one carrier, it has not been clear whether Members are prepared to accept re-routed passengers for the return trip at half the special fare. The question whether special round-trip fares are automatically available over the lines of two Members as in the case with the round-trip discount and also whether carriers should debit the issuing carriers half the normal return fare or only half the special fare was discussed.

M 256 Some Members stated that they would accept passengers at half the special round-trip fare, others declined to do so.

M 257 It was agreed that in order to clarify the situation, Members wishing to participate in any special fares introduced in Europe would so notify the Secretary who, in turn, would circulate this information to Members.

[fol 4434] —58—

M 258 In Conference 2 the provision governing the validity of the combination of the international fare and a domestic short-validity round-trip fare was deleted. It was felt that this provision should be covered when special fares are filed under Resolution 159.

Circle-Trip Discount—Resolution 151a

M 259 The draft submitted by the FRCS provides against the use of backhaul fares in the circle-trip reduction which results in undercutting round-trip fares. The Conferences and Joint Meetings adopted resolutions based on this draft.

M 260 In the case of Resolution JT12(S)151a, special provision was made for directional fares involving South Atlantic circle-trips.

Open-Jaw Trip Discount—Resolution 152

M 261 The only significant change in the resolution adopted by all Conferences and Joint Meetings was the deletion of paragraph 2 from the previous resolution. This paragraph now forms a separate Resolution 152b.

Filing of Open-Jaws—Resolution 152b

M 262 Although the FRCS recommended against the filing of open-jaws by rule, the Conferences accepted this proposal made by PAA. This change was considered necessary because some Members interpreted the previous resolution as requiring that open-jaws be filed as specific amounts between individual points. The new rules governing the filing of open-jaws requires the refiling of all open-jaws at present in effect. It also stipulates that an open-jaw shall not become effective if protested by a Member.

Common Interest Group Travel—Resolution 158 and 158a

M 263 The Middle East Working Group recommendation to extend the application of Resolution 270 158 to cover traffic between Europe and the Middle East was not accepted. Traffic Conference 2 did, however, agree to an extension for traffic carried wholly within the area of the Middle East as defined in Resolution 280 158 and to add Iceland to the definition of Europe.

M 264 Resolution 280 158a moved by CAA and amended by Air France, permits Common Group Interest discounts to be offered wholly within Southern Africa and between Mauritius and Reunion on the one hand and Mauritius on the other.

M 265 At the request of TEAL, Resolution 370 158 was agreed amending Resolution 360 158 to apply between Australia and New Zealand. The number of people constituting a group was reduced from 15 to 10.

Creative Fares—Resolution 159

M/266 The FRCS recommended revalidation of the present resolutions with an additional paragraph 7 permitting off-hour, on-hour combinations of half of the sum of the off-hour round-trip fare and the normal round-trip fare in the outbound direction. Filings of round, circle and open-jaw trips are also permitted under the new Resolutions 160/159, 280/159 and JT23(8)159, and it was also agreed to standardize journey time to 8, 17, 23 or 30 days, except within Europe where 30 day duration will not apply.

Special Round, Circle and Open-Jaw Trips—Resolution 159a

M/276 In Conference 3 and for Joint 31 traffic, Resolutions 370/159a and JT31(8)159 were adopted to replace the existing special round, circle and open-jaw trip fares. Standardized ticket validities of 8, 17, 23 and 30 days apply and mileage limitations of 5,500 miles and 3,500 were agreed for Conferences 3 and 31, respectively.

Family Fares—Resolution 166

M/268 In agreeing the closing of fares and rates within Traffic Conference 1, Members decided that all rules contained in carriers tariffs would be expressed in resolution form. PAA drafted a Resolution 160/166—Family Fares—reflecting family excursion fares at present in their tariff. This resolution was adopted by the Conference.

M/269 CAA moved the revalidation of the present resolution which permits Members to establish discounted family fares between Johannesburg, Bulawayo and Salisbury. Resolution 280/166 was adopted and amends Resolution 270/166 to the extent that these fares are applicable to Johannesburg from Bulawayo, Livingston and Salisbury.

Special Event Fares—Resolution 168

M/270 Amendments to the existing resolution were proposed by the FRCS in order that more information should

be submitted by the proponent so as to provide some restriction in the use of Special Event Fares. Also, for the sake of uniformity, the protest rules applicable in Resolution 159 were inserted in Resolution 163. Resolutions 280/163 and JT23(8)163 incorporating these changes were accepted by Conference 2 and for Joint 23. A motion to adopt similar resolutions for Conference 3 and Joint 31 failed.

Student Fares—Resolution 167

M 271 Conferences 23, Joint 12, 23 and 31 adopted student fare resolutions setting the 26th birthday as the age limit.

M 272 In the joint resolutions covering travel to and from the United States and Canada, the student fare discount does not apply beyond the gateways of the North American continent. An exception was made in the case of 31 traffic

—60—

[fol. 4436] to interior points of Canada where the discount is carried through to Montreal. Student fare reductions are permitted over the North and Mid-Atlantic routes during the off-season periods only. It was further agreed that a student should not be eligible unless he is attending a course of not less than a school year. The Conferences felt that owing to the administrative and distribution difficulties involved, a standard form of certificate was not considered necessary. However, the FRCS was requested to prepare a list of the information required from school or university authorities in order to determine a student's eligibility to receive a discount.

M/273 SAA proposed concessional fares for students travelling in groups for educational purposes during vacation periods between South Africa and Europe and South Africa and Israel. This proposal received no support.

Student Nurses' fares—Resolution 280/167a

M/274 Resolution 280/167a was adopted by Traffic Conference 2 at the request of Aer Lingus. This permits student nurses registered for training at any recognized nurses training establishment in Ireland or the United Kingdom to travel between these two countries at the student fare discount.

Period of Ticket Validity—Resolution 280/276

M/275 Arising from discussions on student fares, it was noted that validity of tickets in Europe was only 6 months and that this would be inconsistent with the student fare resolution. It was agreed, therefore, that the validity of normal fare tickets in Traffic Conference 2 would be 12 months with the exception of South Africa and East Africa, where the validity would be 6 months. Resolution 280/276, incorporating this change, was agreed unanimously by Conference 2.

Conversion of Ticket Classification

M/276 Resolution 278, adopted by all Conferences and Joint Meetings, contains the same provisions as the present resolution but in addition to round, circle and open-jaw trips, around-the-world trips are also covered.

Free and Reduced Fare Transportation—Resolution 200

M/277 It was the general sense of the meeting that the present resolution was unsatisfactory but Members were divided as to what steps should be taken to improve the regulations governing free and reduced fare transportation. On the one hand some Members proposed the liberalization of the resolution by the addition of a clause permitting the use of "principal's privilege." Other Members favored liberalization by the addition of other specific categories of persons to whom free and reduced transportation may be granted.

M/278 SAS stated that they had suffered considerable hardship under this resolution and quoted a recent case where they were unable to grant a free passage to a person who was travelling on business intimately connected with

—61—

[fol. 4437] the affairs of the Company. This Member felt that in such instances managements should have the right to issue free transportation and suggested that the Conferences adopt the rule used for considerable time by the North Atlantic Shipping Conference to regulate the concession.

This rule reads as follows:

"Principals of the lines may, on purely personal grounds, grant free or reduced rates passages. Particulars of any such concessions to be reported to the Conference Secretary within a week of passenger's embarkation. The spirit of this clause is understood to be that reductions shall not be granted on personal grounds where the business is competitive."

M/279 Several Members strongly supported the necessity of this clause but others felt that the liberalization as proposed would result in lack of control, and in any case it would have difficulty in gaining acceptance by certain Governments.

M/280 An Ad Hoc Committee consisting of FRCS and Agency experts was created to study the problem. This Committee also considered a draft resolution proposed by TCA governing free transportation in connection with public relations contacts such as the press, publishers, etc., and its report recommended the adoption of a resolution incorporating the following:

(i) The provisions of the present Resolution 200 with the amendment to paragraph (1)(c)(1) identifying an employee of a public relations agency regularly retained by an air carrier as an employee of the air carrier under the terms of the resolution. Similar recognition was extended to a business consultant or an employee or a member of a business consultant retained by an air carrier.

(ii) Provisions, based on the draft submitted by TCA, permitting Members to grant free transportation to public relations contacts.

(iii) Provisions, defining the basis on which "principal's privilege" may be exercised.

M/281 The Conferences considered that the last two mentioned questions should be covered by separate resolutions and adopted Resolution 200 applicable in all Conferences and Joint Meetings based on (i) above.

Free Transportation—Public Relations—Resolution 209

M/282 Speaking to the draft prepared by the Ad Hoc Committee created to study the general question of free and reduced transportation, some carriers feared that in spite of the fact that Members would be required to report

—62—

[fol. 4438] to the Secretary details of any free transportation granted, the situation would get out of control. These Members however, were agreeable to the introduction of this resolution in Conferences 2 and 3 but were not willing to accept it in Conference 1 or for Joint 1 and 2 traffic.

M/283 SAA proposed that free transportation be limited to "permanent" members of the editorial staff of newspapers or magazines. This was agreed although it was recognized that, in practice, it would be difficult to determine the exact meaning of "permanent" and some Members felt that unless the resolution was worded in more precise terms it would be impossible for the Enforcement Office to perform its duties.

M/284 At the insistence of a Member, the paragraph permitting free passes to "any recognized professional freelance writer, such as photographer or cameraman" was deleted. The Conferences recorded, however, that this category of persons could travel without charge on special assignments.

M/285 With the above amendments the draft resolution prepared by the Ad Hoc Committee was approved by Traffic Conferences 2 and 3 and by Joint 23. Air India International, IBERIA, NWA, PAA, PAB, SAA and TWA abstained from voting.

Free Transportation—Personal—Resolution 210

M/286 The privileges granted under this resolution, which was based on a draft prepared by the Free and Reduced Transportation Ad Hoc Committee, are essentially the same as those contemplated by SAS and other Members in their suggestion that the Conferences adopt a "principal's privilege" clause in Resolution 200. The Ad Hoc Committee had

pointed out that it was virtually impossible for the Conferences to agree upon a definition of "principal" and for this reason had avoided use of the expression in the draft resolution. They had, instead, recommended empowering Member as such, to grant free or reduced transportation at their own discretion, but defined the terms under which such concession may be given and also set up machinery to enable each Member's activities to be kept under constant surveillance by other Members and the IATA Enforcement Office. In this manner they hoped that abuses would be avoided and that the resolution would not be used as a device to extend the granting of free and reduced transportation in order to promote sales.

M/287 Resolution 210 was adopted by Conferences 2 and 3 and for Joint 23 traffic but was not accepted by Conference 1 or other Joint Meetings. Air India International, ALI, Aer Lingus, BCPA, BEA, CPAL, Cyprus Airways, NWA, PAA, TWA and SAA abstained from voting.

Children's Fares—Resolution 201

M/288 Traffic Conference 1 adopted a new Resolution 160/201 which eliminated the charge for infants under two years of age.

M/289 The FRCS was instructed to study the applicability of children's fare reductions to student fares and to fares filed under Resolutions 159 and 163.

[fol. 4439]

—63—

Free or Reduced Fares for Tour Conductors—Resolution 204

M/290 The Conferences considered a re-draft of Resolution 204 which contained modifications intended essentially for the purpose of clarification.

M/291 It was pointed out that in those areas where Resolution 158 is not applicable, Resolution 204 was being used as a device to grant common interest group travel discounts. The meeting felt that a clear distinction between the purposes of these two resolutions should be made and in the opinion of some Members, the present weakness

was to be found in the inadequacy of the definition of a "Tour Conductor." Attempts to improve upon the present definition were unsuccessful.

M/292 The main points of difference between Resolution 204 accepted by all Traffic Conferences and Joint Meetings and the present resolution are as follows:

(i) One free passage may be issued for a tour conductor for a group of 15 and for each of the multiple of 15 thereafter.

(ii) Paragraph 5(d) stated what has hitherto been implied—i.e. that the free passage for the tour conductor will not be used to rebate cost of the tour to any of the members of the tour.

(iii) Paragraph 5(e) states in greater detail the requirements concerning advertising literature.

(iv) That the terms "round-trip" and "circle-trip" used in Resolution 204 include transportation partly by air and partly by surface means.

(v) Paragraph 8 stipulates the condition under which circumstances passengers must travel together and provides a workable solution whenever a carrier is obliged to transport groups on more than one flight owing to lack of space, and also when operating conditions prevent passengers from commencing transportation on the flight scheduled.

M/293 It was agreed that in the event of any government withholding approval of this resolution, a new Resolution 204a will be submitted for mail vote.

M/294 PAA abstained from voting in Conference 1, Joint 12, Joint 31 and asked that the matter be referred to the Agency Committees for study and further recommendation to the next Conference n eting.

[fol. 4440]. —64—

Change of Routing—Resolution 279

M/295 At the FRCS meeting in Nicosia no agreement could be reached regarding standard procedures to be

adopted for endorsement of tickets, reroutings, interchange or fare adjustments and the Conferences were requested to examine two draft resolutions, one submitted by BEA and another by TCA. An Ad Hoc Committee was created to consider these drafts and the Conferences and Joint Meetings accepted their recommendation as at Resolution 279.

Low Density Cargo—Resolution 280/502a

M/296 Resolution 280/502a adopted by Conference 2 for application wholly within Europe admits the convenience of expressing the low density factor in the metric system of measurement only and establishes the volumetric equivalent of 1 kilogram at a rounded off figure of 7,000 ccs.

Lower Charge in Higher Weight Category—Resolution 504

M/297 The Conferences and Joint Meetings agreed to make general the rule contained in Resolution 503 that the maximum charge for consignments in each weight group need not be more than the minimum charge for consignments in the next higher group.

Livestock—Resolution 280/511a

M/298 Traffic Conference 2 adopted Resolution 280/511a as recommended by the FRCS Committee. This modifies the present resolution by the addition of a new paragraph providing that the charge is applicable to both the animal and its container, the deletion of the word "unaccompanied," and the substitution of the word "normal" for "basic."

Transfer Charges for Interline Shipments—Resolution 512

M/299 The Conferences considered that the draft submitted by the FRCS lacked clarity and expressed a preference for the present resolution since it provided free transfer between Members at one airport.

COD Service Charge—Resolution 512a

M/300 Resolution 512a adopted by all Conferences and Joint Meetings establishes a "minimum minimum" COD service charge of 2/6 (Sterling) or $0.35 U.S. and it was agreed that the collecting carrier shall retain those charges.

Information Concerning Cargo Handling Charges

M/301 The Conferences did not accept the FRCS recommendation to adopt a resolution governing the compilation and circulation of information concerning cargo handling charges and suggested that the matter be developed further by the FRCS.

[fol. 4441] —65—

Special Rates for Gold, and Platinum and Platinum Metals —Resolution 560

M/302 The FRCS recommended that for Joint 12, 31 and 123 traffic special rates for gold shipments of 1,000 kilos or more should be applied at the 45 kilogram rate between the gateways. This was agreed but an exception was made in the case of gold consignments between Johannesburg and New York as SAA maintained that this traffic could stand the higher rate.

M/303 Resolution 560 was adopted by all Conferences and Joint Meetings. In TC 1 it was decided that no value charge or value surcharge will be assessed.

Carriage of Gold as Baggage

M/304 PAA reported that some Members permit the transportation of gold as baggage and in their opinion this was contrary to Resolution 560.

M/305 Air France stated that they had been accepting gold as baggage for some time. They felt that this was not contrary to the resolution since their charges were higher than those prescribed under Resolution 560. For instance, to Montevideo they charge approximately 500 francs per kilo more than they would charge if they applied the normal cargo rate plus the 150% surcharge for gold.

M/306 PAA explained that they considered the practice undesirable as it exposed Members to unnecessary restrictions, but were prepared to withdraw their objection on the understanding that carriers document the shipments as baggage and charge the gold rate.

Newspapers and Periodicals—Resolution 561

M/307 Resolution 561 adopted by all Traffic Conferences and Joint Meetings amends the present resolution to the extent that it removes the limitation that periodicals must necessarily be published "at least once a month" and also allow the discount to be applied against books. Where carriage is wholly within Europe, other than in Germany, the maximum discount applicable was agreed at 33⅓% as against 50% in other areas.

Carriage of Human Remains—Resolution 280/562

M/308 Most railway companies in Europe require that coffins be carried in separate freight cars and rates charged for such traffic are exceptionally high. In consequence, shipments of coffins by air are on the increase and it was the opinion of the FRCS that this traffic in Europe could stand a surcharge of 200%. This proposal was agreed and Resolution 280/562 was adopted. It was also decided that no quantity discounts on human remains would be permitted.

[fol. 4442] —66—

Special Rate for Personal Effects—Resolution 563

M/309 In accordance with the Conference Provisions, PAA had given notice to rescind Resolution 563. This Member maintained that shippers use the subterfuge or personal effects to break the cargo structure and great quantities of merchandise are shipped at this reduced rate. Other Members who favored keeping the resolution stated that they were not conscious of such abuses and believed that the special rate was a factor in competing with steamship companies as it stimulated traffic by reducing to some extent the disadvantage of the limited baggage allowance by air.

M/310 A proposal that the use of this resolution be limited to passengers travelling by air and that travellers' samples be excluded specifically was not acceptable to PAA. In consequence, therefore, Resolutions 140/563, 260/563, 350/563, JT123(4)563, Special Rate for Personal Effects will be rescinded 90 days after the Bermuda meeting.

Diplomatic Bags—Resolution 630

M/311 The Joint Meetings agreed to adopt the present resolution with a slight amendment n paragraph 5. The expression "IATA cargo rates" has been modified to "applicable IATA cafgo rates."

No-Show and Cancellation Charges—Resolutions 728, 728a and 728b

M/312 Under the present resolutions a "no-show charge" applies in Conference 2 and 3 and for all Joint Meetings. In addition, cancellation fees are charged in Conferences 2 and 3 and for traffic between these two Conferences. A motion to abolish all no-show and cancellation charges was defeated. A further motion to abolish cancellation charges, but to agree upon a minimum worldwide standard no-show charge of £5 also failed. Although a great deal of time was devoted by a working group and the Conferences to this question, it was not possible to achieve worldwide uniformity. The final position with respect to these charges is as follows:

(i) *No-Show Charge*

A no-show charge of £25 ($70 U.S.) maximum and £2 ($5.60 U.S.) minimum was agreed for Conferences 2, 3, JT23, JT31, JT123 and JT12 (traffic between South America and Conference 2 only).

(ii) *Cancellation Charges*

Cancellation charges of the same amounts were agreed for Traffic Conferences 2, 3 and JT23 and 12 (from points in South America to Europe and Africa only).

[fol. 4443] —67—

(iii) At the request of Aer Lingus it was agreed that where the full fare is less than £2 ($5.60 U.S.), no-show and cancellation charges will be assessed for the amount of the full fare.

M/313 To give effect to the above decisions, no-show Resolutions 280/728, 370/728, JT12(8)728, JT23(8)728,

JT31(8)728 and JT123(6)728 were adopted with IBERIA abstaining in Conference 2 and IBERIA and BRANIFF abstaining in the vote for JT12. The cancellation charges Resolution 280 728a and JT12(8)728a were agreed. No resolutions were required by Conference 3 or 23 since the present resolutions have an indefinite expiry.

Consideration of Recommended Practices

M 314 The Conferences noted that the FRCS Committee had not been able to agree unanimously to recommend the disposal of recommended practices. It was decided, therefore, that the matter be referred back to the FRCS for further study.

Flight Line Numbers on Extra Sections

M 315 TWA raised the question concerning the use of flight line numbers whenever a Member is operating extra sections. It was the sense of the meeting that the usual flight line number should not be used. The Traffic Handling Committee was requested to study this matter.

Air Waybill—Conditions of Contract—Resolution 340b

M/316. BOAC in a letter to the Secretary of Traffic Conference 1 pointed out that insurance practices vary considerably and make it virtually impossible for international carriers who employ their individual brokers to be aligned on the question of all-risks covered. This Member suggested, therefore, that the wording of Clause 8 of the Conditions of Contract should be made optional to enable carriers to obtain the fullest possible cover which might conceivably also include cover which is specifically excluded by the existing Clause. It was noted that the Insurance Sub-Committee of the Financial Committee had supported this suggestion.

M 317 PAA referred to the position taken by the Legal Committee which apparently had felt that this provision should remain mandatory. However, since BOAC's suggestion would give the shipper more liberal treatment, PAA stated that they were willing to accept the change proposed.

This was agreed by all Conferences and the amendment was accomplished by the insertion of a new paragraph (2) in Resolution 540b which reads as follows:

"(2) that notwithstanding anything above the exact wording of Condition 8 of the Conditions of Contract shall be optional with each Member."

[fol. 4444] —68—

Glossary of Traffic Terms

M/318 PAA recommended that the Conferences review the terms relating to fares, rates, charges and schedules contained in the Glossary of Traffic Terms and agree formally on definitions of such terms. This Member pointed out that, from time to time, meetings among Members relating to the meaning of resolutions are handicapped because of the differences of the opinions as to the meaning of the term used in resolutions.

M/319 The Conferences agreed that the Glossary to date did not carry enough weight and although it had been approved by the Traffic and Legal Committees, the definitions set out in this Glossary were frequently overlooked in discussions.

M/320 An Ad Hoc Committee was set up to study this matter and reported as at Appendix "G" that it did not recommend formal binding action at this meeting of the Conferences. It did, however, suggest that the Glossary be submitted to the Traffic and Legal Committees to prepare appropriate recommendations for consideration by the Conferences at the next composite meeting. This report was adopted and the Conferences emphasized that the necessity to agree upon definitions was of vital importance to the interpretation of all resolutions.

[fol. 4445] —69—

TRAFFIC COMMITTEE RECOMMENDATIONS

Standard Form of Effectiveness Resolution

M/321 The Chairman of the Traffic Committee explained that the new recommendation (TC11/001) was intended to tidy up the effectiveness resolution and to eliminate the

weaknesses found in the previous form of effectiveness resolutions used by the Traffic Conferences.

M/322 The Legal Drafting Officer added that in order to clean out the mass of the old effectiveness resolutions in the Traffic Manual of Resolution, the new draft included an additional clause to the effect that all resolutions heretofore adopted would be made subject to the new standard effectiveness resolution.

M/323 It was also explained that the basis of the proposal was that each resolution should carry its own indication of type, its own filing date and its own expiry date, if any. By this means, 90% of the resolutions adopted at each meeting could be covered by a single effectiveness resolution for each individual Conference or combination of Conferences. Different effectiveness resolutions would only be required to cover special cases.

M/324 This recommendation by the Traffic Committee was agreed unanimously.

Joint Fares with non-Scheduled Operators

M/325 It was noted that the Traffic Committee had come to the conclusion that it was impossible at present to take any further action on joint fares with non-scheduled operators. However, the Committee was prepared to consider the matter again, if necessary.

M/326 One Member referred to the report of the Middle East Working Group which inter-alia dealt with this problem. It was agreed that the report should go to the Traffic Committee as it outlines some of the difficulties of the small carriers and the various steps which might be taken.

Charters—Resolution 045

M/327 The Chairman of the Traffic Committee pointed out that the recommendation submitted to the Conferences had been drafted with a view to stopping the use of Charters as a means of undercutting fares. At the same time the Traffic Committee had intended to leave a reasonable amount of freedom to Members and had taken into consideration the Legal Committee's comment on the subject.

M/328 NWA referred to their particular situation of having approximately 50% of their aircraft grounded and this Member hoped that these difficulties would be taken into consideration when redrafting the resolution. Whilst they had every intention to living up to IATA rules and regula-

—70—

[fol. 4446] tions, they felt that they should be left with the necessary amount of freedom with respect to chartering equipment.

M/329 PAA drew attention to the new regulation set up by the CAB pertaining to the chartering of aircraft and felt that this had a bearing on the Traffic Committee's proposal. Air India Ltd. stated that their government had authority to requisition space on their services at any time, and requested that this aspect of the problem be borne in mind. Chicago & Southern referred to their recent introduction of the sale of "speed-pack units" on a rate per mile basis and hoped Conferences did not consider this practice as being contrary to the resolution. At the request of the Conferences, the Traffic Committee re-examined its recommendation in the light of the CAB's action and of the various comments expressed by Members.

M/330 At the latter stages of the meeting, the Traffic Committee submitted a revised draft of a charter resolution. The Traffic Committee pointed out that while only U. S. carriers were bound to implement the CAB regulation, there was likelihood that the CAB would take action which would adversely affect all scheduled carriers operating to the United States if IATA did not work out a satisfactory resolution. For this reason, the new draft, although based on the Traffic Committee's previous recommendation, took into account the CAB's requirements and in particular, attempted to be more specific with respect to the meaning of the term "general public."

M/331 Attention was drawn to the fact that while the proposed resolution might be satisfactory with respect to operations regulated by the CAB, it might not be suitable for application to other operations, such as those within

Europe. For example, it did not permit charters to agents for passenger transportation and intra-European operators might feel that carriers should be free to make such charters. The Traffic Committee suggested that even if they were not disposed to adopt the resolution at present, Members in other areas such as Traffic Conference 2 might perhaps be able to discuss with their governments the possibility of undertaking to bind themselves to such a resolution in the future.

M/332 The Traffic Committee felt that during the current sessions, Conference 1, Joint 12 and Joint 31 might well adopt the draft resolution and in other areas allow the current resolution to remain in effect.

M/333 The Conferences then considered Traffic Committee's latest recommendations. Air France point out that they were compelled by government contract to carry mail on all services whether chartered or not. This Member was unable to accept any limitation for carriage of mail in the charter resolution.

M/334 A further draft was prepared incorporating changes required by Members, and this was submitted to Conference 1, Joint Meetings 12 and 31. The Joint Meetings were unable to accept the new resolution. Members

—71—

[fol. 4447] acknowledged that it represented an improvement over the present resolution but they were reluctant to adopt charter rules which had not been given legal clearance. In particular, they felt the full implications of paragraph 11 required careful study, and they believed that the conditions imposed under paragraph 9 relating to the charter or leasing of aircraft from one air carrier to another were unworkable as it presumed to regulate the action of non-IATA carriers.

M/335 In view of the objections received, it was decided to revalidate the present JT12 and JT31 resolutions and to refer the draft back to the New York Charter Working Group set by the FRCS at Nicosia for further study. This Group was authorized to draft a charter resolution for mail vote action by Conference 1 and JT12 and JT31. It was also

authorized to finalize its work with respect to a minimum rate formula for Conference charter rates and to prepare a resolution for mail vote.

M/336 At an individual meeting of Traffic Conference 1, Braniff again stated that they could not agree to the closing of fares and rates in Traffic Conference 1 unless a satisfactory charter resolution was adopted. This Member considered the final draft submitted by the Traffic Committee as a suitable resolution. In view of the firm position taken by this Member, the Conference accepted a resolution based on this draft. Resolution 160/045 amended the draft to the extent that paragraph 11 was deleted entirely and the provisions contained in paragraph 4 of the present resolution 045 replaced paragraph 9.

M/337 Conferences 2 and 3 agreed to retain Resolutions 270/045 and 338/045 respectively. KLM gave notice that they would not be bound by Resolution 270/045 90 days after the next Conference meeting.

M/338 The charter question was also discussed at an individual session of Traffic Conference 2 when it was recognized that the present resolution required modification. Since time did not permit this being done at Bermuda, it was agreed that a Committee be appointed to study charters and report to the next meeting. Various interpretations of the present resolution were discussed but the Conference was unable to arrive at satisfactory conclusions. The main questions causing difficulties were:

(i) Does Resolution 045 permit the same aircraft to be chartered to more than one charterer at the same time and for the same journey?

(ii) May a Member resell space on a chartered aircraft to th general public at IATA fares and rates?

(iii) May an individual person resell charter to another individual person and if so, what is the relationship between the rates charged?

M/339 The Conferences felt that it would be necessary to coordinate study of the charter question and with this in

mind requested the Secretary of the Traffic Committee to prepare and circulate a charter questionnaire to all Members. On the basis of replies received to this questionnaire

—72—

[fol. 4448] and the reports of the study groups (the New York Group and the Committee to be established by Conference 2), the Traffic Committee, at its next meeting, should undertake a global study of the charter question.

Alcoholic Beverages

M/340 This matter was discussed at some length but no agreement could be reached. One group felt that since carriers did not live up to the present resolution, it should be rescinded. Other Members opposed this proposal. Finally, it was agreed to retain the present resolution but to ask the Traffic Committee to consider the whole question of "giveaways."

Family Travel Plan

M/341 The Conferences agreed that no action be taken at the present time.

Bulk Travel Plan

M/342 The Conferences agreed that no action be taken at the present time.

Free and Reduced Transportation

M/343 This item is discussed under M/277 to M/281 of this report.

Carrier Names and Abbreviations—Resolution 275c

M/344 In the draft Resolution (TC11/275c) recommended by the Traffic Committee provision was made for the addition of new abbreviations between Conference meetings.

M/345 On the question that Members publish all abbreviations in tariffs and timetables, it was pointed out that there were good legal reasons for doing so in order to obtain maximum benefit under the Warsaw Convention. BEA suggested that this requirement was too exacting. This view

was supported by other Members and as a compromise, it was agreed to delete this mandatory provision in Resolutions 160/275c, 280/275c and 370/275c adopted by the Conferences.

Form of Baggage Tag—Resolution 300

M/346 The Madrid Traffic Conferences had adopted a new form of baggage tag for use as from January 1, 1951. The reason for this was to bring the IATA baggage tag into line with that of the ATC. However, as the ATC had made certain changes since it had introduced the form which the Conferences had adopted for Madrid, the IATA form was still out of line with that of the ATC. Furthermore, there had been no standard procedures covering the use of the ATC type of tag as there had been no opportunity to prepare these during the Madrid meeting.

[fol. 4449] —73—

M/347 The Traffic Committee had studied the matter and in their recommendation (TC11/300) felt that in order to obtain uniformity with the ATC, the Conferences should be asked to adopt the latest ATC tag. Minor drafting changes in the procedure were also submitted by the Traffic Committee.

M/348 In essence the draft resolution was found acceptable to the Traffic Conferences and Resolutions 160/300, 280/300 and 370/300 were adopted.

M/349 American Airlines stated their experience showed that the practice of indicating the transfer cities in code is conducive to error. It was agreed, therefore, to spell out city names in full rather than to use abbreviations.

M/350 With reference to the tag itself, it was agreed that the date of issuance could be left out unless its inclusion is particularly required by the Legal Committee and that the method of stapling together of baggage tags be optional.

M/351 Air France, supported by PAA, suggested a few changes such as making allowance for space to insert the number of checked baggage items and to show the total weight of the baggage. Accordingly, paragraph 3 was amended to show that it is optional to make space for the total weight and for the total number of pieces.

M/352 Since some carriers used the 24 hour clock, the reference to A. M. and P. M. on the baggage tag was deleted.

M/353 It was agreed that the attention of the Traffic Handling Group of the Traffic Committee be drawn to the above changes with a view to similar changes being agreed by the ATC.

Excess Baggage Ticket—Resolution 301

M/354 The Conferences agreed to amend Resolution 140/301, 260/301, 350/301 by the insertion of the following in paragraph (11):

"(h) inclusion and use of an additional line entitled 'Excess Wt. Chge. @ ..... per kilo Cy.' immediately below the line similarly entitled."

Transshipment and Terminal Charges—Resolution 512b

M/355 The Conferences were unable to accept the Traffic Committee's recommendation (TC11 512b) that the transshipment and terminal charges lying solely within the control of Members be eliminated as much as possible since the accounting costs involved are not compensated by the revenue which accrues.

[fol. 4450] —74—

M/356 BEA pointed out that under transshipment charges, cartage between airports was a major item of expense and could not agree that Members should absorb these charges.

Place and Airport Name Abbreviations—Resolution 538

M/357 The Conferences accepted the Traffic Committee's recommendation (TC11 538) which was aimed at facilitating interline cargo handling. It was agreed, however, that the Cargo Handling Working Group should make a further study of the question of designators as it was understood that certain Members are at present using four letter city designators instead of the three letter designator shown in the Universal Interline Reservations Code.

Form of Air Waybill/Consignment Note (AWB)—Resolution 540

M/358 The Chairman of the Traffic Committee pointed out that the recommendation submitted to the Conferences did not contemplate any changes to the form of the air waybill but did recommend improvements to the procedures.

M/359 The Conferences agreed to alter paragraph (2)(a) to read as follows: "proof of receipt of the goods for shipment" and to delete sub-paragraph (2)(c).

M/360 The KLM suggestion to use a maximum number of seven digits in the serial number was accepted.

M/361 In the opinion of one Member, copy 8 should be kept by the first carrier in case of prepaid consignments but should go forward whenever the transportation charges are to be collected at destination. The Cargo Handling Group was requested to give this matter study.

M/362 With reference to paragraph 9 (o) it was agreed to modify the wording in order that subsequent carriers, not only the first carrier, may make a notation on the air waybill on the apparent condition of the goods and of the packing. It was noted that this provision is already included in the Conditions of Carriage.

M/363 SWISSAIR suggested that since carriers are entitled to inspect passenger's baggage, this Member felt that carriers should be entitled to make a similar inspection in the case of cargo. The meeting supported this view and requested the Cargo Handling Group to study the matter.

Irregularity Report (IRP)—Resolution 543

M/364 The Conferences adopted the Traffic Committee's recommendation (TC11/543) with an amendment in paragraph 1 to provide that the IRP should be "forwarded by airmail or fast means normally used" and with the further amendment that the number of copies to be prepared be left to the carrier's discretion.

Cargo Accounting Advice (CAA)—Resolution 544

M/365 The Traffic Committee's recommendation (TC11/544) was adopted with minor drafting changes. Paragraph (1), third line, was amended to read "IATA *or* ATA Revenue Accounting Manuals."

Transfer Manifest (TRM)—Res. 545

M/366 The Traffic Committee's recommendation (TR11/545) was adopted. KLM abstained from voting and stated that:

> "with regard to the mandatory use of the transfer manifest for interline cargo shipments, according to the information received from the KLM representative at the meeting of the Clearing House and Revenue Accounting Sub-Committee, there was a general feeling that instead of the transfer manifest another document such as a transfer coupon accompanying each individual shipment would offer a better solution and suggested that the problem be referred back to the Clearing House and Revenue Accounting Sub-Committee."

Cargo Identification Tag or Label—Resolution 546

M/367 The Conferences adopted the Traffic Committee's recommendation (TC11/546) with a minor drafting change in the first line of paragraph (1). The expression "lot" was changed to "bulk lot". It was understood that the label may also be used for consignments consisting of one package.

Aircraft Differentiating Label—Resolution 549

M/368 The Traffic Committee Recommendation (TC11/549) was accepted unanimously by all Conferences with the amendment that the Spanish text on the label should be amended to read: "No cargar en aviones de pasajeros."

Interline Tracer (TRC)—Resolution 550

M/369 The Conferences adopted the Traffic Committee's recommendation (TC11/550).

Prepaid Ticket Advice (PTA)—Resolution 740

M/370 Braniff strongly recommended that the draft resolution submitted by the Traffic Committee (TR11/740) be modified to indicate clearly that the issuing carrier should be held responsible for the validity of the issue wire.

M/371 PAA referred to Section B covering "Scope" and suggested that it should be extended to cover various forms of taxes and other incidental charges.

[fol. 4452] —76—

M/372 SAS proposed that Section D, paragraph (3) be modified to reduce the period from three months to one month in the case of a prepaid ticket advice being unpaid.

M/373 With the above amendments, the Conferences adopted the Traffic Committee's recommendation.

Reservations for Cargo—Resolution 751

M/374 Traffic Conference 2 agreed to rescind Resolution 220/751 as recommended by the Traffic Committee (TC11/751).

Form of Interline Cargo Handling Agreement—Resolution 850b

M/375 The Conferences adopted the Traffic Committee's recommendation (TC11/850b) as amended by the Legal and Financial Committees.

M/376 KLM made the following statement for the record:

"As this resolution embodies the same provisions for proration and re-routed cargo shipments as Resolution 018, the same objections recorded in respect of Resolution 018 apply to the Interline Cargo Handling Agreement. According to our information the Clearing House and Revenue Accounting Sub-Committee noted that considerable accounting difficulties would be encountered if prorating of re-routed cargo shipments are handled in this manner. As this Committee will discuss the question at its next meeting, KLM suggests that no specific action be taken by the Conference at this time and that the question be referred to the FRCS and Revenue Accounting Sub-Committees."

[fol. 4453] —77—

REPORT OF THE COMPOSITE AGENCY GROUP

M/377 Mr. E. S. Sullivan, Chairman of the Composite Agency Group which met in New York on April 10, 1951, presented the Agency report.

General Sales Agents—Resolution 800

M/378 The Composite Agency Group had recommended revalidation of the Resolution with deletion of paragraph 12 and with the addition of a new paragraph to allow the Enforcement Office to inspect books and records of General Sales Agents relating to the sale of air transportation.

M/379 KLM stated that they had not been able to submit the information called for by the Madrid meeting of the Conferences since Resolution 800 was not being implemented fully by all carriers, and, in consequence, they were not able to assess the degree of hardship with which the restrictive clauses of this resolution imposed upon them.

M/380 With reference to the new paragraph permitting the Enforcement Office to inspect books and records of General Sales Agents, the LDO drew attention to the Conference Provisions relating to enforcement machinery and suggested redrafting this paragraph to bring it into line with the wording of the Provisions. The Conferences accepted these recommendations and adopted Resolution 800 incorporating the new paragraph. Two other amendments which were proposed when other questions relating to Agency administration were developed were also agreed upon.

M/381 To prevent the sales agency rules being circumvented by General Sales Agents individually or General Sales Agents in collaboration with Members, it was considered necessary to insert a new paragraph which defines clearly, the terms under which a General Sales Agent may disburse commission. A second paragraph was added prohibiting the disbursement of all or any portion of a General Sales Agent's overriding commission.

Sales Agency Rules—Resolution 810

Definition of "Suitable Practices"—Section C (1)

M/382 The Agency Committees have, for some time, experienced difficulty in deciding whether the employment by an Agent of personnel formerly employed by an IATA Approved Sales Agent which had gone into default would disqualify an agent under Paragraph C(1) of Resolution 810 referring to "suitable practices." The IATA Legal Adviser and the Legal Drafting Officer had given the question careful consideration, and had provided a legal opinion covering this subject.

M/383 The Conferences accepted this opinion and directed Members and Agency Committees to be guided accordingly. In Members' own interests, it was agreed that under no circumstances would the advice given Members by legal counsel be divulged to agents.

[fol. 4454] —78—

Procedure for Approval or Retention of Agents—Section B

M/384 Consequent upon the decision to discontinue the use of a combined passenger and cargo form of agency application, it was necessary to amend the third sentence in Section B, Paragraph (1), which now reads "there shall be *two* types of agency application forms. . . .".

M/385 The Conferences noted that all governments had approved Resolutions 810i (General Sales Agents of Non-IATA Air Carriers) and 810j (Equality of Commissions) and accepted the Agency Group's recommendation that the terms of these resolutions be incorporated in the Sales Agency Rules under Section B. This required the addition of two new paragraphs (9) and (10).

Rates of Commission—Passenger Transportation—Section J

M/386 A Working Group was set up to study the problems connected with rates of commission for passenger transportation, and this Group recommended a complete revision of Section J to clarify its various provisions.

M/387 SAS felt that the inclusion of Paragraph (10) under Section B might lead to complications unless Section J governing the payment of commission on charters was amended. According to the present rules, an agent may not receive rates of commission from a non-IATA carrier on charters higher than the IATA rate for scheduled services. IATA Members, on the other hand, could, if they so desire, pay commissions on charters exceeding the rate for scheduled services. This Member suggested the deletion of the reference to charter rates in Section J or alternatively, an amendment to read "that where practical commissions on charters shall not exceed 5%, but in no case more than 7½%." In essence, this amendment was accepted by all Conferences.

M/388 For clarification and to avoid misinterpretation, the Conferences decided to define in precise terms an agent's commission entitlements with respect to subsidized immigrant traffic. Under the revised provisions of the resolution, an agent may receive commission only on that portion of the fare he actually collects or, in cases where a government pays a portion of the fare, an agent may claim commission if the government transportation request is drawn in his favor, it is cashed by him and he remits the proceeds to a Member.

M/389 An amendment was made to reflect the accepted interpretation covering the payment of commission on "prepaid" business. An agent making a "prepaid" sale is entitled to the commission applicable, notwithstanding the fact that the fare might be paid by the purchaser directly to the Member and the agent himself does not collect the fare.

M/390 The Traffic Conferences agreed that these new provisions should not become effective until January 1, 1952.

[fol. 4455] —79—

Rate of Commission—Cargo Transportation—Section K

M/391 The Conferences agreed to limit the rate of commission for carriage of international air cargo on chartered aircraft to 5%. This was accomplished by the deletion of

the words "when practicable" in the third line of Section K, Paragraph (1).

Limitations on Payment of Commissions—Section M

M/392 The Agency Group drew attention to the fact that under the present Resolutions 810 and 851, it is possible for a non-approved sales agent to collect commission indirectly from an IATA carrier. A non-IATA carrier with whom a Member has an interline agreement is not subject to the provisions of Resolution 810, except that commissions exceeding the agreed IATA rates cannot be paid. Resolution 851 grants this exception. In practice, therefore, a non-IATA carrier may disburse all or portions of its commissions to its sub-agents whether or not they are IATA approved.

M/393 To eliminate this conflict, the Group had suggested amendments to both resolutions which would prevent a non-IATA carrier, approved as a sales agent under the special rules relating to non-IATA carriers, rebating commissions to agents not approved by the Association.

M/394 The Conferences favored the suggestion in principle, but felt that an exception should be made in the case of steamship companies qualified as approved agents under the special rules and also members of the Air Traffic Conference of America. An Ad Hoc Committee, which was set up to study the matter, recommended that the situation be regulated under Section M of the resolution rather than under Section P, as suggested by the Composite Agency Group. The Conferences accepted the Ad Hoc Committee's proposal which, in addition to clarifying the present limitations of payment of commissions, reflected the wishes of Members.

M/395 In Traffic Conference 3 Members took cognizance of special conditions prevailing and agreed that, within the area falling under the jurisdiction of the Hong Kong Agency Investigation Board, agents may disburse all or portions of their commissions to sub-agents or brokers whose names are submitted to the Board. CPAL abstained

from voting on this motion and made the following statement:

"That while 'recognition of the non-IATA approved 'Hong Kong Brokers' is a step in the right direction and while Canadian Pacific Air Lines and other Member airlines will, undoubtedly, make a true endeavor to apply and live with the resolution as it is now to be amended, we, Canadian Pacific Air Lines, feel bound to inform the Conference of our views and recommendations in this matter:'

[fol. 4456] —80—

"(i) The filing of a list of 'Brokers' used by each IATA approved sales agent will tend to falsify what is not a fairly clear situation.

"(ii) Placing the onus to maintain such a list and keep the AIB properly informed of changes etc. on the IATA approved sales agent is not considered to be realistic.

"(iii) The 'IATA approved sales agent' is being forced by this amendment to 'split' his commissions and this is not a recommended procedure.

"(iv) We have, as yet, done nothing to prevent or at least discourage rebates to passengers.

"It is, therefore, recommended that Conference study and perhaps capitalize on the experience of the steamship companies who also faced the Oriental ways of doing business, and who have for many years found it necessary to recognize the 'Hong Kong Brokers'.

"We believe the Steamship Conference eventually decided that their Members must deal directly with both Steamship Conference agents and separately with the 'Hong Kong Brokers', but that their Conference agents would be paid 5%, whereas the 'Brokers' would only receive 3%.

"Canadian Pacific Air Lines suggests that the 'Hong Kong Broker', through our approved agents, receives too great a commission, and this encourages 'Rebates.'

"Canadian Pacific Air Lines proposes that Member airlines at Hong Kong should be permitted to deal directly with the 'Brokers', and follow the example of steamships in limiting Brokers' Commission to 3%.

"Canadian Pacific Air Lines suggests that the matter be studied by the Agency Committee, which will report and prepare a recommendation for the next Conference meeting."

Standard Sales Agency Agreements—Section G

M/396 To allow for difficulties experienced in certain areas, it was agreed to amend Section G, Paragraph (1), which at present makes it mandatory for a Member appointing an approved sales agent to execute a Standard Sales Agency

—81—

[fol. 4457] Agreement. Under the new provision, a Member may enter into an agreement with an agent either in the form of the Standard Sales Agency Agreement or in a form which will give legally binding effect to the terms and conditions contained in the Standard Sales Agency Agreement.

Payment of Commission to Employees

M/397 Section M(4) of Resolution 810 permits a Member to pay agency commission to its directors, officers or full-time employees. The Agency Committee of Traffic Conference 3 reported that in the Hong Kong area there was evidence that employees of the Members, receiving remuneration on the basis of commission on sales, made a practice of rebating commission to agents and in some cases passengers. To combat this irregular practice, the Agency Committee of Traffic Conference 3 recommended the insertion of clauses in Resolution 810 specifically prohibiting employees rebating commission. This recommendation received the majority of support of the Composite Agency Group and further recommended that the amendment should apply on all areas.

M/398 SAS objected to the proposed amendment on the basis that they considered that employees of Members are included in the term "Member" used throughout IATA

resolutions and, as such, carriers themselves would be in violation of the sales agency rules if they permitted the rebating of commissions by their employees. This view was accepted by the majority of Members and a motion to adopt the amendment proposed by the Agency Group was defeated.

Appropriate Notation on Air Waybill to Establish the Right to Commission

M/399 The Chairman of the Composite Agency Group reported that the Group was unable to recommend a solution to the difficulties arising from the implementation of the last sentence of Section K(2). The Agency Committees of Traffic Conferences 1 and 2 had recommended the inclusion of a special box on the air waybill reading "Commission payable to ————" for use by carriers who would decide to whom commission is payable. This suggestion was rejected by the Group on the grounds that one of the parties concerned might regard such action as arbitrary and make legal claim for the commission involved. The Conferences accepted the Agency Group's views and suggested that the matter be given further study by the Agency Committees.

Office Space Shared by Member and Agent

M/400 The Composite Agency Group was of the opinion that this practice was undesirable and had recommended the addition of a new paragraph in Resolution 810 prohibiting a Member and an agent occupying the same office space unless permitted to do so by the Agency Committee. KLM explained that for reasons of economy they had several such agreements with agents and suggested that unless substantial reasons were provided against the continuation of agreements, their present arrangements should stand. They also felt that authorization to share office space with an agent should be in the hands of the Conferences and not the Agency Committees.

[fol. 4458] —82—

M/401 The Conferences felt that the matter required further study by the Agency Committees and that question of

restriction should only be applicable in cases where it can be established that a Member gains a competitive advantage by the arrangement.

Payment of Commission on Insurance Premiums

M/402 The Composite Agency Group had considered the question of whether a carrier acting as a broker for an insurance company was in violation of the Agency Resolution if he allowed an agent commission on insurance sold. It was pointed out that Section K(1) distinguishes clearly between transportation charges and other charges such as insurance, taxes and COD charges and the Conferences endorsed the opinion that the practice of paying commission on insurance premiums was not a violation of the resolution.

Single Agency Agreements concluded by the Secretary on Behalf of IATA Members

M/403 The Chairman of the Composite Agency Group explained that under the scheme proposed, Conference Secretaries would be authorized to conclude that part of the sales agency agreement relating to terms and conditions with agents on behalf of Members. Members would be relieved of a considerable administrative burden. Although the proposal was intended specifically, to cover agency administration in U.S. and Canada, it could be adapted for application for the rest of Traffic Conference 1 and also Conferences 2 and 3.

M/404 The LDO stated that, aside from administrative difficulties, there appeared to be some doubt as to the ability to prove the existence of a contract. He felt that before the scheme is adopted by the Conferences, the Legal Committee should clear this point and also the question of the applicable law when agreements with agents in a number of countries are signed by the Secretary.

M/405 NAL confirmed that the ATC scheme had been cleared by their attorneys. However, the question of the applicable law had not presented difficulty since the ATC scheme only covered agents in U. S. and Canada. In the opinion of this Member, it would be advantageous for IATA

to test the scheme in North America. BEA and BOAC stated that they were not in favor of introducing the scheme in one area and not in others. Members had not had much time to study it in detail and suggested, therefore, that it be referred back to the Legal Committee and Agency Committees for further examination.

M/406 A Member pointed out that since the Agency Committee of Conference 1 had been responsible for drafting the proposal and had already recommended its adoption in U. S. and Canada, there was no reason to refer it back to this Committee. It was suggested that as far as Conference 1 was concerned, this scheme should be submitted to the Members for adoption by mail vote since it was cleared by the Legal Committee. In the meantime, the question could be studied by the Agency Committees of the other Conferences. It was agreed to adopt this procedure.

[fol. 4459] —83—

Joint IATA/ATC Agency Administration

M/407 Members of Traffic Conference 1 noted the views of its Agency Committee regarding the question of joint IATA/ATC administration of agents in the United States and Canada. The Committee had studied the matter and acknowledged the desirability of joint administration, but had come to the conclusion that this would not be possible until the IATA and ATC resolutions covering Sales Agency Rules contained identical provisions. It was suggested that it would be more convenient for the ATC to adopt IATA Sales Agency Rules than vice versa, since it appeared unwise to disturb the worldwide uniformity of agency procedures which the Association had achieved.

M/408 The meeting was informed that the Executive Committee had also studied the question and had authorized the Director General to develop the matter further.

Agency Fees

M/409 The Conferences accepted the Agency Group's recommendation and the Entrance and Agency Fees for the calendar year 1952 were agreed upon at the present level. In regard to Traffic Conference 1, where the position

is influenced by IATA's close relations with the Air Traffic Conference of America, it was agreed that the Association should offer to collect, at the same time as the billing of IATA sales agents, the amount of the fee required by the ATC from those of their agents who are also IATA approved.

M/410 ALI stated that the Entrance and Agency Fees were extremely high for agents in soft currency countries, and requested that the possibility of reduction in fees for these agents be studied by the Agency Committees. In principle, the Conferences did not approve of such discrimination, but agreed that the matter be studied.

M/411 SAS stated that they still preferred to see the practice of collecting fees from agents abolished altogether.

M/412 BEA suggested that if Agency Fees were to be retained, a token reduction should be made. This Member pointed out that agents had been told that fees were collected to cover agency administration and the cost of bonding. However, they were aware that the bond had been cancelled, and expected a reduction of the fee. This view received little support. Attention was drawn to the fact that a substantial reduction was made following the Nice Meeting Conferences, and although the previous bonding scheme no longer seemed practicable, other methods of protection were being studied. It was agreed, however, that a letter explaining the present position and purpose of the Agency Fees should be drafted and circulated to agents.

[fol. 4460] —84—

Commission on Prepaid Business

M/413 The Conferences considered the proposal made by Air France that a handling fee should be paid to the handling agent on prepaid business involving two agents. This Member explained that it had been approached by numerous agents suggesting that airlines adopt the same practice as shipping companies. In their view, traffic was being diverted to surface transportation because agents received handling fees.

M/414 On a point of clarification, it was confirmed that on sales handled through two offices of the same agency enterprise, no handling fee would be payable.

M/415 A motion to permit payment of handling fees was defeated and it was decided to refer the matter to the Committees for further study.

M/416 PAL informed the meeting that they would request the Agency Committee of Conference 3 to study the situation in Manila where carriers had been approached by agents suggesting that both Members and agents charge 25 pesos whenever they are required to take care of a passenger's documentation. PAL stated that although shipping companies in Manila followed this practice, this Member did not feel it was necessary for air carriers to introduce similar procedures. This view was supported.

Consolidated Form of Application for Cargo Sales—Resolution 160/810b

M/417 Traffic Conference 1 accepted a revised form of agency application for cargo sales as at Resolution 160/810b. This new form was recommended by the Agency Committee of Conference 1 and represented the results of study conducted to determine the information required from an applicant in order to evaluate his ability to handle air cargo traffic.

M/418 Members of Traffic Conferences 2 and 3 stated that they were not prepared to accept the new form until it had been studied by the respective Agency Committees.

Form of Agency Application, Combined Passenger and Cargo Sales—Resolution 810c

M/419 The Conferences agreed that this form served no useful purpose and Resolution 810c was rescinded.

Modification of Verbatim Clause in all Forms of Agency Application

M/420 The recommendation of the Composite Agency Group was adopted unanimously by the Traffic Conferences as at Resolution 810a.

Inclusive Tours—Resolutions 810d and 810e

M/421 The Composite Agency Group expressed the opinion that the principles on which the present Inclusive Tour Rules are based are unsound, and recommended that the Conferences set up an Ad Hoc Committee consisting of

—85—

[fol. 4461] agency and fares experts to study the whole question and formulate more simple rules. The Group felt that contrary to the fundamental principles of the Inclusive Tour Program, under which Members should prepare to grant tour operators additional commission in order to promote this type of traffic, it was found that considerable volume of normal traffic is being diverted and qualified as extra commission traffic. The Conferences accepted the Group's recommendation and created the following Committee to study Inclusive Tour questions and to report before the next meetings:

J. M. Bamford —Air France
J. R. Barch —Trans World Airlines
J. W. Croes —KLM Royal Dutch Airlines
J. L. Grumbridge—British European Airways
H. Heim —Pan American World Airways
A. Honne —Scandinavian Airlines System
J. H. Mahoney —American Airlines

M/422 For purposes of clarification, Traffic Conference 1 agreed to an amendment of Resolution 810d (Inclusive Tours Initiated by Members) reading as follows:

"The provisions of this resolution shall apply only to tours sold within the area of Traffic Conference 1 for transportation wholly within that area."

M/423 The present Resolution 260/810e covering Inclusive Tours Initiated by Producers in Conference 2 allows a discounted fare instead of commission in Europe. The Middle East Working Group had recommended that this facility be extended to the Middle East. The Conference was not disposed to permit inclusive tour facilities between Europe and the Middle East but agreed to extend the application of the resolution to transportation wholly within the

area of the Middle East and also between Cyprus and Greece. Resolution 280 810e was adopted giving effect to this decision.

Implementation of Resolutions 810i and 810j

M/424 It was agreed that applications from General Sales Agents of non-IATA carriers for exemption from the provisions of Resolution 810j should be referred to the Agency Committees for action.

M/425 The Secretary of Conference 3 was requested to send a letter to all agents of Conference 3 informing them that they are now subject to Resolutions 810i and 810j. The form of the letter to be sent should be similar to that already sent to agents in Traffic Conferences 1 and 2.

M/426 At an individual meeting of Traffic Conference 2 a letter from the International Federation of Charter Operators (FITAP), asking certain questions relating to the application of Resolutions 810i and 810j, was con-

—86—

[fol. 4462] sidered. The letter asked what criterion would be used by the Conferences in maintaining or withdrawing IATA approval of General Sales Agents of non-IATA companies. The Conference was of the opinion that each case should be judged individually and on its own merits.

M/427 FITAP also asked for a definition of "General Sales Agents" and "Approved Sales Agent." The Conference was of the opinion that the term "General Sales Agent" was well-known in the trade and did not require definition. However, the principal difference between the two was that a general sales agent supervised the activities of sales agents on behalf of a carrier.

M/428 In answer to another question, the Conference confirmed that an approved sales agent, when appointed as a general sales agent, ceased being an approved sales agent.

M/429 In replying to a further question concerning approval by governments of IATA resolutions, it was suggested that FITAP refer to national carriers of each individual country for the information they require.

Form of Passenger and Cargo Sales Agency Agreements—Resolutions 820 and 821

M/429 The Conferences agreed that the form of Sales Agency Agreements should be amended to permit carriers and IATA Enforcement Officers to inspect an agent's records relating to the sale of air transportation offered by a carrier. It was also agreed that IATA Enforcement Officers should be given adequate opportunity to interview and gain information from any officer or employee of an agent whom the Enforcement Officer has reason to believe is in possession of information concerning a complaint under investigation.

Agency Interline Agreements with non-IATA Carriers—Resolution 851

M/430 This resolution was amended to reflect the new provisions agreed upon by all Conferences in Section M(3) of Resolution 810 relating to the limitation on payment of commissions. CPAL abstained for the same reasons as recorded under Minute 395.

Reduced Fares for Agents—Resolution 203

M/431 Several carriers opposed the recommended liberalization of Resolution 203 permitting group travel of agents for educational purposes. One Member felt that it would create an unfair situation for small carriers and another Member expressed the view that tourist organizations and hotels should be called upon to meet a portion of expenses.

M/432 SAS stated that in Scandinavia, local tourist organizations were unable to contribute the necessary funds and that surface carriers granted rebates to groups of agents on educational tours. PAA felt that the two annual

—87—

[fol. 4463] passes permitted under the present resolution were intended for the purpose of educating agents and this Member could see no reason for further liberalization.

M/433 A motion to adopt the agency group's recommendation in all areas failed. However, Traffic Conference 2

adopted this resolution as at 280 203b applicable only to European agents for tours formed wholly within Europe. BEA, Cyprus Airways, PAA and TWA abstained from voting.

M/434 PAA proposed that Resolution 203 be amended to prohibit granting of transatlantic free and reduced rate transportation to agents during the high traffic season. This Member suggested that agents, requesting free and reduced transportation during the on-season, imply that a refusal might lead to a diversion of their business to other Members more amenable to allowing such transportation. This proposal received no support.

M/435 Air France informed the meeting that ASTA had been invited to hold their next convention in Paris, and this Member had been requested by the Official French Tourist Organization to grant free or reduced transportation to members and allied members of ASTA.

M/436 The majority of Members were opposing in principle to the granting of free or reduced transportation to allied members of ASTA and felt that normal members should use their annual free tickets for the purpose of attending the Paris convention.

Rules for Participation by Members in Conventions of Travel Agents

M/437 The Composite Agency Group reported that there was a tendency on the part of organizers of travel agency conventions and similar functions to impose upon Members' hospitality. To protect Members, the Group recommended the adoption of rules to govern the participation in conventions and functions of travel agents. NAL explained that a similar resolution had been passed by the Air Traffic Conference of America because the ATC Members found that they were required to pay a large portion of expenses at such conventions. In the opinion of this Member, IATA carriers should adopt similar protective rules.

M/438 The Conferences accepted the Agency Group's recommendation and adopted Resolution 812 governing

Members' participation in international, national, regional and district conventions of sales agents.

Numerical Code of Countries, Currencies, Cities and Agents

M/439 The Conferences were in favor, in principle, of applying the numerical code developed by the IATA Clearing House and Revenue Accounting Sub-Committee to agents as proposed by KLM. It was recognized that administrative machinery would be required to implement this scheme and until this work is completed, it would not be possible to decide the date of introduction of the code.

[fol. 4464] —88—

General Sales Agency Appointments

M/440 *Traffic Conference 1*

Socca, 2a, Avenida Norta 11
San Salvador, El Salvador

In the absence of full details regarding the appointment of this agent by SABENA, no action was taken by the Conference.

M/441 *Traffic Conference 2*

The following Sales Agents appointed as General Sales Agents were authorized to receive commissions for sales over the lines of all Members:

(i) Jules Boutin Travel Bureau Ltd., Dinard, France
Appointed by Air France

(ii) Societe d'Exploitation de l'Aeroclub du Touquet, Le Touquet, France—Appointed by Air France

(iii) Karnak Syrian National Tourist and Transport Co., Ltd. Damascus, Syria—Appointed by BOAC

(iv) Mitchell Cotts & Co.—Aden
Appointed by Air India International

(v) Scottish Aviation, Ltd., Prestwick, Scotland
Appointed by Hellenic Airlines

(vi) Dwyer and Co. (Iraq) Ltd.
Appointed by KLM

(vii) Peltours—Tel Aviv, Israel
Appointed by Cyprus Airways
KLM & SAS abstained from voting.

M/442 *Traffic Conference 3*

Forbes, Forbes and Campbell & Co., Ltd.,
Bombay and Karachi—Appointed by Air Ceylon

It was decided to defer action on the application submitted by Air Ceylon in order to be given an opportunity to submit the necessary details why it was desirable to extend such authority to their general sales agent.

M/443 China Travel Service, China—Appointed by PAL

It was decided to defer action until the political situation in China clears.

[fol. 4465] —89—

M/444 Messageries Maritimes, Singapore and Malaya
Appointed by Air France

The Conference unanimously voted in favor of granting authority to this company. PAA abstained from voting.

M/445 Warner, Barnes & Co., Ltd., Manila
Appointed by BOAC, CPA and QEA

Authority was granted to this agent for a period of twelve months subject to review by the Agency Committee and the Traffic Conference.

Agency Matters—Traffic Conference 3

Relationship with Air Transport Association of India

M/446 The Conference endorsed the recommendation that a joint meeting of the Karachi AIB and the ATA be arranged to discuss the matters suggested by the Agency Committee. The latter will not act on any recommendation forthcoming from such meeting except in consultation with the Conference Chairman.

Membership of AIBs and Attendance at AIB Meetings

M/447 The Conference expressed the opinion that only full-time regular employees of Members will attend AIB meetings.

Directive to AIBs

M/448 The Conference noted that the Agency Committee had amended the Directive to AIBs to the effect that only representatives of Members of Traffic Conference 3 can attend AIB meetings as voting delegates. The Conference was in agreement with this interpretation as it considered the AIB to form a part of the Conference machinery. One Member wished to reserve his position.

Confidential Nature of AIB Reports

M/449 The Conference strongly supported the viewpoints of the Agency Committee that AIB reports are confidential and should only be divulged to Members.

M/450 The Conference adopted the recommended procedure that any Member or its employee(s) aware of such violations would be called upon to disclose the name of the offender. The Secretary will inform Members of the Agency Committee, which will consider the report at its next meeting with the view to adopt a vote of censure and decide upon disclosure to the employing airline in order that the latter may take the disciplinary action it deems required.

[fol. 4466] —90—

Hong Kong AIB

M/451 The Conference commended the Members of the Hong Kong AIB on their efforts to clarify and improve the agency situation in Hong Kong.

MISCELLANEOUS AGENCY ITEMS

Air Tour Construction Fares—Resolution 160/810g

M/452 This resolution, proposed and drafted by Pan American World Airways forms part of the undertaking to reflect existing fares and conditions in the closing of

Conference 1 fares and rates. The Resolution 160/810g, applicable only in Traffic Conference 1, authorizes Members to set up limited validity circle, round-trip and open-jaw tours at a 25% discount (first class or tourist) to include specified tour features on which agent's commission is payable. The total cost of the air tour construction fare must not exceed the base fare and children's reductions are not allowed.

INTERPRETATION OF CERTAIN PARAGRAPHS OF RESOLUTIONS 800 and 810

M/453 Pan American World Airways requested consideration of this item by the Conferences and referred to a recent decision made by a Commission created under Article XII of the Provisions for the Regulation and Conduct of Traffic Conferences.

M/454 Since the Chairman of the Composite and Joint Meetings had been a Member of this Commission, the Chairman of Traffic Conference 2 was requested to take the chair during the discussion of this item.

M/455 PAA raised the question whether a Member, having an appointed General Sales Agent in a given territory, is required to execute Sales Agency Agreements with every agent in that territory in addition to the agreements which the General Sales Agent makes with these agents. In their opinion, such duplication of Sales Agency Agreements was not required.

M/456 Several carriers thought it was necessary only to have a Sales Agency Agreement in the name of that Member acting as General Sales Agent, otherwise, the administrative problem would be enormous.

M/457 The Legal Drafting Officer, whose opinion was sought, stated that the apparent thought behind Resolution 810 was that every agent with whom a Member, directly or indirectly, is doing business must have an Agency Agreement in a certain form covering every phase of the relationship between the principal and the agent. He considered it a good principle to authorize Members acting as

General Sales Agents to appoint Sales Agents, and as far as IATA is concerned if a Sales Agent has signed an IATA Standard Sales Agency Agreement he thereby comes under the Association's control.

[fol. 4467] —91—

M/458 British European Airways stated that in their opinion an IATA Member was responsible for the acts done under his name and on his behalf by his agents, including his General Sales Agents. An IATA Member appointing a General Sales Agent, whether a Member or not, would do so in the form of an agreement, and the General Sales Agent would then be compelled to observe all IATA resolutions, including the execution of written agreements with all the Sales Agents it appoints. If the Sales Agency Agreement is violated, and the original Member thereby sustains damage, the carrier should have recourse against the General Sales Agent who has failed in his obligation.

M/459 A proposal was made that the matter be submitted to the Legal Committee, and during the ensuing discussions a show of hands was taken as to whether a Member should be held liable in cases where his General Sales Agent, who is also an IATA Member, fails to execute written agreements with Sales Agents. Nine Members felt that the appointing Member would be held liable and seven Members were opposed to this view.

M/460 The Conferences agreed to refer the question to the Legal Committee and endorsed the Chairman's opinion that the intent of the resolution should be clarified in such a manner as to avoid misinterpretation and to permit proper enforcement.

REPORT OF THE MIDDLE EAST WORKING GROUP

M/461 The report of the Middle East Working Group was considered at an individual meeting of Traffic Conference 2.

M/462 The general questions raised under the heading of "Problems of the Small Operators in the Middle East" were referred to the Traffic Committee with the request that they be considered at its London meeting so that early action by the Conference may be taken.

M/463 The Executive Committee was requested to consider the MEWG papers concerning its terms of reference, Conference dues, and the Group's views regarding the creation of local airline panels.

M/464 The Conference believes that the creation of panels should be encouraged and that these panels should consist of local representatives or district managers who would not have executive powers. Recommendations on local problems would be made to head offices of Members who would then take up questions through already-established IATA Committees. Such panels should not be regarded as part of the official IATA machinery.

M/465 The view was expressed that action on terms of reference for the MEWG and on the creation of panels was not required as urgently as the general question of the small IATA carrier in the Middle East. Furthermore, it was suggested that there might be advantage in permitting the situation to develop of its own accord before setting up governing rules and procedures.

[fol. 4468] —92—

M/466 The Conference felt that the revised Resolution 021 which would become effective in October 1951 would overcome the currency difficulties at present being experienced in the Middle East.

M/467 With reference to the particular situation in Lebanon, the Secretary was requested to arrange for a meeting of the local representatives in the Middle East as soon as possible with a view to agreement being obtained on the basis of the revised resolution.

M/468 The Conference recorded that sympathetic consideration should be given to requests from Middle East Regional Operators for exemptions under paragraph 4 of the General Sales Agency Resolution 800.

M/469 The Agency Committee of Traffic Conference 2 were requested to examine the possibility of new applicants seeking IATA agency approval being granted temporary certificates through Agency Investigation Boards. The Conference sympathized with the proposal provided it

avoided delays in agency administration and could be applied within the terms of the existing resolution. Cases were quoted where agents in the Middle East approached Members with a view to breaching resolutions. It was recommended that AIBs be notified of such approaches by agents so that all Members may be placed on their guard. The Agency Committee was requested to examine this matter and also the possibility of withdrawing IATA agency approval in those cases where unsuitable business practices are proven.

M/470 Resolution 280/105 was adopted to prevent the practice of passengers and agents receiving money in lieu of ground transportation.

M/471 MEWG recorded a proposal that commission on passenger transportation in the Middle East be increased from 5% to 7½%. This proposal was rejected unanimously.

POSTAL MATTERS

Standardization of Distances for Postal Purposes—Resolution 655

M/472 The Chairman of the Conference called upon Mr. Dolby, the Chairman of the Postal Sub-Committee of the Traffic Committee to explain how the "Yellow Book" of standardized postal distances had come into being. Mr. Dolby explained the arguments and the processes leading up to the formula on which the table of standardized distances had been drawn up. The object had been to maintain as closely as possible the existing cost to postal administrations and the existing revenue to air carriers.

M/473 Some European Members objected to the Yellow Book on the grounds that:

(i) the use of standard distances rather than the distances for the routes travelled by the mails would give rise to accountancy problems as it would be difficult to teach the Post Office how to pro-rate the revenues between carriers;

[fol. 4469]

(ii) the UPU would not accept the use of a different percentage increase on the great circle distances in different areas of the world and would require a standard percentage increase for worldwide application;

(iii) the use of a twice weekly frequency as a minimum resulted in unduly inflated figures in some cases.

They suggested the establishment of a Committee to work out an alternative proposition.

M/474 The Director General pointed out that in postal matters IATA was fighting what might be regarded as a rearguard action. The Yellow Book was one phase of this action. If the carriers could not agree on standard distances, the Post Offices were likely to decide the distances for them and they could not expect that the distances established unilaterally by the Post Offices would be to their liking. The Yellow Book might not be perfect, but it was the best proposition that IATA had been able to produce.

M/475 The European carriers, who had objected to the Yellow Book stated that they were willing to cooperate in its submission to the UPU, but that the Members should agree on an alternative proposition in case the Yellow Book is rejected.

M/476 Other Members pointed out that it was impossible to produce distances which would satisfy all Members and all Post Offices. Members' postal experts had spent much time on producing the Yellow Book and the Conferences should give it their backing.

M/477 The point was made that Members had a strong case for asking the UPU to accept the Yellow Book because it represented the continuance of the present level of payments by the Post Offices. The UPU had asked the carriers to standardize distances and any other proposition would cost carriers money.

M/478 A vote showed that 30 Members favored acceptance of the Yellow Book, 2 were opposed while 4 abstained. Both dissenters stated that they supported the objectives of the Yellow Book but opposed it in matters of mechanics.

M/479 The Chairman pointed out the importance of reaching agreement in this problem which involved 20-30% of carriers' revenues and appointed a Committee under Mr. Dolby to study the points which had been made and to report back to the Conferences.

M/480 The Chairman of the Committee on Postal Distances presented his report, and outlined the points which had been discussed by the Committee. In particular he drew attention to the Committee's recommendation that application of through distances should not be restricted to single

—94—

[fol. 4470] carrier service. This would mean that the list would have to include the distances between any two points in the world between which closed mails were exchanged. The list would, therefore, have to be amplified as soon as possible on the basis provided for in paragraph 2 of the proposed resolution.

M/481 The question was raised as to when the distances would become effective. It was stated that, once the UPU had accepted them, the Postal Administrations would be asked to put them into effect immediately.

M/482 The question was also raised as to how the distances would be applied in the case of indirect routings. It was indicated that the choice of routes was a matter to be decided by the Postal Administrations and that the carriers concerned would have to establish prorates for the routings chosen by the administration. The Conferences considered that machinery would have to be set up to work out the accountancy side and they requested that for this purpose a Working Group should be established comprising accountancy people from the following Members: BEA, AF, SAS, PAA, TWA and KLM.

M/483 After drafting amendments had been made, the resolution submitted by the Committee was adopted as at Resolution 655 by all the Conferences and Joint Meetings with the following abstentions: Conference 2: QEA, Conference 3: CPA, BCPA, QEA, TEAL, Joint 23: QEA, Joint 31:BCPA, CPA, QEA, Joint 123: QEA, BCPA, CPA. This resolution would be taken by Mr. Dolby to the St. Gall Meeting of the UPU.

M/484 The Conferences recognized that agreement to use specific distance figures was only part of the postal problem confronting Members and that there was also need for an IATA resolution which would bind Members to quote specific rates.

M/485 The Director General pointed out the difficulties of the U.S. carriers with respect to Conference action on postal rates. He said that IATA was trying to create law and order by degrees. The Postal Administrations had wanted distances, so a start had been made with distances. However, it was hoped in due course to overcome the difficulties with respect to action on rates.

M/486 Attention was drawn to the fact that the interpretation of that part of the resolutions of UPU/IATA Meeting in Cairo which dealt with the application of a single basic rate to replace combination rates had not yet been properly resolved. In such an uncertain situation, there was a considerable danger of rates being undercut. Attention was also drawn to the fact that the 3 and 6 gold franc rates for "A" and "B" routes were referred to in the Cairo resolutions as "maxima," whereas from the carriers point of view they should be regarded as "minima." It was suggested that the Conferences should cover these points by a resolution.

[fol. 4471] —95—

M/487 The meeting felt, however, that there would be no objection to the Conference adopting a resolution which would express approval of the Cairo resolutions, would provide for a literal interpretation of their provisions respecting combinations, and would provide for Members considering A and B category rates as minima. The U. S. carriers would have to abstain and leave to their Government the final decision whether they should be directed to act in conformity with this resolution.

M/488 The Conferences and the Joint Meetings thereupon adopted Resolution 652 with the following carriers abstaining: PAA, TWA, PANAGRA, NORTHWEST, NATIONAL, AMERICAN, UNITED, BRANIFF, CHICAGO

& SOUTHERN, BCPA, CPA, QEA, PAL and AIR FRANCE.

M/489 At a later stage of the meeting, the Director General read a cable received from M. Briend to whom he advised the text of Resolution 652. This resolution had been presented to the Executive and Liaison Commission of the UPU and M. Briend cabled informing the Conference that the resolution would probably be acceptable if IATA agreed a reduction to five gold francs.

M/490 The Conference would not consider any question of an immediate reduction. A suggestion that Conference adopt a resolution freezing the Category "A" area was not developed because it was considered that it would be inadvisable to adopt a further resolution on such a complex problem at this stage of the meetings.

M/491 The feeling was that if the Executive and Liaison Commission would not accept the Conferences' interpretation of the Cairo resolution with respect to the application of the 5.25 gold franc rate, there was no alternative but to revert to pre-Cairo-conditions and let combinations continue. In these circumstances it was emphasized that, if Postal Administrations should approach any Members to extend the Category "A" area or to allow combinations to be applied where they had not been applied prior to Cairo, such approaches must be met by all Members with a firm refusal.

RESOLUTIONS OF THE THIRD INTERNATIONAL CONGRESS OF AFRICAN TOURING

M/492 The Conferences made no comment on the resolutions adopted by the Third International Congress of African Touring. These resolutions were referred to IATA by the President of the Alliance International de Tourisme under whose auspices the Congress was convened.

[fol. 4472] —96—

ANY OTHER BUSINESS

M/493 Time did not permit full discussion on the paper submitted by KLM regarding the scheduling of Conference

meetings. It was agreed, therefore, that Members should submit their comments to IATA Head Office, Montreal, to permit full consideration to be given to this question before the next meeting. KLM's views were circulated to all Members under cover of their letter HAG/TAR.611/Cr/PW of April 20, 1951.

CONFERENCE ADMINISTRATION

Filing of Special Event and Creative Fares with Civil Aeronautics Board

M/494 Traffic Conference 1 agreed that the Secretary of Conference 1 should file creative and special event fares with the CAB on behalf of U. S. carriers.

Conference and Enforcement Office Budgets

M/495 Conferences 1, 2 and 3 approved budgets for 1951 as at Appendices "H" to "K". These budgets included appropriations for the Enforcement Office (Appendix "K"). In this connection it was noted that collections from fines imposed would be credited in the first place to the Conferences against the expenses chargeable to it by the Enforcement Office.

M/496 In the event of there being no meeting in the Autumn of 1951 the Conferences authorized the Treasurer to assess Members for 1952 dues in the same amount as for 1951. The Conferences also agreed that this method of assessment may be regarded as an automatic procedure and that it should not be necessary in the future for the Treasurer to seek interim powers.

M/497 The Conferences noted that a special reserve had been created for funds derived from the collection of agency fees and that the Treasurer had asked for suggestions as to how these funds should be used. One Member believed that it should be used to continue efforts to secure a bond. Other Members were opposed to bonding and suggestions were made that funds should be used to reduce fees for small operators or generally to reduce Conference dues.

Method of Assessment of Conference Dues

M/498 Conferences 1, 2 and 3 adopted unanimously the following method of assessment of Conference membership dues to commence with the 1951 assessment:

(a) One-third of Budget Expenses Assessable to Members to be shared equally by all Conference Members, with non-voting Members paying one-half of the share of the voting Members;

[fol. 4473] —97—

(b) Two-thirds of Budget Expenses Assessable to Members, to be apportioned to all active Members in direct relation to their international scheduled mileage in operation within the Conference area, for the months of March and September of the preceding year according to the following scale of discounts to be applied to any international scheduled mileage in excess of 10% of the total mileage reported by all Members of the Conference:

The	proportion	for	the	1st	10%	of	total	scheduled	mileage	—	100%
"	"	"	"	2nd	10%	"	"	"	"	—	80%
"	"	"	"	3rd	10%	"	"	"	"	—	60%
"	"	"	"	4th	10%	"	"	"	"	—	40%
					All	mileage	thereafter			—	20%

(c) All assessments to be computed to the nearest U.S. dollar;

(d) To calculate the international scheduled mileage, the IATA definition of "International Air Services" shall apply except that the measurement from (or to) the country of the reporting carrier shall commence (or terminate) at the normal gateway point (see note). In the case of carriers flying in an Easterly or Westerly direction, the distances are to be calculated to the border line of the Conference areas as set out in the master map on file with the Director General and referred to in Section I of the Provisions for the Regulation and Conduct of the Traffic Conferences of IATA;

(e) New and resigning Members shall be charged on a monthly pro-rata basis (to the nearest full month).

In the event that a new Member had no international scheduled mileage for the base period, its mileage shall be based on the first two complete months of operation within the Conference area regardless of whether or not the carrier was Member of a Conference at the time the operations commenced; or if the first complete month of operation should fall between March and September of the year for which the scheduled mileage figures are normally reported the mileage should be based upon the first complete month of operation together with the month of September;

(f) Adjustments in the Conference billings shall be made at the end of the year to give effect to new and resigning Members' assessments as outlined in (e), above;

(g) The calculation of the international scheduled mileage figures mentioned in (d) above, shall be made by

—98—

[fol. 4474] the Conference Members and shall be submitted to the Conference Secretary not later than December 31st of the year for which scheduled mileage figures are reported. If the figures are not in the hands of the Secretary by that date, the Secretary is authorized to calculate the figures himself. The Members which have not submitted their own figures must accept the calculations made by the Secretary as the basis for the assessment of the dues.

Note: A "gateway point" means the last scheduled traffic stop within the boundaries of the operator's state on a flight from a foreign country destined to the operator's state. For the purpose of defining "gateway point", however, in the case of flights destined for a foreign country from the operator's state or return from a foreign country to the operator's state by way of territory subject to its sovereignty, suzerainty, protection or mandate, "State" shall mean the Metropolitan State or mother country only.

Unpaid Conference Dues

M/499 At the Bermuda meetings in November 1948, the Conferences agreed that new and resigning Members should be charged Conference dues for the broken portion of the year in which they join IATA or resign from IATA on a monthly prorate basis to the nearest full month. In order to simplify the settlement of the resigning Members' dues, both for the year of resignation and for any prior year, the Conferences approved the following procedure which had been suggested by the Treasurer.

(i) In the event of a Member's resignation, the Treasurer is authorized to charge such Member, in final settlement of Conference dues for the year of resignation, a share of the Conference budget or Conference budgets with which the Member is concerned, computed in the manner in which agreed by the Conferences;

(ii) If such Member has not paid the Conference dues for the year of resignation, and/or dues for any prior year, by the date when the final expenses for the year of resignation are distributed among Members of the Conference, the Executive Committee may authorize the Treasurer to cancel both the original assessment for the year of resignation and any other outstanding assessments, to exclude such Member from the assessment of the final expenses of the Conference or Conferences concerned for the year of resignation, and to charge the other Members of the Conference or Conferences concerned for any unpaid assessments pertaining to prior years together with and in the same manner as the final expenses of the year of resignation;

[fol. 4475] —99—

(iii) Any amount written off according to the above procedure and subsequently collected shall be used to reduce the expenses of Conference or Conferences concerned in the year when such collection is made.

Apportionment Between Conferences of Costs of this Meeting

M/500 It was agreed that the cost of this meeting would be divided in the following proportions:

Conference 1—2 parts
Conference 2—2 parts
Conference 3—1 part.

Election of Officers to take Office as from the Closing of the 1951 General Meeting

M/501 The following officers were elected:

Traffic Conference 1:

Chairman	—	R. Ireland
1st Vice Chairman	—	J. Shannon
2nd Vice Chairman	—	W. Sternberg

Traffic Conference 2:

Chairman	—	J. W. S. Braneker
1st Vice Chairman	—	F. von Balluseek
2nd Vice Chairman	—	L. Schoevaerts

Traffic Conference 3:

Chairman	—	B. L. Anderson
1st Vice Chairman	—	A. W. Gill
2nd Vice Chairman	—	C. W. Budd

Date and Location of Next Composite Conference Meetings

M/502 In view of the uncertainty as to whether or not an Autumn meeting would be required it is felt that a definite choice of location could not be made.

Press Release

M/503 A Press Release, as at Appendix "L", was prepared by a Drafting Committee and approved by the Conferences.

Votes of Thanks

M/504 A vote of thanks to the Chairman, Mr. Deichler, for his able and patient handling of the meeting was moved by PAA and unanimously endorsed by all Members. The Members also thanked the Chairmen of the FRCS and Agency Committees, the Ad Hoc and Working Groups and the Secretariat for their contribution in making the meeting a success.

MINUTES

[fol. 4477] —101—

Appendix "A"
to
Minute M/2

IATA TRAFFIC CONFERENCE RULES AND PROCEDURES

Purpose

1. The purpose of the IATA Traffic Conference Rules of Procedure is to ensure that the business of each meeting will be conducted as quickly, efficiently and in as orderly a manner as possible.

Chairman

2. The Chairman, as the presiding officer of the meeting, shall be responsible for:

(a) maintaining order;
(b) protecting the rights of all representatives; and
(c) seeing that business is properly brought before the meeting and acted on.

3. The Chairman shall conduct the meeting impartially. Normally he will confine himself to statements of fact. If he wishes to express a personal opinion, he shall appoint a temporary Chairman and not resume the chair until the matter under discussion has been decided.

4. The Chairman shall rule out of order all remarks that are not relevant to the matter under discussion.

Members

5. No person shall speak without first obtaining recognition from the Chairman.

6. All remarks shall be made to the Chairman and not to the meeting or to any other person.

7. Only one representative (as well as one interpreter, if used) of each Conference Member shall sit at the Conference table, and, unless otherwise permitted by the Chairman, only one adviser or alternate shall sit immediately behind him.

8. The Chairman shall ensure that all statements are expressed in a clear and audible voice.

Agenda

9. Action shall be taken on matters which have been clearly and fully noticed on the Agenda for action.

[fol. 4478] —102—

10. Business will be taken up in the following order:

(a) Meeting called to order by the Chairman;
(b) Minutes of previous meeting approved;
(c) Committee Reports received and acted on;
(d) Unfinished business acted on;
(e) New business acted on;
(f) Budget matters;
(g) Election of officers;
(h) Date of next meeting; and
(i) Meeting adjourned.

11. In order that available time shall be utilized efficiently, the Chairman may impose in advance a time limit for each item of the agenda or for each speaker.

Motions

12. Matters shall not be debated or discussed unless:

(a) a written proposal has been filed with the Secretary; and

(b) the matter has been proposed in the form of a motion by one person and seconded by another.

13. A motion once decided shall not be reconsidered, unless upon consent of all the representatives present and voting.

14. The Chairman may entertain at any time in his discretion a motion to "put the question" under consideration; if such a motion is carried by a majority of the representatives present and voting, the question shall be voted upon forthwith.

Amendments

15. Amendments that are relevant to the motion under discussion may be proposed and seconded; if adopted, the amendment shall be incorporated into or substituted for the motion.

16. The Chairman shall not accept any amendment to a motion that has the effect of completely nullifying the motion.

17. An amendment to an amendment may be proposed, but no more than two amendments to the same motion shall be before the meeting at one time.

18. In the event of general consent, amendments may be adopted without a formal vote.

19. Amendments may be proposed verbally during the discussion; provided that the Chairman may, in his discretion, require the proponent to make written presentation thereof.

[fol. 4479] —103—

20. Amendments shall be voted on in the reverse order in which they have been made; e.g. where a motion, followed by Amendment A, then Amendment B, has been made, the order of voting will be:

(a) Amendment B;
(b) Amendment A (as modified by Amendment B);
(c) The motion (as modified by Amendments B and A).

Voting

21. The Chairman will restate the motion before putting it to a vote. If he should not do so, a restatement may be requested by any representative.

22. Procedural motions shall be adopted by a majority vote of the representatives present and voting. Substantive motions (i.e. motion intended to result in binding Conference action) shall be by unanimous vote, except as otherwise stated in the Traffic Conference Provisions.

23. Normally the Chairman will not vote. But, if he elects to cast his company's vote, he shall explain the reasons for so doing.

24. Motions shall be acted upon in the order in which they appear on the agenda. The voting on one motion shall not be delayed pending action on another, unless the subject matter of both are definitely inter-related.

Punctuality

25. Meetings, including all sessions thereof, shall commence promptly on time or as soon as the quorum (one-third of the Conference Members) has been assembled.

Committee Reports

26. Due weight shall be given to all recommendations contained in Committee or Sub-Committee reports. Where the vote in the Committee or Sub-Committee has been unanimous or by a strong majority, the Chairman shall endeavor to avoid any discussion of the subject.

Legal Interpretations

27. Representatives may request legal interpretations of the L.D.O., but these shall have only the weight of his personal opinion and shall not be binding in subsequent arbitration proceedings.

Adjournment

28. Meetings shall be adjourned upon a unanimous vote of the representatives present and voting.

Working Hours and Duration of Meetings

29. The working hours and duration of meetings shall be as unanimously agreed.

PAN AMERICAN WORLD AIRWAYS

PROPOSED TRANSATLANTIC FARE AND SERVICE POLICY 1951-1952

SUMMARY

1. All-year normal first-class fares to be maintained at existing levels, based on $375 one way between New York and London and 10% discount for round trip.

2. A limited frequency, high density tourist-class service to be adopted on a year-round basis, based on $225 one way between New York and London and 10% discount for round trip.

ALL-YEAR NORMAL FIRST-CLASS FARE

Although there may be some reason for modification of the basic all-year first-class transatlantic fare, there are certain factors which should be considered in discussing any change at this time.

The present fares have generated a satisfactory volume of traffic. A first-class fare lower than $375 between New York and London would result in unnecessary dilution of passenger revenues. On the other hand, it is possible that a higher fare could lead to a loss of traffic to the steamship lines. The present all-year first-class fare is equivalent to 10.87 cents per mile one way and 9.78 cents round trip between New York and London, as compared with an average of 10 cents per mile for typical first-class steamship accommodations for round-trip transportation between New York and Southampton. There is a marked differential insofar as other classes of steamship travel are concerned: six and a half to seven cents per mile on single-class

steamers, six to six and a half cents for cabin-class accommodations, and four and a half to five cents for tourist-class accommodations.* A higher air fare might permit the steamship lines to capture a substantial volume of passenger traffic that otherwise would move by air. Furthermore, the prevailing all-year normal fare by air has gained public and industry acceptance, and any basic change at this time might not be desirable.

An important reason for not increasing the present all-year first-class fare structure lies in Pan American's further proposal to abandon discounts for off-season transportation.

At the present time there are four basic fare levels across the Atlantic during the off-season; e.g., one-way fare, off-season round-trip fare (fare and a third), on-off season round-trip fare, and the special 15-day round-trip excursion fare (fare and a tenth). This fare structure has been needlessly complex and the overlapping periods involved in on-off season transportation, particularly when combined with the fare and a tenth program have caused public

—112—

[fol. 4488] confusion as well as ticketing difficulties and added accounting problems.

The present off-season fare structure has undoubtedly caused diversion from the higher fare level. A passenger questionnaire survey conducted by Pan American between January and March 1951 revealed that at least 65% of the users of the 15-day excursion fare plan would have travelled by air anyway at the higher fare. Furthermore, it is apparent that the 1950-1951 program, which permitted eastbound transportation from September 1 through March 31 (seven months) and westbound from December 1 through June 30 (seven months), with no other limitation on the time of completion of the round trip, involved excessive diversion from full first-class fares. Although on-season transpor-

* Rates given are for standard accommodations on steamer services between the United States and Southampton, as shown in the Official Steamship and Airways Guide, April 1951.

tation covers a period of five months in either direction, there are only two months which coincide as one-season months in the two directions.*

The elimination of off-season discounts would effectively increase the passenger revenue yield, since transatlantic air travel to and from Europe in the winter months is relatively less elastic than at other times of the year. It should be noted that steamship lines currently offer only a nominal reduction for off-season travel, as shown by the following table (fares are between New York and Cobh or Southampton):

Minimum Transatlantic Steamship Fares (Round Trip)

	on season			off season		
	First	Cabin	Tourist	First	Cabin	Tourist
Queen Mary	$750	$470	$340	$730	$450	$330
Ile de France	670	460	340	650	420	330
America	650	440	330	590	400	320
De Grasse	490	372	—	440	352	—

YEAR-ROUND LIMITED FREQUENCY AND HIGH DENSITY TOURIST SERVICE

Although Pan American believes that the prevailing first-class fare, based on $375 one way between New York and London, should be maintained, it is important to realize that a choice of fares is available to most other major overseas destinations, on a *year-round* basis, whereas, transatlantic rates lower than first class have been available only during those periods of the year which are least popular for transatlantic travel. Typical comparisons are shown in the following table:

---

* On-season period:
Eastbound—April, May, June, July, August
Westbound—July, August, September, October, November

[fol. 4489]

(From New York Round Trip)

To:	Miles	First Class Fare		Cheapest Available Year Round Fare	
		$ Amount	¢ per mile	$ Amount	¢ per mile
London	6,904	675.00	9.8	675.00	9.8
Lima	7,466	712.00	9.5	539.60	7.2
Honolulu	10,142	588.00	5.8	508.00	5.0

(From Chicago Round Trip)

To:	Miles	First Class Fare		Cheapest Available Year Round Fare	
		$ Amount	¢ per mile	$ Amount	¢ per mile
London	8,352	745.80	8.9	745.00	8.9
Lima	7,902	723.60	9.1	615.45	7.8
Honolulu	8,618	504.20	5.8	458.00	5.3

The transatlantic area, however, is the most heavily travelled to and from the United States and offers an already existent and potential market at least equal to that of all other world areas combined. As shown in detail in Attachment L, a total of 1,071,999 persons travelled between Europe and the United States in 1950, having increased from 611,577 in the prewar period. It should be noted, however, that despite this numerical increase, the relative importance of transatlantic travel has become increasingly less to total overseas travel to and from the United States. During the immediate prewar period it accounted for 57.8% of all travel between the United States and all overseas areas; in 1948, it accounted for only 45.7%; and in 1950, despite the influence of Holy Year and adverse factors which reduced transpacific travel, the proportion was only 49.7%.

It is likewise significant that 68.6% of total transatlantic passengers still travel by boat, as compared, for example, with only 19.9% of combined sea and air passengers be-

tween the United States and all Latin America.* In other words, for every three transatlantic air passengers, there were almost seven transatlantic passengers who travelled by boat. This is shown by the following table** which analyzes 1950 transatlantic travel:

[fol. 4490]

—114—

	Number of Passengers	% of Total
Air	316,827	31.4
Sea		
First Class	160,895	16.0
One & Cabin Class	235,554	23.4
Tourist Class	294,746	29.2
Total Sea	691,195	68.6
Total, Sea and Air	1,008,022	100.0%

A continued policy of high fares for transatlantic air travel will undoubtedly continue to divert potential airline traffic to surface carriers as well as to other world areas. This can best be appreciated by examining the fare levels for each classification of transatlantic travel. All-year air and first class steamer rates are generally comparable—nine and a half to ten and a half cents per mile—and air accounts for twice as many passengers as first-class steamer. But first-class air fares are not at all competitive with one and cabin-class rates—which range between six and seven cents per mile—and are even less competitive with tourist-class fares ranging from four to five cents per mile. Yet each of these two classes of steamship passengers is larger than first-class steamship. In other words, on-season first-class air fares are competitive with fares paid by only 23.3% of the 691,000 transatlantic steamship passengers.

There is an obvious demand for lower cost air transportation across the Atlantic and it seems clear that a year-round air fare of six and a half cents per mile—the one-way

* Reports of the U.S. Immigration and Naturalization Service.

** Taken from monthly IATA Traffic Reports.

tourist-class level proposed by Pan American would receive very substantial traffic support. It is significant that tourist-class steamship passenger volume is higher than that of any other single steamship class, and accounted for 43% of all transatlantic steamship travel in 1950 (see Attachment II). Moreover, it is an established fact that the low and medium-priced steamship accommodations are utilized *over the full-year period* at a higher rate than the luxury classes (Attachment II).

Analysis of historical travel, however, does not reflect the wholly new travel which would be developed among people who could and would pay $400 or so for round-trip travel between the United States and Europe, but who do not have the month's vacation which is the sensible minimum for boat travel.

All published travel market surveys are unanimous in their findings that the market broadens very considerably as the cost of travel decreases.* Data taken from a Curtis Publication survey** reveals that 2.4% of U. S. families spend

—115—

[fol. 4491] over $1,500 per year for vacations and is corroborated by other independent market research studies.† According to the U. S. Census Bureau††, there are 39,200,000 families (family groups of two or more persons) in the United States, in addition to 9,000,000 individuals (single persons not living within a family group), meaning that 940,800 families spend over $1,000 per year on vacations, exclusive of a large but indeterminate number of single persons not living within a family group and for which no vacation expenditure data is readily available.

---

* An independent survey among Time and Newsweek subscribers (January 1951) indicated that 74% of all transatlantic travellers had incomes of $5,000 a year or more.

** The Vacation Travel Market of the U.S., 1951, Curtis Publishing Company.

† See for instance American Magazine's Annual Travelogue, 1949.

†† Bulletin Series P-60, No. 7, February 8, 1951, U.S. Bureau of the Census.

At a round-trip fare of $405 the average couple vacationing in Europe would find a budget of $1,300 ample for a trip lasting 17 days. Total expenses of the average individual tourist to Europe would be approximately $750. Thus, a trip to Europe at the tourist fare level presented herein is within the normal vacation expenditure of a tremendous number of U.S. families and individuals. Obviously, the time saved by air would permit tourists trips to Europe not possible by boat. Studies by the U.S. Bureau of Labor Statistics* shows that 86% of all employees in private industries work under some form of paid vacation plan; the bulk of these people receive two weeks' vacation and are immediate prospects for a transatlantic tourist service.

Furthermore, annual income level is not necessarily the determinant in measuring the potential market, since an important source of traffic for the tourist service lies in the relatively low income groups represented by teachers, students, office workers and others. Many of these people are not financially able to take extended trips every year, but will accumulate savings toward one every other year. Not only will the tourist fare program permit more of these people to undertake a European trip, but it will permit them to take such trips more frequently than is now possible.

The tourist fare level will likewise broaden the potential transatlantic market within Europe. There is a higher volume of westbound steamship traffic over the Atlantic than is the case eastbound. A substantial portion of this traffic is represented by immigrants, the majority of which now go by boat; a tourist air fare would permit the airlines to compete more effectively for this available market.

Economic and Operational Considerations

In view of the market clearly available to the North Atlantic air carriers under a tourist fare program based on $225 one way between New York and London, as compared with a first-class fare of $375, it is now appropriate to analyze the economic soundness of such a tourist-class service. This

* U.S. Bureau of Labor Statistics, Monthly Labor Review, February & March 1945.

is set forth in detail in Attachment III. The tourist service would be operated with 61-seat DC-4 aircraft, which would average 55 seats available by operating via Keflavik when advantageous to do so. Frequency of Pan American's service would be limited to seven round trips per week (four to London and three to Paris) during June through September, and four round trips per week (two to London and two to Paris) during the other eight months of the year.

—116—

[fol. 4492] Passenger service would be restricted, with meals available for sale to passengers at compensatory and reasonable prices. Fares would be based on $225 from New York to London, subject to 10% round-trip discount. Even with an allocation of overhead costs to this service, it would break even with an average of 33 passengers per trip, equivalent to an average seat factor (based on 55 seats available) of 60%. These calculations include charging the tourist service with $690,000 of overhead cost, thereby relieving the normal first-class operations of Pan American's Atlantic Division of an almost equivalent amount. Stated differently, if these overhead charges were not allocated to the tourist service, it would break even at a 49% seat factor.

There is not the slightest doubt that Pan American would carry more than the number of passengers necessary to average the 60% seat factor. Hence, the tourist service, viewed by itself, will clearly be economically sound.

In the event of concern as to the possible diversionary effect of a tourist service upon the first-class regular service, it is only necessary to examine the history of those areas in which tourist (or coach) services already are in operation. Experience demonstrates that first-class traffic more than maintains prior levels after the inauguration of tourist service.

One good illustration is the domestic coach field in the United States. Most of the U.S. domestic coach operations were inaugurated in the latter part of 1949 and the early part of 1950, and the impact of coach service on first-class revenues can be found by comparing 1949 and 1950 revenues. As shown in Attachment IV, coach-service passenger revenues in 1950 amounted to $43,242,000, as compared

with only $9,592,000 in 1949. However, first-class passenger revenues of these same carriers amounted to $346,970,000 in 1950, an increase of $14,558,000 over 1949.

Even more significant are the traffic results of domestic coach and first-class services. Shown in Attachment V are the revenue passenger miles developed by the principal operators of domestic coach services. It will be readily apparent from this data that first-class traffic and seat factors have risen over earlier levels *at the same time that coach services were operating at extremely high seat factors.* For instance, the coach services operated by American and TWA had seat factors ranging between 75 and 80% throughout the entire year of 1950, despite higher traffic and improved seat factors on their first class services. Reference to similar data for Eastern and National reveals the same general characteristics.

Another good illustration is found in Pan American's Bermuda operations. Tourist-class service, inaugurated on October 1, 1950, resulted in the carriage of 10,170 passengers in the tourist service during the next five months, while the volume of first-class passengers increased 11% at the same time.* In addition, there was a very substantial improvement in the seat factor on the first-class service. This is set forth fully in Attachment VI.

—117—

[fol. 4493] (It should be noted that the combined traffic carried by Pan American and Colonial, between October 1950 and February 1951, was double the total traffic carried by Pan American, Colonial and BOAC in the same five months a year before** and was more than seven times the traffic carried by BOAC alone; it is apparent that the additional traffic was newly generated and not gained by BOAC's withdrawal from Bermuda service.)

---

* Although the officially designated tourist service became effective on October 1, 1950, a round-trip $85 excursion fare on DC-4 aircraft was instituted on June 1, 1950 and resulted in an extremely high level of traffic to and from Bermuda throughout the summer months.

** BOAC suspended its U.S.-Bermuda service in March 1950.

In Attachment VII is traced the traffic history of Pan American's tourist and first-class service between New York and San Juan from the inception of the tourist service in 1948. Total traffic, as well as traffic on both tourist and first-class flights, has increased consistently to the point where the tourist service throughout 1950 had a year-round seat factor of approximately 75% in both directions and almost 80% on the first-class service. Pan American likewise operates parallel tourist and first-class flights over another major overseas route—between New York and the east coast of South America. This route does not offer the tremendous potential available over the North Atlantic; notwithstanding, however, the tourist service to Buenos Aires had an overall seat factor of 71.0% in January 1951 and 66.7% in February 1951, as compared with 75.2% and 78.2% respectively on the first-class service in these months.

Operation of tourist service under a restricted frequency arrangement moreover will provide an effective limit on any potential adverse effect upon first-class service. The tourist-class seats which Pan American proposes to operate during the summer months would approximate only 18.6% of its total North Atlantic service.*

A transatlantic tourist service need not be limited to DC-4 aircraft. Certain minimum requirements, however, applicable to every carrier, could be easily established, including (a) high density seating; (b) restricted passenger service; and (c) limited frequency.

A 61 seat DC-4 tourist aircraft is equivalent to approximately 50% additional seating capacity compared to a standard configuration in first-class transatlantic service. Utilizing the standard configurations employed by the Civil Aeronautics Board in its rate-making procedures applicable to U.S. carriers operating over the North Atlantic**, the following relationships are derived:

---

* Based on the *combined* capacity of first-class and tourist services proposed.

** CAB Order E-3880-1-2, February 7, 1950.

Aircraft Type	Number of Seats: Standard Transatlantic Configuration per CAB	Tourist Configuration at 150% of Standard
DC-4	40	60
DC-6	43	64
L-49	43	64
B-377	61	91

—118—

[fol. 4494] A limitation on tourist service frequency could be established as a percentage of first-class seats operated. An analysis is set forth below comparing the volume of regular first-class service which the North Atlantic carriers will operate during the summer of 1951* with the comparable volume of tourist-class service resulting from application of a ratio of 20% of first-class seats, a proportion suggested by the Civil Aeronautics Board as a reasonable limit:

Scheduled One-Way North Atlantic Passenger Capacity To and From U.S., Summer 1951, and Approximate Proposed Tourist Service Capacity

Carrier	Regular Summer Service: Weekly Trips	Weekly Normal Seats Available**	Proposed Tourist Service: Weekly Seats Available†	Approximate Weekly Trips††
Air France	12	496	99	1.8
BOAC	14	812	162	2.9
KLM	10	412	82	1.5
LAI	2	90	18	1.0
PAA	32	1684	337	6.1
SABENA	5	235	47	1.0
SAS	7	308	62	1.1
Swissair	3	132	26	1.0
TWA	21	890	178	3.2
Total	106	5059	1011	19.6

* Based upon carrier schedules shown in Official Airline Guide, May 1951, which for most carriers includes increased schedules for summer operation effective in June.

** Based upon standard maximum seats available for each aircraft type.

† Computed at 20% of indicated first-class seats available.

†† Based on operation of DC-4 aircraft with 55 seats normally available; number of trips weekly are derived by dividing previous column by 55 and allowing a minimum of one round trip weekly.

Pan American is convinced that a tourist-class service over the Atlantic would be successful, as it has been in every other heavy traffic area where it has been tried. In addition to the benefits which would accrue to the carriers in terms of increased traffic and revenues, a tourist fare program would redound to the obvious advantage of Europe's economy. Tourism is a leading dollar-earner in Western Europe—in 1950 the ERP countries earned approximately $396,000,000 from travel by U.S. residents.* However, as pointed out in a report on the role of tourism in the European Recovery Program, " . . . to accomplish these and further earning increments, more adequate transatlantic transport capacity is needed, especially at lower rates. . . . American and foreign flag carriers are being encouraged to make more transatlantic passenger capacity available at moderate rates. . . ."**

—119—

[fol. 4495] In conclusion, it is particularly pertinent to refer to a recent address' by the Chairman of the Civil Aeronautics Board on "Aviation Policy in 1952," in which he stated in part as follows:

> "In March, the Board announced its policy for 1951 on trans-Atlantic charter operations. We decided that we would issue no further exemptions to authorize trans-Atlantic charter operations except where the regularly certificated trans-Atlantic carriers—both U. S. and foreign—are unable or unwilling to provide reasonably adequate charter service at established charter rates. We provided that our certificated U. S. trans-Atlantic air carriers will be authorized to contract for the flight equipment and the flight personnel, if necessary, of other air carriers to perform this charter service.

---

* Business Information Service, No. 16, April 1951, U.S. Dept. of Commerce.

** Tourism in the European Recovery Program, Economic Cooperation Administration, June 1950.

' "Aviation Policy in 1952", Address by D. W. Rentzel, CAB Chairman, April 20, 1951, at annual conference of Airport Operators Council, Memphis, Tennessee.

"But we did something else when we established this policy that I believe may have far reaching consequences on the development of world trade and travel by air. We proposed that consideration should be given to the establishment of a low fare for individual passengers on regularly authorized trans-Atlantic service.

"That means that trans-Atlantic air travel may be brought within the financial reach of millions of people who cannot now afford the fare of the present luxury services. It may mean that large numbers of American citizens will be able to travel to Europe on a one or two-week vacation and come home with a better understanding of the cultural and political problems of Europe and their relationship to our national life than ever before existed."

OPERATING PLAN AND COST DATA

OPERATING PLAN

Under normal operating and traffic conditions, it is planned that all trips will be operated on the Great Circle Course via Gander-Shannon. If required, westbound trips may be operated via Iceland.

For purposes of this study, it was assumed that all westbound trips would be operated over the longer route via Iceland.

Based on average wind components and normal alternate routings the following payloads will be available:

	Pounds
Gander-Keflavik	10,100
Keflavik-Gander	11,500
Gander-Shannon	11,050
Shannon-Gander	8,100

All flights will be operated with crew complements consisting of a Captain, 1 Pilots and 1 Steward. Reserve crews will be maintained at required points.

STATISTICAL INFORMATION

On-Season		
London Service	928,845	2,644
Paris Service	408,561	1,139
Off-Season		
London Service	504,759	2,653
Paris Service	542,935	2,860
	2,385,080	10,296

* Computed at 191 MPH

ESTIMATED COST OF OPERATION

	Cost per Hour	Cost per Mile
Direct Aircraft Operating Expenses		
Flying Operations	$344.00	$ .754
Direct Maintenance - Flight Equipment	38.85	.800
Depreciation - Flight Equipment	38.87	.098
	$800.95	$ 1.052

The above estimates are generally based upon the experience in the Atlantic Division during the first 9 months of 1950. It provides for a crew complement consisting of 4 pilots. Depreciation and aircraft rental has been provided on the basis that 5 aircraft will be required to operate on-season and 3 aircraft will be required to operate off-season schedules.

[fol. 4500]

APPENDIX C
Attachment III

	Cost per hour	Cost per Miles
Direct Aircraft Operating Expenses (Continued)		
The unit cost per hour and per mile has been adjusted where required for a provision of 8 non-revenue flying.		
Ground and Indirect Expenses		
Estimated Additional Cost Directly Applicable to Tourist Service	$ [illegible]	$ .2[illegible]
These costs represent additional out-of-pocket expenses attributable directly to the tourist service such as landing charges, flight service personnel and travel and incidental expenses.		
Overhead Costs Allocable to the Tourist Service	.0[illegible]	.0[illegible]
A direct allocation of divisional and general office overhead costs which would include Ground Operations, Ground and Indirect Maintenance, General and Administrative, and Ground Equipment Depreciation Accounts, is made to the tourist service on the basis of available ton miles.		
Total allocation of overhead to the tourist service per year - $690,000.		

APPENDIX D
Attachment III

	Cost per Hour	Cost per Mile
Total Cost before Traffic and Sales, Advertising and Passenger Expenses other than Flight Attendants	$ 323.90	$ 1.6[illegible]
Traffic and Sales, Advertising and Passenger Expenses Estimated at 14% of Total Cost	$ 52.73	$ .27[illegible]
Total Cost of Operation or Total Revenues Required to Break Even	$ 376.63	$ 1.97[illegible]
Passengers Required to Break Even per Mile		33
Estimated Passenger Load Factor Required to Break Even on Basis of 55 Seats		6[illegible]%
Total Passengers Required in each Direction to Break Even per Year		3,54[illegible]

Recommended Practice

COST OF GROUND TRANSPORTATION

160/1105—RECOMMENDED, that a reasonable charge for ground transport service between the airport used by the passenger and the city being served shall be made at origin, destination and stopover points.

[fol. 4508]

Appendix "F"
to
Minute M/180

Recommended Practice

COST OF GROUND TRANSPORTATION

280/1105—RECOMMENDED, (1) that Members operating international scheduled air services wholly within Traffic Conference 2 give early consideration to the proposition that passengers be charged a fare for ground transportation provided by or operated on behalf of Members between the airport and its respective city centre (town terminal) at points or origin, stopover, and destination;

(2) that such proposition shall be considered on an area basis at local meetings of Members' representatives;

(3) that in the event that agreement can be reached in any area for the application of a fare, such agreement should be put into effect at the earliest date permissible under Conference procedures;

(4) that any fare that may be agreed upon shall be separate from and additional to the air fare paid by the passenger.

[fol. 4509] 133

Appendix "G"
to
Minute M 329

REPORT OF THE GLOSSARY AD HOC COMMITTEE

Pursuant to the direction of the Chairman of the composite meeting of the Conference, the Glossary Ad Hoc Committee considered the matter of the advisability of the Conferences, at the meeting adopting the Glossary of Air Traffic Terms as set forth in the Traffic Handbook, in the form of a resolution.

2. As a result of its discussions of the matter, the Ad Hoc Committee recommends that:

(i) the Conferences, at this meeting should not adopt the Glossary either in the form of a resolution or in any other form having binding effect on the Members;

(ii) the Conferences should refer the matter to the Traffic and Legal Committees and request those Committees to prepare appropriate recommendations for consideration by Conferences at the next composite meeting;

These recommendations are based on the following considerations:

(a) It was not possible for the Ad Hoc Committee, within the time available to it, to study adequately the effect which each of the terms contained in the Glossary would have on the presently existing resolutions and those in the process of adoption. Accordingly the Ad Hoc Committee is not prepared to state that the definitions of each term contained in the Glossary is consistent with the intended meaning of that term where and as used in any of the resolutions.

(b) The Ad Hoc Committee is of the opinion that the seriousness and importance of giving binding effect to the definitions is such as to warrant greater deliberation and care than is possible at this meeting.

3. In addition to the matter of the Glossary the Ad Hoc Committee under the directions of the Chairman of the composite meeting considered that part of the report of the special committee (created at the Madrid meetings) on the application to Conference No. 4 of certain ambiguous resolutions containing a list of recommended definitions of certain terms frequently used in the resolutions. These recommended definitions are as follows:

Traffic Terms and Definitions

Fare, Normal	means the full, on or off-season fare established for a normal, regular or usual service, the application of which is not dependent upon any specially limited period of validity or other special circumstance.

[fol. 4510] —134—

Fare, Class B	which is equivalent to the terms tourist fare and second class fare, means the full on or off-season fare established for Class B (tourist or second class) service, the application of which is not dependent upon any specially limited period of validity or other special circumstance;
Fare, Specified	means the fare specified in an applicable Conference resolution;
Rate, Specified	means the rate for the carriage of goods specified in an applicable Conference resolution;

Fare, Constructed	means the fare established in accordance with the provisions of an applicable Conference construction resolution;
Rate, Constructed	means the rate established in accordance with the provisions of an applicable Conference construction resolution;
Rate, Normal,	means a rate established for commodities in general, the application of which, with respect to a given consignment is not dependent upon the existence of any special qualifications, such as minimum quantities or nature of the commodity;
Fare, Basic	means either a specified or constructed fare expressed in the basic currency (Sterling or U.S. Dollars);
Rate, Basic	means either a specified or the constructed rate expressed in the basic currency (Sterling or U.S. Dollars).

4. While the Ad Hoc Committee, as in the case of the Glossary, recommends that the Conferences at this meeting should not adopt definitions of these terms in a form having binding effect, it realized that the Conferences may desire nevertheless to do so, in which event the Ad Hoc Committee would recommend the following amendments and additions:

(a) amend "Fare, Normal" so as to read:

> Fare, Normal means a fare for a regular and usual service, the application of which is not dependent upon any specially limited period of validity or other special circumstance;

(b) add a new term and definition "Fare, IATA Normal" to read:

Fare, IATA Normal means a specified or constructed normal fare;

[fol. 4511] —135—

(c) add a new term and definition "Fare, IATA Normal First Class" to read:

Fare, IATA Norm First Class means the highest minimum IATA normal fare;

(alternate definition)—means the minimum IATA normal fare established for First Class services

Note: The first of these recommended definitions would be incorrect in the case of points or places between which only a tourist fare was established by the Conferences.

(d) add a new term a definition "Fare, IATA Normal Tourist Class" to read:

Fare, IATA Normal Tourist Class, means the minimum IATA normal fare established for tourist class services;

(e) amend the term and definition of "Fare, Class B" to read as follows:

Fare, IATA Normal Class B, means the minimum IATA normal fare established for Class B services;

(f) amend the definition of "Constructed Rate" by inserting before the word "established" the words "for the carriage of goods";

(g) add a new term and definition as follows:

"Rate, IATA Normal, means a specified or constructed normal rate".

5. In the light of the said list of terms and definitions (as amended and added to by the Ad Hoc Committee), the Ad Hoc Committee examined each of the presently existing resolutions to determine what effect thereon the proposed new terms and definitions would have. For obvious reasons no such complete examination was attempted in respect of the resolutions in the process of adoption. Parenthetically, it seems advisable to state that this is one of the principle reasons why the Ad Hoc Committee recommends that the Conferences should not adopt the list at this meeting.

6. The results of the said examination are as follows:

(i) In Resolutions 014e, 270 045, 052, 360 053, JT12(7)054a, JT12(7)054e, 057, 155a, 155c, 156, 157, 157a para (d), 157b para (d), 270 158 para (h), 360/158 para (g), 159, 159a, 163, 164a, 164c, 164d, 166, 167, 169, 171, 172c, 270 728a, 330 728b, the word normal would have to be deleted and the words "IATA Normal First Class" inserted instead.

[fol. 4512] —136—

(ii) In Resolutions 051, 051a, 150, 150a, 151a, 152a, 201, 204, 276, 260 130, 150 311, 270 311, 260 810e, immediately before the word "normal" the letters "IATA" would have to be inserted.

(iii) In Resolutions 159 (Para 8) and 163 (Para 8) the word "basic" would have to be deleted and the words "IATA Normal First Class" would have to be inserted.

(iv) In Resolution 503 the word "basic" would have to be deleted and the words "IATA Normal Rate" would have to be inserted.

7. In respect to the Ad Hoc Committee's recommended definition of the term "Fare, Normal", some of the Members were of the opinion that, while it would be inadvisable to do so now because of the use in many resolutions of the term normal round trip, it might be desirable for any committees studying the Glossary problem in its entirety to consider defining the term so as to mean only a one-way fare.

PRESS STATEMENT

An increase of 5.3% across the North Atlantic for air fares, beginning October 1, 1951, reflects the action, in general, taken in Bermuda by the Sixth Meeting of the Composite and Joint Traffic Conferences of the International Air Transport Association.

In some areas fares were not increased, and plans were made for the introduction in October 1952 of low-fare tourist service, notably across the North Atlantic and between London and South Africa. The Conference decided to continue the popular winter excursion fares across the North Atlantic and to encourage student travel between their homes and college, 50% reduction will be granted to students up to the age of 26 years.

Mr. R.E.S. Deichler, Chairman (Vice President, American Airlines) stated that a review of operating costs of the carriers, representing 65 airlines from 42 nations, shows an average increase of operating expenses in the excess of 20%. He stated that the fare increase did not reflect these higher costs of gasoline and oil, salaries, materials and government fees to the full extent, because the airlines of the world had increased efficiency and business sufficiently to off-set the inflationary increase in expenses.

The Bermuda Conference was a milestone in the achievement of uniformity and standardization of services to the public. For the first time in the history of air transportation has the international air traffic between the countries of North, Central and South America been brought under a uniform fares and rates pattern. The operators serving this area were able to achieve this agreement without disturbing the present level of fares and rates, thereby assuring to the public a continued high standard of service at no increase in cost. The ability of operators to come to this agreement, which has been sought for a number of years, is further proof that international co-ordination in air transport is well on it way to perfection.

The sixty-five Member carriers, representing all leading international airlines of the world, and aggregating more than half a million route air miles also perfected the standard practices of tickets, reservations, baggage handling and cargo procedures to a point never before considered, so that travel and shipment by air on international flights becomes convenient and easier for the public the world over. On the other hand the Conferences permitted the flexibility necessary in certain special areas where local conditions required some change in the application of the rules.

All traffic agreements made by the Members of I.A.T.A. are subject to approval by Governments before they may become effective.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 429

Orders
Serial Numbers E-5623

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Adopted by the Civil Aeronautics Board
at its office in Washington, D. C.
on the 17th day of August, 1951

Agreements C.A.B. Nos. 5326 R-1, 3, 5-8, 11-17, 25, 27, 29-39, 41-44, 46-48, 50, 51, 53, 54, 58-88, 98-105, 107, 120-125, 134, 135, 142, 143

In the matter of certain resolutions adopted at Traffic Conference Meetings of the International Air Transport Association at Bermuda between

PAN AMERICAN WORLD AIRWAYS, INC., VARIOUS AIR CARRIERS, FOREIGN AIR CARRIERS, AND OTHER CARRIERS

relating to rate matters

ORDER

There has been filed with the Board pursuant to Section 412(a) of the Civil Aeronautics Act and Part 261 of the Board's Economic Regulations certain agreements between various air carriers, foreign air carriers, and other carriers embodied in resolutions of the Traffic Conference of the International Air Transport Association at meetings in Bermuda in May 1951 evidenced by the above designated agreement numbers.

In order to clarify the relationship between Board action on IATA agreements and Board action with respect to similar subjects in other Board tariff and rate proceedings, the Board believes it appropriate, prior to a specific consideration of the agreements now before it, to point out some of

the factors which must be considered in passing on IATA agreements which do not apply in the case of Board action with respect to tariffs in air transportation.

There are two basic factors which must enter into our consideration of IATA agreements. First, is the fact that the Board has no statutory authority over rate levels in foreign air transportation and lacks the statutory power to suspend tariffs for foreign transportation. Accordingly it may in some cases be less adverse to the public interest to approve an IATA agreement on rates, even though the rates agreed on fail to meet the standards of justness and reasonableness applicable to interstate and overseas air transportation, than to disapprove the agreement and leave the carriers free to file rates which depart to an even greater degree from these standards.

[fol. 4540] Second, it must be remembered that IATA is an organization of air carriers of many countries with varying national interests and differing concepts of transportation principles. It is obvious that such an organization cannot function without a large degree of mutual accommodation. If each government involved were to withhold approval of any agreement which did not in every way measure up to that government's conception of national interest and proper transportation principles no agreements could ever be reached. In the light of this situation the Board believes that it should be slow to disapprove agreements which do not apply in air transportation or adversely affect such transportation, even though the particular agreement may not accord with our national law or our concepts of proper transportation practice.

We believe that the foregoing discussion of some of the basic factors entering into our consideration of IATA agreements will serve to indicate that our action with respect thereto is of little relevance or precedent value in connection with rate and tariff proceedings involving air transportation, and also provide a background for the findings which follow.

After consideration of the above designated agreements[1] submitted for our approval we make the following findings with respect thereto.

[fol. 4541] 1. Subject to the general conditions that:

(a) Approval of any resolution herein shall not be deemed approval of the application to such resolution of any other resolution except to the extent permitted by any approval of such other resolution.

(b) No approval of any resolutions herein shall extend beyond the period during which Board approval of the "Provisions for the Resolution and Conduct of the Traffic Conference of the International Air Transport Association" is in effect.

(c) Approval of any effectiveness resolution is limited to the extent that it provides effective dates for other approved resolutions.

We do not find the following resolutions or portions of resolutions to be adverse to the public interest or in violation of the Civil Aeronautics Act.

---

[1] In order to simplify reference to the large number of resolutions involved, the following system has been adopted:

All IATA resolutions bearing the same IATA series number have been designated by the same R number under CAB agreement No. 5326. So, for example, the resolution on "Free Transportation—Personal" which applies in Conference 2, Conference 3 and Joint Conferences 23, and carries the IATA numbers 370 210, JT 23(8) 210 and 280 210 would be listed as follows:

IATA No.	C.A.B. No.	Title	Applicability
210	R-87	Free Transportation—Personal	2, 3, 2-3

Any reference to R-87 would be a reference to all resolutions bearing the IATA No. 210. If reference is made to the 210 series resolutions applying in specific Conferences e.g., Conference 2 and Joint Conferences 23, the reference would be R-87 (2; 2-3).

If the Application is indicated as "worldwide" it means the resolution applies in all seven Conferences i.e., 1, 2, 3, 1-2, 2-3, 3-1, and 1-2-3.

IATA No.	C.A.B. No.	Title	Applicability

[fol. 4544]

002c R-8 Revalidation Resolution 1, 2, 3, 1-2, 1-2-3, except for those portions as to which we find in finding paragraph 3 that action should be deferred.

056 R-33 Normal Fares and Rates 3-1, except for those portions as to which we find in paragraph 5 that action should be deferred.

2. Subject to the general conditions in paragraph 1 we do not find the following resolutions or portions of resolutions to be adverse to the public interest or in violation of the Civil Aeronautics Act provided that this finding as to each resolution or portion of a resolution, or group of resolutions is subject to the conditions specified thereunder.

(a) 053 R-27 Normal Fares and Rates 3

(1) That proposed fares for regional services or regional operators shall apply only on two engine equipment.

(2) That such fares shall be available to any carrier using such equipment.

(3) That such fares are not to be used to promote combinations with through fares or construct any through fares.

(4) That the publishing of such fares in tariffs or time tables and the advertising and sale of tickets based on such fares is restricted to India, Ceylon and Pakistan.

(b) 014c R-13 Meeting Special Fares in other areas 2-3, 3-1, 1-2-3

That except with respect to the described substitution of continental tourist or coach service for transatlantic tourist service, the reduced fare is applied with the same restrictions that may be applicable to the fare being equalized.

(c) 017 R-16 Proration of Joint Fares and Rates Worldwide

That approval of this resolution does not constitute approval of any method of apportioning rates other than on a pro rata basis and that any agreement concluded by United States air carriers providing for apportionment upon any other basis shall be filed with the Board for review and action thereon.

(d) 115 R-37 Meeting Rates and Practices 1

That the notice referred to in Paragraph 3(c) of the resolution be circulated to all Members and

[fol. 4545] that air carrier Members file with the Board all notices received and sent pursuant to this resolution within 5 days from the date such notices are received or sent, or alternatively, arrange that the Conference Secretary send such notices to the Board at the time of circulation to the Members.

(e) 115a R-38 Meeting non-IATA competition in Middle East 2

115b R-39 Meeting non-IATA competition India-Africa 2-3

172k R-79 B-Fares in the Middle East 2

That air carrier Members file with the Board copies of all notices and protests received and sent pursuant to this resolution within 5 days from the date such notices or protests are received or sent, or, alternatively, arrange that the Conference Secretary send such notices and protests to the Board at the time of circulation to the Members.

(f) 159 R-58 Creative Fares 1, 2, 2-3

159a R-59 Special Round, Circle, Open-Jaw Trip Fares 3, 3-1

163 R-60 Special Event Fares 2, 2-3

(1) (a) That air carrier Members file with the Board copies of all notices and protests received and sent pursuant to this resolution within 5 days from the date such notices or protests are received or sent; or (b) alternatively, arrange that the Conference Secretary send such notices and protests to the Board at the time of circulation to the Members.

(2) That no proposed fare is to become effective if the Board should disapprove it within 35 days from the date of circulation of the original notice by the Conference Secretary (if (1)(*a*) above is employed) or within 20 days (if (1)(*b*) above is employed).

(g) 139 R-58(1) Creative Fares 1

That the first sentence of Note (1) shall be inapplicable to the resolution.

(h) 180 R-81(2) Africa Europe Tourist Service Program 2

That this tourist service program shall not become effective unless the Board approves the decision of the Conference required by paragraphs 3 and 4 of this resolution.

[fol. 4546]

(i) 200 R-82 Free and Reduced Fare Transportation Worldwide

That approval of this resolution by the Board shall not be construed as:

(a) an exemption from the requirements of filing tariff provisions as a condition precedent under Section 403 of the Civil Aeronautics Act, to the issuance of passes to any person described in the said resolution;

(b) a determination as to whether a violation of Section 404 of the Civil Aeronautics Act will result from the issuance of a pass to any person named in the said resolution pursuant to such resolution whether or not tariff provisions applicable hereto have been previously filed with the Board;

(c) an acceptance by the Board of any of the definitions or terms used in the said resolution.

(j) 810e R-134 Inclusive Tours Initiated by Producers 2

That reasonable modifications of a tour are limited to minor adjustments, involve no extra expense to the carrier and are applied alike to all passengers.

(k) 164c R-63 Off-Season Fares, India, Pakistan, Ceylon, Europe 2-3

Except as to paragraph (c) and (d) in which we find in paragraph 4 that action should be deferred,

That paragraph (h) thereof be construed to make the fares applicable to those points in Europe other than those listed in Appendix A for which the normal specified or constructed fares are lower than the normal specified or constructed fares to the European points listed in Appendix A.

3. We find that action should be deferred pending final Board action in the Free and Reduced Rate Transportation case, Docket No. 2737 et al on

204	R-85	Free or Reduced Fares for Tour Conductors	Worldwide
002e	R-8	Revalidation Resolution	1, 2, 3, 1-2, 1-2-3

insofar as it revalidates Resolutions 130/203, 250/263, 340/203 and JT 123 (3) 203, Reduced Fares for Agents.

4. We find that the resident fare provisions of paragraphs (c) and (d) of the following resolution may result in unjust discrimination and be adverse to the public in-
[fol. 4547] terest and that action should be deferred on said paragraphs 164c R-63 Off-Season Fares, India, Pakistan, Ceylon, Europe 2-3

5. We find that the following resolution may be adverse to the public interest by agreeing on uneconomically low cargo rates from the Orient and that action should be deferred thereon:

(a) Insofar as it would commonrate North American points other than the West Coast gateways with respect to cargo transportation to the Orient across the Pacific;

(b) Insofar as it would commonrate North American points other than the West Coast gateways and New York with respect to cargo transportation from the Orient across the Pacific;

(c) Insofar as it specifies cargo rates to New York from points in the Orient across the Pacific lower than required to equalize with cargo rates to New York from points in the Orient across the Atlantic, and provides a basis for construction under the provision of resolution JT31 (8) 044b of cargo rates from points in the Orient to any North

American point other than the West Coast gateways or New York which are lower than the lowest combination of rates available to such point by combining the rates from such points to a West Coast gateway or New York and the rates from the West Coast gateway or New York to points in the Orient.

056	R-33	Normal Fares and Rates	3-1

6. We find that the following resolutions result in agreements establishing rates or charges to be quoted or charged any nation for the transportation of mail and that action [fol. 4548] thereon should be deferred because participation therein by any United States air carrier would violate the condition on such air carrier participation in IATA traffic conferences imposed by Order Serial No. E-3888, dated February 9, 1950.

652	R-124	Air Mail Conference UPU/IATA	Worldwide
655	R-125	Standard Postal Distances for Foreign Air Mail	Worldwide

7. We find that the following resolution may be adverse to the public interest in permitting the furnishing of first class service at tourist or coach fare and that action should be deferred thereon.

014e	R-15	Special Canadian Construction Rule	1-2, 1-2-3

8. We find that the following resolutions may be adverse to the public interest in that they promote uneconomic competition through permitting the furnishing of free and reduced rate transportation and that action should be deferred thereon.

203b	R-84	Educational Tours for Agents	2
209	R-86	Free Transportation—Public Relations	2, 3, 2-3
210	R-87	Free Transportation—Personal	2, 3, 2-3

9. We find that the following resolution provides for fares in air transportation which may be unjustly discriminatory and may result in uneconomic rate reductions; that such resolution may be adverse to the public interest

and in violation of the Civil Aeronautics Act; and that action should be deferred thereon:

810g R-135 Air Tour Construction Fares

Accordingly, IT IS ORDERED THAT:

1. The agreements embodied in the resolutions or portions of resolutions listed in finding paragraphs 1 and 2 be, and they hereby are, approved subject to the conditions, provisions, or limitations specified with respect to each in said finding paragraphs;

[fol. 4549]

2. Action on the agreements embodied in the resolutions listed in finding paragraph 3 be deferred pending final Board action in the Free or Reduced Rate Transportation Case, Docket No. 2737 et al;

3. Action on the agreements embodied in the resolutions or portions of resolutions listed in finding paragraphs 4 through 9 be deferred.

IT IS FURTHER ORDERED THAT:

1. Any air carrier party to any resolution which has been approved above subject to a condition, provision, or limitation may within 15 days of the date hereof petition for reconsideration or modification of such condition, provision or limitation, which petition shall be accompanied by the reasons and data in support thereof.

2. Any air carrier party to a resolution as to which action has been deferred in whole or in part, (other than a resolution listed in finding paragraph 3) may within 15 days of the date hereof submit in writing such reasons as it deems appropriate for not disapproving such resolution or portions thereof together with supporting data, and may, in addition, request a hearing thereon.[2]

By the Civil Aeronautics Board:

/s/ M. C. Mulligan
M. C. Mulligan
Secretary

(SEAL)

[2] If no protest is received within 15 days from the date of this order with respect to any such resolution or any part of any such resolution, the Board will by subsequent order disapprove said resolution.

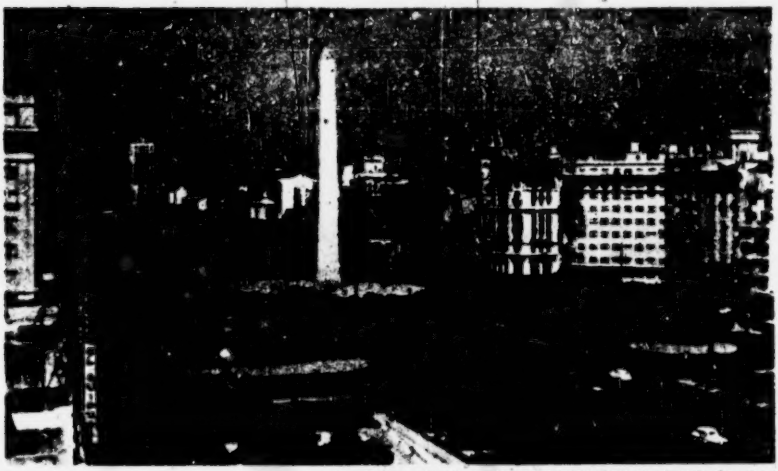
1951

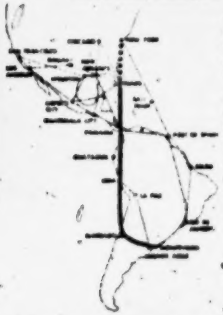


Buenos Aires is second only in population to New York and Chicago, in this hemisphere. Its streets are all a Champs Elysées and Boulevards. You don't know South America until you've seen Buenos Aires.

FLY *El Inter Americano* to SOUTH AMERICA

From Miami to Lima, sleep in a real bed-sized berth for a minimum extra charge. Lower unoccupied.

Daily DC-6 service to Panama, 4½ hours; Guayaquil, 8½ hours; Lima, 11 hours; Santiago, 17 hours; Buenos Aires, 18½ hours from Miami



Aboard El Inter Americano you fly over the routes of Pan American and Panagra . . . straight jet from Miami, direct South America's West Coast to Santiago, then over to Buenos Aires . . . the shortest distance from the U.S.A. One way fare is $[illegible] from Miami. 10% off on round trips.

En route visit Panama, Guayaquil, Ecuador, seaport; Lima, center of Spanish culture; scenic Arequipa . . . mass transporting more than ever before. Enjoy super service throughout your flight . . . luxurious leather chairs with complimentary cocktails and wines, including Pierre Lorillard to leave Panagra passengers personal attention in the air and on the ground by Pan American and Panagra (Pan American-Grace Airways) . . . two airlines with 22 years experience in South America.

Let us help you plan an itinerary that takes you to all or more of the six republics of South America. You can see them all on the most amazing flights on the continent . . . and keep your vacation within a month's vacation. It's easy to arrange. More countries do not require visas.

TABLE OF CONTENTS

STATISTICAL MATERIAL

Exhibit No.	Description
PS-101	Comparative Density Of Air Passenger Traffic Flow Over U. S. - South American Routes And Other Major Catagories Of U. S. Air Routes - 1957
PS-102	Comparative Density Of Air Passenger Traffic Flow For Pan American (LAD), Panagra, Braniff (International) And Local Service Carriers - 1957.
PS-103	Number Of U. S. Air Carriers Serving South American Cities (Including Balboa) And Volume Of Traffic Enplaned - 1957.
PS-104	Number Of U. S. Air Carriers Serving South American Cities (Including Balboa) And Volume Of Passenger Traffic Exchanged With The U. S. - 1957.
PS-105	Volume Of Air Passenger Traffic Between The U. S. And Foreign Cities Receiving Service From Two Or More U. S. Flag Carriers - 1957.
PS-106	Comparative Development Of Air Passenger Traffic Between The U. S. And South America And Between The U. S. And Other Major Geographic Areas Of The World - Fiscal Year 1957.
PS-107	Operating Ratios, Pan American (LAD), Panagra, And Braniff (International) - 1947 - 1957.
PS-108	Rates Of Return For Pan American (LAD), Panagra, And Braniff (International) - 1947 - 1957.
PS-109	Aliens Travelling By Air Between The U. S. And Major Geographic Areas As A Percent Of Total Air Travelers - Fiscal Year 1958.
PS-110	Aliens As A Percent Of Total Air Travelers Between The U. S. And South America - Fiscal Years 1947 - 1958
PS-111	Percentage Of Aliens Traveling By Air Between The U. S. And South America Using The Services Of Foreign Flag Carriers. Fiscal Years 1946-1958.
PS-112	Percentage Of U. S. Citizens Traveling By Air Between The U. S. And South America Using The Services Of Foreign Flag Carriers - Fiscal Years 1947 - 1958
PS-113	Passengers Traveling By Air On U. S. And Foreign Flag Carriers - Calendar Years 1953 - 1958.

TABLE OF CONTENTS

STATISTICAL MATERIAL

hibit No.	Description
PS-114	Summary Of Increases In Subsidy Requirements Under Alternative Three Carrier Route Patterns Between The U. S. And South America.
PS-115	Description Of Route Structure And Schedules Assumed For Alternative Three Carrier Route Patterns Between The U. S. And South America - 1952 And 1957.
PS-116	Estimated Changes In Passenger Traffic Distribution Under Alternative Three Carrier Route Patterns Between The U.S. And South America - 1952 and 1957.
PS-117	Gains Or (Losses) In Passenger Revenues Under Alternative Three Carrier Route Patterns Between The U. S. And South America - 1952 and 1957.
PS-118	Gains Or (Losses) In Non-Passenger Revenue (Excluding Mail Subsidy) Under Alternative Three Carrier Route Patterns Between The U S. And South America - 1952 And 1957.
PS-119	Computation Of Increase Or (Decrease) In Aircraft Miles Scheduled Under Alternative Three Carrier Route Patterns Between The U. S. And South America - 1952 And 1957.
PS-120	Distribution Of Increase Or (Decrease) In Aircraft Miles By Type Of Aircraft Under Alternative Three Carrier Route Patterns Between The U.S. And South America - 1952 And 1957.
PS-121	Aircraft Operating Expenses Per Revenue Mile Flown For Pan American And Panagra - 1952 And 1957.
PS-122	Estimated Additional City Ticket Office Expense For Panagra Had Independent Sales Operations Been Conducted - 1952 - 1957.
PS-123	Additional Station Costs For Pan American (LAD) At New Stations To Be Added Under Route Assumption 2.
PS-124	Changes In Income And Expenses Under Alternative Three Carrier Route Patterns Between The U. S. And South America Pan American (LAD) - 1952.
PS-125	Changes In Income And Expenses Under Alternative Three Carrier Route Patterns Between The U.S. And South America Pan American (LAD) - 1957.
PS-126	Changes In Income And Expenses Under Alternative Three Carrier Route Patterns Between The U.S. And South America Panagra - 1952.
PS-127	Changes In Income And Expenses Under Alternative Three Carrier Route Patterns Between The U.S. And South America Panagra - 1957.
PS-128	IAncreases And Decreases In Investment Requirements Under Alternative Three Carrier Route Patterns Between The U.S. And South America - 1952 And 1957.
PS-129	Increases Or (Decreases) In Rate Of Return Requirements Under Alternative Three Carrier Route Patterns Between The U.S. And South America - 1952 And 1957.

PAN AMERICAN WORLD AIRWAYS INC.,
STATISTICAL EXHIBIT 101

Comparative Density Of Air Passenger Traffic Flow Over U. S. - South American Routes And Other Major Categories Of U. S. Air Routes
1957

	Revenue Passenger Miles Flown (000)	Route Miles Operated	Revenue Passenger-Miles per Route Mile per Day
Domestic Trunk Operations	24,499,510	60,599	917.8
Local Service Carriers	747,288	25,563	80.0
Foreign and Overseas Operations 1/	5,391,027	103,563	142.6
Pan American (LAD) 2/			
Within South America	143,442	5,517	71.2
South America plus Miami-Balboa Sector	212,185	6,683	87.0
Panagra	168,641	5,458	84.6
Braniff			
South of Balboa	45,317	4,887	25.4
International Division	92,381	7,092	35.7

1/ Exclusive of Pan American (LAD), Panagra, and Braniff (International).

2/ Revenue passenger miles determined from segment traffic data reported to ICAO for the months of March and September 1957. Data for these months are annualized by multiplying the sum of March and September by a factor of 6.

1957	97.0	102.0	96.4	92.1	100.4
1947-1957	91.8	97.0	93.7	98.6	96.5

1/ Including subsidy.

2/ Operating expenses as a percent of operating revenues.

...es of Return for Pan American (LAD), Panagra, and Branif (International)
1947 - 1957

"Net Profit" represents reported net profit (after income taxes) before interest charges. For the years 1947 through 1955, the data are adjusted to reflect the accrual of mail pay and subsidy (less applicable taxes) in the years in which earned rather than reported. The data for 1956 and 1957 are as reported. For the years 1949 through 1957, net profit is adjusted to eliminate capital gains and losses less applicable taxes at the rate of 25% for Pan American and Braniff and 22% for Panagra.

Average Total Investment represents the average of quarterly balances of net worth, long-term debt and notes payable. Where necessary to obtain divisional figures, total system investment has been prorated on the basis of divisional operating expenses.

Including subsidy.

In the Re-opened Transatlantic Final Mail Rate Case, Docket No. [illegible] et al., decided March 23, 1956, the Civil Aeronautics Board found a 10% return on invested capital to be a fair and reasonable rate of return with respect to the international operations of Pan American.

[fol. 4638]

Pan American World Airways Inc., Statistical Exhibit 115

Description Of Route Structure And Schedules Assumed For Alternative Three Carrier Route Patterns Between The U. S. And South America 1952 And 1957

I. Route Pattern Assumptions

Assumption 1

A. Extension of Panagra from Balboa to Miami.

B. No addition of through plane services in either 1952 or 1957. Continuation of interchange service between points north of Miami (New York and Washington) and points in South America during 1957.

C. No extension of existing Pan American routes and no new interchange arrangements.

D. No change in Braniff's operating authority.

Assumption 2

A. Extension of Panagra from Balboa to Miami.

B. Extension of Pan American to the West Coast of South America (in accordance with its application in CAB Docket No. 8597 (Bogota, Quito, Guayaquil, Lima, La Paz, Santiago, and Buenos Aires.)

C. No through plane service to points north of Miami in 1952. Interchange services between points north of Miami and points served by Pan American and Panagra in South America to the extent such services were provided in 1957. Both Pan American and Panagra assumed to participate in such interchange.

D. No change in Braniff's operating authority.

II. Scheduling Assumptions.

Assumption 1.

1952

A. Panagra to offer the schedules operated under the Pan American - Panagra interchange agreement.

B. Pan American to operate a daily service between Miami and Balboa in each direction.

C. No change in Braniff's service.

1957

Same as above.

Description Of Route Structure And Schedules
Assumed For Alternative Three Carrier Route
Patterns Between The U. S. And South America
1952 And 1957

II. Scheduling Assumptions (Cont'd.)

Assumption 2.

1952

A. No change in Braniff's service.

B. Pan American and Panagra to divide the through services between the U. S. and South America which were provided under the interchange agreement equally and each to provide, as a minimum, the number of flights provided by Braniff to and from and within South America, except in those markets where Panagra actually provided less frequency than Braniff.

1957

Same as above.

III. Assumed Scheduling Plan under Assumption 1.

1952

	No. of Weekly One-Way Flights

(1) Local traffic over the Miami-Balboa sector is estimated to divide 58.8% for Panagra and 41.2% for Pan American after excluding traffic in which Braniff has participated. It is further estimated that Panagra would carry all foreign traffic moving between Miami and points in South America which Panagra serves. The division of local traffic is based on the relative frequency of service assumed (14 round trip flights per week by Panagra and 7 by Pan American).

(2) Local traffic over the Miami-Balboa sector is estimated to divide 58.8% for Panagra and 41.2% for Pan American, based on the relative frequency of service assumed (14 one-way flights per week by Panagra and 7 by Pan American). In dividing local traffic between Panagra and Pan American, Braniff's traffic has been excluded. It is estimated that Panagra would carry all foreign traffic to points served by it.

Intra-South American traffic in Route Assumption 2 is assumed to divide in the same ratio as the frequency of service offered by the competing carriers. Braniff's service and traffic-participation is estimated to remain unchanged. Traffic to the United States from South American points is likewise estimated to divide in the same ratio as frequency of service.

Increase (Decrease) In Non-Passenger Revenue (Excluding Mail Subsidy) Under Alternative Three Carrier Route Patterns Between The U. S. And South America 1952 and 1957

	Gain (Loss) in Passenger Revenue (000's)	Estimated Ratio of Non-Passenger Revenue (Percent)	Gain (Loss) in Non-Passenger Revenue (000's)
I Route Assignments - 1952			
Pan American	$12,005	10.1 [1]	$1,214
Panagra	2,705	10.1 [1]	274
Braniff	-	10.1 [1]	-
II Route Assignments - 1952			
Pan American	(4,346)	10.1 [1]	(439)
Panagra	4,346	10.1 [1]	439
Braniff	-	10.1 [1]	-
III Route Assignments - 1952			
Pan American	5,410	10.1 [1]	547
Panagra	(5,410)	10.1 [1]	(547)
Braniff	-	10.1 [1]	-
IV Route Assignments - 1957			
Pan American	2,778	15.2 [2]	422
Panagra	(2,568)	15.2 [2]	(390)
Braniff	(210)	15.2 [2]	(32)

1 Based on Braniff's experienced ratio in 1952, after deducting the amount of $1,234,000 of mail subsidy included in U.S. mail pay. Non-passenger revenues from scheduled transportation totaled $477,000 as compared passenger revenues of $6,058,000.

2 Based on Braniff's experienced ratio in 1957. Non-passenger revenues for the year amounted to $1,149,000 as compared with passenger revenues of $6,915,000.

I.	Route Assumption 1 - 1952			
	Aircraft and spare parts	$ 2,400[1]	$ --	$ 2,400
	Ground equipment[2]	--	220	220
	Net working capital[3]	(248)	903	690
	Total	2,152	1,123	3,310
II.	Route Assumption 1 - 1957			
	Aircraft and spare parts	$ 2,200[8]	$ --	$ 2,200
	Ground equipment[2]	--	257	257
	Net working capital[3]	(546)	1,283	737
	Total	1,654	1,540	3,194
III.	Route Assumption 2 - 1952			
	Aircraft and spare parts	$ 4,800[4]	$ (78)[5]	$ 4,722
	Ground equipment[2]	1,809	220	2,029
	Net working capital[3]	1,072	(175)	1,017
	Total	7,681	(33)	7,768
IV.	Route Assumption 2 - 1957			
	Aircraft and spare parts	$ 8,800[8]	$ (600)[7]	$ 8,200
	Ground equipment[2]	2,116	257	2,373
	Net working capital[3]	1,272	(303)	969
	Total	$12,188	(646)	$11,542

1/ It is estimated that two DC-6 s would be required to provide a daily round trip frequency between Miami and Balboa, at an investment of $1,200,000 each.

2/ Required investment in ground equipment estimated on the basis of the increase or decrease in ground equipment maintenance expense in 1952 (in Panagra's experienced ratio of $22.00 of ground equipment investment per $1.00 of ground depreciation expense) and in 1957 on the basis of Panagra's experienced ratio of $25.74 ground equipment investment per $1.00 ground depreciation expense.

3/ Increase or decrease in net working capital requirements based on changes in cash operating expenses, in the ratio of $1.00 increase or decrease in net working capital per $4.00 increase or decrease in cash expenses.

4/ At least four DC-6 aircraft, at $1,200,000 each including spare parts, would be required to operate 3,..99,000 annual miles.

5/ To reflect retirement of one fully depreciated DC-4 aircraft which would be excess due to a decrease of 530,000 annual scheduled miles.

6/ Increased investment in four DC-7 aircraft at $2,200,000 each, required to provide 3,348,000 annual miles.

7/ To reflect retirement of one DC-6B aircraft, at an approximate net book value of $500,000, plus spares valued at an additional 20%. This equipment would be excess due to a decrease of 1,026,000 scheduled miles.

8/ Increased investment in one DC-7 aircraft, at $2,200,000, to provide a daily round-trip frequency between Miami and Balboa.

W. R. GRACE AND COMPANY EXHIBIT 1

IMMEDIATE RELEASE
MARCH 2, 1929

INFORMATION SERVICE
POST OFFICE DEPARTMENT

today

Postmaster General New [A] awarded to the Pan-American-Grace Airways, of New York City, the contract for carrying the air mail between Cristobal, Canal Zone, and Santiago, Chile, which route, when put into operation, will be the longest one in the world.

In awarding the contract, Postmaster General New made the following statement:

[Handwritten initials in first paragraph—PAG.]

"It is directed that the proposal of the Pan American Grace Airways, Inc., of New York, N. Y., submitted in response to the advertisement of January 31, 1929, for air mail service on the route between Cristobal, Canal Zone, and Santiago, Chile, for service as stated in the advertisement be accepted at the rate of $1.80 per mile and $.80 per pound, as stated in their proposal.

"In making this award the matter of the financial ability of the leading bidders or the integrity of the competing companies is not considered. That may be conceded. The award of contract is based on other but very material considerations.

"This is the most important air mail contract that has yet been awarded. Its importance goes not alone to the financial ability of the bidders but more directly and to a far greater degree to their proven and recognized capacity for performing the service contemplated.

"The Pan-American Company has filed evidence of extensive preparation for the operation of an air mail route through the countries with which arrangements are necessary. It has had this particular service in view for the last two years and has for that length of time been conducting negotiations and perfecting arrangements for the [fol. 4673] carrying on of the service if in the ruhness of time it should be awarded the contract for it. It has the required franchises under which to operate in the countries to be served and over which the line passes. It is indeed operating through subsidiary companies already in existence over a considerable portion of the route under consideration. In addition to this it will have the benefit of all the facilities of the Grace Line of steamers now operating a firmly established service by sea along the whole line of the proposed air mail route.

"The low bidder does not have these facilities. It has not the advantage of a functioning organization and of an operating personnel already in the field. According to the statement of its president, which is a part of the file

scribed to this company's stock but it is admitted by its president that these subscriptions are dependent upon the award of contract to the company. It is thus plainly apparent that it has not the important advantage of possessing a fixed and functioning organization equipped to enter upon the work. I am convinced that under the most favorable circumstances the low bidder could not possibly place itself in position to perform this service without the lapse of much time.

"In awarding the contract to the Pan-American Company I am also greatly influenced by information obtained direct from the United States Ambassador to Cuba, Honorable Noble B. Judah. The Ambassador has informed me that the president of the company appearing as low bidder has figured in one or more projected aeronautical enterprises in Cuba, where his experiences have been unfortu- [fol. 4674] nate, resulting in complete failure. On the other hand, the Ambassador states that the Pan-American Company is now operating lines to and through Cuba in a conspicuously successful manner.

"I would repeat that the contract in question is for a route most difficult to serve but at the same time of very great and far-reaching importance not only to the public but to the whole future of transportation by air. Failure would be a serious blow to the prestige of American aeronautical enterprise.

"Because of the facts herein enumerated, I am firm in the opinion that the best interests of the service, the Government, and the public to be served require that the award be made to the company best equipped to perform the service and I therefore make the award to the Pan-American-Grace Airways, Inc., of New York."

[fol. 4675]

W. R. GRACE AND COMPANY EXHIBIT 2

FOREIGN AIR MAIL CONTRACT

Route No. 9

Cristobal, CANAL ZONE to Santiago, CHILE

Ten Year Period

Beginning April 1, 1929

[fol. 4676]

CONTRACT FOR FOREIGN MAIL SERVICE

Route No. F. A. M. 9

This contract, made this 21 day of March, 1929, by and between the United States of America (by the Postmaster General) and the Pan American Grace Airways, Inc., a corporation organized and existing under the laws of the State of Delaware, Contractor:

WITNESSETH, That whereas the said Pan American Grace Airways, Inc., has been accepted as contractor on route No. F. A. M. 9 in conformity with the advertisement inviting proposals for the service specified herein, issued by the Postmaster General under date of January 31, 1929:

NOW THEREFORE, The said contractor undertakes, covenants and agrees with the United States of America:

1. To carry mails for the United States of the specified load of not exceeding 800 pounds a trip each way and any excess mails required to be carried in safe and suitable aircraft from Cristobal, Canal Zone, by Buenaventura and Tumaco, Colombia, Esmeraldas and Guayaquil, Ecuador, Talara, Truxillo, Lima, Lomas and Mollendo, Peru, Arica, Iquique, Antofagasta, Caldera and Coquimbo to Santiago, Chile, and return, three times a week, by a schedule satisfactory to the Postmaster General, and to perform the services and undertakings in connection therewith as specified in this contract, for and during the term of ten (10) years beginning April 1, 1929. (The Contractor may be permitted

to omit service south of Mollendo, Peru, for a reasonable time at the discretion of the Postmaster General, pending completion of operating arrangements.)

2. To receive and deliver the mails at each post office on the route, unless other provision is made by the Department. The contractor also undertakes, covenants and agrees with the United States and binds itself to be answerable in damages to the United States for the proper care and [fol. 4677] transportation of the mails, and to be accountable for any loss or damage resulting to any such mail or any part thereof by reason of the failure to exercise due care on the part of any of contractor's officers, agents or employees in the custody, handling or transportation thereof.

For the service herein specified when performed in accordance with the provisions of this contract and evidence thereof shall have been filed with the Postmaster General, the said contractor is to be paid by the United States at the rate of $1.80 per mile each way for the specified load of not exceeding 800 pounds each way, plus the rate of 90 cents per pound per thousand miles or pro rata thereof for greater or less mileage for any excess mails required to be carried in the same aircraft, based on statute miles by the shortest practicable airway distance between points on the route as determined by the Postmaster General; payments to be made monthly and as soon after the close of each month as accounts can be adjusted and settled; said pay to be subject, however, to be reduced or discontinued by the Postmaster General as hereinafter stipulated, or to be suspended in case of delinquency.

It is further stipulated and agreed by the contractor—

1. That in case of failure from any cause to perform any service required by this contract a pro rata deduction shall be made from the compensation of the contractor on account of such omitted service, except that pro rata pay will be allowed for the airway distance flown between stated points on the route traversed on a partially completed trip if no delay in the mails over the ordinary means of transportation has resulted.

2. That deduction from pay may be made for suffering the mails to become wet, damaged or destroyed, or when a

grade of service is rendered inferior to that stipulated in the contract, or for the loss of or depredation upon the mails in the custody of the contractor or its agent, provided the loss is occasioned by their fault, or for other delinquencies, in the discretion of the Postmaster General.

[fol. 4678] 3. That the Postmaster General may annul the contract or impose forfeiture, in his discretion, for repeated failures or for failure to perform service according to contract; for violating the Postal Laws and Regulations; for disobeying instructions of the Post Office Department; for subletting service without the consent of the Postmaster General, or assigning or transferring the contract; for combining to prevent others from bidding for the performance of postal service, and such annulment shall not impair the right of the Department to claim damages from the contractor and its surety.

It is further stipulated and agreed—

1. That if in the opinion of the Postmaster General the development of aircraft should be such as to render the equipment used on the route obsolete, so that it no longer meets the needs of the Department, the Postmaster General may call upon the contractor to provide suitable equipment and in the event of its failure to do so within such reasonable time as shall be given it, may terminate the contract.

2. That mail apartments in all planes shall be made fireproof to the satisfaction of the Post Office Department.

3. That the Department may increase or decrease the number of intermediate stops, or the number of trips per week, and change the termini of the route, dispatch mail on any plane of the contractor flown over the route, and modify or change the schedule as the needs of the service require; and the Department may also extend or curtail the route, with pro rata allowance or reduction of pay.

4. That service on this route may be extended at the option of the Post Office Department from Santiago, Chile, by such intermediate points as the Postmaster General may determine, to Buenos Aires, Argentine, and Montevideo, Uruguay, at not exceeding pro rata allowance of additional pay.

5. That the contractor must make its own arrangements for landing fields, lighthouses, radio stations and such other

aids to navigation as may be necessary for the proper performance of the service.

[fol. 4679] 6. That this contract covers all mails to and from the United States or its possessions, including parcel post; provided that the Contractor shall have the right to make arrangements with intermediate countries for the exchange of local mails between such countries.

7. That during the continuance of this contract, if the postal interests shall require, by mutual agreement between the contractor and the Postmaster General, the contract rate of pay herein may be changed, but shall never exceed the rate herein provided.

8. That the Contractor may be permitted to sublet the service to acceptable persons, by permission of the Postmaster General, at not less than the contract rate of pay.

9. That no Member of or Delegate to Congress or Resident Commissioner shall be admitted to any share or part of this contract or agreement or to any benefit to arise thereupon.

10. That the Contractor shall use flying equipment on the route of United States manufacture, shall use other equipment if practicable of United States manufacture, and shall employ necessary pilots and flying crews of United States citizenship where practicable to do so.

The contractor warrants that it has not employed any person to solicit or secure this contract upon any agreement for a commission, percentage, brokerage, or contingent fee. Breach of this warranty shall give the Government the right to annul the contract, or, in its discretion, to deduct from the contract price or consideration the amount of such commission, percentage, brokerage, or contingent fees. This warranty shall not apply to commissions payable by contractors upon contracts or sales secured or made through bona fide established commercial or selling agencies maintained by the contractor for the purpose of securing business.

[fol. 4680] This contract is also subject to all the provisions of the advertisement (though not all specifically

stated herein) and to the provisions of the Postal Laws and Regulations applicable to this service.

IN WITNESS WHEREOF, The Parties hereto have executed this contract.

W. R. Grace and Company Exhibit 3

January 3, 1928

Memorandum of conversation with Dr. von Bauer

Dr. von Bauer began with the Scadta Company as Manager but in 1921 when they were in financial difficulties, he invested heavily in the Company and became its head. He is now the principal stockholder. Scadta is a Colombian Company. They have recently organized two other companies in connection with their new services.

The Company has a liberal concession in Colombia which while it does not give them any monopoly, does give them certain advantages in the way of exemption from export duty on planes, spare parts, supplies, etc. and the right to conduct what virtually amounts to a private mail service, the Company selling their own stamps and delivering their own letters at destination.

The Company, even on the small service which it is now running, has eleven planes, maintains an airport at Barranquilla which represents an investment of $200,000, and smaller airports at Girardot, Cartagena and Buenaventura. Dr. von Bauer explained that the land plant is quite as important as the flying machinery pointing out the difficulty of maintaining adequate repair shops, and the necessity of

maintaining supplies of repair parts, etc. in order to make necessary repairs at a point so far distant from the factory. He stated that an engine costs $7,000. and the larger Dornier whale planes up to as much as $100,000. Scadta's practice is to write off the entire investment in a plane in twelve to eighteen months although ordinarily the plane is [fol. 4684] in use much longer than that, 4,000 running hours being estimated as the commercial life.

The Colombian service maintains reserve planes which are stationed at strategic points and proceed in search of any plane which does not pass within a certain period after schedule time. Insurance is carried on the planes although the rate is 20% to 25%, though in Scadta I imagine the Company carries part of their own insurance as Dr. von Bauer said they had an insurance reserve of $100,000. Insurance for the pilots is optional with them and paid for by deduction from their salaries. Dr. von Bauer stated that few of the pilots carry insurance as they prefer the cash.

Asked for his ideas regarding a West Coast of South America service, Dr. von Bauer stated that the matter would require very careful study in detail and that it was impossible to reach any conclusion without this study. The question of the best type of plane for the service would itself require very careful investigation. For example, for a part of the service hydroplanes would probably be desirable and for other sections, land planes. On account of the rains between the Canal and Guayaquil, all metal planes would probably be required here. Among the difficulties to be overcome which he mentioned, were the prevalent rains between the Canal and Guayaquil, the fogs from there to Lima and the possible heavy seas below that point, and all along the course, the difficulty of finding suitable landing places. As indicative of the possible cost of such a [fol. 4685] service, it may be noted that on a Florida/Guatemala/Cuba triangular service, which Dr. von Bauer figured on some years ago, he estimated that an investment of $2,000,000 would be required.

[fol. 4686]

W. R. GRACE AND COMPANY, EXHIBIT 4

[Handwritten notations—Mr. Cogswell please note and return, RHP.

Mr. Patchin, I read both and find them very interesting indeed. It looks as if in a year or two it might be practicable to do something on the West Coast.]

New York, March 13, 1928.

D. S. Iglehart Esq.,
Del Ray, Florida.

Dear Mr. Iglehart:—

We have had a very interesting conversation with the aviation representative of the Ford Motor Co., who states, on behalf of that organization, that their three motored all metal plane with a capacity of 12 passengers and 1500 pounds of mail and or freight can be operated at 75¢ a mile including overhead and maintenance for 100,000 miles. This includes depreciating the motors 100% during 100,000 miles of flying and depreciating the plane, other than the motors, 20% a year. Also insurance at 25%.

The Ford people declare that they are achieving this experience in actual service between Detroit and Chicago and Detroit and other points. These figures are far lower than the ones we previously had and, if confirmed, would make the profitable operation of airplanes in conjunction with our steamers much more of a commercial possibility than we have hitherto believed.

I am having some new figures prepared that I think you will find of interest upon your return. Meanwhile, you may find the enclosed report of the Guggenheim Fund worth reading.

With kindest regards, I am,

Very truly yours,

R. H. PATCHIN

FROM MR. DEPT.

SUBJECT: AVIATION

The following are the operating results of a mail service between Los Angeles and Salt Lake City for one year, ending August 31st, 1927, which has been operating for several years:

The equipment consists of five Douglass planes, single motors, carring 500 pounds pay-load.

In seven months last year this service carried 269 passengers.

Number of miles flown	—	306,597
Number of hours flown	—	3,165.04
Cost per hour	—	66.88
Miles per hour		96.87
Cost per mile		69.00

Based on the above experience, The Western Airways Express now operating a mail and passenger service between San Francisco and Los Angeles with special tri-motor Fokker planes, with maximum speed of 140 miles an hour and a cruising speed of 120 miles an hour, have made the following estimate of costs of service on 365 mile run or 730 miles round trip, totalling 21,900 miles per month:

Overhead	.1153
Traffic	.0533
Maintenance fields	.0204
" equipment	.0893
Transportation (Pilot salaries, etc.)	.1140
Communication	.0168
Depreciation	.2840

W. R. GRACE AND COMPANY EXHIBIT 7

March 22, 1928.

MEMORANDUM OF CONVERSATION WITH REAR ADMIRAL H. E. CONE, MR. PATCHIN AND MR. COGSWELL. 3 22 28

Admiral Cone felt that a service from Panama South should be undertaken only with tri-motored planes and

he was of the opinion that it would require for the service between the Canal and Callao sea-planes and south of that point, land-planes. He thought that amphibians were not practical for landing in such a seaway as would prevail in these altitudes. He considered navigating conditions favorable, particularly from northern Peru south and not at all favorable between the canal and northern Peru although the excessive heat there would be an adverse factor.

Admiral Cone said he thought it would be impracticable for us to reach any conclusion without employing a competent man familiar with aviation, both in its operation and equipment aspects and having him make an investigation on the ground. He thought Commander Grow of the U.S. Naval mission in Peru, who is in charge of the Peruvian government's air forces probably had more knowledge than any other man of the air navigation situation between Perú and the Canal. He considers Grow a high class man and recommended that we obtain his views. He is now working on the establishment of an American service with the Peruvian Government from Lima to Iquitos.

Admiral Cone thinks the costs shown by Western Airways Express and other efficiently managed aviation companies are conservative; he is especially impressed with the results of the Western Air Express because it has accumulated from their revenues from carrying air mail, passengers and freight, maintaining landing fields, aviation schools and [fol. 4692], taxi service, a substantial surplus. The Guggenheim Fund made a substantial equipment loan to Western Air Express with which it bought the new Fokker planes now being operated between Los Angeles and San Francisco. Admiral Cone expressed the opinion that, with quantity production, the price of planes and engines will rapidly decrease. He thought the Wright Whirlwind engine now sold at $4,000.— actually costs less than $1,000.00 to build. He says that Ford is seeking by all possible means to increase his output in order to bring the plane down to a reasonable price and Admiral Cone thinks

within a few years that airplane engines will cost very little more than first class auto engines and that the planes complete will cost no more than a high class automobile. He concurred in Mr. Patchin's opinion that when a high price plane bought today is depreciated at the end of say two years, it will probably be possible to buy two or more planes with depreciation fund.

As regards metal versus wood and fabric planes, Admiral Cone said that it was an open question. Duralumin, the rustless metal of which the Ford planes are built ~~is~~ has not, in his opinion, been ~~entirely~~ fully established as superior under all conditions to wood and fabric.

Admiral Cone said that very satisfactory progress was being made on devices to prevent stalling, i.e., loss of control of the plane in taking off or in landing. The Guggenheim Fund expects great progress to be made in this respect during the next two years.

The necessity of en route repairs, Admiral Cone said, was likely to be over-estimated by steam-ship men and likewise the ground personnel needed for operations and repairs at the various ports of call. The modern airplane [fol. 4693] engine requires very little repairs that can be made en route. If it goes wrong it would probably have to be sent back to the factory for an overhaul, therefore the repair problem is met by having spare engines distributed at certain points along the route. If engine trouble develops, the tri-motored plane may be expected, ordinarily, to reach the next port where a spare engine is located whereupon the spare is substituted in a very few minutes. Except in the case of a serious smash, other parts of the plane seldom requires repairs as the mechanism is simple and accessible.

In response to our request, Admiral Cone mentioned the following persons experienced in aviation who might be available for employment:

Chas. T. Blackburn.
c/o L. A. Young Industries,
208 La Salle Street,
Chicago, Ill.

Former Commander in U. S. Navy; resigned to become assistant to general manager of air transport company operating a mail service from New York to Chicago; resigned as result of disagreement in organization. Is understood now to be figuring on establishment of a passenger air service from New York to Chicago.

J. Parker Van Zant.

Formerly U. S. Army officer, now running Scenic Airways Corp'n. General Manager of company operating planes out of Detroit. This is a service which takes tourists by airplane to Grand Canyon, Yellowstone Park and other points of scenic interest. This concern is understood to be backed by Mr. Mayo, Ford's chief engineer, H. Coffin and other aviation experts.

[fol. 4694]
Reid Chambers,
Kew Gardens, Long Island.

Organizer of the Florida Airways from which he later retired. Has studied thoroughly the question of Caribbean air transportation. Understood to be very intelligent with wide knowledge of aviation, but usually disagrees with associates.

Major Bane,
P. O. Box 506,
Monterey, Calif.

Formerly head of the design staff of U. S. Army air force. Has high class aeronautic experience. Retired or resigned from Army after dispute with General Patrick. Reported to be well off financially. Now raising chickens in California.

Admiral Cone's comment on various planes, is as follows:—

Boeing Company of Seattle—Have not yet built tri-motored planes but have built two-motored. Very progressive and able company.

Ford and Atlantic Aircraft Corporation (Fokker) are the only concerns now building tri-motor planes. Ford all of metal. Fokker, have metal fuselage—remainder of plane is fabric and wood.

Loenig builds excellent amphibians.

Sikorski is producing very excellent construction in a single-motor amphibian now being used by Standard Oil Co. in Colombia and Venezuela.

[fol. 4695]

W. R. GRACE AND COMPANY EXHIBIT 8

[Emblem]

U.S. ARMY PAN AMERICAN FLIGHT

April 20, 1928.

My dear Mr. Patchin:

Since you were in the other day discussing the matter of an air line from the Panama Canal southward to Valparaiso, I have given this matter additional thought which leads me to believe that perhaps between my own personal files of information and the library in the Pan American Union, sufficient data are available to warrant the tentative layout of an air line over this route.

I realize investigation would be quite costly and this should be reduced or entirely avoided if at all possible. There is no doubt that the line would have to follow the coast as far as Peru before a choice became available of a water route or land route, and even in the southern part of Peru the route would have to again follow the coast line. In Chile, there is again the choice of the route following the longitudinal railroad or the coast line. With regard to the inland routes, I have little or no information; but after consideration of all the factors involved, I am quite sure that the coast line route is to be preferred and, in fact, is the only practicable route over a large

portion of the journey. I, therefore, believe that at least for the present the consideration of interior air lines paralleling the coast might be disregarded.

Again with an idea of reducing cost and at the same time retaining a reasonable degree of safety in flight, I feel that the single motored amphibian plane would be very suitable. The tri motored plane would have an excellent effect on the morale of the passengers, but the air cooled radial engine now coming into extensive use in airplane construction has proved its reliability to such a marked extent that it is a very dependable motor. The Loening amphibian is now being built with a Wasp, 9 cylinder, air cooled motor and has given excellent results. The cabin type of plane built by Mr. Loening and which is being exhibited at the Aircraft Show in Detroit, this week, has great possibilities for commercial use.

[fol. 4696] I, therefore, believe you would be perfectly justified in going ahead on plans for a commercial air line from Panama southward along the Pacific Coast, utilizing the single motored amphibian type of airplane. I should be glad to go into this matter more thoroughly with you at any time that you might desire should you care to make further investigation.

Assuring you of my great interest in the success of commercial air ~~factors~~ *ventures* and of my willingness to give whatever assistance I can, I am,

With kindest personal regards,

Very sincerely yours,

/s/ H. A. Dargue
H. A. Dargue,

U.S. ARMY PAN AMERICAN FLIGHT

May 26, 1928.

My dear Mr. Patchin:—

In reply to your letter of May 23rd, I shall be glad to go ahead at the earliest possible moment with the preparation of as comprehensive a report as my information permits on an air transport route from Colon to Valparaiso.

I am completely tied up for the next few days with pending legislation but with the adjournment of Congress in view on next Tuesday, it would appear that immediately thereafter I shall be able to start the study you desire.

I shall be very glad to see you when you come to Washington next week.

With very kindest personal regards, I am,

Sincerely yours,

/s/ H. A. Dargue

Dear Valverde,

AVIATION.

I am in receipt of your letter No. 4203 and note your enquiries in regard to the possible development of the United States Mail Service to the West Coast, and I will make the necessary investigations and keep you posted on anything that should develop.

As a coincidence there appeared in the "Provincia" yesterday an article in regard to an Air Mail Service from Santiago to Iquique for which Señor Luis Testart already holds a concession, the reading of which will no doubt be of interest to you.

Assuring you that I will keep you fully in touch with anything new,

Yours very truly,

F. J. Harpel.

Mr. W. F. Cogswell,
c/o The Grace Line,
10 Hanover Square,
New York City.

Dear Mr. Cogswell:

In reading over the draft memorandum which I handed you in Mr. Hoyt's office yesterday, I find that several corrections should have been made.

I have made these corrections and am attaching herewith revised copy of the memorandum.

I have arranged to have Mr. Harris return to New York on Tuesday, August 21st. At that time, he will be prepared to spend several days calling on the major American companies operating in Peru, to tie up, if possible, some southbound mail revenue.

Please telephone me as soon as you are prepared to further discuss this matter.

In the meantime, I will have made up some detailed figures covering the initial six months' operations, and if possible, some sort of figures covering capital requirements for the year following the acquisition of a United States mail contract.

Yours very truly,

/s/ J. T. Trippe

November 7th. 1928

International Petroleum Co., Ltd.,
TALARA.

Dear Sirs,

PERUVIAN AIRWAYS CORPORATION.

Our New York House have entered into an arrangement with the Aviation Corporation of the Americas, which owns all the stock of the Pan American Airways Inc., to form a Corporation under the name of the Peruvian Airways Corporation. This new company has taken over the mail contract and concession previously held by the Huff Daland Dusters, Inc., and will operate between Lima and Talara the airplane which up to the present has been operated by the Huff Daland Dusters Inc.

This service, we hope will be the nucleus of a through service between the United States and Chile and there is consequently the possibility that the service will be augmented in the future. The success of the primary operation will naturally depend on keeping expenses to a minimum and obtaining as much business as possible. With this in view we are appointing you as agents of the Company in Talara and enclose herewith copy of the present proposed schedule. For the present as Agents we will give you a 5% commission on any business either cargo or passengers which you may secure for the service. In addition an Agency Fee of S/. 25.00 per month will be paid you for the present and naturally when the service is augmented by the addition of more airplanes, this Agency Fee will be

[fol. 4701], increased. However, we are putting this at a low figure to start with in order to give the Company an opportunity to stand on its own feet and the success of the venture will be a great deal due to the interest taken by Agents with the idea of using every effort to stimulate this business and be of all assistance possible.

Mr. Harold R. Harris is Vice President & General Manager of the concern with offices in Grace Building in Lima and consequently he will be in charge of the operations and will from time to time give you full details as to just what he requires of his Agents in order to make the service benefit and have everything running smoothly.

As W. R. Grace & Co., are 50% holders in the Peruvian Airways Corporation, we would like to have you assist as much as possible in helping us to make this venture a success and we assure you that any assistance you can give will be greatly appreciated.

For your information we enclose herewith clipping from a recent number of the "WEST COAST LEADER" which gives an outline of the importance of the new service and the possibilities for its future.

Trusting you will be able to help the Peruvian Airways Corporation in your district, we are,

Yours very truly,

p.p. W. R. Grace & Co.,

CGB/h.

[fol. 4702]

W. R. Grace and Company Exhibit 13

October 22nd, 1928.

Mr. R. H. Patchin,
W. R. Grace & Company,
10 Hanover Square,
New York City.

Dear Mr. Patchin:

I am enclosing, herewith, copy of letter received from the State Department today, answering my letter of October 16th. This letter is mild, compared to the attitude taken by Mr. Francis White, Assistant Secretary of State, in conversation. He takes the position that Pan American Airways, Inc., has been favored in every way in establishing itself in the Caribbean area, and that the Department looks to this Company to carry the banner of American Air Transport on the West Coast of South America.

He has advised emphatically that now is the proper time to begin negotiations with Chile, because of the failure of the French to live up to their concession, and urges most strongly that we make plans to open up negotiations with the Chilean Government, for a definite concession, in the very near future.

From what little I know of the South American Air Transport situation, I feel that he is correct, and that we can possibly obtain, at this date, a much more favorable concession than we could hope to get at a later date.

In view of the fact that we have no one available at the moment to send to Chile, for the purpose of undertaking negotiations, it occurred to me that you might be able to have one of your men down there undertake these negotiations for us. We could supply the form of concession desired and give him the benefit of the experience we have had in negotiating this concession in Central America.

If this suggestion meets with your approval, I would be glad to talk it over with you in further detail, at your convenience.

Yours very truly,

John A. Hambleton,
Vice President.

moradas from SANTIAGO 2-28-29

Our twenty-five

following are conditions stipulated in official memorandum received late this afternoon from minister of interior concerning permit quote

"1—It shall be understood that those who obtain the permit submit themselves to Chilean laws on public health, police, custom house, or those of any other category.

"2—The permit shall be understood to be conceded subject to the dispositions of the Havana Convention before mentioned insofar as these are applicable to it.

"3—The frontiers shall be crossed by the planes on their entering the country or on their leaving same, through Tomasiri in the North, and through Uspallata in the West.

"4—Hydroplanes or flying boats shall only fly over territory or waters under Chilean jurisdiction after submitting themselves to an examination by custom house, public health and police authorities in the airdrome or port nearest to the point of crossing the frontier.

"5—The pilots of the ships must be nationals of the United States or Chile.

"6—When flying over Chilean territory or waters they must be accompanied by a pilot of Chilean nationality.

"7—The landing points in each place in the Republic must be submitted for the approval of the Government.

"8—During the life of the permit the landing fields of the concessionaires can be used by the Military Aviation Department without charge to the state.

[fol. 4713] "9—This permit does not include any authorization or concession of commercial or postal character.

"10—It shall run for a period of no longer than six months while the basis for a definite agreement is established, and

"11—The permit shall not have any character of monopoly or privilege.

(Signed) Guillermo Edwards Matte"

My dear Mr. Patchin:

Following up your telephone conversation and, as well, telegram of even date, I communicated with Assistant Secretary White of the State Department who was glad to have the information and advised me that he would cable tonight to Ambassador Culbertson at Santiago of the satisfactory outcome of the matter of the contract between the Post Office Department and the Pan American-Grace Airways.

I also suggested that he carry in his cablegram the information that the service would be established to Mollendo

at an early date and the extension would come very soon into Chile.

Am glad to have been of service to you in this matter.

Very sincerely yours,

W. IRVING GLOVER
Second Assistant Postmaster General.

ASSISTANT SECRETARY OF STATE
WASHINGTON

March 16, 1929.

Dear Mr. Patchin:

I received this morning your letter of March fifteenth. After what you said to me by phone yesterday, I immediately sent a further and fuller cable to the Legation in Ecuador setting forth this Government's interest in having the air mail carried through to Chile, and I hope this will be of some use in meeting the attacks against the Pan American Grace Airways, Incorporated. If there is anything further that we can properly do, please let me know.

Yours, very sincerely,

/s FRANCIS WHITE

Hops from Buenos Aires

told. Today I start on an air flight with a letter for the United States 9,000 miles away on the other side of the hemisphere, from a continent basking in sunny springtime to a north of autumn shivers over the world's longest mail line.

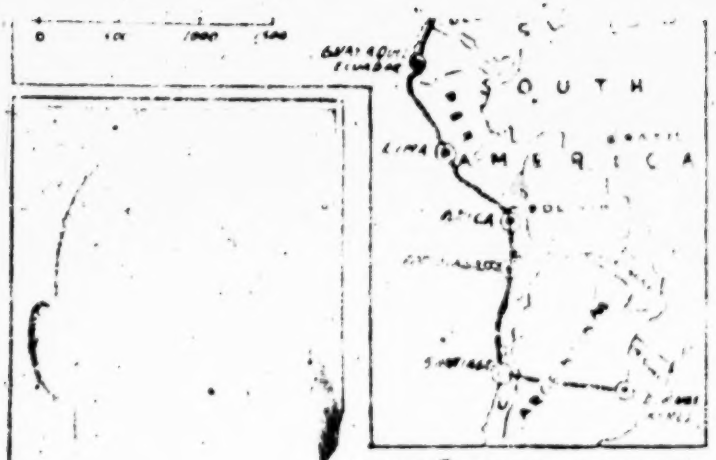
Other letters may travel farther but none without change from land to sea, while this one nearer each day on man-made wings until it reaches our Atlantic coast and is passed up to other planes humming through the night to the farthest corner of the United States on the world's fastest mail delivery.

Each day the story will be told. From the days when the Grecian bards sang of the winged Mercury, the world's first messenger, the sagas of the mail service have been sung—tireless Indian runners, trotting slippered postmen through bandit-ridden China, reindeer teams in Siberia, camel trains across the desert, long black trains thundering past lonesome stations in the night, chubby hands stretching on stubby toes to drop a letter in the corner box and the faithful man in gray bringing a letter. All this is the romance of travel and [illegible]

A Century's Progress

From the days of the pony express until the [illegible] department established two [illegible] with a search [illegible] the air mail is a [illegible] years [illegible] [illegible] [illegible]

W. F. Hall Printing Company Exhibit



Junius B. Wood (below), a staff correspondent of The Chicago Daily News, will attempt to traverse the air route indicated above, starting tonight from Buenos Aires for Chicago. The Pagal Air Line will carry Wood from Buenos Aires to Santiago, Chile. From that point, he will travel in a Grace Lines plane to Panama, thence by Pan-American plane to Miami. At Miami he will transfer to a plane operated by the Pitcairn company which will carry him to Atlanta. The last leg of the journey will be made in a Nicaraguan plane operated by the Interstate Lines.

Buenos Aires, Argentina, Oct. 18 — The story of the world's longest and fastest air-mail route, the crowning achievement in the romance of mail delivery through the ages, is to be to drop a letter in the corner box and the faithful man in grey bring us a letter. All this is the romance of travel and [illegible]

A Century's Progress

From the day of the pony express until the radio, departing from enabled two continents with an area through the air waves, [illegible] years ago [illegible] progress symbolizes a century of man's triumph over nature. A week ago the first flight started here, just 437 years from the day Columbus discovered the continent. In those days, before radio and cable linked the world, travelers disappeared for a few years when they sailed across the sea. Today a letter comes from continent to continent in nine days. Those lords voyagers have gone into history as the world's greatest adventurers. Perhaps those who daily fly in planes over mountains and seas are greater adventurers to an age when adventure palls on a surfeited world.

This air flight which starts today is the second on this long journey and it may show that possibly wind and rain will provide thrills, but whether there be sunshine or clouds, nature will be picturesque and the story of how the mail came through always will be interesting.

Crosses Thirteen Countries

This mail route crosses four times between here and Miami the Cordilleras known as the Rocky mountains in North America and the Andes in South America. It flies over a part of the Pacific ocean, the Gulf of Mexico and the Atlantic. Over Panama, where ships seem below like toy boats in a ditch, and over Nicaragua, where another great canal soon will link the two oceans. It crosses thirteen countries and connects with as many more, stretching through the air from the Arctic on the north to the Antarctic on the south, in that long flight skimming over the sea along the coast, soaring 20,000 feet above the snow-mantled Andes, fac-

Copyright, 1929, The Chicago Daily News Inc.

Antofagasta, Chile, Oct. 21.—The first air mail for the United States which left Buenos Aires Saturday morning stopped here today after covering 1,276 miles of its 9,000-mile flight.

Under low-hung clouds with lightning playing on the tips of the wings, the big metal plane in which I was a passenger passed over Argentina Andes and was halted for the night at Mendoza, Argentina, by a blizzard raging around the peaks of the Andes. It fought its way across the barrier on Sunday to Santiago, Chile. The Chilean mail was put aboard another plane and at 4:38 p. m. we were 420 miles farther north along the Chilean coast. The schedule takes us to Tacna on the northern limit of Chile's long seacoast today.

A steady twenty-four hour rain had become a downpour when half a dozen automobiles bringing the Argentine mails and airplane staff slipped and slithered on the muddy road to the Pacora field after daylight Saturday morning. The bespectacled postal agent was accompanied by his corps of clerks who watched to see the plane and a serious policeman.

The guard carefully counted the mail bags and had the pilot sign a manifest. Argentina takes the air mail seriously and all was properly sorted in separate bags to drop off at the different stops on the journey from Mendoza to faraway Miami.

The little group on the field was huddled under the shelter of one of the big wings of the trimotor Ford metal plane. The engines were being warmed up. The Pan-American commander, Capt. Elmer Boyd, and Capt. Ralph O'Neill, veteran Andes flyer, were in the cockpit. Capt. Boyd was to pilot the plane to Mendoza, 600 miles away, and Capt. O'Neill was to fly it on to Santiago.

Low-hanging patches of white clouds flecked the fields of green and brown below. Then the big plane found itself between two floors of solid cottony clouds, white above and white below. All else was invisible, like a bare room stretching to infinity. In thirty minutes the upper clouds changed into rain. A hole appeared below the plane which dived through it and skimmed 100 feet above the ground.

Traveling 110 Miles an Hour

We had been flying by compass but now the Los Andes railroad station showed where we were. The speedometer was registering 110 miles an hour. We followed the railroad tracks where there was brief glimpse of Argentine windmills bobbing up as an unpleasant surprise.

Clouds are not interesting and I slept for two hours. I was awakened by a shout of "the big prairie fire" nearly jolted me from my seat and Williams the San Francisco pilot and Peter Pickup, the mechanic, both looked back, laughing heartily. Below was a herd of cattle throwing dignity to the winds and with tails out and heads down charging wildly across the field. "The sun was shining brightly and the plane with a playful dive stampeded the herd. "Cheer up the sun is shining" shouted Williams above the roar of the motors. "See Argentina first!"

The sunshine lifted to a brighter red the two bare heads of the young Americans in the cockpit and I could not fail to thrill with patriotic pride at the thought of what Americans are doing and daring in distant lands.

Start to Climb Foothills

Half an hour of sunshine and then rain again. At 11:30 a. m. the big squares of cultivated fields and grazing herds were left behind and we slowly started to climb the bare and scrubby foothills of the Andes. Scattered haciendas appeared and then solid vineyards of grapes along the banks of the rivers and streams. Then we were over the Andes.

"It was a beautiful day yesterday," said one of the aviation enthusiasts at Mendoza yesterday. "We could see the entire Cordilleras from here."

Storm Grows Worse

But it was not beautiful this afternoon and hourly reports came that the storm was getting worse. "That would cover our wings with ice in ten minutes and we could not fly," said Williams. So he looked up the plane in the field and went to the Plaza hotel, which is the best in Argentina. This was some satisfaction.

In the last fortnight I have flown across the Andes twice but the first time we needed to rise only 18,500 feet to surmount nature's barrier. Every minute and every hour its mood changes from a smiling air to strong storms and capricious winds. On each flight the mail pilot takes a new look and new chances of slipping through when and how he can. The orders are not as to how is to be done but that is to get the mail through.

Andes Hidden by Clouds

Dull blue clouds hid the Andes when we returned to the Los Tamarindos airdrome at Mendoza on Sunday morning. Toward the south a break showed lighter clouds over another pass 4,000 feet lower than the Uspallata pass, but Chile will not permit commercial airplanes to cross there, probably believing that some military secret would be disclosed. A report from the peaks said that the winds were still strong, but that the snow had stopped.

"We will make a try for it so that you will know what this jump is like," said the red-haired pilot.

"Bumpo" agreed the lone policeman carrying a rifle, who had stood on the field guarding the plane through the night a symbol of Argentina's vigilance over the mail.

None of the spectators who had thronged the field on the previous day showed up that early, not believing that an attempt to cross the mountains would be made.

It did not look any too good with a solid wall of clouds banked along the base of the mountains, but we started and flew steadily, enveloped by fog. Mendoza is 2,900 feet above sea level. We were off the ground at 8:13 o'clock Sunday morning. We were 7,000 feet up at 8:20, 9,500 at 8:22, 13,000 at 8:28, 17,500 at 9 o'clock,

ning playing on the ups of the wings, the big metal plane, in which I was a passenger, passed over Argentina Saturday and was halted for the night at Mendoza Argentina by a blizzard raging around the peaks of the Andes. It fought its way across that barrier on Sunday to Santiago Chile. The Chilean mail was put aboard another plane and at 4:38 p. m. we were 436 miles farther north along the Chilean coast. The schedule takes us to Tacna, on the northern limit of Chile's long seacoast, today.

A steady twenty-four-hour rain had become a downpour when half a dozen automobiles bringing the Argentine mails and airplane staff slipped and slithered on the muddy road to the Pacha field after daylight Saturday morning. The bespectacled postal agent was accompanied by his daughter who wanted to see the plane and a serious policeman.

The guard carefully counted the mail bags and had the pilot sign a manifest. Argentina takes the air mail seriously and all was properly sorted in separate bags to drop off at the different stops on the journey from Mendoza to faraway Miami.

The little group on the field was huddled under the shelter of one of the big wings of the trimotor Ford metal plane. The engines were being warmed up. The Pan-American company's agent signed the last documents including one disclosing that I was an assistant pilot. The pilot and mechanic were in the cockpit and I with the mail was in the big passenger compartment built to carry fourteen, which eventually it will do over the Andes.

The motors tempo increased with a deafening roar. James D. Summers, vice-president of the Pan American company, holding a watch. There was a small group of spectators who were shivering on the lee side of the plane. Mr. Summers waited until it was exactly 8 o'clock when he waved his

chauffeur-was registering 110 miles an hour. We followed the railroad tracks where there was less change of an Argentine windmill bobbing up as an unpleasant surprise.

Clouds are not interesting and I slept for two hours. I was awakened by a flop of the big plane that nearly lifted me from my seat. Ned Williams, the San Francisco pilot and Peter Prokup, the mechanic, both looked back, laughing heartily. Below was a herd of cattle throwing dignity to the winds and with tails out and heads down charging wildly across the field. The sun was shining brightly and the plane, with a playful dive, stampeded the herd. "Cheer up, the sun is shining," shouted Williams above the roar of the motors. "See Argentina first."

The sunshine tinted to a brighter red the two bare heads of the young Americans in the cockpit, and I could not fail to thrill with patriotic pride at the thought of what Americans are doing and daring in distant lands.

Start to Climb Foothills

Half an hour of sunshine and then rain again. At 11:30 a. m. the big squares of cultivated fields and grazing herds were left behind and we slowly started to climb the bare and scrubby foothills of the Andes. Scattered haciendas appeared and then solid vineyards of grapes along the tree-lined roads. Mendoza was below. A charge into the wind and then down on the rain-swept field at 1:45 p. m. It was the fastest trip made from Buenos Aires. The time was less than five hours for the 360 miles over a road which 100 years ago horsemen in relays, leaving their spent, spurred and dying mounts along the trail, occasionally did in seven days.

Toward the west, the Uspallata pass was hidden in clouds. A message from the All-American cable office at Lascuevas brought from the relay station told of a storm raging there 17,000 feet above the sea with the thermometer showing 38 degrees below zero.

Andes Hidden by Clouds

Dull blue clouds hid the Andes when we returned to the Los Tamarindos airdrome at Mendoza on Sunday morning. Toward the south a break showed lighter clouds over another pass 4,000 feet lower than the Uspallata pass, but Chile will not permit commercial airplanes to cross there, possibly believing that some military secret would be disclosed. A report from the peaks said that the winds were still strong, but that the snow had stopped.

"We will make a try for it, so that you will know what this jump is like," said the red-haired pilot.

"Bueno," agreed the lone policeman carrying a rifle, who had stood on the field guarding the plane through the night, a symbol of Argentina's vigilance over the mail.

None of the spectators who had thronged the field on the previous day showed up that early, not believing that an attempt to cross the mountains would be made.

It did not look any too good with a solid wall of clouds banked along the base of the mountains, but we started and flew steadily, enveloped by fog. Mendoza is 2,000 feet above sea level. We were off the ground at 8:13 o'clock Sunday morning. We were 7,000 feet up at 8:20, 9,500 at 8:22, 13,000 at 8:26, 17,500 at 9 o'clock, 20,000 at 9:03 o'clock and 20,700 at 9:11. It was steep climbing, but the plane popped out of the clouds above the mountains as was expected. If it had been less steep the flight probably would have ended in an abrupt bump against the side of the mountain.

Beacon Towers 12,650 Feet

Once in the pass the big plane bucked and bumped in the wind like an ocean leviathan in a storm, but the ceiling of clouds had gone and there was a clear wild below to where the precipitous railway was starting. The peaks above the valley were covered with perpetual snow and below

WOODS FLYING WITH THE MAIL

Map with unbroken line showing territory already covered by Junius B. Wood of The Chicago Daily News foreign service. The broken line indicates territory he will fly over in mail plane.

In a couple of days from now the letters which we carried over the Andes will be aboard another plane skimming over the ocean around the equator, with a perspiring pilot in his shirtsleeves and linen trousers. Just now my head is aching. Lights are dancing in front of my eyes and I have a desire to sleep instead of looking out of the windows. These feelings with a shortage of breath caused by the abnormal altitude discourage romancing over the scenic variety which comes to the air mail traveler. Solitary and in the vast space without a sign of life, the big plane was buffeted by the winds and seemed merely a sparrow in a gale, and every plunge and dive appeared to be a tumble with death. This must seem to be a tremendous effort for the thirty-four pounds of mail which we are carrying from Buenos Aires. The service, however, must start. When the saving of time is considered, it seems to be worth while.

French Plane Passes

Then off to our left into the sun flashed a French mail plane going east. This was the one thing real in the myriad spots twinkling before our eyes.

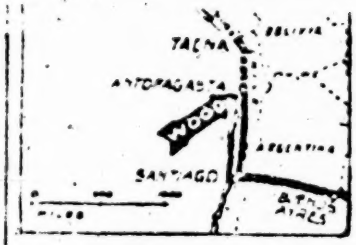
During the California gold rush a shipload of Frenchmen walked from Buenos Aires to Santiago. It took them three months. A few years ago, with good luck, one might cross the Andes by rail in eight days. Then the railroad dug a tunnel and when there are no snow blockades trains get over in twelve hours. But this Sunday morning the French and American planes slid past each other on the airway 20,000 feet up across the Andes in one or two hours, each having the mail to its own country on different continents on opposite sides of the Atlantic in nine days.

"We have passed through the worst," the pilot shouted. It is 10:15 and the altitude is still 20,700 feet. Two minutes later it is 20,000 feet, three minutes more it is 15,000 feet, two minutes more it is 12,000 feet. Santiago is in view ahead under clouds. At 10:23 we are bumping across the field with our ears cracking as if machine guns as we try to get back to normal. Our heads are [illegible] from what seemed to be a [illegible]. Other thrills seem only pin pricks as compared with such a flight while the plane which brought me takes the United States mail to Santiago, whence it continues to Buenos Aires.

The government of Chile had kindly given me special permission to travel on the plane as a passenger.

Wisconsin Man New Pilot

Robert Reste of Wannakee, Wis., is the new pilot who will continue to Lima, 1,750 miles away, on the longest aviation run in the world. The mail exchange having been made, and the last greetings having been said, the third plane on which I have been a passenger in a day left the ground. It bumped and bucked in a cross wind sweeping the hilltops and struck across the ocean. After about two hours it came down in spirals onto another well-kept army field after we had made only 586 miles for the day but when the altitude is considered many more. Copiapo was one of the most important towns in Chile before the mines were worked out. It lies in the last green valley we will see for another 1,000 miles. Copiapo has rain only twice a year. Today the sun is shining and dust is blowing. It is a different world from that of the morning in Mendoza where an overcoat was comfortable in the chilly rain.



Map with unbroken line showing territory already covered by James H. Wood of The Chicago Daily News foreign service. The broken line indicates territory he will fly over in mail plane.

W. R. GRACE AND COMPANY EXHIBIT 31

NEW YORK

September 26, 1930.

DIRECTORS, PAN AMERICAN-GRACE AIRWAYS, INC.

Gentlemen:

I take the opportunity afforded by the second anniversary of the commencement of operations by our Company on the West Coast of South America to give the Directors a brief resume of the operations, to date, and to remark on past and present performance.

The Directors may recall that on September 13, 1928 our operations were inaugurated by a flight of a plane piloted by Mr. Harris from Lima to Talara. Operations between the Canal Zone and Mollendo were commenced on May 17, 1929. Extensions of the route to Santiago, Chile, were made on July 16, 1929. The line was further extended to Buenos Aires on October 12, 1929, and to Montevideo on November 30, 1929.

The Post Office ordered twice-weekly service on July 1, 1930, at the same time cutting the running time two full days between the Canal Zone and Montevideo.

I refresh the Directors' minds with these dates so that they may appreciate the fact that within the space of practically one year Panagra has increased its mileage from 1200 miles per week to 18,000 miles per week. It has also increased its miles flown per day from 170 to 2570.

It was inevitable that such a rapid increase in route and mileage, coupled with the distance from the source of supplies, would entail added responsibilities and increased
[fol. 4737] effort on an already hard-working organization. The necessary additions to that organization could not be made at a moment's notice. Men capable of doing their best work and also of handling themselves diplomatically in Latin America have to be very carefully chosen. They

could not be chosen and sent down beforehand, because of the policy that only a minimum expenditure must be incurred until we were placed on a twice-weekly basis.

It is, therefore, a source of gratification to your management, and I am sure it will be to the Directors, to be able to state that since operations commenced, in spite of high-pressure work throughout the organization, there has been no case of loss of life or limb to passengers and flying personnel, and not even a forced landing from motor failure whilst maintaining almost an unbroken schedule. It would be extremely unjust to attribute this record solely to undeserved good fortune. The men on the ground and in the air who have contributed to this record by unfailing diligence under difficult working conditions, and sometimes inclement weather, in foreign countries, should receive due credit.

It has been called to your management's attention that certain unfavorable reports have been received concerning the appearance of our planes, and an apparent lack of organization throughout our operations.

I have not been favored with a copy of these criticisms, but as far as I am able to determine, only one such was received from an individual who had any previous experience to qualify him as a judge. It is, therefore, impossible to make detailed answer. I know of no operations in any industry that could not be criticized if a person were so [fol. 4738] disposed. I would, therefore, beg the Directors to examine the following illuminating data:

Miles flown Sept. 1928 to May 17, 1929	46,000
" " May 17, 1929 to Dec. 31, 1929	282,100
" " Dec. 31, 1929 to Aug. 31, 1930	440,364
Miles flown weekly since July 1, 1930	18,000
Planes in operation May 17, 1929	5
" " " Dec. 31, 1929	11
" " " Aug. 31, 1930	15
Hours flown per plane per day	1.7
Pilots on Pay-roll Aug. 31, 1930	13

Flying hours per pilot per day		1.97
Motors in operation		25
Motors — Spares		45
Mechanics on Pay roll — Dec. 31, 1929		29
" " Aug. 31, 1930		52
Value of spare parts — Dec. 31, 1929		$ 20,300
" " " June 30, 1930		33,400
" " " July 31, 1930		39,600
Operating Costs per mile flown — 1929		$ 2.20
" " " " — to		
August 31, 1930		$ 1.72
Operating Costs per mile flown — July and August, 1930		$ 1.47
Passenger Revenue — 1928		$ 5,700.
" " 1929		$ 72,500.
" " 1930 (to Aug. 31st)		$ 84,400.

Commenting upon the above data I would respectfully draw the Directors' attention to:—

First: The notable and rapid increase in mileage flown.

Second: Planes have been placed in operation to care for the increase, so that each plane is in the air less than two hours per day.

[fol. 4739]

Third: Pilots have been hired to the extent that each pilot is not required to fly more than 750 hours per year.

Fourth: Motors have been purchased for 80% replacement, and spare parts have been laid down for approximately six months in advance. A substantial increase in the mechanical force has been made. Of the above 52 mechanics, 20 are Americans and experts in shop and line service.

Fifth: Our operating costs, which include Depreciation and Obsolescence, Crash Reserve, etc., have

shown a gradual decrease, commensurate with the additional mileage flown.

Sixth: Our passenger service seems to be giving satisfaction, as in the face of strenuous competition from a competing American Company in Peru, the passenger revenue shows notable increase.

It will be recalled that your management was instructed to exercise the strictest economy in expenditures for operations, and that no large sums for permanent facilities were to be appropriated until the Post Office ordered at least twice-weekly service. This carried with it the obligation to delay the building of hangars and shops until it was definitely known where these could be strategically located. It was, therefore, not until after July 1st, 1930 that the determination of what looked to be a permanent schedule permitted the expenditure for permanent facilities.

A re-allocation of appropriations was immediately asked for. The construction of a hangar at Lima was commenced. This is now ready for occupancy. Other facilities are either completed or in process of completion.

The services of a maintenance engineer were secured—[fol. 4740] Mr. C. C. Cole, late of the Western Air Express. Mr. Cole arrived in Lima the first part of August, 1930, with instructions to report immediately as to what should be done to place our maintenance on a level with that of any successful airline. Mr. Cole's reputation is so high that the Department of Commerce has appointed him to inspect planes for re-license from Talara to Montevideo, and will accept his statements as to the fitness of Panagra planes. Mr. Cole's recommendations will be carefully studied and placed before you for approval.

It is the intention of the management to have the use of the facilities of four overhaul stations along the route—Panair at Cristobal, Panagra at Lima, Curtiss Co. at Santiago, and either Panair or Panagra at Buenos Aires. This latter depending upon the plans for the extension of "Alas" activities. Where necessary Flight Mechanics will accom-

pany the planes, and Ground Mechanics will be located at intermediate points.

It is believed that it will not be necessary to purchase airports in Peru, Chile or the Argentine, but that by arrangements with the Governments and private Companies, the necessary facilities can be more cheaply obtained. I again call the Directors' attention to the anti-monopolistic policies of the large South American countries, and to their evidenced desire to control commercial aviation within their territorial limits by the erection of Government airports at which all commercial aircraft will be ordered to clear. An incident such as the recent invasion of Chile by a revolutionary plane, piloted by American aviators, will strengthen the determination of the Governments to enforce such policies.

[fol.4741] It will undoubtedly be of interest to the Directors to read the latest impressions of travellers over our lines. I, therefore, attach to this report extracts from letters from Mr. C. C. Cole, from Commercial Attache Walter J. Donnelly, and from two other important passengers.

I most respectfully request that the Directors hasten the settlement of the unpaid bills for Panair and Grace services during 1929, and the first eight months of 1930. Our estimated Cash Position at October 1st will be:

Cash in Banks Sept. 25th		$ 222,100.
P. O. accruals including September estimated revenue		280,000.
		$ 502,100.
Unpaid bills including supplies purchased	$ 24,000.	
Appropriated for Chile	87,500.	
Unexpended appropriations	30,000.	141,500.
	Available Cash	$ 360,600.

These figures would seem to show that the Company is entirely solvent. No proper statement of Profit or Loss

can be made, however, until it is definitely decided what we must pay for supervision by Panair and for W. R. Grace agency fees. If a reasonable figure is established for these services, it will be possible to provide, from current revenue the additional equipment and facilities necessary to insure the continuance of successful operation.

[fol. 4742] Extract from letter from Commercial Attache Walter J. Donnelly, dated February 10, 1930.

"Bogota.

"Last month I returned from a 7,000 mile airplane tour of the West Coast of South America. It is a real service. In my opinion it is far superior to the Scadta and much more difficult."

Extract from letter from Mr. C. C. Cole, dated August 12, 1930.

"I wish to take this occasion to thank you for the most interesting airplane ride I have ever made. It was also instructive to me. The crew of the plane and the plane were above reproach and did everything possible to make the trip a pleasure. The engines functioned perfectly from start to finish and the time taken to service at the stopping points was a real eye opener to me under the conditions. You are to be congratulated on the operation and I believe it to be the most interesting airplane trip that can be had."

Extract from letter from Mr. John T. Faris, D. D., Editor of the Board of Christian Education of the Presbyterian Church in the U.S.A. dated September 23, 1930.

"On Friday last I returned from South America. I wish to tell you how helpful were your letters, and how wonderful were all the arrangements made for me.

I did not use the plane from Arequipa because of the revolution. It was considered unwise by those who advised me not to go to La Paz and Cuzco. Therefore, I took the plane at Lima, and rode to Cristobal. Later I had the Pan American plane from Cristobal to Puerto Cabello and return.

My contact with your representatives to whom you wrote, and in fact all other representatives of the Airways whom I saw and with whom I rode, was delightful. You certainly have a remarkable organization."

Lima, Oct. 7th, 1930.

R. H. Patchin, Esq.,
NEW YORK.

Dear Patchin:

Your No. 2.

I expect to write the Panagra directors shortly regarding what we are doing here. In the meantime you may take my word for it that we are running a real transportation business in Peru along thoroughly sound lines and Trippe and all others concerned have nothing to worry about. Incidentally I think Trippe should lay off this line until he comes down here and sees for himself what is being done and makes any specific constructive suggestions which he may have to offer. At the present time, so far as Peru is concerned, he simply does not know what he is talking about.

I personally saw something of Capt. Wooten on his recent inspection trip here, and his reports, to me at least, are most satisfactory and should leave no basis for misgiving in Washington or in any other quarters. His personal opinion of our service is best shown by the fact that

he is making a personal trip with his wife over our entire line from Santiago to Cristobal, and in a speech at the Canal reported by the newspapers he said:

> "'One of the finest operating airways in the world is in operation between Cristobal and Montevideo,' he declared, in referring to the Panagra system. 'This is largely due to the fact that this company has as its head of operations a man who has a thorough knowledge of aircraft operations.'
>
> "Unless you have made the airtrip down the Pacific Coast of South America you have no real knowledge [fol. 4744] of the countries over which these Panagra planes fly. It is one of the most educational voyages one can take in Latin America."

As a result of my observations I am more than ever convinced that this business if our partners will let us run it in a business-like way, will be a very important success and I think Mr. Iglehart was right when he took the position long ago that if there were any buying or selling to be done we should be the buyer and not the seller. Coupling Trippe's remarks to you and the proposed financing of Panafr I can easily imagine that Trippe would like to get complete ownership of our line to assist in new financing. You may tell him in unequivocal terms that he is not going to get it now or at any other time. While I agree in principle with his theory that neither party should ~~not~~ sell without offering to the other, and told him the day before I sailed that we would not think of doing so, I think the question is academic because we have no intention of selling and I would not consider for a moment entering into any agreement whatsoever on this subject.

From the standpoint of successful operation on the commercial side the one most important thing is for us to get our 3rd trip. The outstanding reason for this, to my mind is as follows: We have more than enough equipment for 2 trips a week but could probably not get along on much less. We could run 3 trips without any materia increase in equipment. One of our biggest expense items is depreciation [fol. 4745] tion and obsolescence. While I believe that our

depreciation figure is an arbitrary one and that we can get more out of our equipment than our estimated life I fear that our obsolescence period of 2 years may not be far wrong. Improvements in flying equipment and the necessity for more speed may very well result in the obsolescence of our equipment at the end of two years or thereabouts, although naturally we hope for a little longer life. But assuming that the foregoing assumptions are correct it follows that the only way we can avail of the excess life of our equipment over and above our depreciation basis is to get in that life within our two year obsolescence period. This, of course, means more extensive use of our equipment. A comparison of our depreciation and obsolescence under the one trip and two trips a week schedules shows this very graphically. With one trip a week our depreciation was running way behind our obsolescence. With two trips a week the two figures are brought much closer together. With three trips a week our depreciation would run ahead of our obsolescence which would mean that we could save any life which our equipment may have in excess of our depreciation basis. Bearing in mind what a tremendous part of our total expenses depreciation is it is unnecessary for me to point out to you what a large amount of money added to profits this means. The same is, of course, true on all our general overhead and capital charges, but I think it worth while to develop this one point principally because my examination of the figures here has made it so impressive.

[fol. 4746] Unless the Chilian situation has been settled by the time I get there or unless I get some new light on the subject after my arrival I shall probably be sending some pretty strong cables on this subject and I hope you will get back on them, and if necessary, draw Mr. Ingleheart into the picture to see that we bring that issue to a conclusion. I do not wish to be overly suspicious but I do not wish our partner to land us in an awkward situation in Chile at the end of our two year period which he can take advantage of to get his East Coast line extended to Buenos Aires or perhaps even to Santiago. After all we are making money in Chile, conditions there are exceptional, and I

he is making a personal trip with his wife over our entire line from Santiago to Cristobal, and in a speech at the Canal reported by the newspapers he said:

> "'One of the finest operating airways in the world is in operation between Cristobal and Montevideo,' he declared, in referring to the Panagra system. 'This is largely due to the fact that this company has as its head of operations a man who has a thorough knowledge of aircraft operations.'
>
> "Unless you have made the airtrip down the Pacific Coast of South America you have no real knowledge [fol. 4744] of the countries over which these Panagra planes fly. It is one of the most educational voyages one can take in Latin America."

As a result of my observations I am more than ever convinced that this business, if our partners will let us run it in a business-like way, will be a very important success and I think Mr. Iglehart was right when he took the position long ago that if there were any buying or selling to be done we should be the buyer and not the seller. Coupling Trippe's remarks to you and the proposed financing of Panair I can easily imagine that Trippe would like to get complete ownership of our line to assist in new financing. You may tell him in unequivocal terms that he is not going to get it now or at any other time. The same is, of course, true on all our general overhead and capital charges, but I think it worth while to develop this one point principally because my examination of the figures here has made it so impressive.

[fol. 4746] Unless the Chilian situation has been settled by the time I get there or unless I get some new light on the subject after my arrival I shall probably be sending some pretty strong cables on this subject and I hope you will get back on them, and if necessary, draw Mr. Ingbiart into the picture to see that we bring that issue to a conclusion. I do not wish to be overly suspicious but I do not wish our partner to land us in an awkward situation in Chile at the end of our two year period which he can take advantage of to get his East Coast line extended to Buenos Aires or perhaps even to Santiago. After all we are making money in Chile, conditions there are exceptional, and I

think we can afford to pay even a little too much to get that situation cleared rather than continue to take unreasonable chances. After all we can pay for the Chilian concession out of Chilian profits. The Latecoere situation, as I stated at the last directors' meeting which I attended, makes this matter of increasing importance as I expected that it would. Latecoere have entered Peru, and with conditions as they are here I do not think we are going to be able to stop them. This means that they can make transfer arrangements with the Chilian National Lines in the south and with Scadta or someone else in the north, or even extend their own lines there with the result that we shall only
not have a strong competing line all along this Coast but Chile's interest in us as the only international line to the
[fol. 4747] United States will be very measurably diminished.

As Cogswell's Nos. 2 and 3 seems to call for no special reply I would suggest that you show him this letter for his guidance. It might also be well to show it to Mr. Iglehart and our other associates at 7 Hanover Square, thereby making it unnecessary for me to write them separately on this subject.

Your truly,

(*Sgd*) HAROLD J. ROSS

New York, July 30th, 1929.

Assistant Secretary White of State Department advised R.H.P. by telephone today, that Ambassador Culbertson at Santiago had reported that proposed meeting at Lima is a part of plan among The Scadta, Faucett, Lloyd Boliviano and Chilean Military Service directed against Pan American and that the New York, Rio and Buenos Aires working

with Latecoere and the Curtiss interests working through Faucett are parties to.

The Ambassador says that the Chilean Government is more liberally inclined towards company in Chile which merely undertake to deliver mail and passengers to particular points than Pan American hence his recommendation for cooperation between Pan American and Chilean Lines.

PRIVATE LETTER #4387

LA PAZ, 15th August 1929.

Messrs. W. R. Grace & Co.,
NEW YORK.

Sep 3 1929

Dear Sirs;

PAN-AMERICAN GRACE AIRWAYS INC.,
LLOYD AEREO BOLIVIANO.

We confirm our private letter #4371 of the 8th inst, and we beg to advise you that, according to verbal information, the renewed activities of the Lloyd consisted in

their having applied for a permit from the Chilean Government to land their planes in Chilean territory. The reply was evasive and ambiguous, to the effect that there would be no objection, provided that the Bolivian Government would allow the Chilean planes to land in their country. It further transpired that deputy Peña, a brother of one of the members of the Directorate of the Lloyd, intends to present a protest to the Congress, asking to grant to the Lloyd exclusive rights for international postal service.

Both Mr. Rocca, Postmaster General, and Mr. Flores official Mayor, of the Communication Department are of the opinion that it is entirely out of the question that the Bolivian Government will even consider the idea of allowing Chilean planes to land here, and that the entire plan of the Lloyd is impracticable.

We cannot of course vouch for the aforementioned information, but it shows that the Lloyd is active and anxious to exercise a monopoly in this country. There are also aware that our exclusive option expires in 3 months, and Mr. Kyllmann is continually inquiring what news we have of the expected arrival of Mr. MacGregor, or of another representative of the Company.

We enclose herewith a map of Bolivia, which may be of interest to you. You will notice that besides the established air lines, amongst the projected ones marked therein, are those which are covered by our option.

We shall be pleased to receive further news from you, and remain,

Yours very truly,

ORIGINAL AIR MAIL LETTER

COPY FOLLOWS BY STEAMER

New York, October 15, 1930.

KENNETH C. HAWKINS

Dear Roig:—

George Barr Baker who, as you know, accompanied Mr. Hoover as publicity secretary on his trip around South America, recently introduced to me Kenneth C Hawkins, late operations manager of the northern division (New York to Para) of Nyrba and who has been let out as a result of the merger. He wants to be located and I passed him along to MacGregor with whom he is to have some

further conversation but I do not understand that there is, at the moment, any vacancy in which his services can be utilized.

I am not pressing him on MacGregor but I am impressed by the unusual background of aviation and radio experience which he claims to have as indicated by the following record:

Graduate of Annapolis, 1919, standing 96 in class of 524.
7 months naval transport service.
Chief Engineer of a destroyer for two years.
Attended U.S. Naval Destroyer Engineering School, Sperry Gyro Compass School, Submarine School.
Served in Submarines for two years; as chief engineer for one year and Commanding Officer for one year.
Attended Naval Aviation School and was rated as a pilot in 1923.
Served on U. S. S. Nevada with the aircraft squadron of the battle fleet.
Had two years' service with seaplanes and for six months was communication officer on the staff of Admiral Reeves, commanding the aircraft squadron of the battle fleet.
For two years, 1926-8, was communications officer of the naval air station of San Deigo, Calif., in Nov. 1928 went to U. S. S. Maryland as aviation officer and commandered that vessel with Hoover on cruise around South America.

Mr. Hawkins resigned and joined Nyrba as pilot, flew their second Sikorsky from Tampa to Buenos Aires and was finally appointed Operations Manager of their northern division.

Hawkins claims to have extensive experience in operation and construction of radio. He says efficient sets can be manufactured much cheaper than the prices quoted by R.C.A. and that patent infringement suits need not be [fol. 4757] feared as R.C.A. stated at the Radio Conference in Washington, last fall, that they would not interfere with any aviation company in the foreign field which built its

own sets. I am checking up on this as it seems a very broad statement.

Anyway, Hawkins seems to have a lot of radio and practical aviation experience and he might be just the man to take into Panagra in some executive capacity, *not necessarily as a radio engineer*, but with the idea that he could develop the possibility of equipping the planes with simple radio installation and to work with the ground stations already existing. It seems to me that it ought to be possible to get service from the governmental ground stations in Peru and Chile cheaper than putting in our own ground equipment at heavy expense.

I am sending you Hawkins' record for your information but I have told him simply that he would have to sell himself to MacGregor and Harris.

Webster, whom I encountered on the street last week said he understood the Chilean aviation Administrate has a very ambitious program of government airports which it is hopeful of getting financed in the United States. I should think the chance of this was pretty slim at this time.

Have just received and read with the greatest interest, your letter No. 1 and I am delighted with the good report of the service. I am writing Rebstock to send me the original newspaper clipping quoting Wooten's endorsement of Panagra. I will have it photostated and placed where it will do the most good.

I fully realize all you say about the importance of the third trip and will work steadily towards that end but I am bound to say that I consider the chance slender at least for the next fiscal year.

It seems to me that the penetration of our foreign competitors must have a powerful motive for the extreme extensions recently made are so remote from their genuine commercial interests.

[fol. 4758] I am very glad you are now in Santiago and we are looking for important cables from you at any mo-

nent. Sommers has just cabled PanAir suggesting that we propose to Chile and Argentina that inasmuch as the Brazilian revolution has impaired the service and carriage of air mail from Chile, Argentine and Uruguay to Europe that we bring all the air mail for Europe to New York for despatch by the fastest trans-Atlantic steamers. This seems a good idea and we may be cabling Santiago later in the day about it.

I have shown your letter #1 to Mr. Iglehart and all others concerned.

Wall Street has been misbehaving. After the Prince & Whitely failure, several houses have been quietly salvaged by the banks. Common report says among them were Pynchon & Co. and Otis & Co. In commercial lines there is some indication of improvement but I think it is retarded by the bad picture in the stock market.

Faithfully yours,

/s/ R. H. Patchin

[fol. 4759]

W. R. Grace and Company Exhibit 40

No. 3.

SANTIAGO, 24th October, 1930.

R. H. Patchin Esq.,
W. R. Grace & Co.,
NEW YORK.

Dear Patchin,

Your Nos. 4 and 5:

So far as our foreign competition is concerned I believe that it is based upon a political motive; Deering told me in Lima that he believed that it was a part of the French idea of Latin consolidarity in preparation for the next war, and I dare say he is correct. Whether he is or not, however, and whatever the motive may be, the competition is a very substantial fact.

As soon as Rihl arrives next week I hope we can make some substantial progress in clearing up our Chilean situation. I believe that the present moment is a favourable one, and that with fair cooperation from New York we ought to be able to get in substance everything we want, except radio ground stations, but we will have to be given a little latitude in the matter of detail, and not have too much insistence on the exact manner in which everything we want is formulated. On this whole subject I refer you to my letter to Cogswell of October 20th. So far as the radio ground stations are concerned, I not only feel that we cannot get them, but personally I am not interested in pressing the point. If we get permission to instal them it is very likely to be in some form requiring us to instal them within a fixed time, and perhaps in accordance with Chilean Government specifications and regulations, which may not suit us. Moreover I see no reason why we should incur this capital expenditure so long as we can use Government ground stations; even though our use of Government ground stations is bound to be subject to certain regulations which may at times be a little irksome; I believe that even if we had our own stations, they would be subject to quite similar regulations.

The point which Hawkins mentions that plane sets can be constructed economically is of very great interest. I should suppose that this might be the case, as if it were otherwise I do not believe Panair would have developed their sets. I think you should follow up this idea very closely, because, in Chile at least, radio is I am afraid going to become more and more a necessity. In Peru,* where flying conditions are much easier on account of more natural landing fields and better weather, it is not so pressing, but at this end of the line we must have it in the not too distant future, especially if we get into the passenger business. It is apparently the only practical thing over the Andes. Radio beacons and beams, while of some value where it is possible to fly in a straight line, are of little value over the Andes, where owing to weather conditions it is repeatedly [fol. 4760] necessary to divert from such a line.

---

* (except Arica/Arequipa) and Northern Chile

I would like to reemphasize what I said in my letter of October 14th about free passengers, and carrying of any passengers where we are not regularly in the passenger business. On the latter point it has come to my attention that the letters which we give people taking them into our service in order to be in a position to carry them at all, lead to frequent misunderstanding. The holders of these letters, innocently or otherwise, seem to take them rather seriously, telling people both in the "Panagra" and Grace organization and outside that they are connected with our Company. This results in our own people talking to them far more intimately than there is any occasion for doing, and the holders of the letters, or at least some of them, seem to be entirely without shame in the matter of asking questions about the most private details of our business. As many of the pilots and some others enjoy talking freely and seem to delight in making a display of their knowledge about everything they know, or think they know, this is at any time likely to have disagreeable consequences. So far as the newspaper and publicity men are concerned, I have still to find anyone along the coast who considers their publicity of any value here, and personally I think it is of infinitesimal value in the United States, the more so since all their stories are bound to be coloured with the spirit of adventure. Commercial aviation has no interest in adventure, and that kind of publicity creates just the opposite of the impression which we must build up, which is to the effect that transportation by air is a regular established means of transportation, no different from any other except that it is quicker and more comfortable.

So far as our equipment, operations and maintenance at this end of the line are concerned, I prefer not to go into details until I have been able to devote a little more time to the problem. Even then I may not do much writing on the subject, as by the time I have reached my conclusions I shall probably be heading North anyhow and can discuss the whole question more fully upon my arrival. In the meantime, however, any matters which I can agree upon with Harris I shall endeavour to quietly put into force on the ground without making them matters of state by cables

and letters. I will say, however, that before undertaking passenger business over the Andes we must give that problem a good deal closer study than it has yet received. Unless the Falcon proves the exception of the rule, as I trust it will, the advice we have received from our partners on this problem, which ought to be one where they would be particularly helpful, has been pitiful to a degree. Such progress as we have made has been due entirely to our own personnel, and in spite of expensive errors of our associates, we shall have to go along the same lines. My idea is that C. C. Cole will have to spend a protracted period in this Division, that he should certainly be here all through next winter to become thoroughly familiar with the actual conditions, and if possible that Harris should also spend a good bit of time here, particularly next winter. It is most unfortunate that this was not done during the winter just closing. This will, of course, be expensive, but I see no way of avoiding it.

[fol. 4701] While Hawkins has certainly had some very interesting experience I do not quite see where we can use him at the moment, as with the two Coles I think we have sufficient high category technical assistants for the time being. The weakness in his record seems, of course, the fact that he has had so little commercial experience, and that with a company where most of what he has learnt will probably have to be forgotten before he becomes of much use to us.

With kindest regards, I am,

Very sincerely yours,

HJR FL.

P.S. Please number my unnumbered letter to you as follows:—

ORIGINAL AIR MAIL LETTER

COPY FOLLOWS BY STEAMER

Santiago, May 6, 1935.

D. S. Iglehart, Esquire,
New York.

Dear Mr. Iglehart,

WASHINGTON

I have read with the greatest interest your No 36 and enclosures on this subject. It seems to me that our case was very well presented and that the concession, since we had to make it, was made as gracefully as possible. From your letter as well as from what Vidal tells me there seems to have been no escape from this bitter pill.

I note from your letter that you are proposing to draw Clark into the picture and have no doubt that being in the same firm with Root this will help to insure so far as possible a united form of representation. In spite of all its difficulties I still feel that this is desirable so long as at all possible for I am worried lest, with one partner proposing one form of cut and the other another form, the Post Office will simply adopt both suggestions. In this connection I am, of course, particularly concerned about the Montevideo run and hope it may be possible to present a united front on

this point. There are now 3 trips there which the Post Office may consider too many. Obviously we having been there first, the Pan American stop is the one which should be discontinued. Moreover, Trippe ought to be willing to discontinue it, for, since he is paid mileage from Buenos Aires to Rio in any case, the call at Montevideo means little if any additional mileage for him and the efficiency of his service would be improved by omitting this call, because, once they have a one-day schedule between Buenos Aires and Rio they will have a full day's flying to do and they can well afford to conserve the half hour or so of daylight required for this Montevideo stop. The difficulty, of course, from the P.O. standpoint in omitting the Panair stop is that it will not really save them any money for even though the [fol. 4763] rate is higher the omission of their stop would save little or no mileage between Rio and Buenos Aires and the only way to make a real saving in their case is to make Montevideo their terminal, which is hardly logical. I am concerned, therefore, lest the Post Office cut off one of our trips which would be almost as bad as losing both for the expense of maintaining an amphibian and crew to make one trip would be about as great as for two trips.

A very important consideration in connection with this service is the fact that it has cost us a great deal of money and effort to secure our flying rights and establish ourselves in the Argentine and Uruguay. The cost to the Post Office in maintaining the present service to Montevideo under which they are in effect paying for only two trips a week in any case, is a trivial amount compared to the importance of maintaining the foothold which has been secured. This is particularly true in the Argentine and Uruguay where the United States occupies a distinctly inferior position. Anything such as this American air service which helps to improve this position ought to be maintained and extended rather than restricted. The rights to maintain these services were not secured without difficulty. If they are thrown away now it may not be possible to secure them again later.

I wish the men who are passing on this question in Washington could see what our Line is doing today and appreciate what it has meant to reach this point. — could have just a

faint realization of the struggle and the problems involved in the establishment of these United States air lines in these countries over-seas. Nothing in domestic aviation development compares with it either in cost of attainment or importance of the result. The job is far from finished. Continued effort and expense along the lines of the past will [fol. 4764] be necessary to hold our present position and steadily advance it. We have built up a standing and good will in these countries which is of the greatest value. But it can readily be lost. The cancellation of United States domestic airmail contracts undoubtedly had an unsettling effect and I am constantly asked about the attitude of our Government toward the foreign airmail. We cannot expect goodwill abroad if it appears that we do not enjoy it at home.

After all, we are still a foreign line in these countries and our relationship with them on which our whole development must depend can only be maintained if it is based on a clear mutuality of interest which must consist, not only of providing continually better international service, but development of local services and cooperation with local interests. The program of development and expansion on which we are embarked, including the Bolivian extension, local services by Aerovias in Peru, better equipment, faster schedules, improved airports (notably the very constructive air port program we are working out in cooperation with the Peruvian Government) and lighting in cooperation with the Chilean Government, will serve to strengthen and solidify this position and to build American aviation into the life of the countries along our Line in a manner which will be of inestimable value to them and a definite contribution toward solidifying relations between them and the United States. A narrow view with regard to these collateral developments will be utterly destructive of any real American aviation progress abroad.

It may perhaps be said that from the standpoint of foreign Government relations, equipment and operations we have completed a pioneering stage or at least a definite phase of it. Our present program of expansion and improvement represents, in a sense, a secondary stage of [fol. 4765] development which is only made possible by the

conservation of the experience and resources of the earlier period. The fact that we have proceeded cautiously, avoiding waste and building up reserves by a policy of conservatism during the first period in which we have been acquiring our experience, should not be used as a reason for penalizing us by a reduction of mail pay now based upon figures which chance to exist at what is really merely a moment of transition from one period of development to another.

The phase upon which we are now entering will be no less free of problems than the past and no less expensive perhaps substantially more so. Some idea of what we have had to face to date in the way of equipment alone may be had if we just stop to think that four years ago we were operating with Fairchilds and just going to Fords. Already the Fords are replaced with Douglases, three sets of equipment in five years. And there is no reason to believe that future progress will be less rapid. On the commercial side we are still very much in the pioneering stage. Increase of mail, express and passenger revenue, while encouraging, is still very much short of enough to make possible the frequency of service which in the case of domestic lines goes so far toward tarrying overhead and capital charges and thereby making reduction in their subsidies possible. Increased Government support to the Chilean Line and to Air France (see clipping enclosed) and extension of Lufthansa activities to this Coast at the instigation of the German Government, give some indication of what we may expect in the way of increased competition. With the increase in Japanese influences here and Trans-Pacific flying now a reality, the possibility of developments in that direction are not to be ignored. Now, halfway across the stream, is certainly not the time for the United States [fol. 4702] Government to reduce its support of their airlines in these countries. If the authorities in Washington could but feel the pulse of this development and but sense its far-reaching importance on the ground, I am confident that their efforts would be directed toward the furthering of this development in every possible way rather than its restriction. I am hopeful that the Post Office Commission now going over the lines may catch the spirit of the situ

ation and be able to transmit it to the Government upon their return to Washington.

NORTHERN EQUIPMENT

I am at a loss to understand Campbell's report that the S-43's would not be available until the first half of next year. All of our recent information has been to the effect that they should be available much sooner. United Aircraft's representative, whom I saw in Lima, was certain that the first ones would be ready by the middle of this year and you will have seen Beatty's letter which I sent to Patchin with my No 69.

I will see what can be done to further the idea of this Colombian survey. I spoke to Trippe about his overland possibility several months ago and Hargis, when in New York, also discussed it with him and prepared a memorandum on the subject which you will find in my files. Trippe put Harris off at the time with the statement that Pan American, Scadta and the Colombian Government might not be agreeable and did not take a copy of his memorandum. This memorandum, by the way, resulted in Harris' receiving a rather strong letter from MacGregor (Miss Boucher can give you copy of this letter from my files) which may lead him to be rather cautious about embarking again on this terrain.

I have recently heard that with the close of the Winter season to the West Indies, Panair have a number of Com- [fol. 4767] modores laid up at Miami. If so this ought to make this equipment available for us at least during the Summer.

CONDOR

I of course saw Mr. Fritz Hammer when he was here but, as he did not seem to be particularly communicative, it occurred to me that it might be a good id a to get Koch in touch with him as they were at least semi-compatriots and could talk things over together in German. I accordingly asked Koch to have a talk with him which he did on Satur-

[Handwritten notation in margin near second full paragraph 4th line: "will be sent out tomorrow"; also near 10th line is word "attached."]

day and the result was the very important information which I passed to you in my cable No 33. I am very hopeful that this may give us the key to the situation and that we may be able to work out some arrangement along the lines indicated which will enable Condor to meet their problem without coming to this Coast. If they come here I do not see how it can possibly cost us less than $50,000. per year and a good deal more if we become embarked on rate wars and other retaliatory practices. The whole promising business we have built up between here and Buenos Aires will be seriously injured. Unless you have other ideas, in which case I would be glad if you would cable me, my plan would be in the first place to spare no effort to endeavor to work out some arrangement for giving them the West Coast European mail at Buenos Aires if this will result in their withdrawing their contemplated service to Santiago, or, failing this, endeavor to come to some satisfactory traffic agreement with them designed to minimize the loss to us as far as possible. If there seems to be any promise of a reasonable agreement along these lines, I would prefer to make it at the outset because we would probably come to it in the end and I would like, if possible, to avoid a preliminary period of ruinous competition at heavy loss.

Very truly yours,

/s Roberne

W. R. Grace and Company Exhibit 42

April
Second
1930.

Richard F. Hoyt Esq.,
c/o Hayden, Stone & Co.,
25 Broad Street,
New York City.

Dear Mr. Hoyt:—

In my opinion the most important thing now effecting Pan American Grace Airways Inc. is the appropriation

necessary to increase the service to two trips a week. The President has recommended that this be done as indicated by his attached message to the Senate.

The Senate Appropriations Committee has included the proposed increase in the Bill.

Understand Nyrba is doing everything possible to get this appropriation earmarked for the East Coast.

Very truly yours,

1930.

George Akerson Esq.,
Secretary to the President,
The White House,
Washington, D.C.

Dear Mr. Akerson:—

You may recall that by your arrangement the President received me a short time ago to speak about the South American airways situation.

I will greatly appreciate it if you will bring to his attention the attached letter and enclosures dealing with the same subject.

I would not, of course, claim his attention for it if I did not feel it was pertinent to his very keen interest in the matter.

With kindest regards, I am,

Faithfully yours,

Patchin

[fol. 4770]

W. R. Grace and Company Exhibit 44

April 4, 1930.

The President,
The White House,
Washington, D.C.

My dear Mr. President:—

Since you were good enough to permit me recently to bring to your attention certain facts regarding South American air mail, may I submit the attached data showing how the three principal air mail routes by which the Post Office Department is now forwarding air mail via Central America and the West Coast of South America to Argentina and Uruguay on the East Coast, serve seventy percent of our total commerce with Latin America.

These three routes directly serve fifteen of the twenty-one Republics. Bolivia and Paraguay are indirectly served. The only country with large commerce left out is Brazil and it can be reached by a short additional route from Montevideo to Rio.

This demonstrates, I think, that the Post Office Department by creating this through trunk line is providing the greatest possible service at the least possible expense. Eighty-five percent of the total United States investment in Latin America is in countries along these three routes.

Pan American Airways Inc. and Pan American Grace Airways Inc. have just submitted to the Post Office a new schedule whereby the schedule from the United States to Buenos Aires and Montevideo will be greatly reduced. As previously explained to you greater frequency of service is indispensable to the operation.

Respectfully,

Patchin

Encl (1)

[fol. 4771]

W. R. Grace and Company Exhibit 45

April 12, 1930.

W. Irving Glover Esq.,
Second Assistant Postmaster General,
Post Office Department,
Washington, D.C.

Dear Mr. Glover:—

I notice that the Senate passed the P. O. Appropriation Bill with increase and appropriation for air mail.

I gave Chairman Wood of the House Appropriation Committee a copy of the memorandum which I recently left with you showing the distribution of United States investment along the three routes, 5, 8 and 9, which form the trunk line from the United States via Central America and the West Coast of South America to Buenos Aires and Montevideo. This clearly shows that the Post Office is serving our most important political relationships, the largest number of countries, the largest commerce and the largest investment of United States capital by the least possible mileage. Although the population figures are not contained in my memo, it is a fact that more population is served by these three connecting routes than could be reached in any other way.

Some confusion is caused by the habit of referring to Route #9 as a *West Coast* service. This leads many people to think that it is exclusively on the West Coast whereas, in fact, the great River Plate market is its terminal and perhaps its most important section.

Very truly yours,

Patchin

[fol. 4772]

W. R. Grace and Company Exhibit 46

SANTIAGO, 20th October, 1930.

W. F. Cogswell Esq.,
W. R. Grace & Co.,
NEW YORK.

Dear Bill,

Chilean Situation

Your Nos. 5 and 6:

When it is suggested that we are paying a "shocking amount" for this concession, and that we should be "hard-boiled" and withdraw our offers by a fixed date unless our terms are accepted, you can probably not imagine how strange these ideas sound at this end. Such ideas overlook, in the first place, the fact that we are dealing with military authorities, who regard the whole subject of aviation as one of national policy and not to be treated as a commercial matter in any sense; Valverde can explain what this means better than I can. You are also assuming that the original decree 2001 has already been whittled away, and that its original terms requiring lighted airways throughout the entire length of Chile have long since been abandoned, and it is simply a question of the Government accepting what we are willing to offer or get nothing. This again is a wholely erroneous conception. As matters now stand the terms of 2001 are still in force, and will be in force when our two years are up, unless in the meantime they have been modified by *mutual* agreement. To date no such agreement has been reached on any point, and if we permit the two years to run off without reaching such agreement we will be forced at the end of the two years into a purely diplomatic battle, which, even should it result in better terms (personally I cannot conceive of its doing so) than we can now arrange, in my opinion bad will with the local authorities which will result from such a situation will cause us in the long run many times the amount which we are now con-

sidering paying; I am not alone in this opinion. Bear in mind too that we are the only foreign company commissioned to fly throughout the length of Chile, and the local authorities here do not regard that as an insignificant privilege by any manner of means. Latecoere have had to pay much more, for which they have received less, and so NYRBA would have had to do, had they continued. I would far rather pay the amount we are talking about than have to expend the amount which Latecoere did in developing an airport which is 25 miles out of town, and which they are not permitted to use except for storage and repairs. The idea, therefore, of standing out on impossible terms in the hope of getting better is simply forcing us inevitably into what would be an extremely awkward position at the [fol. 4773] end of the two year period, which is very near at hand. In my opinion if we let things go to the last minute, we are sure to have a most difficult situation on our hands, which in grief and bad feeling will give us more than the amount we are now talking about, even in the remote possibility of our being able at that time to reduce that amount in the first instance. If we are to be forced into this position I feel that the responsibility for it and for getting us out of it when the time comes must be put up very squarely to the Pan American.

It is because of the above that I am very glad Mr. Rihl is coming over, for I believe that once he sees the situation at close range and gets the feeling of it, which it is impossible to convey by correspondence, he will agree with me that we should avail of our present opportunity (if it is not lost by that time) to get this matter closed up, removing this long standing bone of contention between us and the authorities, working with them on a friendly basis, and relying upon the development of mutual understanding and confidence to work out the balance of our problems. I shall, of course, have to rely on you and Patchin to get the other Directors in line should Rihl agree with me to any extent, because I realize the strong likelihood that, even if he does, that will not be the end of the matter. If that point is reached it may be necessary to ask Mr. Iglehart to take up the matter with Mr. Hoyt. If Rihl does not agree with me, or if he does but his principals fail to back him up, I

confess I shall be at the end of my rope with nothing to suggest, except that Trippe responds for the responsibility which he has assumed by coming down here and handling the matter himself. While it is always possible that some miracle might come to pass which would enable him to make a far better arrangement than anything which is now possible, my mind is very clear that we should settle the matter up in the light of facts as they now exist, and not wait for some supernatural condition to come to our assistance.

It is somewhat difficult to keep the matter open now that I am here, but I am going off to Concepcion today, which will leave a little time, and in the meantime I have left a memorandum with Mr. Dagnino, as per copy enclosed.

I trust that you have already written us replying fully to Mr. Dagnino's letter to Mr. Valverde No. 15032, because if you have any comments on any of the specific language in the proposed form of decree sent you with that letter we ought to have them promptly.

Yours sincerely,

P.S. "Ley y Reglamento de Aeronavegación" 1930, of which you have a copy, gives a good idea of the general view here towards the whole subject of aviation. Articles 11 and 12 on page 28 are of interest on the question of Radio.

[fol. 4774]

W. R. Grace and Company Exhibit 47

December 5, 1930

Substance of Telephone Message Received at 11:30 A.M. to-day from Mr. Roig in Santiago, Chile—

The Minister this morning signed a decree which was being sent to the President for signature (President leaving this afternoon). Roig was able to intercept the decree before it got to the President, and this is what the decree contained.

In the first place the Minister advised that this was not a decision of the Aviation Department but that it had been taken up fully by the Cabinet and it was the decision of the Chilean Government. He stated that they had a definite policy with reference to Aviation that was of a permanent character, and that there was a limit to which they were willing to go in granting concessions to foreigners flying in the country. That the Chilean Government proposed to maintain its sovereignty in the granting of these concessions and he indicated that this decree represented the limit to which they would go in granting a concession to us.

First: They entirely omitted the most favored nation clause. Roig says that as this was entirely omitted that it leaves open for discussion any condition that might arise, and he thinks there is no objection to omitting it. He says he is not sure that the Ambassador feels just as he does about it, but he thinks that if the Ambassador did object to this point it would be the only one to which he would raise any serious objection. He feels, however, that we should convince the Ambassador to agree to this.

[fol. 4775] Second: The clause with reference to flying with single motor planes has been reworded to state that in the transport of passengers, planes preferably of two or more motors should be used, but that if single motor planes are used they should be of at least four hundred horse power. A further clause was added stating that precautions should be taken for sufficient security to passengers and assurance of arrival on time, etc. This is merely a general clause and has no particular importance.

Third,
Cabotaje: It is specified that no rights should be granted for Cabotaje, but in spite of this fact in occasional cases where Cabotaje might be carried on, previous consent of the Government must be gotten and the charge for obtaining this will be agreed upon, but it will be not less than 50% of the passengers. Roig explained that the Government's contention is that we have been carrying a lot of free passengers and that this has interfered with the Government service, and their feeling is that we ought to abandon the idea of carrying Cabotaje passengers at all.

Fourth: There is a general provision that a clause specifying that flying has to be done in accordance with rules and regulations of the Aviation Laws of Chile.

Fifth: The Force Majeure has been restored in a satisfactory form.

Sixth: For compensation we are to have the option of lighting the two fields within 7 months or paying 500,000 pesos within thirty days.

Seventh: The duration of the concession. The clause represents substantially as follows:

Permission to run for four years from the date of this de- [fol. 4776] cree and extended for another equal time if company has complied with the obligations imposed by this decree, and if the Government "lo estime conveniente". Roig feels that if we go along operating satisfactorily in Chile that at the end of the first four years no one will know that the four years has expired and that we will go along for the succeeding four years without any difficulty whatever. He feels, furthermore, that if we don't go on smoothly and we have serious trouble, that we will have impediments no matter what clause there is in the decree. He feels, however, that if we can get to a definite working agreement with the Government and could abandon discussion as to what basis we are flying on, that we will be able to work up a mutually good faith that would give us more or less permanent rights in the country.

Now the question comes as to what will happen if we refuse to accept this decree. Roig says that the Ambassador has been a party to the whole discussion, that he has been in touch with the Ambassador, has made definite representations to the Minister, and he feels that if we refuse to accept this decree we would either have to try to fire some sort of a diplomatic gun, which, however, he feels would be fired without much enthusiasm or confidence on the part of the Ambassador; the alternative to firing this gun being merely to let matters go along as they are, in which case he is of the opinion, and the Ambassador is also, that our position will become less favorable and that we will eventually be forced to accept a less favorable settlement.

ORIGINAL AIR MAIL LETTER

COPY FOLLOWS BY STEAMER

Airmail—10 20 30
Arr. Sant.—10 26 30
Santa Maria—10 24 30
Arr. Valpo—11 9 30

NEW YORK, October 18th, 1930.

Dear Roig:—

Chile Concession: We were able to get the whole Board together the evening of the receipt of your cable #52 and had a session from six to eight at the office of Panair. All that we were able to accomplish was to get Trippe to agree to send Ribl a cable instructing him to proceed immediately to Santiago. Trippe stated he had talked to him on the phone after receipt of your cable and Ribl had expressed the opinion that he did not consider it advisable to make the proposed payment. Hoyt stated bluntly that it was no use sending Ribl if his mind was already made up on the subject, but Trippe promised he would go there with an open mind and would report on the situation as he now finds it. We, of course, have no real assurance as to what private instructions will be sent him on the subject. During the course of the meeting, our partners went into another room and talked the matter over between themselves for about half an hour. As to their individual attitudes, Trippe, as you know, is strongly opposed to spending any substantial amount, ostensibly because of the principle involved. There is no doubt that if we should [illegible] right to fly through Chile the East Coast picture [illegible] be materially brightened. Whitney also appears to have quite decided views on the subject. Hoyt, I believe, would

[illegible]

[illegible]

[illegible]

[illegible]

[illegible]

European Mail: As the Latecoere service through Brazil has been interrupted, we have taken the matter up with the Post Office here and they have agreed to use every effort to facilitate the despatch from New York of mail coming from South America for Europe via our route. This mail is of considerable quantity and while, of course, we cannot expect to hold all or even a major part of it, after Latecoere resumes service, nevertheless, we should retain part, especially in view of the fact that their service is only once a week. MacGregor was somewhat opposed to pushing this as he is afraid of the volume of mail interfering with our passenger-business, but it seems to me [fol. 4778], that this is a golden opportunity to advertise and strengthen the West Coast route.

Laidlaw: We have arranged with Panair to send Laidlaw from Rio to Buenos Aires and Santiago. As you probably know, he was formerly in the postal service and is an expert in those matters. His salary is only $375. a month and I believe it will be worth many times what it will cost us to have his assistance in putting the handling of the mails on a more satisfactory basis. For example, the weights reported by the Postmaster at the Canal Zone of mails from Argentina and Uruguay are consistently higher than those on which we are collecting from those Governments, and this, of course, represents a loss to us as the United States Post Office collects on the basis of the amount reported from the Zone.

Enclosed herewith copy of letter from MacGregor to Harris in reference to plan to avoid the sections of the Peruvian Airways concession which require that company to place its planes at the disposal of the Government. It seems to me the plan is rather thin, but this is, of course, largely a matter to be decided by the people on the ground. As you know, Panagra as such has no operating rights or concession in Peru. One objection to the scheme is that it would seem to be pretty clearly a subletting under our United States mail contract. If you consider this point serious, I should appreciate your cabling me on the matter.

The report in your letter #1 to Patchin in reference to our operations was most interesting. We will be interested to hear your views as to Chile, although Wooten's speech and the fact that he and the Ambassador are both using our line for their families, it would seem to show that conditions there are equally satisfactory.

While the obsolescence period of two years on our planes may not be far wrong, nevertheless, at the end of that period a plane should in all probability be suitable for relief or reserve purposes; in other words, it will not be necessary for us to have as many new planes and therefore the obsolescence charge should be less. The third trip a week seems to be out of the question during this fiscal year.

Sincerely yours,

s/ W F Coggswell

No. 4

H. H. Pattison, Esq.,
W. R. Grace & Co.,
NEW YORK.

Dear Pattison,

This letter is written merely as a memorandum for use in connection with subsequent developments.

Mr. Rihl arrived late last night, and we had our first conference with him at the Grace office this morning. There were present at this conference, besides Mr. Rihl and myself, Messrs. Metzner, Heavey, Dagnino and Harris. I explained to Mr. Rihl the whole situation as I understood it, revealing the history of our Chilean negotiations from the beginning, and dwelling in detail upon the present state of the negotiations, and the reasons why I considered it desirable to bring those negotiations to a conclusion at this time. I stated that the difficulties in the way of this seemed to be: first, Mr. Trippe's idea that we might possibly avoid any payment by letting matters drift to the end of our two year period, second, New York's insistence on radio ground stations, and third, New York's insistence on 50% of the mail. I explained that the other minor points could, I thought, be arranged satisfactorily, and my reasons for considering the three points mentioned impossible, with the possible exception of the last named.

Mr. Rihl stated that he had discussed this matter by telephone with Mr. Trippe, and that he had told Mr. Trippe that he considered that it would be establishing a very bad precedent for us to pay anything to Chile for the right to deliver international mail in Chilean territory. He stated that so far as the 50% of the mail was concerned he did not consider this of any importance, as under the London Conference the Post Office would deliver the mail in any case to the line maintaining the best service, and he was

inclined to agree with my statement that, even though Latecoere had an agreement giving them a percentage of the mails, the Chilean Post Office paid no attention whatever to this agreement in their despatch of the mails. So far as Radio is concerned his idea was that, if the Chilean Government was acting in good faith in offering us the use of their ground sets, it was unnecessary for us to have ground sets of our own, but that if it was merely their idea to avail of this to exact improper charges from us then the matter was of more consequence.

In the course of preliminary conversation he had stated that he saw no reason for extending the East Coast service beyond Punta Alegre unless the Buenos Aires service from the West Coast were discontinued and that he felt there was some possibility of the latter in view of the difficulties in crossing the Andes. He also had stated that the [fol. 4780] various services which the Panair were operating out of Buenos Aires to Montevideo and other points could not be made profitable unless they received some sort of Government subsidy.

After we had explained the whole situation, shown him various documents and answered various questions which he had raised, he suggested that, since Chile had never accepted any of the proposals we have made as alternatives to Decree 2001, why should we not simply let the two years period provided by this decree run off, telling Chile that unless at the end of that time they gave us a satisfactory concession without any payment, we would deliver the mail at Arica and divert our Argentine service by way of La Paz and the Argentine. I suggested that there was no point in our taking this position merely as bluff unless we were prepared to go through with it, and that when it came to going through with it I saw nothing in it, because to make this change would cost us in the long run as much as we were now proposing to pay the Chilean Government, and when we got through we would have a West Coast service which would be wholely inadequate in that it failed to serve Chile, the leading West Coast country. While naturally I did not say so, I immediately formed an impression (and the others formed exactly the same impression) that the

result of this proceeding might easily be that the United States Post Office would terminate our line at Arica and arrange for delivery of the Buenos Aires mail by way of the East Coast, the more so since Ribl in his preliminary conversation had emphasized the fact that he saw no reason why the United States Post Office should subsidize the double service to Buenos Aires, which would be the inevitable result of continuing our line and at the same time extending the East Coast line to that point.

Following these conversations Messrs. Ribl, Metzner and the writer proceeded to the Embassy in order that Ribl might have an opportunity to get the views of the Ambassador. He took the same line with the Ambassador, namely that we should retire all offers, and, if we could not make satisfactory arrangements, divert our line at Arica. The Ambassador stated very promptly that however advisable this might have been as an original proposition, he did not consider that, in view of the history of these negotiations in the course of which we had repeatedly promised Chile some payment, the Company could now take this tack without a violation of the Company's honour, which would have a very bad effect on the company's future standing. He also emphasized the fact that it would be folly to adopt this course merely as bluff unless we were prepared to go through with it. At this point I again emphasized the fact that as a practical matter this would save us no money, and that we would be going to all this trouble merely to avoid establishing a precedent, which, in my opinion, was of no consequence anyhow, as in the other countries, as well as in Chile, we would be obliged as a practical matter to settle these questions on the best basis possible whenever they arose, and that what had been done in one country would have little weight as precedent in any other. In this the Ambassador concurred.

[fol. 4781] Ribl then stated that we could, of course, not make this threat unless we were prepared to go through with it, and that, therefore, before making the threat we would have to take the matter up with Washington to satisfy ourselves that the Post Office Department would agree to this change in our route. He stated that in that case the

question would doubtless become a diplomatic one to be settled by the Department of State, and asked the Ambassador categorically what his recommendation would be if in that case the State Department asked him for his views. The Ambassador stated that in that case he would have to advise the State Dept. that in his opinion, as a matter of national policy, Panagra should be told to make some settlement with Chile, and that consent should not be given to this diversion of the route. He stated as his reason for this the fact that if Panagra were to withdraw from Chile it would leave the field clear open for the completion of arrangements with Latecoere, which would result in a weakening of American influence and a corresponding increase in French influence on the West Coast of South America, which, in his opinion, was highly undesirable from the standpoint of American foreign policy.

The Ambassador also stated that he considered there was little chance of our securing radio ground stations. He also raised the question whether the flight from La Paz to Buenos Aires would not be considerably more difficult from an aviation standpoint, to which Rihl replied that while he considered flying conditions entirely practicable over this route, there would, of course, be the difficulty of carrying heavy loads owing to the lessened efficiency of planes flying at the altitude which this route would necessitate. The Ambassador also pointed out on the question of radio and on the general situation the same fact which we had previously emphasized, that it must be borne in mind in dealing with Chile that we were dealing with a military Government which considered all aviation questions purely in this light. He also emphasized the importance of arriving at some working arrangement with the Chilean Government which would remove the existing spirit of antagonism and make possible the developement of a spirit of mutual confidence and understanding, which he felt would enable us to settle our routine problems when they came along. In this connection he emphasized the point that we had to work with the Chilean authorities for the next ten years and that we should consider this fact in forcing any unacceptable settlement at the outset, his theory being that in the long run we would gain more by

working along on a friendly basis than by making a hard trade at the start, which would only serve to plague us in the next ten years. All in all the Ambassador confirmed 100% the views which we had expressed, and gave no encouragement whatever to the line of procedure which Rihl had suggested.

As matters now stand Rihl has yet to make up his mind whether to insist on the idea of forcing a settlement without any payment, or diverting our line at Arica, and will probably be communicating with Trippe on this subject. So far as concerns Radio 50% of the mail and the other [fol. 4782] minor points, I think we will have no difficulty in agreeing with him on what is the practical course to pursue. On the main question, however, I feel clear that we must stand absolutely firm on the action of the Directors of the Company authorizing the payment of $500,000 C'cy. and loan of $200,000 C'cy. to Chile in order to clear up our situation, and must not for a moment be drawn into any idea of diverting our line at Arica. Such a course would wholely discredit Panagra in Washington, and would in my mind without the slightest doubt be availed of by Panair to reduce our line to a mere spur to Pera, with the main mail movement moving down the East Coast. If the attempt is made in New York to push this idea I think your position should be that this point has already been discussed by the Directors and the point definitely decided that we will make this contribution to Chile to clear up our Chilean situation, and that we must proceed to clear it up in accordance with this authorization, and that our partners cannot insist upon arbitrary terms calculated to defeat this end, when such terms are in fact not insisted upon in good faith, but merely for the purpose of making it impossible to arrive at a settlement.

Very truly yours,

HJR/FL.

W. R. Grace and Company Exhibit 51

Minutes of a regular meeting of the Board of Directors of Pan American-Grace Airways, Inc. held at the office of Hayden, Stone & Co., 25 Broad Street, New York, N.Y. on the 5th day of January, 1931 at 11:30 o'clock in the forenoon.

PRESENT:

Messrs. R. F. Hoyt
R. H. Patchin
H. J. Roig
J. T. Trippe
C. V. Whitney

being a quorum of the Board.

Mr. J. D. MacGregor, Vice President and General Manager of the corporation, was also present.

Mr. Roig called the meeting to order and on motion duly made and seconded was appointed Chairman of the meeting. Mr. MacGregor acted as Secretary of the meeting.

On motion duly adopted, the proper officers of the corporation were authorized to charter from Pan American Airways, Inc., on a bare boat basis, Sikorsky 306N for operation on the northern division during the period of overhaul of Sikorsky 300N, and Sikorsky 945M, at a charter hire of $46.16 per hour with a minimum of 208 flying hours; the charter party to provide that this corporation should have the option to purchase Sikorsky 306N at any time within thirty days from the commencement of the charter at a purchase price of $24,980, any charter hire earned prior to the purchase to be credited on the purchase price; the proper officers of the corporation were also au-

[fol. 4788] thorized to agree to pay Pan American Airways, Inc. the sum of $6,000, being one-half of the standby

charges of the reserve plane for the northern division from July 1, 1930 to December 31, 1930, such standby charge to cease on the arrival at the Canal Zone of Sikorsky 945M after overhaul, and thereafter (provided this corporation should purchase Sikorsky 306X) Pan American Airways, Inc. to pay this corporation standby charges at the Canal Zone at the rate of $1000 per month and charter hire at the rate of $46.16 per flying hour for the use of a standby plane for any period during which Pan American Airways, Inc. should require a standby plane in connection with its operations between the Canal Zone and Venezuela unless Pan American Airways, Inc. should maintain a standby plane of its own at the Canal Zone or some other point on the North Coast Route.

Mr. Roig made a detailed report to the meeting of his recent negotiations in Chile with regard to the Chilean concession which had resulted in the issuance of a decree in the form attached. He stated that a last minute change had been made in this decree without consultation with us, the effect of which was to eliminate the right to use single motor planes in carrying passengers.

Mr. Roig stated that he had been advised that the United States Ambassador had taken exception to this last minute change made after Mr. Roig had left Chile and had protested to the President of Chile who had given him an appointment next week to discuss the matter. The Ambassa- [fol. 4789] dor had advised that he believed he could get this change corrected provided he were authorized promptly to accept the decree provided this correction were made. After full discussion, it was, on motion duly adopted,

RESOLVED that the American Ambassador at Santiago be authorized to accept on behalf of this corporation decree in the form presented to this meeting provided Paragraph 3 thereof be amended to restore the right to use single motor planes without limitation of horsepower and provided that Paragraph 11 be omitted from the decree and the payment of 500,000 pesos therein mentioned be handled privately as in settlement of the controversy with re-

spect to the old decrees and not for the right to fly in Chile.

There being no further business, the meeting adjourned.

/s/ Harold J. Roe
Chairman of the Meeting

/s/ J. D. MacGregor
Secretary of the Meeting

W. R. Grace and Company Exhibit 51X

=168

No. 5.

SANTIAGO, 30th October, 1930.

R. H. Patchin Esq.,
W. R. Grace & Co.,
NEW YORK.

Dear Patchin,

Our Santiago-Buenos Aires Division is, I believe, at the moment, and will continue increasing to be the object of Trippe's desire.

From what I can gather from conversations with Rihl and others, Panair, since the absorption of NYRBA, find themselves with an enormous expense account in Buenos Aires and no business. They have taken over the huge NYRBA offices, hangars and shops, but, apart from using the latter for reconditioning the Commodores also taken over from NYRBA, they have no manner of use for all this show, as the only service they are running is a daily service between Buenos Aires and Montevideo, which Rihl states does not pay of itself, and which we know from experience never will pay without some form of subsidy. They are, of course, talking about running passenger line to connect with their mail line at Santos and also talking of other passenger lines to other points in the Argentine, but these too we know will never pay without a subsidy, because one of the few thoroughly well established facts with regard to

commercial aviation is that a well equipped passenger line with multi-motor planes cannot be made to pay, even if it carries maximum loads every mile flown. I reckon that Panair cannot be losing less than between $50,000 and $100,000 Cag. per year in the Argentine at present, and I would not be surprised if it were in excess of the latter figure.

The result of all this is that Panair are going to be desperate to get their East Coast line extended to Buenos Aires in one form or another. Ribl states that he sees no reason why the United States Government should subsidize two air services to the Argentine and that therefore so long as our line runs to the Argentine there is no reason why the United States should extend their East Coast line beyond Punta Alegre. This is perfectly obvious, but it of course concentrates the pressure on our line as about the only way Panair can get their East Coast line extended to Buenos Aires is by discontinuing our line from Santiago. I cannot escape feeling that this is behind Trippe blocking all efforts to get the Chilean situation settled on a reasonable basis and a good deal of his other conduct. You may recall that he suggested to me a long while ago that we ought to turn over the operation of this line to them, which would probably be the first step in getting it discontinued and switched to the East Coast.

[fol. 4791] In my low moments I have sometimes thought that it might be worthwhile falling in with Trippe's idea and stopping our line at Santiago, provided we can in exchange get a controlling stock interest in Panamerican Grace, which might not be utterly impossible. This would certainly be worth some sacrifice, and we would not be giving up very much in direct revenue, because the Buenos Aires run is not going to be very profitable anyhow. I have always abandoned this idea, however, because of the fear that if our line stopped at Santiago the shrinkage in our mail movement would be such that there would be little possibility of a third trip, and we might even lose our second trip. The loss of either of these would, of course, offset any financial disadvantage from the operation of the Buenos Aires Division; I am therefore of the opinion that we should hold on to this Division, which, in my opinion,

means that we must fight for it, because our friend in his usual relentless fashion will never let up unless he has his way.

Fighting to retain this Division means, in my opinion, spending a great deal more money on it than we have ever previously contemplated, and even facing the possibility of having this line show a constant loss. I am naturally hopeful that this latter contingency may be avoided, or the loss held down to a very small figure, but there is not the slightest use of considering that we are making an adequate fight unless we are prepared to spend money and take whatever loss is necessary to win the fight. If we are only going to do a half-way job we may as well not waste any money, but make the best trade we can at this time and abandon the Buenos Aires service.

The expenditures which I believe necessary to put this line on the best possible basis are:

1. Procurement of radio services, ~~and~~ combined perhaps with radio beam, at the earliest possible moment. If we cannot get Panair radio, as seems likely, we will have to go ahead and get it elsewhere.

2. In addition to the Falcon, which, of course carries no passengers, at all, we should, I think, equip one of our Fords for use over the mountains, so that we may institute a passenger business. This will involve some expense in special equipment for the Ford, and, since the high gear-ratio will make it impossible to run the Ford beyond Mendoza, our obsolescence on this Ford will be terrific, as the amount of mileage we will get out of it will be extremely small. This will mean that the Ford will probably a little more than break even; even with a good passenger business and, if the passenger business does not develope, will actually lose a money.

3. Put a faster plane between Mendoza and Buenos Aires, and an amphibian (we may be able temporarily to use the Loening) between Buenos Aires and Montevideo; we are now using a land plane on a run which [fol. 4792] is entirely over water.

4. Make the most intensive study possible of flying conditions over the Andes, and provide promptly whatever improvements that study indicates to be reasonably necessary.

The above may not increase our actual operating efficiency as much as 2%, but it will evidence the disposition to do everything possible and offer a service reasonably comparable to what Panair will offer down the East Coast, which, I believe, will be of very great, if not indispensable, psychological importance. Since I have been here I have experienced the sensation of waiting two hours for a pilot reported to be lost coming over the "hump", and I can assure you that, if he had not got in successfully, the absence of radio, irrespective of whether it would have been of any use to him, would have been prejudicial to us. Moreover, when Capt. Wooten or any other Government representatives look over our service and form impressions about what we are doing, they are bound to have a wholely different impression of a layout such as I have described above than they must have today when they look at the litle red Fairchild which constitutes our Transandean equipment.

Very truly yours,

HJR FL.

[fol. 4793]

W. R. Grace and Company Exhibit 52

=697-A

PAN AMERICAN-GRACE AIRWAYS, INC.
122 East 42nd Street, New York, N. Y.

ORIGINAL AIR MAIL LETTER

LIMA, July 12, 1931 PERSONAL = 375

Mr. MacGregor, New York

PANAIR POSSIBLE OVERNITE STOP AT BARRANQUILLA

Receipt is acknowledged of your personal =107 on the subject of possible change in our schedule to leave Cristobal

at one o'clock. The first time I read this letter I nearly burst into flame. It seems to me that things of this sort have gone too far already with Panair. By their operation Miami-Kingston-Barranquilla-Cristobal they have managed to delay our South American schedule a whole day over the schedule that was previously in force via Porto Cabezas. They have also managed, by making the Barranquilla hop, to increase the total mileage from Miami to Buenos Aires via the west coast.

However if we get this scheme slipped over on us and have to change our whole operating schedule because Panair have trick ideas, we could stay at Buenaventura overnite and could make Pimentel the next night, Arica the next night if we step on it, Santiago the fourth night, and have the fifth in Buenos Aires & Mont'video.

Pimentel is a better stop for the overnite stop than Santa Elena. However it is not too good.

This scheme would probably mean an increase in the number of Fords we would require and possibly increase the number of pilots, besides interfering very seriously with our plans for the location of radio stations, repair bases, etc., etc. Likewise this has the distinct disadvantage of eliminating the overnite stop in Lima, which place is very desirable to stay overnite in from the standpoint of the thru passenger. It also makes us go into Buenaventura [fol. 4794] late in the afternoon when it is very rainy, keeping us overnite in the rain at this point, necessitates a landing at Pimental late in the afternoon (the field not being lighted) eliminates the advantage of the lighted airport at Las Palmas, Lima.

If you think there can be any serious possibility of the institution of this proposed schedule, please let me know and I will work up the detail of this schedule and approximately what it will cost us.

I certainly hope you can kill the idea before it gets started. It seems to me that every effort should be made to resume at least the mail transport direct from Miami to Cristobal. Naturally the Panair extension to Barranquilla cuts us out of the big advantage we had in the Buenaven-

tura-Bogota connection for passengers, giving the B
quilla-Bogota run to Scadta. In this connection it se
me that Panair have gone out of their way to help S
to our decided disadvantage. I feel sure that you
already considered these points and have taken all po
steps in connection with it.

CRISTOBAL, September 15,

PRIVATE & CONFIDENTIAL

[Handwritten notation: I understand you are taking
of this matter. HJR]

Mr. R. H. Patchin
W.R.Grace & Co.
New York

Dear Mr. Patchin:

In view of the fact that Mr. MacGregor is not in
York at present and will not arrive in Cristobal before
departure of this airmail, I am writing the following
to you since it seems to me that they may be of certain
portance just at this time.

Apparently Panair are planning to commence a one
service from Miami to Barranquilla, in the near fu
which will mean our departure from the Canal Zone s
bound at approximately noon instead of early in the m
ing. This would mean that we would have to make
overnite stop in Buenaventura, forcing us to take ad
tage of the Scadta hangar and other facilities there wi
presumably high expenditure. In addition this would d
the mail south of the Canal Zone by at least half a
over a possible one day run from Miami to the Canal Z
Buenaventura is a very unsatisfactory point for an o
nite stop on account of the heavy rains that are
countered there.

(Handwritten notation—Mr. Roig—note page 24)

Rec'd by us 9-5-35—3 P. M.

August 27, 1935

Pan American Airways, Inc.
New York

Gentlemen:

The recent survey of the Pan American Airways, Inc. and the Pan American-Grace Airways, Inc. foreign airmail contract lines, disclosed that on your F.A.M. Route No. 8 and that part of F.A.M. Route No. 5 from San Salvador to Cristobal, you are operating planes capable of maintaining a much faster schedule than is kept at the present time. The same condition obtains as relates to F.A.M. Route No. 9 which contract is held by the Pan American Grace Airways, Inc. from Cristobal to Buenos Aires, the only exception in the latter being that part of the route between Cristobal and Guayaquil.

The survey also disclosed that it is essential to inaugurate faster schedules on all of the international lines; first, to provide satisfactory mail facilities and, second, to meet foreign competitive air service which is rapidly developing in some of the countries traversed by our contract lines.

During the conferences which officers of your company recently had it was tentatively understood that not later than February 15, 1936, your company would have faster planes operating from Miami along the East Coast of South America to Buenos Aires and between Miami and Cristobal by way of Barranquilla. It is the desire of the Department to inaugurate the faster schedules as soon as practicable. Accordingly, as it is now possible to have the faster service from Brownsville to Buenos Aires by way of the West Coast, there does not appear to be any reason for further delay in inaugurating new schedules on these particular lines.

[fol. 4805] With regard to faster service from Miami to Buenos Aires by way of Barranquilla and Cristobal and along with the West Coast, the only drawback appears to be over that part of F.A.M. No. 5 between Miami and Cristobal. It is the opinion of the Department that faster service should be provided immediately between these two points named in order to connect with fast planes operating along the West Coast of South America. This should be done regardless of when faster service may be started along the East Coast.

Therefore, you are kindly requested to advise as to the earliest possible date you can provide faster service to Cristobal both from Miami and Brownsville.

Very truly yours,

(sgd) HARLEE BRANCH
2nd Asst. Postmaster General

" Arica	"	11.21 AM	" Antof.	"	1.25 PM
" Antofagasta	"	1.46 PM	" Santiago	"	5.36 PM

(*All Eastern Standard Time*)

New York/Miami: This was the smoothest part of the whole trip and as you will see from the above itinerary we arrived only a few minutes late.

Transfer from one Miami Airport to the Other: The first detail that struck me was that the passengers were left to sort out their own bags and carry them to the bus, although there appeared to be a man there detailed to this particular job but he was still rubbing his eyes. The bus took the passengers in a very roundabout way to the air- [fol. 4814] port, first going to Miami and stopping at Panair's office for about 35 minutes, where passengers were told they could avail of the opportunity to get some coffee next door. I asked the bus driver why he did not go straight to the airport and he replied that normally he did go direct but would then have to come back to Miami to pick up a few passengers and that in this way he could save a trip.

We arrrived at Panair's airport in ample time to go through the usual performance of re-weighing luggage, filling out various forms, etc., but when the hour of departure arrived, 8 A. M., nothing happened to our plane, which was still sitting on dry land. As time went on I inquired the reason for holding up the procession and I was told that they were waiting for a spare part coming from Bridgeport. If seems that this spare part came with us from New York but the transfer from one airport to the other appeared to have taken two hours, as according to my observation they did not get busy with it until shortly after 8 o'clock, with the result that we took off 1 hour and 10 minutes late.

On arrival at Panair's airport at Miami I noticed the same old sign which I saw last February, announcing departures for Havana as also for Cristobal at 8:15 A. M. I said to one of the men behind the counter that I thought the hour of departure for both planes had been changed to 8 A. M. and he smilingly replied that I was correct but that they did not as yet get around to changing the sign.

Miami/Barranquilla: The delay of 1 hour and 10 minutes [fol. 4815] at Miami made it impossible to reach Barranquilla as the captain of the boat said that the deadline for taking off at Kingston was 2:55 P. M. (as indicated in my

letter No. 1). The passengers destined for Barranquilla, of whom there were two of the nine we carried, were quite disappointed. We took off at Kingston as indicated in the itinerary and although you told me before leaving that the sorting of mail at Barranquilla was reported to take six hours, I did not at the time take you seriously. Now, however, I know differently and can confirm that you were out to the extent of only about ten minutes as we arrived at 8:40 A. M. and the sorting of mail began at once, and we took off when it was finished at 2:56 P. M., or exactly six hours and 16 minutes after arrival.

Barranquilla/Panama: As you know, before approaching Panama, just after passing the San Blas Islands, they go straight overland, and I imagine it is the same kind of country you would find from Panama to Turbo, and I must say that to attempt to make that trip to Turbo with a land plane is flirting with danger.

Panama/Santiago: As you probably know, we made Panama/Lima in one day, as also Lima/Santiago. We encountered a great deal of fog, particularly between Panama and Buenaventura, where practically nothing could be seen until we arrived. The two bad spots, however, which preoccupy me considerably were from south of Paramonga, particularly from Chancay to the Lima Airport. At that time the sun set and it began to get dark rapidly just as were heading into an impenetrable fog which made the [fol. 4816] approach to the Lima Airport impassable, or at least so it seemed to a non-connoisseur. Captain Colliver, however, headed straight towards the sea, taking no chances, until he found a hole in the wall enabling him to get to Limatambo, where it was relatively clear.

Arica was another bad spot where nothing whatever could be seen and Captain Cantwell headed a considerable distance west over the ocean where we circled around for, I should say, about 10 minutes. This does not seem very long when you sit in a soft office chair but it is different when you go through it in a plane through dense fog.

From Arica south we headed straight over the ocean, although I was under the impression that this was prohibited. However, we had not much choice as there was

quite a thick fog all along the pampa. We passed close by Iquique and shortly after that we headed towards the pampa.

The last 200 miles or so before arriving in Santiago is very impressive and picturesque but it is still a puzzle to me what would happen in case the engines gave out, as I could not for the life of me see anything but a lot of sharp peaks. I suppose, however, that anyone having made the trip a dozen times or so would not feel a bit apprehensive about these contingent risks.

While it has been demonstrated several times that Panama/Santiago can be made in two days my impression is that we are running some risk in doing this regularly dar- [fol. 4817] ing winter time when it gets dark in Santiago, for instance, at about 5:30/5:40 E. S. T., bearing in mind also the fact that fogs seem to be more prevalent in winter than in summer. During the summer months I believe it would be feasible to adopt a 2-day itinerary but I repeat that I would not do it during the winter months as there is no margin whatever to make either Lima or Santiago in daylight, as you can see from the above itinerary, which was so rapid that practically all the way from Panama to Santiago I could never smoke a pipe in peace as just about when I got going well we had to hop off again.

According to my observation they went considerably above the normal speed to make the above itinerary, which will undoubtedly be reflected in additional gasoline consumption.

Miami/Panama In One Day: It is not possible to make Panama in one day and arrive in daylight, unless they leave Miami at about 6:30 A. M., because even if they had left at 8 o'clock they would have arrived at Kingston 1 hour and 10 minutes earlier, or say at 1:46, and allowing 20 minutes for taking on gas and passengers, would have arrived at Barranquilla at 5:21 P. M., and giving them 19 minutes to take on gas there, they would have taken off at 5:40 P. M., arriving at Panama at just about 8 P. M., which, of course, would be too late. It seems to me, however, that for the purpose of getting the New York mail at Newark airport, the Eastern Airways, instead of leaving at 10:10 P. M., might

easily leave at 8:30 or 9 P. M., and instead of allowing two hours at Miami this might be cut down to an hour and a half [fol. 4818] or even an hour and a quarter. In this way we could get about an hour and a half or two hours additional time, which is just about the margin they need to make Panama with reasonable safety. There is one ~~unfortunate~~ feature about this three-day summer itinerary to Santiago, namely, the fact that when it is summer here it is winter up north, but whether it be summer or winter at Newark or Miami it is just as easy to take off there at 8:30 or 9 P. M. as it is at 10:10 P. M.

You will appreciate that when I am groping around for a three-day itinerary I am referring only to the South American summer period as I do not believe that with the existing equipment it is feasible to have a regular two-day itinerary between Panama and Santiago during the South American winter. Of course, the most direct solution would be to go from Kingston straight to Panama. The purser on board the boat from Barranquilla to Panama tells me that the distance from Kingston to Panama direct is 501 miles as against 652 miles via Barranquilla. As far as the weather conditions across the Caribbean are concerned, I know, of course, nothing about them, but I think that any statement to the effect that it is more hazardous going direct rather than via Barranquilla is just a lot of bunk. Furthermore, I believe that to land at Panama even after sunset is not nearly as hazardous as it is to land after daylight in some other places, as, for instance, Lima.

Handling of Luggage: One thing drew my attention, namely, the fact that they still have no "through arrange- [fol. 4819] ment" to take care of charges for excess luggage. Everything is carefully weighed at Newark and a lot of "papeleo" is made out covering excess baggage and the passengers pay for such excess for the Newark/Miami section only. At Miami you go through the same performance again, all of which, of course, means delay, particularly if you happen to have six or eight passengers with excess luggage, as the amount of paper work connected therewith is quite considerable.

At Panama the luggage was again rechecked and reweighed but no papers had to be made out in my case and

no payment was requested, presumably because I am connected with the company and the charge will be made by debit note.

Luncheons: The luncheon taken on at Miami was excellent but the same cannot be said of the luncheon served on board between Panama and Lima, and less so of the luncheon between Lima and Santiago. The service in this respect leaves much to be desired as when you consider that you are not allowed to smoke you get ever so much hungrier than you ordinarily do and have nothing that is fit to eat for two days running.

Outside of the luncheon criticism my impression was that the Panagra service is better than the Panair. The individual attention is more impressive and all in all there is much more snap to every kind of function both on board and on the ground. The personnel generally inspires one with considerable confidence, particularly the pilots, and I think they deserve a great deal of credit for the handling [fol. 4820] of the ships.

Now, I know that probably none of the foregoing information is new to you for after all, you have done so much more travelling by air than I have, but I could not resist the temptation to give you my impressions as also to submit to you the actual itinerary followed on this particular trip.

Very truly yours,

/s/ A. GARNI

CRISTOBAL

September 19, 1936.

Mr. H. J. Roig,
NEW YORK.

Dear Mr. Roig:

Thanks very much for "LOST HORIZONS" which I read with a vey great deal of interest. Mr. Harris will

arrive this afternoon from Lima, and I shall deliver to him the book you kindly sent to him.

I had a very delightful trip south. We were, of course, very fortunate to escape any effects whatsoever from the hurricane which was raging in the east and which, from the papers, it would appear is now harrying the sea-coast around New York.

I have a cable from Mr. Vidal telling me that George Rihl will leave New York on Tuesday via Mexico City and will arrive in Lima October 1st. I take for granted that George interviewed you during the last week and that he will bring with him very definite instructions for our work in Buenos Aires. I plan to leave for Lima tomorrow, Sunday, and may possibly, if I find there is time, run up to La Paz to see Guzman Tellez before Rihl's arrival. I just missed Mr. Garni at Barranquilla, but understand he had a pleasant trip from Santiago. He should have reached New York before the present bad weather set in.

You will, of course, have noted that the last southbound Panair-trip #150 overnighted at Kingston. The local Panair office never receives information as to what causes a delay, because their radio communication only goes as far as Kingston, and Miami. Operations never advise the reason for delays. The only way our Cristobal office can obtain the information is through friendship with the crew of the plane, and such information as they are able to get is, of course, not available until the plane arrives. Please take [fol. 4822] this into account in connection with these delayed arrivals. Also, it is possible the Panair crews have now been advised to say nothing because of the recent adverse criticisms in the local press, and the fact that we ourselves have displayed a knowledge for the causes for the delays which could only have been received from talking with the members of the crew.

Yours very truly,

J. D. MacGregor

Hotel Tivoli
Ancon, C. Z.
December 7, 1936.

Mr. J. D. Mac Gregor,
BUENOS AIRES.

Mr. Branch expressed a desire on December 4th to observe the physical transfer of airmail from Panagra to Panair at Cristobal. Consequently he and Mr. Michaelson, Balluder and I took our plane from Balboa on regular schedule December 5th to Cristobal. At Cristobal we were joined by Mr. Campbell and Mr. Taylor, the Cristobal Postmaster. Mr. Branch apparently had no criticism of the physical exchange but asked a number of questions about the safety of the mail for Central America which is stored overnight in the vault in the Panair passenger station at France field.

We remained in Cristobal overnight in order to take advantage of a trip which I had arranged with Major Taylor, acting Commanding Officer of France Field, to take Mr. Branch and Mr. Michaelson on a fishing trip December 6th. This fishing trip carried, in addition to Major Taylor, Captain N. B. Harding, Mr. Branch, Mr. Michaelson, Mr. Flexer, American Chargé d'affairs in Panama, Mr. Balluder, Campbell, and me, and proved to be most satisfactory to all on the trip even though no fish were caught. The United States Army Air Corps crash boat was used. The trip was made from France Field through the breakwater to the mouth of the Chagres river, where we disembarked and visited Fort San Lorenzo on foot. This is a most interesting ruin of the Spanish time, captured and sacked by Morgan's men in 1671.

The fishing trip was resumed up the Chagres as far as the launch could go, when we disembarked and walked to

the Gatun locks, from where we returned to France Field by automobile and from France Field to Albrook Field in a special Panair Ford through the courtesy of Mr. Balluder.

During the launch trip Mr. Branch took the opportunity to speak to Mr. Balluder, Mr. Campbell, and me about the negotiations he had been having with Pan American Airways in regard to the additional services on the East coast of South America. He stated that a final agreement had been reached in writing whereby Pan American Airways would receive payment for a second service from Miami to Pará until such time as Mr. Branch could secure additional funds with which to pay for a second trip on the East coast all the way down. This payment for the second trip was also predicated on the establishment by Pan American Airways of a one day service from Miami to the Canal Zone, and Mr. Branch made this the key note of his conversation with us, also that Panair would operate a second trip through Brazil on a cut-off, thus eliminating what Mr. Branch called "the Brazilian elbow." Mr. Branch led us to believe in his conversation that if these two promises by Panair—that is, Miami/Canal in one day and operation of the Brazilian cut-off—were not forthcoming in six months after the payment on the East coast second trip South of [fol. 4824] Pará was commenced he would consider that Pan American Airways had violated their agreement, with presumably the consequent cancelation of the mail pay on the second trip. Mr. Branch intimated that he felt that so far Pan American Airways had not shown entire good faith in connection with their operation between Miami and the Canal. As far as he could see they were not taking any steps toward the implantation of a direct service Miami to the Canal in one day. Mr. Branch stated he had told Mr. Trippe that improvement on the East coast—by which I presume he meant airmail payment for a second trip—was only justified if the West coast service to Buenos Aires was speeded up by means of a one day connection between Miami and the Canal, and that this matter was in his mind of vital importance.

You will note that this above conversation confirms what Mr. Branch told Mr. Garni and me in our postal conference

as reported in my letter to you of November 28th (JDM 2123).

MEMORANDUM OF CONVERSATION WITH
J. T. TRIPPE, SEPTEMBER 14, 1934
AT HIS OFFICE 4:00 PM

oooOooo

After discussing various general matters, I said that we had all become convinced as a result of certain recent developments and particularly various matters which had come to my attention on my trip, that a serious situation existed with regard to Panagra which we would have to find a way to remedy and, painful though it might be to do so, I felt that we should discuss the matter with the utmost frankness.

After some general exchanges we proceeded to the situation in the northern division. I pointed out that some time before I went south I had discussed with Trippe what the ultimate equipment should be in this division and since that must necessarily be somewhat delayed what temporary equipment we could secure in the meantime. He had himself suggested the Commodores at a price, as I recall it, of $20,000 each without motors and I had acquiesced in this suggestion, it being at the same time decided that we should get new estimates on the boat which had previously been worked out to our specifications. I was, therefore, very much surprised now to find that there was any question about these Commodores.

He said that at the luncheon in question I had not taken any definite commitment about the Commodores nor had
